This bibliography was prepared by the NASA Scientific and Technical Information Facility operated for the National Aeronautics and Space Administration by RMS Associates.

**A CUMULATIVE INDEX
TO
A CONTINUING BIBLIOGRAPHY ON

AERONAUTICAL ENGINEERING**

This Cumulative Index supersedes the indexes contained in supplements [SP-7037(210) through SP-7037(221)] published by NASA during 1987.

Scientific and Technical Information Division 1988
National Aeronautics and Space Administration
Washington, DC

This index is available from the National Technical Information Service (NTIS), Springfield, Virginia 22161 at the price of \$14.50 domestic; \$29.00 foreign.

INTRODUCTION

WHAT THIS CUMULATIVE INDEX IS

This publication is a cumulative index to the abstracts contained in NASA SP-7037(210) through NASA SP-7037(221) of *Aeronautical Engineering: A Continuing Bibliography*. NASA SP-7037, and its supplements have been compiled through the cooperative efforts of the American Institute of Aeronautics and Astronautics (AIAA), and the National Aeronautics and Space Administration (NASA). Entries prepared by the two contributing organizations are identified as follows:

1. NASA entries by their *STAR* accession numbers (N87-10000).
2. AIAA entries by their *IAA* accession numbers (A87-10000 series).

HOW THIS CUMULATIVE INDEX IS ORGANIZED

This Cumulative Index includes a subject, personal author, corporate source, foreign technology, contract number, report number, and accession number index.

HOW TO USE THE SUBJECT INDEX

Two types of cross-references appear in the subject index:

1. Use (U) references indicate that the subject term is not "postable," i.e., not a valid term, and that the following term or terms are used instead. For example:

AIRCRAFT PROTUBERANCES

U PROTUBERANCES

FLIGHT PERFORMANCE

U FLIGHT CHARACTERISTICS

2. Narrower Term (NT) references refer the user to more specific headings in the same subject area, under which additional material on the subject may be found. For example:

FLOW RESISTANCE

NT AERODYNAMIC DRAG

NT FRICTION DRAG

NT SUPERSONIC DRAG

In addition, a searcher may use the title or title and title extension in the index to narrow further his quest for particular items; this is because subject terms may include documents on different aspects of the same subject term. For example:

AIRLINE OPERATIONS

All-weather operations, including pilot role, instrument landing systems and guidance aids.

Airport congestion as constraint on air travel, considering runway capacity and adjusted demand.

HOW TO USE THE PERSONAL AUTHOR INDEX

All personal authors used in the abstract-section citations in the individual Supplements appear in the index. Differences in translation schemes may require multiple searching on the index for variants of an author's name. For example:

EMELIANOV, M. D.

and

YEMELYANOV, M. D.

HOW TO USE THE CORPORATE SOURCE INDEX

The corporate source index entries are abridged versions of the corporate sources used in the abstract-section citations in the individual Supplements. The corporate source supplementary (organizational component) does not appear in the index. For example:

BOEING CO., SEATTLE, WASH. MILITARY AIRCRAFT SYSTEMS DIV. (Source citation entry)
BOEING CO., SEATTLE, WASH. (Source index entry)

HOW TO USE THE FOREIGN TECHNOLOGY INDEX

The foreign technology index identifies research performed outside of the United States. Listings in this index are arranged alphabetically by country of intellectual origin. For example:

CHINA, PEOPLE'S REPUBLIC OF

HOW TO USE THE CONTRACT NUMBER INDEX

All contract numbers that are identified in the abstract-section citations in the individual Supplements appear in this index. Changes by agencies in the style in which contract numbers are presented may require multiple searching for variants. For example:

AF 33(615)-71-C-1758
F33615-71-C-1758

HOW TO USE THE REPORT/ACCESSION NUMBER INDEX

All report numbers that have been assigned by the corporate source, monitoring agency or cataloging activity appear in this index. Variations in cataloging may result in different report number series. For example:

TP-924
ONERA-TP-924

IDENTIFICATION OF DESIRED SUPPLEMENT

The abstract and descriptive cataloging for any accession number selected from the indexes may be found in the appropriate Supplement. The page-number range of each Supplement appears on the inside front cover of this index. Once the range of page numbers containing the selected accession number is located in the second column, the desired supplement number will be found in the first column. For example:

Page 257 will be found in Supplement 213

AVAILABILITY OF DOCUMENTS

Information concerning the availability of documents announced in *Aeronautical Engineering Supplements* is found in the Introduction to the most currently issued *Supplement*.

PUBLIC COLLECTIONS OF NASA DOCUMENTS

DOMESTIC: NASA and NASA-sponsored documents and a large number of aerospace publications are available to the public for reference purposes at the library maintained by the American Institute of Aeronautics and Astronautics, Technical Information Service, 555 West 57th Street, 12th Floor, New York, New York 10019.

EUROPEAN: An extensive collection of NASA and NASA-sponsored publications is maintained by the British Library Lending Division, Boston Spa, Wetherby, Yorkshire, England for public access. The British Library Lending Division also has available many of the non-NASA publications cited in *STAR*. European requesters may purchase facsimile copy or microfiche of NASA and NASA-sponsored documents, those identified by both the symbols # and * from ESA — Information Retrieval Service European Space Agency, 8-10 rue Mario-Nikis, 75738 CEDEX 15, France.

FEDERAL DEPOSITORY LIBRARY PROGRAM

In order to provide the general public with greater access to U.S. Government publications, Congress established the Federal Depository Library Program under the Government Printing Office (GPO), with 50 regional depositories responsible for permanent retention of material, inter-library loan, and reference services. At least one copy of nearly every NASA and NASA-sponsored publication, either in printed or microfiche format, is received and retained by the 50 regional depositories. A list of the regional GPO libraries, arranged alphabetically by state, appears on the inside back cover. These libraries are *not* sales outlets. A local library can contact a Regional Depository to help locate specific reports, or direct contact may be made by an individual.

STANDING ORDER SUBSCRIPTIONS

NASA SP-7037 and its supplements are available from the National Technical Information Service (NTIS) on standing order subscription as PB88-914100 at the price of \$8.50 domestic and \$17.00 foreign, and at \$14.50 domestic and \$29.00 foreign for the annual index. Standing order subscriptions do not terminate at the end of a year, as do regular subscriptions, but continue indefinitely unless specifically terminated by the subscriber.

TABLE OF CONTENTS

	<i>Page</i>
Subject Index	A-1
Personal Author Index	B-1
Corporate Source Index	C-1
Foreign Technology Index	D-1
Contract Number Index	E-1
Report Number Index	F-1
Accession Number Index	G-1

Typical Subject Index Listing

The subject heading is a key to the subject content of the document. The title is used to provide a description of the subject matter. When the title is insufficiently descriptive of document content, a title extension is added, separated from the title by three hyphens. The (NASA or AIAA) accession number and the page number are included in each entry to assist the user in locating the abstract in the abstract section. If applicable, a report number is also included as an aid in identifying the document. Under any one subject heading, the accession numbers are arranged in sequence with the AIAA accession numbers appearing first.

A

A-10 AIRCRAFT

Impact resistant hybrid composite for aircraft leading edges p 24 A87-11848

A-300 AIRCRAFT

A310-300 CFRP fin damage tolerance demonstration p 655 A87-44594
Simulation of fly-by-wire control for civil transport aircraft at the French Centre d'Essais en Vol p 600 N87-23647

A-310 AIRCRAFT

Display of navigation information on aircraft screens p 158 A87-16989
A-310 Aircraft Integrated Data SystemS (AIDS) design philosophy p 30 N87-10076
The Airborne Integrated Data System (AIDS) for the Airbus A-310 engine condition monitoring p 31 N87-10082

Lufthansa's Aircraft Integrated Data Systems (AIDS) based A-310 engine condition monitoring system: Progress achieved between the 12th and 13th AIDS Symposiums p 31 N87-10084

Comparative evaluation of redundant flight data recorded by a digital aircraft integrated data system recorder (DAR) on board an Airbus A-310 aircraft p 33 N87-10098

A310-300 CFRP fin damage tolerance demonstration [MBB-UT-015/86] p 658 N87-25317

A-320 AIRCRAFT

The evolution of air transport aircraft flight deck p 30 A87-12688
A320 - Fly-by-wire airliner p 96 A87-16394
A320 - The challenge of fly-by-wire controls p 189 A87-18449
Control evolution and the A320 p 253 A87-22920
The Airbus rudder - An example of new fabrication technologies p 623 A87-44228
V.2500 - Back on course? p 676 A87-46372

Modern Aircraft Integrated Data Systems (AIDS) technology exemplified on the A-320 p 30 N87-10078
Simulation of fly-by-wire control for civil transport aircraft at the French Centre d'Essais en Vol p 600 N87-23647

Design of a composite tail for the Airbus A-320 [MBB-UT-12-86] p 658 N87-25316

A-6 AIRCRAFT

Master of night attack --- improved aircraft instrumentation design p 365 A87-28389
Development of an airframe modification to improve the mission effectiveness of the EA-6B airplane [AIAA PAPER 87-2358] p 748 A87-49075
Wind-tunnel test results of airfoil modifications for the EA-6B [AIAA PAPER 87-2359] p 748 A87-49076
EA-6B high-lift wing modifications [AIAA PAPER 87-2360] p 748 A87-49077
High-angle-of-attack stability and control improvements for the EA-6B Prowler [AIAA PAPER 87-2361] p 767 A87-49078
Innovative aerodynamics - The sensible way of restoring growth capability to the EA-6B Prowler [AIAA PAPER 87-2362] p 748 A87-49079

A-7 AIRCRAFT

Corsair with more - A-7 plus p 824 A87-53744
Development of flight performance algorithms and a tactical computer aided mission planning system for the A-7E aircraft [AD-A175724] p 364 N87-19387
Real time programs. Design implementation of validation: A survey [AD-A182144] p 796 N87-28309

ABLATION

Radiative and convective heat transfer over ablating composite flat surface in hypersonic flow regime [AD-A182119] p 810 N87-28503

ABLATIVE MATERIALS

Testing of Fe-Cu-base ablative composites. II p 41 A87-12971

ABNORMALITIES

Real time simultaneous in-line wear and lubricant condition monitoring [AD-A183286] p 852 N87-29842

ABORT TRAJECTORIES

Optimization and guidance of abort landing trajectories in a windshear [AIAA PAPER 87-2341] p 111 A87-50460

ABORTED MISSIONS

In-flight ejection seat test using the Aircrew Gliding Escape System (AGES) parachute [AD-A172987] p 235 N87-15948
Aircraft accident report: NASA 712, Convair 990, N712NA, March Air Force Base, California, July 17, 1985, facts and analysis [NASA-TM-87356-VOL-2] p 496 N87-21879
Analysis of Convair 990 rejected-takeoff accident with emphasis on decision making, training and procedures [NASA-TM-100189] p 819 N87-29471

ABRASION RESISTANCE

Real time simultaneous in-line wear and lubricant condition monitoring [AD-A183286] p 852 N87-29842

ABRASIVES

Cutting aerospace structures with water p 531 A87-35395

ABSTRACTS

FAA helicopter/heliport research, engineering, and development bibliography, 1964-1986 [FAA/PM-86/47] p 118 N87-11798
Compendium of NASA Langley reports on hypersonic aerodynamics [NASA-TM-87760] p 291 N87-16802

ABUNDANCE

Infrared emission lines from planetary nebulae p 62 N87-10791

AC GENERATORS

The model of the variable speed constant frequency closed-loop system operating in generating state p 320 A87-24718

ACCELERATED LIFE TESTS

Operational engine usage and mission analysis [AIAA PAPER 87-2097] p 671 A87-45404
Composite main rotor blade of PZL-Sokol helicopter p 746 A87-48938
Performance of high temperature coatings on F100 turbine blades under simulated service conditions [NLR-MP-86021-U] p 370 N87-18569
Composite repair of cocured J-stiffened panels: Design and test verification p 404 N87-20181

ACCELERATION (PHYSICS)

Acceleration to a steady state for the Euler equations p 70 A87-14096
Optimization and acceleration guidance of flight trajectories in a windshear p 765 A87-47807
Acceleration display system for aircraft zero-gravity research [NASA-TM-87358] p 389 N87-18801
Controllable ejection seat catapult [AD-D012592] p 355 N87-19370
A rational approach to lifting surface theory with application to large angles of attack p 414 N87-20196

ACCELERATION TOLERANCE

Incompatibility of the M-1 maneuver with US Navy tactical aircraft oxygen systems [AD-A183731] p 856 N87-30072

ACCELEROMETERS

Accelerometer placement in active flutter suppression systems p 828 A87-52963
Theoretical and experimental investigations of sensor location for optimal aeroelastic system state estimation p 115 N87-11794
Small, self-contained aircraft fatigue data recorder [AD-A172400] p 243 N87-15207
Evaluation of the safe flight instrument corporation stall warning system for the OV-10 aircraft [AD-A177364] p 511 N87-21918

ACCEPTABILITY

Bird impact qualification test for A-10 windshield [AD-A179263] p 575 N87-23599

ACCIDENT INVESTIGATION

Aircraft accident reports: Brief format, US civil and foreign aviation, issue number 7 of 1985 accidents [PB86-916921] p 235 N87-15195
Aircraft accident reports: Brief format, US civil and foreign aviation, issue number 6 of 1985 accidents [PB86-916920] p 235 N87-15196

Shaping of airplane fuselages for minimum drag
p 553 A87-39889

A new approach to the solution of boundary value problems involving complex configurations
p 617 A87-41230

Solution of the surface Euler equations for accurate three-dimensional boundary-layer analysis of aerodynamic configurations
[AIAA PAPER 87-1154] p 559 A87-42100

Unsteady full potential aeroelastic computations for flexible configurations
[AIAA PAPER 87-1238] p 563 A87-42335

New aerodynamic design of the fenestron for improved performance
p 651 A87-43403

Investigation of helicopter twin-rotor characteristics
p 628 A87-43438

Flying wing could stealthily reappear
p 657 A87-46870

Aerodynamic analysis of a complex configuration using a full potential code
[AIAA PAPER 87-2418] p 725 A87-49088

DFVLR-F5 test wing experiment for computational aerodynamics
[AIAA PAPER 87-2485] p 727 A87-49099

Program EAGLE - Numerical grid generation as applied to advanced airframe configurations
[AIAA PAPER 87-2294] p 750 A87-49587

Application of the TranAir full-potential code to the F-16A
p 730 A87-50342

Calculation of the aerodynamic characteristics of bodies of complex shape in transition flow
p 805 A87-51664

A technique of holographic visualization to flow fields of a model with variable angles of attack
p 806 A87-52306

Influence of forebody cross-sectional shape on wing vortex-burst location
p 808 A87-52885

Solution of aerodynamic integral equations without matrix inversion
p 808 A87-52889

Supersonic second order analysis and optimization program user's manual
[NASA-CR-172342] p 15 N87-10842

Forward-swept wing configuration designed for high maneuverability by use of a transonic computational method
[NASA TP 26291] p 75 N87-11702

Assessment of damage tolerance requirements and analyses: A user's manual for crack growth and crack initiation analysis: DAMGRO
[AD-A171209] p 132 N87-12939

More recent research results of the DFVLR in the domain of aerodynamics and flight mechanics
[ETN-86-98216] p 151 N87-13412

Unsteady transonic flow computations for AGARD two-dimensional and three-dimensional aeroelastic configurations
[ONERA-NT-1985-5] p 152 N87-13418

Effects of winglet on transonic flutter characteristics of a cantilevered twin-engine-transport wing model
[NASA-TP-2627] p 201 N87-13789

AGARD Fluid Dynamics Panel Symposium on Applications of Computational Fluid Dynamics in Aeronautics: Proceedings
[NASA-TM-88356] p 231 N87-15181

High altitude, long endurance RPV design technology study
p 245 N87-16011

A comparison of single-block and multi-block grids around wing-fuselage configurations
[FFA-TN-1986-42] p 292 N87-16811

Flight investigation of the effect of tail configuration on stall, spin, and recovery characteristics of a low-wing general aviation research airplane
[NASA-TP-2644] p 300 N87-16815

Flight characteristics of the AD-1 oblique-wing research aircraft
[NASA-TP-2223] p 373 N87-18570

Applications of Computational Fluid Dynamics in Aeronautics
[AGARD-CP-412] p 414 N87-20199

Applications and developments of computational methods for the aerodynamic problems of complex configurations
p 415 N87-20209

The integration of computational fluid dynamics into the military aircraft design process
p 431 N87-20210

Application of the Navier-Stokes equations to solve aerodynamic problems
p 416 N87-20225

Transonic Navier-Stokes wing solution using a zonal approach. Part 1: Solution methodology and code validation
p 416 N87-20228

Development of a mathematical model that simulates the longitudinal, and lateral-directional response of the F/A-18 for the study of flight control reconfiguration
[AD-A176333] p 450 N87-21004

Comparison of transonic airfoil characteristics by Navier-Stokes computation and by wind tunnel test at high Reynolds number
[NAL-TR-9117] p 492 N87-21869

Numerical simulation of the hypersonic flow around lifting vehicles
[NASA-TM-89444] p 536 N87-22116

Computation of unsteady flows using the point vortex method
p 536 N87-22138

Improved combat performance using relaxed static stability and a spin prevention system (FBW Jaguar)
p 523 N87-22674

Performance and loads data from a hover test of a full-scale advanced technology XV-15 rotor
[NASA-TM-86854] p 572 N87-24409

On the nonlinear aerodynamic and stability characteristics of a generic chine-forebody slender-wing fighter configuration
[NASA-TM-89447] p 643 N87-25305

A multi-body aircraft with an all-movable center fuselage actively controlling fuselage pressure drag
[NASA-CASE-LAR-13511-1] p 658 N87-25320

National Aerospace Plane Program: Principal assumptions, findings and policy options
[RAND/P-7288-RGS] p 625 N87-25990

Computational fluid dynamics: Transition to design applications
p 700 N87-26004

Experience with 3-D composite grids
p 706 N87-26021

Effect of Reynolds number variation on aerodynamics of a hydrogen-fueled transport concept at Mach 6
[NASA-TP-2728] p 645 N87-26031

Gust response of helicopters
p 682 N87-26049

Subsonic longitudinal and lateral-directional characteristics of a forward-swept-wing fighter configuration at angles of attack up to 47 deg
[NASA-TP-2727] p 732 N87-26874

Numerical solutions of Navier-Stokes equations for a Butler wing
[NASA-CR-180331] p 790 N87-27929

Program LRCDM2: Improved aerodynamic prediction program for supersonic canard-tail missiles with axisymmetric bodies
[NASA-CR-3883] p 813 N87-28525

Propfan test assessment testbed aircraft flutter model test report
[NASA-CR-179458] p 814 N87-29413

Investigation of generic hub fairing and pylon shapes to reduce hub drag
[NASA-TM-100008] p 816 N87-29422

Parachute recovery systems design manual, chapter 5
[AD-A183191] p 816 N87-29426

Transonic rotor tip design using numerical optimization
[NASA-TM-86771] p 816 N87-29431

Trimming an aircraft model for flight simulation
[NASA-TM-89466] p 828 N87-29502

AERODYNAMIC DRAG

Drag reducing outer-layer devices in rough wall turbulent boundary layers
p 8 A87-11890

Expansion of flow due to resistance of a wire gauze placed in a parallel-sided channel
p 48 A87-12133

The prediction of the drag of aerofoils and wings at high subsonic speeds
p 9 A87-12266

Unsteady drag over cylinders and aerofoils in transonic shock tube flows
p 10 A87-12617

Induced drag of a curved wing

AIRCRAFT DESIGN

Recursive real-time identification of step-response matrices of high-performance aircraft with noisy sensors for adaptive digital flight control
[AIAA PAPER 87-2309] p 771 A87-50430

Total energy control concepts applied to flight in wind shear
[AIAA PAPER 87-2344] p 772 A87-50463

An angle-only tracking filter in modified spherical coordinates --- for fighter aircraft maneuvers
[AIAA PAPER 87-2380] p 741 A87-50465

Application of multivariable control to the STOL and Maneuver Technology Demonstrator
[AIAA PAPER 86-2403] p 751 A87-50487

Singular trajectories in airplane cruise-dash optimization
[AIAA PAPER 87-2404] p 772 A87-50488

Model-following output feedback controller for oblique-wing aircraft
[AIAA PAPER 87-2408] p 772 A87-50491

Handling qualities design of a Northrop high-performance fighter
[AIAA PAPER 87-2450] p 772 A87-50496

Model following flight control system design for ATTAS, DFVLR's new in-flight simulator
[AIAA PAPER 87-2451] p 773 A87-50497

Simulation evaluation of the advanced control concept for the NASA V/STOL research aircraft (VSRA)
[AIAA PAPER 87-2535] p 773 A87-50536

Loop separation parameter - A new metric for landing flying qualities
[AIAA PAPER 87-2536] p 774 A87-50537

Investigating aircraft handling qualities using a structural model of the human pilot
[AIAA PAPER 87-2537] p 774 A87-50538

On design of restructurable control systems for aircraft with some failures
p 835 A87-51981

Accelerometer placement in active flutter suppression systems
p 828 A87-52963

An active control landing gear for the alleviation of aircraft taxi ground loads
p 824 A87-53573

Head-up flying
p 835 A87-53583

On the feasibility of low-speed aircraft maneuvers involving extreme angles of attack
p 835 A87-54140

Simultaneous active controls on wind tunnel model
p 836 A87-54190

Aircraft positioning using Global Positioning System carrier phase data
p 821 A87-54367

Application of bifurcation and catastrophe theories to near stall flight mechanics
p 13 A87-10046

Low speed rotary aerodynamics of F-18 configuration for 0 deg to 90 deg angle of attack: Test results and analysis
[NASA-CR-3608] p 15 A87-10836

Rotary balance data and analysis for the X-29A airplane for an angle-of-attack range of 0 deg to 90 deg
[NASA-CR-3747] p 15 A87-10837

Tradeoff methods in multiobjective insensitive design of airplane control systems
p 115 A87-11730

Application of optimization techniques to the design of a flutter suppression control law for the DAST ARW-2
p 115 A87-11736

The implementation and use of Ada on distributed systems with high reliability requirements
[NASA-CR-179842] p 137 A87-12265

Flared landing approach flying qualities. Volume 1: Experiment design and analysis
[NASA-CR-178188-VOL-1] p 254 A87-15234

Dynamics of a helicopter with a sling load
p 243 A87-15957

Optimal turning at high angle of attack of supersonic and hypersonic vehicles
p 300 A87-16814

The application of quadratic optimal cooperative control synthesis to a CH-47 helicopter
[NASA-TM-88353] p 313 A87-17715

Bounded random oscillations: Model and numerical solution for an airfoil
p 294 A87-18513

High performance forward swept wing aircraft
[NASA-CASE-ARC-11636-1] p 361 A87-18561

Development of a device for controlling the leading edge vortices on a delta wing
[AD-A175207] p 350 A87-19356

Aircraft parameter estimation
[NASA-TM-88281] p 362 A87-19376

Design and evaluation of dynamic flight test maneuvers
[ETN-87-99085] p 364 A87-19389

Robustness qualification and improvement of multivariable regulators, with application to airplane control
[ESA-TT-867] p 374 A87-19401

Design and experimental verification of a calculation method for frequency response analysis of digital control systems in a continuous environment --- aircraft control
[NLR-TR-85090-U] p 374 A87-19402

A digital simulation of the failure performance of a multiplex actuator --- aircraft control
[BU-337] p 375 A87-19407

Development of simulated directional audio for cockpit applications
[AD-A175350] p 391 A87-19570

Stability regions of relaxed static stability aircraft under control saturation constraints
p 448 A87-20288

Rotary-wing aircraft terrain-following/terrain-avoidance system development
[NASA-TM-88323] p 426 A87-20982

Airplane automatic control force trimming device for asymmetric engine failures
[NASA-CASE-LAR-13280-1] p 449 A87-20999

State constraints for predictive control with air vehicle application
[AD-A176205] p 450 A87-21002

Fault tolerant electrical power system. Phase 2: Analysis and preliminary design
[AD-A177278] p 508 A87-21907

Joint University Program for Air Transportation Research, 1984
[NASA-CP-2452] p 483 A87-22604

Investigation of air transportation technology at Princeton University, 1984
p 496 A87-22619

Improved combat performance using relaxed static stability and a spin prevention system (FBW Jaguar)
p 523 A87-22674

Aircraft control position indicator
[NASA-CASE-LAR-12984-1] p 512 A87-22678

Evaluation of numerator lead effects on aircraft handling qualities
[AD-A179388] p 523 A87-22687

Effects of thrust reversing in ground proximity
p 573 A87-24416

Integration of aerodynamic, performance, stability and control requirements into the design process of modern unstable fighter aircraft configurations
p 586 A87-24446

Turbulence models
p 703 A87-25277

Military specifications
p 658 A87-25281

Unresolved issues in wind shear encounters
p 647 A87-25282

Helicopter-V/STOL dynamic wind and turbulence design methodology
p 658 A87-25284

Optimal cooperative control synthesis of active displays
[NASA-CR-4058] p 705 A87-25807

Control of aircraft under severe wind shear conditions
p 682 A87-26050

Conceptual studies of control systems for wings with variable camber
[MBB-UT-221/86] p 682 A87-26836

Investigation of air transportation technology at Princeton University, 1985
p 740 A87-27603

Optimization of aircraft trajectories through severe microbursts
p 753 A87-27604

Design and evaluation of dynamic flight test maneuvers
[VTH-LR-497] p 753 A87-27657

A multichannel model for the description of the pilot in the closed control system, for the evaluation of future aircraft guidance systems
p 822 A87-28537

Advances in Guidance and Control Systems and Technology
[AGARD-CP-411] p 822 A87-29474

Joint development of the Multi-function Integrated Inertial Sensor Assembly (MIIISA)
p 852 A87-29479

Application of parameter estimation to aircraft stability and control: The output-error approach
[NASA-RP-1168] p 827 A87-29499

Automation at the man-machine interface
p 855 A87-29504

Evaluation of the F/A-18 head-up-display for recovery from unusual attitudes
[AD-A183303] p 829 A87-29532

Design verification of SIFT
[NASA-CR-4097] p 858 A87-30099

Some development trends in light ground attack aircraft
p 509 A87-22666

Integrated design of structures
p 509 A87-22669

Frequency-response identification of XV-15 tilt-rotor aircraft dynamics
[NASA-TM-89428] p 524 A87-22690

Trends in ground-based and in-flight simulators for development applications
p 600 A87-23645

Piloted simulation in the development of the XV-15 tilt rotor research aircraft
p 600 A87-23646

Aircraft electromagnetic compatibility
[NASA-CR-181051] p 613 A87-23856

Engine in charge: A history of the Langley Aeronautical Laboratory, 1917-1958
[NASA-SP-4305] p 621 A87-24390

Numerical optimization design of transonic airfoils
p 573 A87-24424

Integrated Design of Advanced Fighters
[AGARD-LS-153] p 586 A87-24445

Integration of aerodynamic, performance, stability and control requirements into the design process of modern unstable fighter aircraft configurations
p 586 A87-24446

Design optimization for a family of multi-role combat aircraft
p 586 A87-24450

Design optimization of fighter aircraft
p 586 A87-24451

V/STOL and STOVFL fighter design
p 587 A87-24452

Advanced fighter design: Operational experience and future requirements
p 587 A87-24453

The integration and operational suitability of emerging technologies for future fighter aircraft: A pilot's perspective
p 587 A87-24454

Quiet aircraft study. Aerodynamic considerations of proposed swept shielded aircraft configurations
[BAE-AERO/PROJ/087] p 587 A87-24456

B-57B gust gradient program
p 657 A87-25276

Aircraft technologies of the nineties in MBB passenger aircraft projects
[MBB-UT-21/86] p 625 A87-25291

Flight duration, airspeed practices and altitude management of airplanes involved in the NASA VGH General Aviation Program
[NASA-TM-89074] p 625 A87-25293

A multi-body aircraft with an all-movable center fuselage actively controlling fuselage pressure drag
[NASA-CASE-LAR-13511-1] p 658 N87-25320

Development of a geometry handling program for the FFA subsonic higher order panel method
[FFA-TN-1985-48] p 699 N87-25534

National Aerospace Plane Program: Principal assumptions, findings and policy options
[RAND/P-7288-RGS] p 625 N87-25990

Computational fluid dynamics: Transition to design applications
p 700 N87-26004

CFD applications: The Lockheed perspective
p 644 N87-26005

Development and application of unified algorithms for problems in computational science
p 705 N87-26006

Application of computational physics within Northrop
p 706 N87-26008

Design applications for supercomputers
p 706 N87-26010

Experience with 3-D composite grids
p 706 N87-26021

Numerical solution of the Navier-Stokes equations about three-dimensional configurations: A survey
p 701 N87-26022

Canard configurations
[ETN-87-99914] p 659 N87-26039

Measurement of the effect of manufacturing deviations on natural laminar flow for a single engine general aviation airplane
[NASA-CR-180671] p 677 N87-26044

A comparison of the structureborne and airborne paths for propfan interior noise
[NASA-CR-180289] p 708 N87-26612

Research and development. Technical-scientific publications 1986
[ETN-87-99713] p 710 N87-26826

Aircraft technology of the nineties in MBB passenger aircraft projects
[MBB-UT-0021/86] p 660 N87-26834

Integration of the propfan concept in aircraft design
[MBB-UT-0001/86] p 677 N87-26835

Development of direct-inverse 3-D method for applied aerodynamic design and analysis
[NASA-CR-180646] p 751 N87-26895

Microcomputer software support for classes in aircraft conceptual design
[AD-A181450] p 752 N87-26902

A study of methods to predict and measure the transmission of sound through the walls of light aircraft. Numerical method for analyzing the optimal performance of active noise controllers
[NASA-CR-181186] p 798 N87-27485

Unique research challenges for high-speed civil transports
[NASA-TM-100490] p 740 N87-27651

On the conceptual design of subsonic transport aircraft for cruising flight optimized for different merit functions
[VTH-LR-451] p 753 N87-27654

Fatigue of aircraft structures
[VTH-LR-486] p 753 N87-27656

Modern composites for primary aircraft structures
[VTH-LR-480] p 784 N87-27736

Development of Integrated Programs for Aerospace-Vehicle Design (IPAD)
[NASA-CR-181274] p 796 N87-28299

Integrated Application of Active Controls (IAAC) technology to an advanced subsonic transport project: Test act system validation
[NASA-CR-172525] p 836 N87-28563

ACEE composite structures technology
[NASA-CR-172359] p 844 N87-28613

ACEE composite structures technology
[NASA-CR-172358] p 844 N87-28614

ACEE composite structures technology
[NASA-CR-172360] p 845 N87-28615

Study of utilization of advanced composites in fuselage structures of large transports
[NASA-CR-172404] p 845 N87-28619

An investigation of the flow characteristics in the blade endwall corner region
[NASA-CR-4076] p 814 N87-29412

Propfan test assessment testbed aircraft flutter model test report
[NASA-CR-179458] p 814 N87-29413

Bibliography for aircraft parameter estimation
[NASA-TM-86804] p 827 N87-29498

AIRCRAFT DETECTION

Boron slurry-fueled jet engine exhaust plume infrared signatures
p 183 A87-17839

A nonlinear tracker using attitude measurements
p 496 A87-35337

Low altitude aircraft tracking and registration system
[DGLR PAPER 86-137] p 498 A87-36780

An automated radar-signature measurement system
p 698 A87-45886

AIRCRAFT ENGINES

Evaluation of captured water column technology for advanced ultrasonic sizing techniques
p 45 A87-10728

Numerical analysis with generalized J-integral
p 47 A87-11492

Superplasticity in aeroengine titanium alloy VT-9 and its modified compositions
p 39 A87-12096

A reinforcing band near the flange of a heated cylindrical casing
p 48 A87-12445

Advances in the vibration monitoring of gears and rolling element bearings
p 49 A87-13007

Variable structure control of a turbojet engine
p 103 A87-13343

Multi-variable control of the GE T700 engine using the LQG/LTR design methodology --- Linear Quadratic Gaussian/Loop Transfer Recovery method
p 103 A87-13418

Technical/economic evaluation of new propfan concepts in comparison with the turbofan of the 1990s
p 104 A87-13989

Improving the energy efficiency of cooled high-temperature turbines
p 104 A87-13990

Further development of the axial-radial compressor
p 104 A87-13998

Polymer, metal, and ceramic matrix composites for advanced aircraft engine applications
p 121 A87-15187

Finite element contact analysis of ring gear and support
p 127 A87-15193

The effect of lubricant cavitation on the characteristics of a short hydrodynamic damper
p 127 A87-15203

Determination of the thrust and net efficiency of a propeller and flow parameters behind the propeller
p 105 A87-15204

The effect of turbine elements on the gasdynamic stability margin
p 105 A87-15208

Using vibration spectrum characteristics for the flow-path diagnostics of aircraft gas turbine engines
p 105 A87-15210

Turbines with counter-rotating rotors for aircraft power plants
p 106 A87-15211

The dynamics of gas turbine engine components in the presence of damage
p 183 A87-17599

Fighter aircraft/propulsion integration
[AIAA PAPER 86-2658] p 142 A87-17905

An overview of the small engine component technology (SECT) studies --- commuter, rotorcraft, cruise missile and auxiliary power applications in year 2000
[AIAA PAPER 86-1542] p 184 A87-17993

Holographic interferometry of rotating components
Decorrelation limitations of the double pulsed technique
p 261 A87-19807

A method for evaluating the effect of the radial clearance on the efficiency of the turbocompressor during the selection of process parameters for a turbofan engine
p 247 A87-20400

A study of heat release in the primary zone of the combustion chamber of a gas-turbine engine
p 247 A87-20401

Thermal sensors utilizing thin layer technology applied to the analysis of aeronautical thermal exchanges
[ONERA, TP NO. 1986-193] p 264 A87-21092

Evaluation of a free-jet technique for testing fighter aircraft propulsion systems
[AIAA PAPER 86-1460] p 248 A87-21507

Validation of aircraft gas turbine engine steady-state mathematical models
[AIAA PAPER 86-1741] p 248 A87-21523

ATF propulsion tests will drive operations at Arnold facility
p 314 A87-23746

FADEC for fighter engines --- Full Authority Digital Engine Control
p 303 A87-24612

Evaluation of capillary reinforced composites for anti-icing
[AIAA PAPER 87-0023] p 297 A87-24904

Reducing the cost of aero engine research and development
p 304 A87-25050

Theory and analysis of aircraft turbomachines (2nd revised and enlarged edition) --- Russian book
p 304 A87-25265

Low cycle fatigue life testing research of an aeroengine casing
p 304 A87-25411

Development of high by-pass ratio turbofan engines
p 305 A87-25422

Design and development of a power takeoff shaft
p 305 A87-25717

Analysis of aircraft piston engine failures. I
p 305 A87-25969

Analysis of aircraft piston engine failures. II
p 305 A87-25973

The application of new ceramic materials in the construction of aircraft gas-turbine engines
p 317 A87-25975

Applying lasers for productivity and quality
p 322 A87-26677

Engine oils no longer suitable for gearboxes?
p 318 A87-27332

Working principles of intake fences
p 288 A87-27476

Design of swirl simulators
p 305 A87-27477

A method for calculation of flow process in an axisymmetric straight-wall annular diffuser
p 289 A87-27479

A computer controlled vibratory fatigue test rig with programmed loading for blading
p 315 A87-27490

Fatigue crack growth testing of J85-CAN-40 compressor discs
p 367 A87-29281

Design verification system for advanced aerospace engines
p 367 A87-29454

Starting systems technology II; Proceedings of the Aerospace Technology Conference and Exposition, Long Beach, CA, Oct. 13-16, 1986
[SAE SP-678] p 367 A87-29576

Past, present and future of hydraulic APU start systems
[SAE PAPER 861711] p 368 A87-29577

Advanced pneumatic start systems for APUs
[SAE PAPER 861713] p 368 A87-29579

Development of a hot gas vane motor for aircraft starting systems
[SAE PAPER 861714] p 368 A87-29580

A systems approach to engine starting system design
[SAE PAPER 861734] p 368 A87-29581

Minimizing heat rejection in aircraft accessory drive gearboxes
[SAE PAPER 861736] p 368 A87-29582

Vibratory strain distributions in an integral-machined air turbine starter wheel
[SAE PAPER 861737] p 368 A87-29583

The prediction of the dynamic behavior of aircraft engines Critical speeds, the effects of unbalances
p 369 A87-29951

In-service monitoring and maintenance of engines at Air France
p 340 A87-30844

New commercial aircraft promise efficiency
p 340 A87-30918

Aircraft turbofan noise
p 398 A87-31144

Low aspect ratio axial flow compressors - Why and what it means
[SAE PAPER 861837] p 369 A87-31150

Rolls revs up for the new century
p 369 A87-31209

Technology for the design of high temperature rise combustors
p 370 A87-31287

Applications of VLSI in electronic turbine engine controls
p 459 A87-31534

Improved engine performance utilizing integrated inlet control
p 438 A87-31541

Parameters for the evaluation of combined engine thrust vector control systems
p 439 A87-31725

Theoretical description of the coefficients of turbulent boundary layer motion --- in aircraft engines
p 439 A87-31726

A utilization complex for a gas-turbine-engine test station
p 439 A87-31728

The effect of lower and upper overlaps on the efficiency of centrifugal radial flow air microturbines with axial admission
p 460 A87-31732

2000 is (nearly) now --- development of new fighter engines
p 439 A87-32003

Simulation of oil circuits in VSCF electrical power systems
[SAE PAPER 861623] p 462 A87-32580

Hydraulic components for high pressure hydraulic systems
[SAE PAPER 861677] p 462 A87-32597

Aspects of testing with a counter-rotating ultra bypass engine simulator
[SAE PAPER 861717] p 440 A87-32608

Analytical redundancy technology for engine reliability improvement
[SAE PAPER 861725] p 462 A87-32614

Design verification and engine test of an advanced fuel management system for aircraft gas turbine engines
[SAE PAPER 861727] p 440 A87-32616

Aerospace information report 1939 trial application
[SAE PAPER 861787] p 478 A87-32636

Overview of AIR 1939 --- Aircraft Engine Life Cycle Cost Guide
[SAE PAPER 861788] p 478 A87-32637

The development of single crystal superalloy turbine blades
p 456 A87-33265

Titanium aluminides - Future turbine materials
p 456 A87-33272

The effect of fuel quality on the emission of pollutants by aircraft gas-turbine engines
p 456 A87-34225

The relevance of short crack behaviour to the integrity of major rotating aero engine components
p 457 A87-34674

The propfan leads the way to a new generation of propulsion engines
p 441 A87-35180

Improving the air-combat capability of future fighter aircraft. II - Thrust vectoring for combat-aircraft engines p 512 A87-36800

Development of aircraft engine combustors p 512 A87-37835

Engineering evaluation of steady operating margin of a dual-rotor compressor p 513 A87-37840

Experimental investigation on cooling effectiveness of high-temperature air-cooled turbine blade p 513 A87-37845

Experimental investigation on cooling effectiveness of a turbine blade under various design conditions p 513 A87-37846

Thermodynamic and Flow Mechanical Problems in Aircraft and Spacecraft Drives. Summary of conference reports for 1974, 1975, 1976 [ETN-87-98750] p 251 N87-15223

Evaluation of improved engine compartment overheat detection techniques [AD-A173960] p 235 N87-15950

Propulsion --- aircraft [PNR90321] p 251 N87-15968

Designing with titanium --- aircraft engines [PNR90325] p 251 N87-15969

An analytical study of icing similitude for aircraft engine testing [AD-A173713] p 252 N87-15973

Reducing the cost of aero engine research and development [PNR90341] p 308 N87-16836

Component lifing --- aircraft engines [PNR90346] p 308 N87-16838

Observation of ice/water formations on a model intake section subjected to simulated cloud conditions --- aircraft engine [PNR90347] p 308 N87-16839

Future trends in propulsion --- aircraft [PNR90348] p 308 N87-16840

An approach to AE monitoring during the rig shop testing of large CFRP aero-engine components --- acoustic emission (AE) [PNR90350] p 308 N87-16841

The technology of advanced prop-fan transmissions [PNR90357] p 309 N87-16843

Aircraft derivative gas turbine development in China [PNR90359] p 309 N87-16844

Operational aids to engine development [PNR90362] p 309 N87-16845

Grinding of steel: A case study [AD-A174649] p 324 N87-17048

- A study of compressor erosion in helicopter engine with inlet separator
[AD-A173288] p 309 N87-17703
- Use of composites in propulsion systems
[PNR-90323] p 310 N87-17707
- Performance of high temperature coatings on F100 turbine blades under simulated service conditions
[NLR-MP-86021-U] p 370 N87-18569
- Theory and design of flight-vehicle engines
[NASA-TM-88583] p 442 N87-20281
- High temperature protective coatings for aero engine gas turbine components
[AD-A176001] p 442 N87-20286
- Advanced composite combustor structural concepts program
[NASA-CR-174733] p 458 N87-20387
- Aircraft and engine development testing
[AD-A176711] p 407 N87-20961
- Advanced Instrumentation for Aero Engine Components
[AGARD-CP-399] p 467 N87-21170
- Acquisition and processing of non-stationary pressure measurements in studies of air intake distortion
p 468 N87-21191
- An experimental and theoretical investigation of an air injection type anti-icing system for aircraft
p 495 N87-21877
- Propulsion system technologies for thrust vectoring
p 519 N87-22670
- Analysis of an advanced technology subsonic turbofan incorporating revolutionary materials
[NASA-TM-89868] p 519 N87-22680
- AI (Artificial Intelligence) gas turbine rotor diagnostics
[AD-A178996] p 520 N87-22683
- Fiber reinforced superalloys
[NASA-TM-89865] p 530 N87-22811
- Acta aeronautica et astronautica sinica
[AD-A179673] p 592 N87-23618
- Highly integrated digital electronic control: Digital flight control, aircraft model identification, and adaptive engine control
[NASA-TM-86793] p 592 N87-23619
- Effects of aircraft engine bleed air duct failures on surrounding aircraft structure
[AD-A181071] p 739 N87-26884
- Advanced turbine blading: A challenge for design, materials developer and manufacturer
[PNR90385] p 763 N87-26911
- Rolls Royce civil engines, the next generation
[PNR90370] p 763 N87-26912
- Application of SPATE to high frequency vibration measurement of aero engine components --- Stress Pattern Analysis by Thermal Emission (SPATE)
[PNR90373] p 764 N87-27667
- The application of radiation physics and photogrammetric techniques for the diagnosis and solution of mechanical engineering problems and performance improvements in the development of aero gas turbine engines at Rolls-Royce
[PNR90388] p 764 N87-27668
- Advanced technology and its application to aero engines
[PNR90389] p 764 N87-27670
- The Rolls-Royce wide chord fan blade
[PNR90392] p 764 N87-27671
- Policy options for the aircraft turbine engine component improvement program
[AD-A182727] p 764 N87-27672
- Development and testing of highly loaded engine components made of carbon fiber reinforced plastics
[ETN-87-90036] p 832 N87-28550
- High accuracy thrust measurement of aeronautical propulsion systems with particular consideration to a hydraulic force measuring device, part 1
[NASA-TT-20080] p 834 N87-28558
- Elevated temperature aluminum alloys
[NASA-CASE-LAR-13632-1] p 846 N87-29850
- Real time simultaneous in-line wear and lubricant condition monitoring
[AD-A183286] p 852 N87-29842
- AIRCRAFT EQUIPMENT**

Spherical mapping and analysis of aircraft angles for maneuvering flight p 770 A87-50340

Guidance on maneuvering flight paths for rotary wing aircraft [AIAA PAPER 87-2406] p 772 A87-50489

On the feasibility of low-speed aircraft maneuvers involving extreme angles of attack p 835 A87-54140

Toward comparing experiment and theory for corroborative research on hingeless rotor stability in forward flight (an experimental and analytical investigation of isolated rotor-flap-lag stability in forward flight) [NASA-CR-179711] p 25 N87-10063

USAF test pilot school. Performance phase textbook, volume 1 [AD-A170957] p 173 N87-13430

USAF test pilot school. Flying qualities textbook, volume 2, part 1 [AD-A170959] p 173 N87-13431

Flight simulator: Field of view utilized in performing tactical maneuvers [AD-A172048] p 193 N87-13453

Investigations of flight paths for maneuvers with constant energy and constant changes of energy including different strategies of steering, calculations of energy requirements for given flight paths, determination of the criteria for successful completion of turning maneuvers in the vertical plane [ETN-87-99017] p 362 N87-18565

Design and evaluation of dynamic flight test maneuvers
[ETN-87-90085] p 364 N87-19389

A simulation investigation of scout/attack helicopter directional control requirements for hover and low-speed tasks
[NASA-TM-86755] p 522 N87-21961

Improved combat performance using relaxed static stability and a spin prevention system (FBW Jaguar)
p 523 N87-22674

Digital control of highly augmented combat rotorcraft [NASA-TM-88346] p 524 N87-22691

Utilization of simulation to support F-14A low altitude high angle of attack flight testing p 600 N87-23649

Singular trajectories in airplane cruise-dash optimization
[NASA-CR-180636] p 659 N87-26035

Non-linear unsteady wing theory, part 1. Quasi two-dimensional behavior: Airfoils and slender wings
[NASA-CR-181008] p 731 N87-26862

Elementary data analysis of measurements in nonsteady longitudinal and lateral flight test maneuvers
[VTH-LR-409] p 752 N87-26905

Optimization of aircraft trajectories through severe microbursts p 753 N87-27604

Design and evaluation of dynamic flight test maneuvers
[VTH-LR-497] p 753 N87-27657

Singular trajectories in airplane cruise-dash optimization p 825 N87-28544

AIRCRAFT MODELS

Modeling of the aircraft mechanical control system
p 111 N87-14135

Application of regression analysis to coupled responses at high angles of attack p 113 N87-16185

Comparison of two techniques of I.F.D. based on a non-linear stochastic model of an aircraft — Instrument Fault Detection p 114 N87-16196

Determination of nonlinear aerodynamic coefficients using the estimation-before-modeling methods
p 114 N87-16202

Numerical simulation of a flexible aircraft taking-off and landing on uneven runway p 190 N87-18529

A mathematical model for reliability analysis of aircraft structure p 167 N87-18530

Basic research in structural dynamic system identification p 206 N87-19242

Introduction to GRASP - General rotorcraft aeromechanical stability program - A modern approach to rotorcraft modeling p 170 N87-19258

Early evaluation of the V-22 Osprey through piloted simulation p 171 N87-19268

The role of modeling and flight testing in rotorcraft parameter identification
[AD-A174776] p 172 N87-19287

Recent progress in the measurement of the drag coefficient of models of transport aircraft in a wind tunnel
[ONERA, TP NO. 1986-170] p 256 N87-21070

Comparative transport aircraft model tests in many European wind tunnels
[ONERA, TP NO. 1986-178] p 214 N87-21077

The interference of the model support mast with measurements of the longitudinal and lateral aerodynamic coefficients
[ONERA, TP NO. 1986-181] p 256 N87-21080

Modeling, design, and analysis of a discrete autopilot and the air vehicle it controls p 253 N87-23078

The role of computerized symbolic manipulation in rotorcraft dynamics analysis p 296 N87-23458

Dynamic support interference in high-alpha testing — angle of attack in oscillatory tests p 314 N87-25719

Applications of the statistical discrete element theory to vehicle response p 322 N87-25878

Development and application of a convolution technique for flying qualities research p 444 N87-32234

A discrete model of a deformable aeroplane with moving control surfaces for natural vibrations analysis
p 428 N87-32934

On the application of axiomatic aerodynamic modelling to aircraft dynamics p 445 N87-33326

Structural analysis of the controlled impact demonstration of a jet transport airplane
p 430 N87-34512

A model for helicopter performance calculations
p 431 N87-35014

On the application of axiomatic aerodynamic modelling to aircraft dynamics. IV - Two dimensional dynamic stall
p 521 N87-36842

On the natural vibration of the aircraft structural model
p 532 N87-36898

Measurement of model deformations in wind tunnels
p 525 N87-36843

Validation of aerodynamic models for predicting the aeroelastic behavior of aircraft with exterior stores
[AAAF PAPER NT 86-21] p 489 N87-38044

A dynamic model of an aeroplane with wings of high aspect ratio for flutter analysis by the method of finite elements p 595 N87-39773

A dynamic model for studying vibrations of a helicopter tail boom p 583 N87-39775

Rotor design for maneuver performance
p 652 N87-43431

Helicopter modelling for performance calculation
p 652 N87-43434

Helicopter model in flight identification by a real time self adaptive digital process p 680 N87-43458

Experimental study of the vortex flow behavior on a generic fighter wing at subsonic and transonic speeds
[AIAA PAPER 87-1262] p 631 N87-44920

Investigation of a delta-wing fighter model flow field at transonic speeds
[AIAA PAPER 87-1749] p 634 N87-45182

Scale model test results of a thrust reverser concept for advanced multi-functional exhaust systems
[AIAA PAPER 87-1833] p 667 N87-45235

Wind tunnel tests on a one-foot diameter SR-7L propfan model
[AIAA PAPER 87-1892] p 635 N87-45281

F-15 SMTD hot gas ingestion wind tunnel test results — STOL and Maneuver Technology Demonstrator
[AIAA PAPER 87-1922] p 669 N87-45301

Exploratory evaluation of a moving-model technique for measurement of dynamic ground effects
[AIAA PAPER 87-1924] p 685 N87-45303

A retrofit crash protection installation in two models of general aviation airplanes
[SAE PAPER 871008] p 737 N87-48695

Development of a real-time blade element aeroelastic rotor
[AIAA PAPER 87-2500] p 749 N87-49171

Validation of aerodynamic parameters at high angles of attack for RAE high incidence research models
[AIAA PAPER 87-2558] p 729 N87-49608

Use of the updated NASA Langley radio-controlled drop-model technique for high-alpha studies of the X-29A configuration
[AIAA PAPER 87-2559] p 768 N87-49609

Partitioning of flight data for aerodynamic modeling of aircraft at high angles of attack
[AIAA PAPER 87-2621] p 750 N87-49621

Analysis of lateral stability of X-29 drop model using system identification methodology
[AIAA PAPER 87-2625] p 769 N87-49624

Simulation and characteristic value determination in helicopters p 824 N87-53564

A study of some approximations in the modeling of a coupled rotor/fuselage aeromechanical system
p 825 N87-53901

Icing and de-icing on a downscale model in ONERA S1 MA wind tunnel p 818 N87-54191

Laboratory tests of the sensors of the Steinheil-Lear Siegler Strapdown Measurement Unit model 1903-SB for model attitude measurements in a wind tunnel
[DFVLR-MITT-86-15] p 202 N87-14682

Practical Application of Finite Element Analysis to Aircraft Structural Design
[AGARD-LS-147] p 268 N87-16376

The influence of a 90 deg sting support on the aerodynamic coefficients of the investigated aircraft model
[F+W-FO-1839] p 294 N87-17684

Experiments in an adaptable-wall wind tunnel for V/STOL testing
[AD-A174900] p 377 N87-19412

Model of aircraft for testing in a wind tunnel
[AD-A176095] p 378 N87-19413

Flight simulator with transputers p 378 N87-19415

Investigation of flow under the fuselage of a powered light aircraft model
[BU-351] p 418 N87-20247

Highly integrated digital electronic control: Digital flight control, aircraft model identification, and adaptive engine control
[NASA-TM-86793] p 592 N87-23619

Magnetostatic surface field measurement facility
[AD-A178258] p 612 N87-23850

Laboratory tests of the sensors of the Steinheil-Lear Siegler strapdown measurement unit model 1903-SB for model attitude measurements in a wind tunnel. Volume 2 of the documentation on the Model Attitude Measurement System (MAMS) for the German/Dutch Wind Tunnel (DNW)
[ESA-TT-1017-VOL-2] p 590 N87-24462

Recent progress in the measurement of the drag coefficients of models of transport aircraft in a wind tunnel
[NASA-TT-20096] p 644 N87-25306

The interference of the model support mast with measurements of the longitudinal and lateral aerodynamic coefficients
[NASA-TT-20079] p 644 N87-25307

The use of NASTRAN in the design of wind tunnel research aircraft p 789 N87-27242

Low speed wind tunnel test of a propulsive wing/canard concept in the STOL configuration. Volume 1: Test description and discussion of results
[NASA-CR-178348] p 735 N87-27641

Low speed wind tunnel test of a propulsive wing/canard concept in the STOL configuration. Volume 2: Test data
[NASA-CR-178349] p 735 N87-27642

An improved design technique for model following control systems in in-flight simulation
[DFVLR-FB-87-09] p 836 N87-28561

Trimming an aircraft model for flight simulation
[NASA-TM-89466] p 828 N87-29502

AIRCRAFT NOISE

Reaction to aircraft noise in residential areas around Australian airports p 54 N87-10116

Comparison of the effectiveness of measures of aircraft noise exposure by using social survey data
p 54 N87-10117

Methods of in-flight aerophysical studies — Russian book p 23 N87-11343

Recent advances in aeroacoustics p 58 N87-11766

Helicopter impulsive noise - Theoretical and experimental status p 58 N87-11771

Resonant and non-resonant acoustic properties of elastic panels. I - The radiation problem
p 49 N87-13026

Influence of airfoil mean loading on convected gust interaction noise p 137 N87-13587

Comparison of two propeller source models for aircraft interior noise studies p 88 N87-13596

Noise and performance of a counter-rotation propeller p 105 N87-14366

Analytical model for investigation of interior noise characteristics in aircraft with multiple propellers including synchrophasing p 94 N87-14925

Experimental study of turboshaft engine core noise
[ONERA, TP NO. 1987-19] p 183 N87-17813

Noise reduction abatement and mitigation - A history of noise control programs and review of the regulatory process
[AIAA PAPER 86-2745] p 210 N87-17960

Application of the cepstrum to remove echoes from rotor acoustic spectra p 208 N87-19243

The role of wind tunnel models in helicopter noise research p 208 N87-19244

Progress in tail rotor noise analysis p 208 N87-19245

High speed flight effects on noise propagation
[AIAA PAPER 87-0013] p 271 N87-22359

The application of sub-boundary layer vortex generators to reduce canopy 'Mach rumble' interior noise on the Gulfstream III
[AIAA PAPER 87-0084] p 239 N87-22405

A prediction of helicopter rotor discrete frequency noise for three scale models using a new acoustics program
[AIAA PAPER 87-0252] p 272 N87-22512

Comparison of production propeller noise with windtunnel and flyover data
[AIAA PAPER 87-0527] p 272 N87-22687

Test procedures for detection of in-flight propeller-induced structure-borne noise
[AIAA PAPER 87-0528] p 272 N87-22688

Benefits of blade sweep for advanced turboprops p 303 N87-24007

Propeller aircraft noise legislation - A comprehensive review p 336 N87-25926

A prediction model for airport ground noise propagation p 334 N87-27104

Realization of an airport noise monitoring system for determining the traffic flow in the surroundings of a military airbase p 329 N87-27108

Airport noise pollution and adverse health effects
p 330 N87-27111

A citizen acoustician's observations of aircraft noise
p 330 N87-27112

How to limit the residential area affected by aircraft noise around an airport p 330 N87-27113

An international study of the influence of residual noise on community disturbance due to aircraft noise
p 330 N87-27114

The need for a representative international noise standard — for airports p 330 N87-27115

Ldn dictates local options - Why? — sociological effect of artificially-modeled noise standards
p 331 N87-27117

Aircraft noise descriptor and its application
p 334 N87-27118

A mobile aircraft flyover noise data acquisition and analysis system for the calculation of reference noise metrics p 334 N87-27119

Prediction of light aircraft interior sound pressure level from the measured sound power flowing in to the cabin p 299 A87-27120

Propeller pseudonoise p 306 A87-27536

A directional array approach for the measurement of rotor noise source distributions with controlled spatial resolution p 344 A87-29659

Experiments on reduction of propeller induced interior noise by active control of cylinder vibration p 361 A87-30933

Structureborne noise control in advanced turboprop aircraft p 397 A87-31110

AIRFOIL OSCILLATIONS

A general family of generalized variational principles for 2-D unsteady fully potential transonic flow with shocks around oscillating airfoils p 342 A87-28334
Experimental study of the aerodynamics of incipient torsional stall flutter p 347 A87-31285
Unsteady transonic aerodynamics of oscillating airfoils in supersonic freestream [AIAA PAPER 87-0852] p 412 A87-33692
A technique for the prediction of airfoil flutter characteristics in separated flow [AIAA PAPER 87-0910] p 464 A87-33719
A method for computing flow fields around moving bodies p 484 A87-35552
Calculation of transonic steady and oscillatory pressures on a low aspect ratio model p 556 A87-41632
Airfoil dynamic stall at constant pitch rate and high Reynolds number p 565 A87-42391
[AIAA PAPER 87-1329] p 565 A87-42391
Unsteady transonic flow with shocks around oscillating airfoils and cascades - A variational theory [AIAA PAPER 87-1426] p 568 A87-42449
Forced unsteady vortex flows driven by pitching airfoils [AIAA PAPER 87-1331] p 631 A87-44931
Wake measurements of an oscillating airfoil p 637 A87-45779
Bounded random oscillations - Model and numerical resolution for an airfoil [ONERA, TP NO. 1987-73] p 681 A87-46767
Active control of aerofoil flutter p 681 A87-46792
Analytic prediction of slender wing rock [AIAA PAPER 87-2496] p 728 A87-49605
Near wake of an unsteady symmetric airfoil p 803 A87-51221
The unsteady flow Euler amplitude equation in vibrating cascades and its numerical method p 830 A87-51810
Unsteady transonic flows past airfoils using the Euler equations p 808 A87-52890
Vortex influence on oscillating airfoils at high angle of attack p 809 A87-53777

AIRFOIL PROFILES

Shock boundary layer interactions in laminar transonic flow over airfoils using a hybrid method p 66 A87-13503
An exterior Poisson solver using fast direct methods and boundary integral equations with applications to nonlinear potential flow p 125 A87-13872
Impact of airfoil profile on the supersonic aerodynamics of delta wings p 71 A87-14363
Method for designing closed airfoils for arbitrary supercritical speed distributions [AIAA PAPER 85-5023] p 146 A87-17815
Integrated design and analysis of advanced airfoil shapes for gas turbine engines [AIAA PAPER 86-2731] p 198 A87-17949
Iterative computation of transonic potential flow past aerofoils with boundary layer p 148 A87-18579
Mach number effects on vortex shedding of a square cylinder and thick symmetrical airfoil arranged in tandem p 216 A87-22035
Detection and measurement of ice accretion on a profile by an ultrasonic method [AIAA PAPER 87-0179] p 234 A87-22485
Viscous transonic flow over aerofoils using transonic full potential equation in a system of Cartesian coordinates [AIAA PAPER 87-0411] p 223 A87-22616
Viscous transonic airfoil flow simulation by an efficient viscous-inviscid interaction method [AIAA PAPER 87-0412] p 223 A87-22617
Navier-Stokes computations of transonic flows using the LU-ADI method --- Lower/Upper block diagonal - Alternating Direction Implicit method [AIAA PAPER 87-0421] p 224 A87-22620
An Euler correction method for two- and three-dimensional transonic flows [AIAA PAPER 87-0522] p 226 A87-22684
Unsteady wake measurements of an oscillating flap at transonic speeds p 278 A87-23652

Numerical simulation by TVD schemes of complex shock reflections from airfoils at high angle of attack --- Total Variation Diminishing [AIAA PAPER 87-0350] p 282 A87-24953
A numerical study of viscous transonic flows using RRK scheme --- Rational Runge-Kutta [AIAA PAPER 87-0426] p 283 A87-24963
An introduction of hybrid difference scheme suitable for computation of transonic flows p 343 A87-28335
Numerical calculations for the two-dimensional transonic flows over lifting airfoils in orthogonal stream-line coordinates p 343 A87-28342
Transonic airfoil design procedure utilizing a Navier-Stokes analysis code p 346 A87-31151
Self-adaptive-grid method with application to airfoil flow p 347 A87-31177
Aspects of the calculation of potential flow past a slat in a system of airfoil profiles p 484 A87-35916
Experimental validation of the criterion of stall-related flutter [AAAF PAPER NT 86-18] p 521 A87-38041
Unified model for the calculation of blade profile losses of axial compressors p 489 A87-39079
First-order viscous flow predictions with symmetric and aft-loaded airfoils p 551 A87-39429
Thick supercritical airfoils with low drag and natural laminar flow p 556 A87-41634
Separation control over an airfoil at high angles of attack by sound emanating from the surface [AIAA PAPER 87-1261] p 564 A87-42351
Computation of flow around an NACA0012 airfoil at high angle of attack [AIAA PAPER 87-1425] p 568 A87-42448
Viscous Transonic Airfoil Workshop compendium of results [AIAA PAPER 87-1460] p 568 A87-42471
Unsteady separation characteristics of airfoils operating under dynamic stall conditions p 628 A87-43421
The effect of trip wire roughness on the performance of the Wortmann FX 63-137 airfoil at low Reynolds numbers p 629 A87-44019
A new simulation of airfoil dynamic stall due to velocity and incidence fluctuations [AIAA PAPER 87-1242] p 630 A87-44915
On vectorization of a 2D Navier-Stokes Solver p 718 A87-47859
The design of an advanced civil fan rotor [ASME PAPER 87-GT-218] p 759 A87-48720
Evaluation of icing drag coefficient correlations applied to iced propeller performance prediction [SAE PAPER 87-1033] p 737 A87-48761
The effect of pitch rate on the dynamic stall of a NACA 23012 airfoil p 721 A87-48931
Implementation of Kutta condition for a finite element formulation of Euler equations --- in aerodynamics p 728 A87-49297
Profiling of a lifting convex wing by a hodograph method p 805 A87-51672
Manipulated turbulence structure in flight p 806 A87-52056
Applications of the titanium tetrachloride method for flow visualization in aerodynamic testing p 806 A87-52324
Development of a turbomachinery design optimization procedure using a multiple-parameter nonlinear perturbation method [NASA-CR-3831] p 2 N87-10003
Vortex shedding of a square cylinder in front of a slender airfoil at high Reynolds numbers. Part 1: Spacing effect [MPIS-23/1985] p 13 N87-10048
Vortex shedding of a square cylinder in front of a slender airfoil at high Reynolds numbers. Part 2: Compressibility effect [MPIS-24/1985] p 75 N87-11704
Study of double exposure holography of the 3-dimensional character of the flow around an airfoil profile in a wind tunnel [NASA-TM-88486] p 202 N87-14673
Noise development in transonic flows at the impact of vortices on a profile leading edge [MPIS-5/1986] p 209 N87-14960
Lift-interference and blockage corrections for a two-dimensional aerofoil during a sudden change of incidence [BU-334] p 350 N87-19364
The aerodynamic effects of a serrated strip near the leading edge of an airfoil [ETN-87-99480] p 418 N87-20248
Flutter analysis of a two-dimensional airfoil with cubic non-linear restoring force [NAE-AN-36] p 493 N87-22628
Low-speed wind-tunnel results for symmetrical NASA LS(1)-0013 airfoil [NASA-TM-4003] p 645 N87-26033
Optimization methods applied to the aerodynamic design of helicopter rotor blades [NASA-TM-89155] p 660 N87-26042

Analysis and design of airfoils and axisymmetric bodies in transonic nonuniform flow p 811 N87-28509
Acoustic effects on profile drag of a laminar flow airfoil [NASA-TM-100505] p 860 N87-30155

AIRFOILS

Vortex simulation of propagating stall in a linear cascade of airfoils p 5 A87-11117
Numerical solution of the Euler equations using rational Runge-Kutta method p 7 A87-11538
A split-matrix method for the integration of the quasi-conservative Euler-equations p 7 A87-11544
Theoretical treatment of gust simulation in the wind tunnel p 9 A87-12148
The prediction of the drag of aerofoils and wings at high subsonic speeds p 9 A87-12266
An exact integral (field panel) method for the calculation of two-dimensional transonic potential flow around complex configurations p 9 A87-12267
Sources and observers in motion. IV - Acoustic measurements on aerofoils moving in a circle at high speed p 59 A87-12996
Influence of airfoil mean loading on convected gust interaction noise p 137 A87-13587
Comparison of numerical solutions of lower order and higher order integral equation methods for two-dimensional aerofoils [AIAA PAPER 86-2591] p 69 A87-14028
Acceleration to a steady state for the Euler equations p 70 A87-14096
Unsteady loading on airfoil due to vortices released intermittently from its surface p 146 A87-17811
A generalised model for airfoil unsteady aerodynamic behaviour and dynamic stall using the indicial method p 149 A87-19224
Prediction of buffeting and calculation of unsteady boundary layer separation over airfoils [ONERA, TP NO. 1986-95] p 213 A87-21021
An ultrasonic sensor for the detection and measurement of the thickness of ice on an airfoil [ONERA, TP NO. 1986-175] p 246 A87-21074
Numerical analysis of a NACA0012 airfoil with leading edge ice accretions [AIAA PAPER 87-0101] p 218 A87-22415
Computational methods for unsteady transonic flows [AIAA PAPER 87-0107] p 218 A87-22418
Vortical patterns in the wake of an oscillating airfoil [AIAA PAPER 87-0111] p 265 A87-22421
Experimental investigation of shock induced buffeting trough holographic interferometry [AIAA PAPER 87-0123] p 219 A87-22429
In-flight measurement of ice growth on an airfoil using an array of ultrasonic transducers [AIAA PAPER 87-0178] p 234 A87-22464
A computational analysis of flow separation over five different airfoil geometries at high angles-of-attack [AIAA PAPER 87-0188] p 220 A87-22472
Effects of a downstream disturbance on the structure of a turbulent plane mixing layer [AIAA PAPER 87-0197] p 265 A87-22476
An experimental investigation of the perpendicular vortex-airfoil interaction at transonic speeds [AIAA PAPER 87-0208] p 221 A87-22486
Rotating arms applied to studies of single angular drop impacts [AIAA PAPER 87-0257] p 257 A87-22516
Comparative low Reynolds number tests of NACA 64-210, NACA 0012, and Wortmann FX67-K170 airfoils in heavy rain [AIAA PAPER 87-0259] p 222 A87-22518
Wind tunnel test results of heavy rain effects on airfoil performance [AIAA PAPER 87-0260] p 222 A87-22519
Effect of aspect ratio on sidewall boundary-layer influence in two-dimensional airfoil testing [AIAA PAPER 87-0295] p 222 A87-22542
An efficient Euler solver, with many applications [AIAA PAPER 87-0352] p 223 A87-22576
Transonic viscous flow predictions with the Lockheed Navier-Stokes code [AIAA PAPER 87-0410] p 223 A87-22615
Application of an upwind Navier-Stokes code to two-dimensional transonic airfoil flow [AIAA PAPER 87-0413] p 224 A87-22618
A comparison of turbulence closure models for transonic flows about airfoils [AIAA PAPER 87-0418] p 224 A87-22619
Computational results for viscous transonic flows around airfoils [AIAA PAPER 87-0422] p 224 A87-22621
ISES - A two-dimensional viscous aerodynamic design and analysis code [AIAA PAPER 87-0424] p 224 A87-22622
Further comparisons of interactive boundary-layer and thin-layer Navier-Stokes procedures [AIAA PAPER 87-0430] p 225 A87-22625

- A global marching technique for the prediction of separated flows over arbitrary airfoils
[AIAA PAPER 87-0591] p 227 A87-22725

p 820 A87-51322

The impact of flight data on an airline: A case study
p 32 N87-10088

Airline data acquisition in an ACARS environment
p 32 N87-10092

Aviation statistics, 1984
[ISBN-90-357-0386-3] p 18 N87-10851

Engine performance monitoring for airlines
[PNR-90305] p 35 N87-10868

Systems, avionics and instrumentation of transport category helicopters
[NLR-MP-85066-U] p 102 N87-11785

Extended Range Twin Operations (ETOPS) --- twin engined aircraft
[CAP-513] p 422 N87-20976

SUBJECT INDEX

- Aviation safety: Procedures for registering and certifying air carriers
[PB87-193249] p 819 N87-29468
- AIRPORT BEACONS**
Colour dependence and surplus information in airport visual aids during VFR operations p 649 A87-44040
- AIRPORT LIGHTS**
Colour dependence and surplus information in airport visual aids during VFR operations p 649 A87-44040
- AIRPORT PLANNING**
The airport passenger terminal --- Book p 255 A87-20352
First results of parallel-runway separation studies in the USSR p 777 A87-47881
Washington metropolitan wind study, 1981-1986 [PB87-151908] p 544 N87-22375
The problems of the calculation of the capacity of flight operation surfaces of airports [ILR-MITT-170] p 838 N87-28566
- AIRPORT SECURITY**
A review of modern X-ray screening devices p 314 A87-25846
- AIRPORTS**
Reaction to aircraft noise in residential areas around Australian airports p 54 A87-10116
Comparative evaluation of weather conditions at Moscow-area airports during which flights are cancelled p 328 A87-24362
Determination of visibility at airports p 328 A87-24366
Structure of the time variability of the meteorological visibility range at Tolmachevo Airport p 329 A87-25258
Characteristics of the vertical wind and temperature profile in the boundary layer in the case of strong ground winds near Ural and Siberian airports p 329 A87-25261
Space-time characteristics of vertical wind shears above certain airports of the Ural-Siberian region p 329 A87-25262
Regression method for predicting wind velocity and direction at circuit altitude at Eniseisk Airport p 329 A87-25263
A new range of initial intervention vehicles foreseen --- for airport firefighting p 314 A87-25847
Airport lighting p 315 A87-26001
New developments in airfield lighting p 315 A87-26002
A prediction model for airport ground noise propagation p 334 A87-27104
Prediction of aircraft noise around airports by a simulation procedure p 334 A87-27109
Effects of weather conditions on airport noise prediction p 334 A87-27110
Airport noise pollution and adverse health effects p 330 A87-27111
How to limit the residential area affected by aircraft noise around an airport p 330 A87-27113
The need for a representative international noise standard --- for airports p 330 A87-27115
Jackson Hole Airport - A case study of dual noise metrics in the airport noise control plan p 330 A87-27116
Ldn dictates local options - Why? --- sociological effect of artificially-modeled noise standards p 331 A87-27117
Robotic technology for ground support equipment yields high performance and reliability [SAE PAPER 861658] p 452 A87-32592
Aircraft without airports - The tilt-rotor concept and VTOL aviation (Seventy-Fifth Wilbur and Orville Wright Lecture) p 403 A87-35073
Development of a microcomputer-supported airport weather information system p 616 A87-40305
Possible solutions to future airspace and airport congestion - An aircraft manufacturer's contribution p 551 A87-40386
Classification of the load-carrying capacity of runway surfaces by the ACN-PCN method, II p 686 A87-46354
The microbursts of 22 June 1982 in JAWS p 792 A87-49368
Pilot evaluation of population-minimal ground tracks in the airport community p 838 A87-52879
Surface measurements of gust fronts and microbursts during the JAWS (Joint Airport Weather Studies) Project: Statistical results and implications for wind shear detection, prediction and modeling [PB86-200847] p 55 N87-10665
Potential impacts of advanced technologies on the ATC capacity of high-density terminal areas [NASA-CR-4024] p 22 N87-10854
Runway incursions at controlled airports in the United States [PB86-917003] p 84 N87-11711

- Advanced construction procedures: Confined bases for airport pavements [FAA/PM-86/9] p 118 N87-11799
Number and duration of Runway Visual Range (RVR) runs for RVR-values lower than 225 m [KNMI-TR-85(FM)] p 119 N87-11805
A review of microbursts and their analysis and detection with Doppler radar [AD-A170458] p 133 N87-13110
TSAR (Theater Simulation of Airbase Resources) database dictionary F-4E [AD-A169575] p 139 N87-13352
Performance prediction of low volume airfield pavements [AD-A172270] p 193 N87-13454
United Kingdom aircraft noise index study: Main report [DR-8402] p 203 N87-14780
Noise disturbance at night near Heathrow and Gatwick airports: 1984 check study --- London airports [DR-8513] p 203 N87-14781
CEC joint study of community response to aircraft noise 1984: Main report. The influence of residual noise on disturbance from aircraft noise --- Commission of the European Communities (CEC) [DR-8601] p 203 N87-14782
A study to monitor microseismic activity to detect sinkholes [DOT/FAA/PM-86/34] p 204 N87-14792
A proposed single criterion for IFR (Instrument Flight Rules) approaches to converging runways [AD-A171844] p 237 N87-15953
Airport pavement load analysis [DOT/FAA/PM-86/36] p 258 N87-15981
Noise levels from urban helicopter operations, New Orleans, Louisiana [AD-A174129] p 273 N87-16590
Frost action predictive techniques for roads and airfields: A comprehensive survey of research findings [DOT/FAA/PM-85/23] p 316 N87-16853
Probabilistic and reliability analysis of the California Bearing Ratio (CBR) design method for flexible airfield pavements [AD-A173231] p 316 N87-17719
Cumulative airport noise exposure metrics: An assessment of evidence for time-of-day weightings [AD-A174848] p 393 N87-19815
Performance of recycled asphalt concrete airport pavement surfaces [DOT/FAA/PM-86-12] p 466 N87-20432
Resilient modulus of freeze-thaw affected granular soils for pavement design and evaluation. Part 3: Laboratory tests on soils from Albany County Airport [DOT/FAA/PM-84-16.3] p 466 N87-20433
Runway Visual Range (RVR) documentation of the civil airports in the Netherlands [KNMI-TR-84] p 426 N87-20986
Criteria for asphalt-rubber concrete in civil airport pavements. Vol. 2: Evaluation of asphalt-rubber concrete [DOE/FAA/PM-86/39-VOL-2] p 526 N87-22394
NOISEMAP 5.1 computer program update. Operator's manual, addendum 2 [AD-A177245] p 540 N87-22394
Low altitude wind shear detection with Doppler radar [DOT/FAA/PM-87/6] p 544 N87-23279
Otis ANGB (Air National Guard Base) visibility sensor field test study [AD-A179176] p 615 N87-24045
Modeling of radio navigation systems in the neighborhood of airports p 821 N87-28533
Pressuremeter moduli for airport pavement design and evaluation [DOT/FAA/PM-87/10] p 839 N87-28572
Soil stabilization for roadways and airfields [AD-A183382] p 839 N87-29545
Calculation of noise around airports for powered gliders [VTH-LR-475] p 860 N87-30150
- AIRSHIPS**
Dirigibles - For what? p 23 A87-11661
Maximum size of a nonrigid airship [AIAA PAPER 86-2736] p 165 A87-17954
An evaluation of the efficiency of design solutions during the design of airships p 237 A87-20378
Applications of similitude in airship design p 430 A87-34516
Sparing to optimize naval airship availability p 625 A87-46716
AIAA Lighter-Than-Air Technology Conference, 7th, Monterey, CA, Aug. 17-19, 1987, Technical Papers p 711 A87-48638
A program for development of an airship transport system [AIAA PAPER 87-2303] p 736 A87-48639
Investigation of hybrid airship RPV for entomological research [AIAA PAPER 87-2304] p 744 A87-48640

ALGORITHMS

- Large crane airships - Design and dynamics [AIAA PAPER 87-2378] p 744 A87-48643
Emergency descent simulation of an aerostat after breakaway [AIAA PAPER 87-2440] p 736 A87-48644
Design or radial-wire airship bulkheads [AIAA PAPER 87-2441] p 744 A87-48645
A heat transfer model for a hot helium airship [AIAA PAPER 87-2443] p 787 A87-48646
The effect of periodic ballonet jet exhaust on the stability of a tethered aerostat [AIAA PAPER 87-2504] p 765 A87-48647
Nonlinear dynamic simulation of a moored aerostat [AIAA PAPER 87-2505] p 736 A87-48648
A comparison of a nonlinear flight dynamic simulation of an airship with flight test results [AIAA PAPER 87-25007] p 765 A87-48649
Pre- and post-flight-test models versus measured skyship-500 control responses [AIAA PAPER 87-2508] p 765 A87-48650
Possible military applications of stratospheric airship discussed p 101 N87-12716
- AIRSPACE**
The future of the National Airspace System [AIAA PAPER 86-2743] p 210 A87-17959
Eurocontrol - Liability and jurisdiction p 273 A87-23270
Legitimate responses to aerial intruders - The view from a neutral state p 399 A87-29489
Possible solutions to future airspace and airport congestion - An aircraft manufacturer's contribution p 551 A87-40386
A proposed single criterion for IFR (Instrument Flight Rules) approaches to converging runways [AD-A171844] p 237 N87-15953
Advanced ATC: An aircraft perspective p 501 N87-21893
Heliport visual approach surface testing test plan [AD-A179897] p 650 N87-25312
Heliport critical area flight test results [AD-A183153] p 823 N87-29487
- AIRSPEED**
Real-time wind estimation and tracking with transponder downlinked airspeed and heading data p 648 A87-42779
A new method of analytical evaluation of helicopter true airspeed p 661 A87-43439
Wind determination from aircraft-movement data p 702 A87-45892
Simplified forms of performance equations. Addendum A: Effect on aeroplane level speed of small changes in thrust, drag, weight, power [ESDU-86004-ADD-A] p 100 N87-12556
Digital program for calculating static pressure position error [NASA-TM-86726] p 301 N87-16821
Integration of altitude and airspeed information into a primary flight display via moving-tape formats [NASA-TM-89064] p 438 N87-20265
Airspeed sensing pressure valve system [AD-D012569] p 438 N87-20266
Design and verification by numerical simulation of a Mach/CAS control law for the NASA TCV B737 aircraft [NASA-CR-178029] p 449 N87-20290
Noise measurements on the helicopter BK 117 design. Weighted noise levels and influence of airspeed [ESA-TT-748] p 477 N87-20800
Flight duration, airspeed practices and altitude management of airplanes involved in the NASA VGH General Aviation Program [NASA-TM-89074] p 625 N87-25293
Integration of altitude and airspeed information into a primary flight display via moving-tape formats: Evaluation during random tracking task [NASA-TM-4010] p 758 N87-27665
Experimental and analytical studies in fluids [NASA-CR-181242] p 791 N87-27943
Singular trajectories in airplane cruise-dash optimization p 825 N87-28544
- ALGORITHMS**
A real-time simulation evaluation of an advanced detection, isolation and accommodation algorithm for sensor failures in turbine engines p 103 A87-13318
Computational enhancements to a 4D algorithm --- for aircraft trajectory optimization p 134 A87-13359
Investigation of an automatic trim algorithm for restructurable aircraft control p 186 A87-16767
Novel accuracy and resolution algorithms for the third generation MTD p 160 A87-19408
A zonal grid generation method for complex configurations [AIAA PAPER 87-0276] p 270 A87-22528
Inverse aerodynamic design method for aircraft components p 342 A87-28067
Fast methods applied to the calculation of transonic airfoils p 641 A87-46962

ALIGNMENT

- Development efficient algorithms for the solutions of full potential and Euler equations on vector computers p 718 A87-47853
- Vector algorithm for large-memory Cyber 205 simulations of Euler flows p 718 A87-47856
- A hybrid algorithm for transonic airfoil and wing design [AIAA PAPER 87-2552] p 727 A87-49104

Characteristics of the vertical wind and temperature profile in the boundary layer in the case of strong ground winds near Ural and Siberian airports p 329 A87-25261
Aviation and satellite climatology p 469 A87-34445
Determination of wind velocity and direction in the lower part of the atmospheric boundary layer on the basis of ground data p 854 A87-53969
Airborne measurement methods applied to the determination of boundary conditions at the sea surface: The TOSCAN experiment p 55 N87-11242

ATMOSPHERIC CIRCULATION

An airborne laser air motion sensing system. I - Concept and preliminary experiment p 662 A87-45732
An airborne laser air motion sensing system. II - Design criteria and measurement possibilities p 662 A87-45733
Turbulence forecasting p 543 N87-22351

ATMOSPHERIC COMPOSITION

Large-scale distribution of peroxyacetylnitrate results from the STRATOZ III flights p 702 A87-46481

ATMOSPHERIC EFFECTS

Disturbances brought by atmospheric statics to airborne navigation and communication systems p 20 A87-12678
Combined guidance - Flight control of atmospheric vehicles p 110 A87-13654
The potential influence of rain on airfoil performance p 346 A87-31128
Optical effects of aircraft boundary layer turbulence p 436 A87-32157

ATMOSPHERIC ELECTRICITY

Disturbances brought by atmospheric statics to airborne navigation and communication systems p 20 A87-12678
Atmospheric Electricity Hazards Protection (AEHP) demonstration p 82 A87-15021
Effect of E-field mill location on accuracy of electric field measurements with instrumented airplane p 95 A87-15027

Implementation of GEMACS for lightning interactions analysis --- general electromagnetic model for analysis of complex systems p 82 A87-15033
Comparison of absorption and radiation boundary conditions in a time-domain three-dimensional finite-difference code p 82 A87-15034
Improved electrostatic discharge wicks for aircraft p 127 A87-15039
The mathematics of interaction between a lightning rod on earth and a step leader due to lightning p 329 A87-25994
Lightning strikes on aircraft. Exploitation of Landes (France)-Front '84 campaign and complementary development of airborne electrical sensors [ONERA-RF-91/7154-PY] p 470 N87-20706

ATMOSPHERIC MODELS

Ice accretion calculations on cylindrical rods following the Bain model, and comparison with experimental results (Fuchs, Schickel, Kaluza, Uwira, 1985) p 56 N87-11434
Atmospheric electrical modeling in support of the NASA F106 Storm Hazards Project [NASA-CR-179801] p 132 N87-12082
Atmospheric Turbulence Relative to Aviation, Missile, and Space Programs [NASA-CP-2468] p 543 N87-22341
Turbulence forecasting p 543 N87-22351
The status of military specifications with regard to atmospheric turbulence p 544 N87-22355
Turbulence models p 703 N87-25277
Microburst model requirements for flight simulation: An airframe manufacturer's perspective p 687 N87-25278

ATMOSPHERIC MOISTURE

Where and when helicopter icing occurs p 702 A87-44702
Experiences with hot-wire instruments for the measurement of the liquid water content in clouds [DFVLR-MITT-86] p 704 N87-26476

ATMOSPHERIC OPTICS

Optical effects of aircraft boundary layer turbulence p 436 A87-32157

ATMOSPHERIC REFRACTION

Doppler frequency shift in a refractive atmosphere p 859 A87-52876

ATMOSPHERIC SCATTERING

Effects of atmosphere on oblique reconnaissance --- in CCD cameras p 29 A87-10937

ATMOSPHERIC SOUNDING

Forecasting and classifying dry microburst activity in the Denver area subjectively and objectively [AIAA PAPER 87-0443] p 269 A87-22636
In situ ozone instrumentation for 10-Hz measurements - Development and evaluation p 611 A87-42185
Severe winds in the DFW microburst measured from two aircraft p 792 A87-50459
[AIAA PAPER 87-2340] Application of Doppler radar and lidar to diagnose atmospheric phenomena p 331 N87-17271

ATMOSPHERIC STRATIFICATION

Density stratification effects on wake vortex decay p 279 A87-24029

ATMOSPHERIC TEMPERATURE

Investigation of extreme temperature values in the free atmosphere p 329 A87-25259
Statistical analysis of extreme vertical temperature gradients in the 6-20 km layer over the Moscow-Irkutsk flight path p 329 A87-25260
Characteristics of the vertical wind and temperature profile in the boundary layer in the case of strong ground winds near Ural and Siberian airports p 329 A87-25261

The use of a numerical filter to correct airborne temperature measurements for the effects of sensor lag p 589 A87-42184

Remote detection of aircraft icing conditions using microwave radiometers [PB86-229507] p 204 N87-14806

Some views on the use of Ada for digital flight control systems p 472 A87-31508
Evaluation of data busses for flight critical control applications p 473 A87-31542
Flight testing of flight control and navigation equipment --- Russian book p 497 A87-36588
Aircraft automatic flight control system with model inversion p 596 A87-40863
Piloted simulation study of the effects of an automated trim system on flight characteristics of a light twin-engine airplane with one engine inoperative
[NASA-TP-2633] p 16 N87-10843
Potential impacts of advanced technologies on the ATC capacity of high-density terminal areas
[NASA-CR-4024] p 22 N87-10854
Efficiency of various control surfaces in steady and unsteady flow
[SNIAS-861-111-101] p 37 N87-10872
Aircraft automatic-flight-control system with inversion of the model in the feed-forward path using a Newton-Raphson technique for the inversion
[NASA-TM-88209] p 116 N87-11796
Design and evaluation of dynamic flight test maneuvers
[ETN-87-99085] p 364 N87-19389
An evaluation of the TSIM control systems computer package
[BU-336] p 375 N87-19406
Design criteria for multi-loop flight control systems p 522 N87-21901
Integrated restructurable flight control system demonstration results
[NASA-CR-178305] p 524 N87-22692
A rotorcraft flight/propulsion control integration study
[NASA-CR-179574] p 587 N87-24457
Automatic systems and the low-level wind hazard p 681 N87-25279
Accident investigation p 647 N87-25285

AUTOMATIC LANDING CONTROL

Flying qualities of pitch range command/attitude hold control systems for landing p 188 A87-17753
Flight evaluation of augmented controls for approach and landing of powered-lift aircraft
[AIAA PAPER 85-1944] p 188 A87-17755
Integrating pitch and power control p 765 A87-48276
Flight test of a digital controller used in a helicopter autoland system p 835 A87-53079
Helicopter MLS Flight Inspection Project
[DOT/FAA/CT-86/14] p 2 N87-10002
Automatic braking system modification for the Advanced Transport Operating Systems (ATOPS) Transportation Systems Research Vehicle (TSRV)
[NASA-CR-178155] p 191 N87-13446
Investigation on MLS approach path interception and transition techniques. Part 2: Flight simulator investigation
[NLR-TR-85097-U-PT-2] p 357 N87-18560
MLS: Its technical features and operational capabilities p 501 N87-21892
A time-based concept for terminal-area traffic management p 501 N87-21895
Philosophy of applying automation to air traffic control p 501 N87-21896
Computer assisted arrival sequencing and scheduling with the COMPAS system p 502 N87-21897

Next generation of control techniques in advanced TMA p 502 N87-21898
A combined stochastic feedforward and feedback control design methodology with application to autoland design
[NASA-CR-4078] p 705 N87-25806

AUTOMATIC PILOTS

Modeling, design, and analysis of a discrete autopilot and the air vehicle it controls p 253 A87-23078
A modal control procedure for multiloop digital design p 474 A87-32450
Analytical determination of the optimal parameters of automatic pilots p 596 A87-42139
The electronic copilot - A look at the future of cockpit automation p 755 A87-47869
Terminal guidance with low update rates
[AIAA PAPER 87-2592] p 774 A87-50555
A simulation evaluation of a pilot interface with an automatic terminal approach system
[NASA-TP-2669] p 366 N87-19393
The effects of display and autopilot functions on pilot workload for Single Pilot Instrument Flight Rule (SPIFR) operations p 512 N87-21921
[NASA-CR-4073] p 512 N87-21921
NASA B737 flight test results of the total energy control system p 775 N87-26918
[NASA-CR-178285] p 775 N87-26918
Flight evaluation of the UH-60A helicopter with the pitch bias actuator centered and electrically disconnected
[AD-A183954] p 827 N87-29495

AUTOMATIC TEST EQUIPMENT

RFC automated inspection overview --- eddy current and ultrasonic testing of gas turbine engine parts p 45 A87-10730
Technical diagnosis by automated reasoning p 57 A87-12217
How to maintain a consistent quality in your bonding process? p 48 A87-12656
Automated infrared inspection of jet engine turbine blades p 125 A87-13719
Sensor-based fault diagnosis in a flight expert system p 177 A87-16681
Automatic fringe analysis in double exposure and live fringe holographic interferometry p 261 A87-19810
An automatic test system for a fighter aircraft p 314 A87-25870
A computer controlled vibratory fatigue test rig with programmed loading for blading p 315 A87-27490
Adjustment diagnostics and fault isolation for calibration test of jet engine controls p 459 A87-31526
A system of problems in the design of computer-aided processes for the ground testing of aviation equipment p 451 A87-31724
AUTOTESTCON '86: Proceedings of the International Automatic Testing Conference, San Antonio, TX, Sept. 8-11, 1986 p 546 A87-38651
HITS DATPG implementation techniques --- Digital Automatic Test Program Generator p 546 A87-38653
AFTA - A platform to expert systems in ATE --- Avionics Fault Tree Analyzer p 483 A87-38656
Feedback from the front - User contributions to B-52 Avionics ATE p 546 A87-38657
AI-based diagnostic testing on ATE p 546 A87-38661
Artificial Intelligence as applied to advanced ATE p 547 A87-38668
The Air Force Organic MATE Operations Center - Status and plans --- Modular Automatic Test Equipment p 547 A87-38679
Engineering and application of the control interface intermediate language imposed by MATE p 547 A87-38680
Optimization of systems for the automatic testing of aircraft engines according to cost criteria p 664 A87-43621

AUTOMATIC TRAFFIC ADVISORY AND RESOLUTION
Evaluating proposed architectures for the FAA's Advanced Automation System p 395 A87-30271
The consequences of accurate bearing resolution on the TCAS Limited Implementation Program p 436 A87-31549
Traffic alert and collision avoidance system (TCAS) surveillance performance in helicopters
[DOT/FAA/PM-85/29] p 503 N87-21905

AUTOMATION

Project management support p 61 A87-11805
FANS - A U.S. perspective p 20 A87-11807
Automatically woven three-directional composite structures p 48 A87-11843
Automated flexible assembly of aerospace structures p 63 A87-13063
Automated assembly-trends, concepts and requirements p 63 A87-13105
Cost drivers and design methodology for automated airframe assembly p 63 A87-13157

Automation of support processes for aircraft production using computers and numerical control --- Russian book p 64 A87-14687
Development of a maintenance automation system p 128 A87-15425
CAD/AI applications for automated manufacturing of composite structures p 205 A87-16779
Pilot's associate demonstration one - A look inside p 180 A87-16841
Aerial photography: Automation of aerial-photography processes --- Russian book p 180 A87-17722
Aircrew automated escape systems requirements formulation, evaluation, test and acceptance p 294 A87-25836
Market supremacy through engineering automation p 395 A87-29596
Automating the software development process p 470 A87-31453
Operation and performance of an integrated helicopter communication system p 422 A87-31469
Guidance automation for nap-of-the-earth flight p 423 A87-31485

HELIX - A causal model-based diagnostic expert system p 401 A87-32071
Automated measuring system for ILS p 425 A87-33331
Toward the factory of the future p 531 A87-35397
Edwards' automated weight and balance system
[SAWE PAPER 1702] p 525 A87-36286
Testing automated ground collision avoidance systems on the AFTI/F-16 p 660 A87-43375
Design of an automated information-processing system p 704 A87-44241
The electronic copilot - A look at the future of cockpit automation p 755 A87-47869
Future impact of manufacturing technology and automation in Pratt & Whitney Canada p 849 A87-53416
Principles of the computer-aided design of aircraft --- Russian book p 858 A87-53957

AUTOMOBILE ENGINES

Advanced Gas Turbine (AGT) Technology Project
[NASA-CR-179484] p 130 N87-11995

AUTOMOBILE FUELS

Automotive gasoline usage in reciprocating aircraft engines
[SAE PAPER 871012] p 783 A87-48752
Avgas/autogas comparison: Winter fuels
[DOT/FAA-CT-86/21] p 43 N87-11014
Autogas in general aviation aircraft
[DOT/FAA/CT-87/05] p 606 N87-23815

AUTOMOBILES

Composite structure repairs carried out according to aeronautical techniques p 405 N87-20185
Activities report of the German-Dutch wind tunnel
[B8677593] p 603 N87-23665
Activities report of the German-Dutch wind tunnel
[B8677594] p 603 N87-23666

AUTONOMOUS NAVIGATION

Knowledge-based tactical terrain analysis --- autonomous helicopter systems p 19 A87-11061
Autonomous navigation system for the new generation of military helicopters and associated flight tests p 648 A87-43469
Operating and support hazard analysis for self-contained navigation system LSI model 6216A, B and C, group B
[AD-A169381] p 22 N87-10855
F-16 digital terrain system: Concept of operations and support
[AD-A177737] p 511 N87-21919
Digital Autonomous Terminal Access Communication (DATAC) system p 540 N87-22610

AUTOROTATION

On the control of auto-rotational characteristics of light airplane fuselages
[AIAA PAPER 87-0349] p 253 A87-22574
Dynamic optimization problems with bounded terminal conditions p 474 A87-31682
Determination of pressure losses in the compressor of a gas turbine engine in the autorotation mode p 461 A87-31739
Effect of strakes on the autorotational characteristics of noncircular cylinders p 410 A87-33241
Autorotating wings - A concept that remains vital p 745 A87-48799
Numerical and experimental study of dynamics of two-dimensional body
[ISAS-619] p 59 N87-10748

AUXILIARY POWER SOURCES

APU fuel efficiency and affordability for commercial aircraft
[AIAA PAPER 87-1907] p 669 A87-45290

AUXILIARY PROPULSION

- Starting systems technology II; Proceedings of the Aerospace Technology Conference and Exposition, Long Beach, CA, Oct. 13-16, 1986
[SAE SP-678] p 367 A87-29576
Past, present and future of hydraulic APU start systems
[SAE PAPER 861711] p 368 A87-29577
Fast start APU technology
[SAE PAPER 861712] p 368 A87-29578
Advanced pneumatic start systems for APUs
[SAE PAPER 861713] p 368 A87-29579
Development of a hot gas vane motor for aircraft starting systems
[SAE PAPER 861714] p 368 A87-29580
Advanced technology payoffs for future small propulsion systems p 758 A87-47081

AVAILABILITY

- Aircraft availability optimization --- tradeoffs in optimal systems design p 475 A87-35009
New concepts concerning ILS siting p 497 A87-35558

AVERAGE

- Interpolation techniques for the time domain averaging of vibration data with application to helicopter gearbox monitoring
[AD-A182572] p 754 N87-27662
Time-averaged aerodynamic loads on the vane sets of the 40- by 80-foot and 80- by 120-foot wind tunnel complex
[NASA-TM-89413] p 780 N87-27680

AVIONICS

- Military aeronautical satellite communications p 18 A87-10137

Configuration design of a helicopter integrated navigation system p 823 N87-29480

Navigation systems for the new generation of combat and transport helicopters and associated flight tests p 823 N87-29481

AWACS AIRCRAFT

The E-3 Joint Test Force - A unique test organization p 713 A87-49208

AXIAL COMPRESSION LOADS

Experimental investigation on advanced composite-stiffened structures under uniaxial compression and bending p 263 A87-20889

AXIAL FLOW

A study on the axially curved mixed-flow vaneless diffusers p 47 A87-11481

Stall transients of axial compression systems with inlet distortion p 279 A87-24010

Tip clearance flows. I - Experimental investigation of an isolated rotor. II - Study of various models and comparison with test results p 638 A87-46208

Journal of engineering thermophysics (selected articles) [AD-A169452] p 139 N87-13347

SIMPROP: A system for simple aerodynamic analysis of propellers in axial flow. Description of method and user's guide [NLR-TR-84128-U] p 154 N87-14288

Measurements of the unsteady flow field within the stator row of a transonic axial-flow fan. 1: Measurement and analysis technique [NASA-TM-88945] p 290 N87-16789

Design of an axial flow research compressor operating in the subsonic and transonic ranges [NAL-TM-PR-8607] p 518 N87-21952

Through flow analysis within axial flow turbomachinery blade rows [NAL-PD-PR-8609] p 537 N87-22167

AXIAL FLOW TURBINES

The effect of lower and upper overlaps on the efficiency of centripetal radial-flow air microturbines with partial admission p 460 A87-31732

Performance of a high-efficiency radial/axial turbine [ASME PAPER 86-GT-18] p 514 A87-38467

An experimental investigation of turbine case treatments [AIAA PAPER 87-1919] p 669 A87-45299

Visualisation of axial turbine tip clearance flow using a linear cascade [CUED/A-TURBO/TR-122] p 107 N87-12560

Measurements of the unsteady flow field within the stator row of a transonic axial-flow fan. Part 2: Results and discussion [NASA-TM-88946] p 290 N87-16790

Unsteady flows in a single-stage transonic axial-flow fan stator row [NASA-TM-88929] p 292 N87-16805

Application of flow calculation methods to transonic and supersonic axial turbomachines [ONERA-RTS-80/7103-EY] p 309 N87-16846

Comparison between inverse designed (PVD) airfoils and standard series airfoils for high loaded axial turbine nozzle application p 518 N87-21951

Aeroelasticity in axial-flow turbomachines. Volume 1: Unsteady turbomachinery aerodynamics [AGARD-AG-298-VOL-1] p 571 N87-24398

Linearized unsteady aerodynamic theory p 571 N87-24399

Stall flutter p 598 N87-24404

AXIAL LOADS

A higher order beam element for vibration of beams with discontinuities p 46 A87-10898

AXISYMMETRIC BODIES

Body of revolution comparisons for axial- and surface-singularity distributions p 4 A87-10525

Method of meridional sections in problems involving a three-dimensional boundary layer p 4 A87-10609

Particle trajectory computer program for icing analysis of axisymmetric bodies - A progress report [AIAA PAPER 87-0027] p 234 A87-22366

A study of supersonic three-dimensional flow past pointed axisymmetric bodies p 286 A87-25232

Static internal performance of single-expansion-ramp nozzles with thrust-vectoring capability up to 60 deg [NASA-TP-2364] p 15 N87-10839

Application of viscous-inviscid interaction methods to transonic turbulent flows [NASA-CR-179900] p 75 N87-11700

Effects of empennage surface location on aerodynamic characteristics of a twin-engine afterbody model with nonaxisymmetric nozzles [NASA-TP-2392] p 302 N87-17693

Effect of a trade between boattail angle and wedge size on the performance of a nonaxisymmetric wedge nozzle [NASA-TP-2717] p 570 N87-23593

Analysis and design of airfoils and axisymmetric bodies in transonic nonuniform flow p 811 N87-28509

Program LRCMD2: Improved aerodynamic prediction program for supersonic canard-tail missiles with axisymmetric bodies [NASA-CR-3883] p 813 N87-28525

AXISYMMETRIC FLOW

A split-matrix method for the integration of the quasi-conservative Euler-equations p 7 A87-11544

A method for calculation of flow process in an axisymmetric straight-wall annular diffuser p 289 A87-27479

Calculation of supersonic steady axisymmetric nozzle and jet p 343 A87-28337

Structure and pulsation characteristics of a compressible turbulent boundary layer behind a fan of rarefaction waves p 484 A87-35813

Unsteady axisymmetric turbulent boundary layer on a slender body of revolution p 485 A87-36562

A method for compressor axisymmetric characteristics by the aid of rotating stall parameters p 488 A87-37839

Stability of axisymmetric boundary layers on sharp cones at hypersonic Mach numbers [AIAA PAPER 87-1413] p 567 A87-42442

Computations of axisymmetric turbulent flows in wakes beyond bluff bodies by using an algebraic-stress model [AIAA PAPER 87-1440] p 568 A87-42458

A method for calculating axisymmetric afterbody flows p 716 A87-47087

Effects of afterbody boattail design and empennage arrangement on aeropropulsive characteristics of a twin-engine fighter model at transonic speeds [NASA-TP-2704] p 492 N87-21873

Estimation of spillage drag for a wide range of axisymmetric intakes at M 1 [ESDU-84004] p 701 N87-26301

Enhanced mixing of an axisymmetric jet by aerodynamic excitation [NASA-CR-175059] p 815 N87-29418

AZIDES (ORGANIC)

Combustion, vaporization, and microexplosion of droplets of organic azides p 606 N87-23806

B

B-1 AIRCRAFT

Palmdale and the bomber connection p 22 A87-10574

Advanced composites applications for the B-1B bomber - An overview p 87 A87-13101

CEPS - B-1B diagnostic expert system --- CITS Expert Parameter System p 205 A87-16778

The B-1B Central Integrated Test System Expert Parameter System p 179 A87-16839

SPF/titanium and the B-1B aircraft p 782 A87-48020

Unsteady inlet distortion characteristics with the B-1B p 575 N87-24478

Correlation of B-1 flight test subjective assessments and some ride quality/vibration exposure criteria [AD-A179844] p 658 N87-25318

B-52 AIRCRAFT

Lessons learned from the B-52 program evolution - Past, present and future [AIAA PAPER 86-2639] p 142 A87-17896

Feedback from the front - User contributions to B-52 Avionics ATE p 546 A87-38657

B-70 AIRCRAFT

An experimental investigation of dynamic ground effect [NASA-CR-180560] p 659 N87-26036

BACKGROUND NOISE

Recognition of synthesized, compressed speech in noisy environments p 424 A87-33049

Effects of background noise on total noise annoyance [NASA-TP-2630] p 208 N87-14120

BACKSCATTERING

Variations in ultrasonic backscatter attributed to porosity p 45 A87-10768

Airborne Doppler lidar measurements p 247 A87-22797

Two-color short-pulse laser altimeter measurements of ocean surface backscatter p 588 A87-39462

BACKWARD FACING STEPS

Flow behind a rearward facing step in hypersonic high enthalpy flow - Some interferometric studies p 807 A87-52371

Acoustic response of turbulent reacting recirculatory flows p 620 N87-23799

BALANCE

The development of balance tubes for Dowty Rotol composite bladed propellers p 63 A87-13630

Automatic loadsheet preparation --- aircraft weight and balance data [SAWE PAPER 1697] p 525 A87-36283

High angle of attack position sensing for the Southampton University magnetic suspension and balance system [NASA-CR-178358] p 780 N87-27681

BALANCING

Microprocessors in jet engine balancing machines [SAE PAPER 861704] p 462 A87-32605

Edwards' automated weight and balance system [SAWE PAPER 1702] p 525 A87-36286

BALLISTICS

Notes on a generic parachute opening force analysis [AD-A170962] p 151 N87-13411

BALLOON FLIGHT

- Extension of hot air balloon flight duration through adaptation of balloon surface characteristics p 344 A87-29262

BALLOON-BORNE INSTRUMENTS

- On-board system for the automatic control of balloon altitude p 436 A87-32484
A simulation platform for three-axis attitude control of a large balloon gondola p 436 A87-32485
Mobile intercept of storms p 132 N87-13064

BALLOONS

- Aerodynamic Decelerator and Balloon Technology Conference, 9th, Albuquerque, NM, October 7-9, 1986, Technical Papers p 79 A87-13776
Prediction of He gas lift in a plastic balloon p 402 A87-32482

BANDWIDTH

- Aircraft collision warning system [AD-D012463] p 236 N87-15199
Flight test evaluation of techniques to predict longitudinal pilot induced oscillations [AD-A179229] p 597 N87-23629

BASE FLOW

- A numerical analysis of supersonic bottom flow with thermal modification of the wake p 3 A87-10409
Influence of yaw and incidence on base drag of rectangular wings p 556 A87-41667

BASE PRESSURE

- Influence of yaw and incidence on base drag of rectangular wings p 556 A87-41667
High Reynolds number flows around smooth and rough cylinders. Volume 1. Mean surface pressure distribution [AD-A183531] p 816 N87-29428

BATTERY CHARGERS

- Aircraft battery state of charge and charge control system [AD-A169411] p 130 N87-12766

BAYES THEOREM

- Statistical classification of radar clutter --- for air traffic control feature extraction p 160 A87-19415

BEACON COLLISION AVOIDANCE SYSTEM

- Traffic Alert and Collision Avoidance System (TCAS-3) [BCD-TR-157] p 741 N87-26892

BEAMS (SUPPORTS)

- A higher order element for stepped rotating beam vibration p 263 A87-20950
Buckling and vibration of a rotating beam p 264 A87-21196
Optimum design of beams with different cross-sectional shapes p 266 A87-22821
Some considerations on the modern beam theory - Development of the practical methods p 381 A87-28434

- A method of predicting the energy-absorption capability of composite subfloor beams [AIAA PAPER 87-0800] p 464 A87-33600

- The structural optimization of a spreader bar for twin lift helicopter operations p 100 N87-11759
Comparison of composite rotor blade models: A coupled-beam analysis and an MSC/NASTRAN finite-element model [NASA-TM-89024] p 318 N87-16884

- A method of predicting the energy-absorption capability of composite subfloor beams [NASA-TM-89088] p 380 N87-19450

BEARING (DIRECTION)

- The consequences of accurate bearing resolution on the TCAS Limited Implementation Program p 436 A87-31549
Evaluation of the F/A-18 head-up-display for recovery from unusual attitudes [AD-A183303] p 829 N87-29532

BEARING ALLOYS

- Selection of rolling-element bearing steels for long-life application [NASA-TM-88881] p 129 N87-11993

BEARINGLESS ROTORS

- Testing a tail rotor system in fiber-reinforced construction manner p 92 A87-14016
Development of a new type of bearingless rotor system p 93 A87-14017
Design verification and flight testing of a bearingless soft inplane tail rotor p 172 A87-19286

- Development of a rotating blade finite element with an application to the analysis of helicopter rotor systems [AIAA PAPER 87-0141] p 240 A87-22437
Aeroelastic stability analysis of a composite bearingless rotor blade p 296 A87-23738

- Ground and air resonance of bearingless rotors in hover [AIAA PAPER 87-0924] p 429 A87-33759
Structural analysis aspects of composite helicopter components [MBB-UD-480-86-OE] p 584 A87-42674

- Aeroelastic stability of a bearingless circulation control rotor in forward flight p 652 A87-43443

- Substantiation of the analytical prediction of ground and air resonance stability of a bearingless rotor, using model scale tests p 654 A87-43463

- Aeroelastic stability of bearingless rotors in forward flight p 432 N87-20260
Development of novel bearingless rotor systems [MBB-UD-471/86] p 702 N87-26837

BEARINGS

- Advances in the vibration monitoring of gears and rolling element bearings p 49 A87-13007
Composites for aerospace dry bearing applications p 454 A87-31373

- A hybrid nonlinear programming method for design optimization p 545 A87-35718
Experimental observation of cavitating squeeze-film dampers p 534 A87-38461

- FEL - A new main rotor system p 651 A87-43402
An experimental and theoretical investigation of an uncentralized squeeze-film damper bearing and the test results on a jet engine p 847 A87-51471

- Advances and applications of Pyrowear 53 in helicopter transmission systems p 849 A87-53419
Carburizing steel for high temperature service [AD-A168327] p 122 N87-11877

- Experimental measurement of the dynamic pressure distribution in a squeeze film bearing damper executing circular centered orbits p 539 N87-22219

BEECH 99 AIRCRAFT

- Aircraft accident report: Henson Airlines Beech B99, N339HA, Grottoes, Virginia, September 23, 1985 [PB86-910409] p 155 N87-13419

BEECHCRAFT AIRCRAFT

[NASA-CR-178149] p 41 A87-10182
- Flight characteristics test of the UH-60A with tail boom mounted strake
[AD-A180791] p 751 A87-26898

BORON

- Prospective, characteristics and problems of the use of boron in different air augmented propulsion modes
[IAF PAPER 86-191] p 122 A87-15924

BORON COMPOUNDS

- New rapidly solidified titanium alloys produced by melt-spinning
p 454 A87-31379

BORON FIBERS

- Composites - What next
p 841 A87-51807
- Composite repair of cracked aluminum structure
p 404 A87-20183
- Damage repair of in-service composite structures: Application to the Mirage 2000
p 405 A87-20184
- Fibre composite repair of cracked metallic aircraft components: Practical and basic aspects
p 405 A87-20187

BOUNDARY ELEMENT METHOD

- A quadrature-collocation technique for boundary element method - Application to helicopter fuselage
[ONERA, TP NO. 1986-124] p 214 A87-21042
- On the boundary element method for compressible flow about bodies
p 555 A87-41268
- 3D and axisymmetric thermo-elastic stress analysis by BEASY
p 609 A87-41269
- Finite and boundary element modeling of crack propagation in two and three dimensions
p 610 A87-41647
- A study of methods to predict and measure the transmission of sound through the walls of light aircraft
[NASA-CR-180632] p 797 A87-27479

BOUNDARY INTEGRAL METHOD

- Shock boundary layer interactions in laminar transonic flow over airfoils using a hybrid method
p 66 A87-13503
- An exterior Poisson solver using fast direct methods and boundary integral equations with applications to nonlinear potential flow
p 125 A87-13872
- On the boundary element method for compressible flow about bodies
p 555 A87-41268

BOUNDARY LAYER EQUATIONS

- An integral method for three-dimensional turbulent boundary layer with large crossflow
[AIAA PAPER 87-1254] p 564 A87-42347
- Nonlinear fracture mechanics analysis with boundary integral method
[AD-A173216] p 328 A87-18124

BOUNDARY LAYER COMBUSTION

- Application of low-Reynolds-number K-epsilon model to solid fuel turbulent boundary layer combustion
[AIAA PAPER 87-1778] p 690 A87-45198
- Status of holographic interferometry at Wright Patterson Air Force Base
p 851 A87-29436

BOUNDARY LAYER CONTROL

- Optimal control of viscous flow at high Reynolds numbers
p 5 A87-10620
- Combination of suction and tangential blowing in boundary layer control
p 67 A87-13641
- All laminar supercritical LFC airfoils with natural laminar flow in the region of the main wing structure
[AIAA PAPER 86-2625] p 147 A87-17884
- Active transition fixing and control of the boundary layer in air
p 148 A87-18927
- Pressure fluctuation measurements with passive shock/boundary-layer control
p 347 A87-31197
- Prediction and control of transition in hypersonic boundary layers
[AIAA PAPER 87-1414] p 632 A87-44946
- Some experiments with a supersonic axial compressor stage
p 719 A87-48723
- About the design philosophy of long range LFC transports with advanced supercritical LFC airfoils
[AIAA PAPER 87-1284] p 745 A87-48727
- Vortical flow management techniques
p 728 A87-49496

- Wind tunnel test of the modified goldschmied model with propulsion and empennage: Analysis of test results
[AD-A167360] p 13 A87-10045
- Application of the e sup N method to calculations of laminar flow control
p 202 A87-14263
- Boundary layer transition control for takeoff and landing configurations
p 242 A87-15162
- Experiences with transition fixing in the high speed regime at NLR, Netherlands
p 242 A87-15163
- Transition fixing in the high speed range for the development of civil aircraft wings
p 242 A87-15164
- Transition fixing on wings in industrial wind tunnels and associated problems
p 211 A87-15165
- Transition fixing and simulation of high Reynolds number flow at transonic velocities
p 229 A87-15169
- LFC leading edge glove flight: Aircraft modification design, test article development and systems integration
[NASA-CR-172136] p 275 A87-17658
- Technical evaluation report on the AGARD Fluid Dynamics Panel Symposium on Improvement of Aerodynamic Performance Through Boundary Layer Control and High Lift Systems
[NLR-MP-85016-U] p 362 A87-18566
- Development of a device for controlling the leading edge vortices on a delta wing
[AD-A172557] p 333 A87-18555

- Development of laminar flow control wing surface composite structures
[NASA-CR-172330] p 483 A87-21849
- China aerodynamics research society
[AD-A182577] p 716 A87-27612
- To enhance the capability and increase the productivity of a group working on critical problems of high speed fluid mechanics - both experimentally and through numerical calculations
[AD-A182559] p 791 A87-27970
- Development of laminar flow control wing surface porous structure
[NASA-CR-172424] p 802 A87-28502
- Investigations on a transonic airfoil with a 30 mm wide perforation/cavity arrangement
[DFVLR-FB-86-59] p 810 A87-28506
- An analysis of the crossover between local and massive separation on airfoils
[NASA-CR-4096] p 814 A87-29411

BOUNDARY LAYER EQUATIONS

- Calculation of strong viscous/inviscid interactions on airfoils by zonal solutions of the Navier-Stokes equations
p 7 A87-11540
- Further comparisons of interactive boundary-layer and thin-layer Navier-Stokes procedures
[AIAA PAPER 87-0430] p 225 A87-22625
- Second-order boundary layers for steady, incompressible, three-dimensional stagnation point flows
p 345 A87-30075
- Analysis of three-dimensional separated flow with the boundary-layer equations
p 346 A87-31156
- Efficient simulation of separated three-dimensional viscous flows using the boundary-layer equations
p 346 A87-31158

[AIAA PAPER 87-0798] p 403 A87-33598

C-135 AIRCRAFT

- The rise of the Phoenix - Development of a KC-135R operational flight trainer
p 376 A87-30851
- Acceleration display system for aircraft zero-gravity research
[NASA-TM-87358] p 389 A87-18801

CABIN ATMOSPHERES

- Prediction of light aircraft interior sound pressure level from the measured sound power flowing in to the cabin
p 299 A87-27120
- Air cycle environmental control system for helicopters - A trade-off study
p 654 A87-43472
- A review of mathematical modelling of aircraft cabin fires
p 739 A87-50714

CABINS

- Comparative rates of heat release from five different types of test apparatuses
p 317 A87-23431
- Escaping from burning cabins - Are smoke hoods the answer?
p 352 A87-30003
- Burning questions --- fireworthiness of aircraft cabin materials
p 646 A87-46373
- Pool fires in a simulated aircraft cabin interior with ventilation
p 818 A87-53783

CALCULATORS

- Application of flight performance advisory systems to US Navy aircraft
p 502 A87-21900
- Fuel conservation evaluation of US Army helicopters. Part 6: Performance calculator evaluation
[AD-A181645] p 753 A87-27653

CALCULUS OF VARIATIONS

- Construction of explicit and implicit symmetric TVD schemes and their applications --- Total Variation Diminishing for fluid dynamics computation
p 344 A87-29688

CALIBRATING

- Data processing and calibration for an airborne scatterometer
p 30 A87-12694
- In-flight transfer alignment/calibration of a strapdown INS that employs carouselled instruments and IMU indexing
p 85 A87-13438
- Experimental calibration of an aircraft vector electric field meter system
p 102 A87-15028
- Improved electrostatic discharge wicks for aircraft
p 127 A87-15039
- On ground calibration of a pushbroom scanner
p 255 A87-19651
- Transient thermal technique for infrared non destructive testing of composite materials
p 261 A87-19689
- An improvement of the calibration of the Eppley pyrometer for the case of airborne measurements
p 365 A87-28966
- A miniature remote deadweight calibrator
p 694 A87-45104
- Motion characteristics of the UTIAS flight research simulator motion-base
[UTIAS-TN-261] p 119 A87-11802

Supplementary calibration test of the tip-aerodynamics-and acoustics-test pressure transducers

- [NASA-TM-88312] p 131 A87-12830
- Theoretical and experimental investigations of flow vector measurements with angle-of-attack and sideslip sensors on DFVLR meteorological research aircraft
[ESA-TT-976] p 177 A87-14327
- Introduction to air data system parameters, errors and calibration laws
[ESDU-86031] p 247 A87-15967
- Controlled diffusion compressor blade wake measurements
[AD-A175141] p 350 A87-19355
- Design and verification by nonlinear simulation of a Mach-CR control law for the NASA TCV B737 aircraft
[NASA-CR-178029] p 449 A87-20290
- Otis ANGB (Air National Guard Base) visibility sensor field test study
[AD-A179176] p 615 A87-24045
- Vector electric fields measured in a lightning environment
[AD-A180012] p 577 A87-24442
- Static calibration of the RSRA active-isolator rotor balance system
[NASA-TM-88211] p 588 A87-24459
- Miniature remote dead weight calibrator
[NASA-CASE-LAR-13564-1] p 700 A87-25558
- The treatment of calibrations of total air temperature probes for use in flight-test analysis work
[ESDU-84007] p 701 A87-26324
- Airflow calibration and exhaust pressure/temperature survey of an F404, S/N 215-109, turbofan engine
[NASA-TM-100159] p 834 A87-29537

CAMBER

- On the application of linearised theory to multi-element aerofoils. II - Effects of thickness, camber and stagger
p 287 A87-25595
- Flow visualization model of the leeside flows over conically cambered delta wings at supersonic speeds
[AIAA PAPER 87-2477] p 726 A87-49093
- Experimental investigation of a double circular arc cascade with 73 deg camber
p 762 A87-49979
- Pressure measurements on a thick cambered and twisted 58 deg delta wing at high subsonic speeds
[NASA-TP-2713] p 735 A87-27643

CAMBERED WINGS

- Aerodynamic design considerations for efficient high-lift supersonic wings
p 146 A87-17816
- Experimental flowfield visualization of a high alpha wing at Mach 1.62
[AIAA PAPER 87-0329] p 265 A87-22563
- Pressure measurement on two spanwise reflex cambered delta wings with leading edge separation
p 288 A87-27469
- Conceptual studies of control systems for the variable-camber wing
[MBB-UT-221-86-PUB] p 769 A87-49960
- Supersonic, nonlinear, attached-flow wing design for high lift with experimental validation
[NASA-TP-2336] p 12 A87-10042
- Numerical methods and a computer program for subsonic and supersonic aerodynamic design and analysis of wings with attainable thrust considerations
[NASA-CR-3808] p 3 A87-10829

CAMERAS

- The KS-147A LOROP camera system
p 28 A87-10934
- Operational usage of the KS-147A (LOROP) in the RF-5E
p 29 A87-10936
- Effects of atmosphere on oblique reconnaissance --- in CCD cameras
p 29 A87-10937
- Reconnaissance and the microprocessor --- in aircraft applications
p 29 A87-10943

CAMS

- Search for a principle to generate high frequency gusts --- wind tunnel tests
[ONERA-RSF-92/1865-AY] p 779 A87-27677

CANADIAN AIRCRAFT

- Flying the CF-18 Hornet
p 656 A87-46313

CANARD CONFIGURATIONS

- A split canard configuration for improved control at high angles of attack
p 67 A87-13643
- Exploratory wind-tunnel investigation of the stability and control characteristics of advanced general aviation configurations
[AIAA PAPER 86-2596] p 111 A87-14031
- Wind-tunnel investigation of the OMAC canard configuration
[AIAA PAPER 86-2608] p 69 A87-14038
- Self-induced roll oscillations measured on a delta wing/canard configuration
p 310 A87-24028

The 1-((diorganooxy phosphonyl) methyl)-2,4- and -2,6-diamino benzenes and their derivatives [NASA-CASE-ARC-11425-2] p 844 N87-28605

CHEMICAL REACTORS

The current application of titanium in Japan and an outlook for the future p 781 A87-47978

CHINA

China aerodynamics research society
[AD-A182577] p 716 N87-27612

CHLOROETHYLENE

Purifying hydraulic systems p 607 A87-39484

CHOKES

Comment on 'Computation of choked and supersonic turbomachinery flows by a modified potential method' p 71 A87-14129

CHOKES (FUEL SYSTEMS)

Numerical and experimental studies on choked underexpanded jets
[AIAA PAPER 87-1378] p 567 A87-42423

CHORDS (GEOMETRY)

The Rolls-Royce wide chord fan blade
[PNR90392] p 764 N87-27671

CHROMIUM ALLOYS

The preparation and properties of vapor deposited Al-Cr-Fe alloys p 841 A87-51634

CHROMIUM STEELS

Fatigue strength of 30KhGSN2A steel lugs under programmed loading p 843 A87-53441

CIRCUIT BOARDS

Microprocessor based UUT testing in a depot environment p 547 A87-38666

CIRCUIT RELIABILITY

VLSI impact on RAMS strategies in avionics design p 128 A87-15423
A rugged electronic pressure scanner designed for turbine test p 695 A87-45124
New technological considerations that improve avionics reliability p 750 A87-50336

CIRCULAR CYLINDERS

Upwind Navier-Stokes solutions for separated periodic flows p 347 A87-31182
Local heat-transfer coefficients of simulated smooth glaze ice formations on a cylinder p 420 A87-32163
Unsteady viscous flows round moving circular cylinders and airfoils. II p 637 A87-45792
Flow of a monoatomic rarefied gas around a rotating circular cylinder p 803 A87-50880
A description of a turbulent flow past a circular cylinder by a discrete vortex method p 11 N87-10014
Results of icing flights in winter 1983/1984: Ice accretion thickness in correlation with physical parameters, object and cloud parameters [ESA-TT-969] p 176 N87-14324
Determination of the local heat transfer characteristics on glaze ice accretions on a cylinder and a NACA 0012 airfoil [AD-A179931] p 647 N87-25309
High Reynolds number flows around smooth and rough cylinders. Volume 1. Mean surface pressure distribution [AD-A183531] p 816 N87-29428

CIRCULAR PLATES

Aerodynamic coefficients of a circular wing in steady subsonic flow p 67 A87-13653

CIRCULATION CONTROL AIRFOILS

Aerodynamic force calculations of an elliptical circulation control airfoil p 71 A87-14360
A new class of circulation control airfoils [AIAA PAPER 87-0003] p 216 A87-22351
Further development of pneumatic powered-lift systems with capability for thrust deflection and recovery [AIAA PAPER 87-0005] p 248 A87-22353
Development of compressible flow similarity concepts for circulation control airfoils [AIAA PAPER 87-0153] p 219 A87-22446
Improved algorithms for circulation-control airfoils in transonic flow [AIAA PAPER 87-0154] p 219 A87-22447
Experimental investigations of the circular wall jet on a circulation control airfoil [AIAA PAPER 87-0155] p 219 A87-22448
Boundary-layer and wake measurements on a swept, circulation-control wing [AIAA PAPER 87-0156] p 219 A87-22449

Evaluation of a research circulation control airfoil using Navier-Stokes methods [AIAA PAPER 87-0002] p 228 A87-22754

Circulation control airfoils as applied to rotary-wing aircraft p 287 A87-25716

Section characteristics of a finite, swept circulation control airfoil p 342 A87-28072

Noise from a circulation control wing with upper surface blowing p 342 A87-28074

The predicting method for the performance of the modern supersonic/transonic stage of the axial-flow compressor p 344 A87-29566

Recent progress in circulation control aerodynamics [AIAA PAPER 87-0001] p 345 A87-31101

A study of a circulation control airfoil with leading/trailing edge blowing [AIAA PAPER 87-0157] p 345 A87-31104

Aeroelastic characteristics of swept circulation control wings [AIAA PAPER 87-0920] p 428 A87-33724

Large-scale static investigation of circulation-control-wing concepts applied to upper surface-blowing aircraft [NASA-TP-2684] p 243 N87-15959

Verification of performance results for a low-speed 15 percent elliptical circulation control airfoil [NASA-CR-181020] p 494 N87-22633

CIRCULATION CONTROL ROTORS

NOTAR (No Tail Rotor) hover testing using a scale model in water p 148 A87-19223

The use of discrete vortices to predict lift of a circulation control rotor section with a trailing edge blowing slot p 627 A87-43416

Aeroelastic stability of a bearingless circulation control rotor in forward flight p 652 A87-43443

Extension of local circulation method to counter rotation propeller [AIAA PAPER 87-1891] p 635 A87-45280

CIRCULATION DISTRIBUTION

A prescribed radial distribution circulation of a hovering rotor blade p 627 A87-43414

CITIES

A program for development of an airship transport system [AIAA PAPER 87-2303] p 736 A87-48639

Noise levels from urban helicopter operations, New Orleans, Louisiana [AD-A174129] p 273 N87-16590

The influence of the choice of computational parameters on the results of three-dimensional potential methods --- transonic flow p 214 A87-21069

[ONERA, TP NO. 1986-169] p 214 A87-21069

Validation of turbulence models applied to transonic shock wave-boundary layer interaction p 214 A87-21072

[ONERA, TP NO. 1986-173] p 214 A87-21072

A comparison and validation of methods for solving the Euler equations p 215 A87-21082

[ONERA, TP NO. 1986-183] p 215 A87-21082

The validation of solution methods for the Navier-Stokes equations for a compressible fluid - Results of the 'GAMM-Workshop' in Nice p 215 A87-21083

[ONERA, TP NO. 1986-184] p 215 A87-21083

New numerical techniques in the method of singularities for application to complex three-dimensional configurations --- aerodynamic flow simulation p 215 A87-21085

[ONERA, TP NO. 1986-186] p 215 A87-21085

The influence of radiation on the thermal equilibrium of a feeder turbine of a turbojet p 248 A87-21089

[ONERA, TP NO. 1986-190] p 248 A87-21089

Concerning inviscid solutions for large-scale separated flows p 264 A87-21271

The stability of the boundary layer on an ellipsoid at angle of attack p 215 A87-21528

[AIAA PAPER 86-1045] p 215 A87-21528

Asymptotic solutions for unsteady flow in cascades p 215 A87-21542

A new class of circulation control airfoils p 216 A87-22351

[AIAA PAPER 87-0003] p 216 A87-22351

Calculation of unsteady wake/rotor interaction p 216 A87-22354

[AIAA PAPER 87-0006] p 216 A87-22354

Time dependent computation of the Euler equations for designing fully 3D turbomachinery blade rows, including the case of transonic shock free design p 216 A87-22355

[AIAA PAPER 87-0007] p 216 A87-22355

TRANAIR - A computer code for transonic analyses of arbitrary configurations p 216 A87-22369

[AIAA PAPER 87-0034] p 216 A87-22369

Navier-Stokes simulation of side-wall effect of two-dimensional transonic wind tunnel p 256 A87-22371

[AIAA PAPER 87-0037] p 256 A87-22371

Leading-edge vortex solutions with large total pressure losses p 217 A87-22372

[AIAA PAPER 87-0039] p 217 A87-22372

Improvements to an Euler aerodynamic method for transonic flow analysis p 217 A87-22373

[AIAA PAPER 87-0040] p 217 A87-22373

Three-dimensional nearfield characterization of a VSTOL jet in turbulent crossflow p 217 A87-22382

[AIAA PAPER 87-0051] p 217 A87-22382

Navier Stokes solution of the flowfield over ice accretion shapes p 218 A87-22414

[AIAA PAPER 87-0099] p 218 A87-22414

Numerical analysis of a NACA0012 airfoil with leading edge ice accretions p 218 A87-22415

[AIAA PAPER 87-0101] p 218 A87-22415

Computational methods for unsteady transonic flows p 218 A87-22418

[AIAA PAPER 87-0107] p 218 A87-22418

Solution of unsteady rotational flow over supercritical wings p 218 A87-22419

[AIAA PAPER 87-0108] p 218 A87-22419

Computational and experimental investigation of cavity flowfields p 218 A87-22424

[AIAA PAPER 87-0114] p 218 A87-22424

Numerical simulation of compressible flow around complex two-dimensional cavities p 219 A87-22425

[AIAA PAPER 87-0116] p 219 A87-22425

Improved algorithms for circulation-control airfoils in transonic flow p 219 A87-22447

[AIAA PAPER 87-0154] p 219 A87-22447

A computational analysis of flow separation over five different airfoil geometries at high angles-of-attack p 220 A87-22472

[AIAA PAPER 87-0188] p 220 A87-22472

A three-dimensional grid generation method for gas-turbine combustor flow computations p 249 A87-22482

[AIAA PAPER 87-0204] p 249 A87-22482

Vortical flow aerodynamics - Physical aspects and numerical simulation p 220 A87-22483

[AIAA PAPER 87-0205] p 220 A87-22483

Incompressible Navier-Stokes solutions for a sharp-edged double-delta wing p 220 A87-22484

[AIAA PAPER 87-0206] p 220 A87-22484

Navier-Stokes computations of vortical flows over low aspect ratio wings p 220 A87-22485

[AIAA PAPER 87-0207] p 220 A87-22485

A numerical study of the Weis-Fogh mechanism --- for solution of wing aerodynamics p 221 A87-22503

[AIAA PAPER 87-0238] p 221 A87-22503

Duct flows with swirl p 265 A87-22509

[AIAA PAPER 87-0247] p 265 A87-22509

Computational analysis of hypersonic airbreathing aircraft flow fields p 222 A87-22531

[AIAA PAPER 87-0279] p 222 A87-22531

Block-structured solution of Euler equations for transonic flows p 223 A87-22575

[AIAA PAPER 87-0351] p 223 A87-22575

An efficient Euler solver, with many applications p 223 A87-22576

[AIAA PAPER 87-0352] p 223 A87-22576

A diagonal implicit multigrid algorithm for the Euler equations p 223 A87-22578

[AIAA PAPER 87-0354] p 223 A87-22578

Euler calculations for wings using Cartesian grids p 223 A87-22579

[AIAA PAPER 87-0356] p 223 A87-22579

A model for effects of large-scale motion on coaxial jet development p 265 A87-22599

[AIAA PAPER 87-0380] p 265 A87-22599

Transonic viscous flow predictions with the Lockheed Navier-Stokes code p 223 A87-22615

[AIAA PAPER 87-0410] p 223 A87-22615

Application of an upwind Navier-Stokes code to two-dimensional transonic airfoil flow p 224 A87-22618

[AIAA PAPER 87-0413] p 224 A87-22618

Navier-Stokes computations of transonic flows using the LU-ADI method --- Lower/Upper block diagonal - Alternating Direction Implicit method p 224 A87-22620

[AIAA PAPER 87-0421] p 224 A87-22620

Computational results for viscous transonic flows around airfoils p 224 A87-22621

[AIAA PAPER 87-0422] p 224 A87-22621

ISES - A two-dimensional viscous aerodynamic design and analysis code p 224 A87-22622

[AIAA PAPER 87-0424] p 224 A87-22622

Investigating dynamic stall using a modified momentum-integral method p 225 A87-22626

[AIAA PAPER 87-0431] p 225 A87-22626

Improvements to the aircraft Euler method p 225 A87-22644

[AIAA PAPER 87-0452] p 225 A87-22644

A numerical investigation on wing/nacelle interferences of USB configuration p 226 A87-22647

[AIAA PAPER 87-0455] p 226 A87-22647

Euler solution of the transonic flow for a helicopter rotor p 227 A87-22685

[AIAA PAPER 87-0523] p 227 A87-22685

Algorithm developments for the Euler equations with calculations of transonic flows p 227 A87-22691

[AIAA PAPER 87-0536] p 227 A87-22691

A global marching technique for the prediction of separated flows over arbitrary airfoils p 227 A87-22725

[AIAA PAPER 87-0591] p 227 A87-22725

Numerical and experimental investigation of a propeller flowfield with a 3-D non-uniform inflow p 228 A87-22735

[AIAA PAPER 87-0607] p 228 A87-22735

Evaluation of a research circulation control airfoil using Navier-Stokes methods p 228 A87-22754

[AIAA PAPER 87-0002] p 228 A87-22754

SUBJECT INDEX

Numerical solutions of Navier-Stokes equations for a
Butler wing
[AIAA PAPER 87-0115] p 228 A87-22755
Initiation of breakdown in slender compressible
vortices p 229 A87-23234
Computations of supersonic flow past lifting bodies
p 229 A87-23284
Computational methods in potential aerodynamics
p 276 A87-23626
Foundation of potential flows p 319 A87-23627
Review of the historical development of surface source
methods p 319 A87-23628
Panel methods - PAN AIR p 276 A87-23629
Unsteady subsonic and supersonic flows - Historical
review; state of the art p 276 A87-23630
Basic principles and double lattice applications in
potential aerodynamics p 276 A87-23631
Comparison of analysis methods used in lifting surface
theory p 276 A87-23632
Introduction to the Green's function method in
aerodynamics p 276 A87-23633
Transonic computational design and analysis
applications p 277 A87-23636
Computational procedures in aerodynamic design
p 277 A87-23637
Experience, issues, and opportunities in steady
transonics p 277 A87-23638
Unsteady transonic flows - Introduction, current trends,
applications p 277 A87-23639
Finite difference methods for the solution of unsteady
potential flows p 277 A87-23640
An integral equation method for potential
aerodynamics p 277 A87-23641
Steady and unsteady incompressible free-wake
analysis p 277 A87-23642
Some new developments in exact integral equation
formulations for sub- or transonic compressible potential
flow p 278 A87-23644
An integral equation for compressible potential flows
in an arbitrary frame of reference p 278 A87-23645
New approach to finite-state modeling of unsteady
aerodynamics p 278 A87-23651
Calculation of supersonic flows with strong
viscous-inviscid interaction p 278 A87-23658
Calculation of transonic potential flow through a
two-dimensional cascade using AF 1 scheme
p 278 A87-23728
A time marching method of explicit scheme for solving
transonic viscous flow within cascades p 278 A87-23755
A discussion about the mean S2 stream surfaces applied
to calculation of quasi-3-D flow in turbomachinery
p 279 A87-23759
Transonic separated solutions for an augmentor wing
p 279 A87-24032
Measurement and prediction of model-rotor flowfields
p 320 A87-24033
Transonic Navier-Stokes solutions for a fighter-like
configuration
[AIAA PAPER 87-0032] p 280 A87-24906
A comparison of inviscid and viscous transonic
separated flows
[AIAA PAPER 87-0036] p 280 A87-24907
Unsteady full potential computations for complex
configurations
[AIAA PAPER 87-0110] p 281 A87-24920
Calculation of three-dimensional cavity flowfields
[AIAA PAPER 87-0117] p 281 A87-24921
On the numerical simulation of the unsteady wake behind
an airfoil
[AIAA PAPER 87-0190] p 282 A87-24934
Numerical simulation by TVD schemes of complex shock
reflections from airfoils at high angle of attack --- Total
Variation Diminishing
[AIAA PAPER 87-0350] p 282 A87-24953
GRUMFOIL - A computer code for the computation of
viscous transonic flow over airfoils
[AIAA PAPER 87-0414] p 282 A87-24959
Viscous transonic airfoil workshop results using
ARC2D
[AIAA PAPER 87-0415] p 283 A87-24960
Using an unfactored predictor-corrector method --- to
simulate transonic flows past airfoils
[AIAA PAPER 87-0423] p 283 A87-24962
A numerical study of viscous transonic flows using RRK
scheme --- Rational Runge-Kutta
[AIAA PAPER 87-0426] p 283 A87-24963
A semiempirical interpolation technique for predicting
full-scale flight characteristics
[AIAA PAPER 87-0427] p 283 A87-24964
The influence of an additional degree of freedom on
subsonic wing rock of slender delta wings
[AIAA PAPER 87-0496] p 283 A87-24970
Blade-vortex interaction
[AIAA PAPER 87-0497] p 284 A87-24971

Numerical method for non-equilibrium hypersonic
boundary layers
[AIAA PAPER 87-0516] p 284 A87-24976
A truncation error injection approach to viscous-inviscid
interaction
[AIAA PAPER 87-540] p 284 A87-24981
Free wake analysis of compressible rotor flows
[AIAA PAPER 87-0542] p 284 A87-24982
A numerical method for the calculation of
incompressible, steady, separated flows around aerofoils
p 285 A87-25002
Numerical modeling of shock wave intersections
p 286 A87-25233
Navier-Stokes solution for a complete re-entry
configuration p 287 A87-25718
Unsteady transonic flow calculations for wing/fuselage
configurations p 287 A87-25720
Analysis of velocity potential around intersecting
bodies p 287 A87-25907
A numerical study of incompressible Navier-Stokes flow
through rectilinear and radial cascade of turbine blades
p 288 A87-26079
Transonic potential flow computations around finite
wings p 288 A87-27475
A method for computation of viscid/inviscid interaction
on transonic compressor cascades p 289 A87-27483
Random vortex method and simulation of vortex
structure behind a triangular prism p 289 A87-27486
Rapid convergence numerical methods for calculating
reactive flows p 323 A87-27529
Computation of transonic flows in turbomachines using
the Runge-Kutta integration scheme p 341 A87-27938
Numerical solutions of viscous transonic flow in
turbomachinery cascades p 342 A87-27962
Euler solutions for highly loaded turbine cascades
p 342 A87-27981
Afterbody flowfield computations at transonic and
supersonic Mach numbers p 342 A87-27983
Inverse aerodynamic design method for aircraft
components p 342 A87-28067
Transonic wing flows using an Euler/Navier-Stokes
zonal approach p 342 A87-28069
Nonplanar, supersonic, three-dimensional, oscillatory,
piecewise continuous-kernel function method
p 342 A87-28073
Calculation of supersonic steady axisymmetric nozzle
and jet p 343 A87-28337
Calculation of aerodynamic heat transfer on blunt-nosed
thin wings at angles of attack p 343 A87-28338
Numerical calculations for the two-dimensional transonic
flows over lifting airfoils in orthogonal stream-line
coordinates p 343 A87-28342
Multigrid acceleration of the isentropic form of the
compressible flow equations p 382 A87-28750
Construction of explicit and implicit symmetric TVD
schemes and their applications --- Total Variation
Diminishing for fluid dynamics computation
p 344 A87-29688
Second-order boundary layers for steady,
incompressible, three-dimensional stagnation point flows
p 345 A87-30075
Conservative full-potential model for unsteady transonic
rotor flows p 345 A87-30279
Transonic airfoil design procedure utilizing a
Navier-Stokes analysis code p 346 A87-31151
Total pressure loss in vortical solutions of the conical
Euler equations p 346 A87-31152
Navier-Stokes simulations of transonic flows over a
practical wing configuration p 346 A87-31153
Analysis of three-dimensional separated flow with the
boundary-layer equations p 346 A87-31156
Hybrid McCormack and implicit beam-warming
algorithms for a supersonic compression corner
p 346 A87-31159
Computation of dynamic stall of a NACA-0012 airfoil
p 347 A87-31160
Self-adaptive-grid method with application to airfoil
flow p 347 A87-31177
Upwind Navier-Stokes solutions for separated periodic
flows p 347 A87-31182
Fast viscous correction method for full-potential
transonic wing analysis p 348 A87-31297
Experiences with the numerical solution of the 3-D
laminar boundary layer equations in streamline
coordinates p 407 A87-31624
Calculation of evaporation under conditions of strong
vapor outflow p 461 A87-31743
Calculation of transonic potential flow through a
two-dimensional cascade using AF1 scheme
p 408 A87-32105
Supersonic inviscid-flow - A three-dimensional
characteristics approach p 408 A87-32115
Direct simulation of hypersonic flows over blunt
wedges p 408 A87-32160

COMPUTATIONAL FLUID DYNAMICS

X-29 Flight Test Program including wind tunnel and
computational support
[SAE PAPER 861642] p 427 A87-32584
Flow simulations for an aft-mounted propfan using Euler
equations
[SAE PAPER 861718] p 408 A87-32609
Application of a panel method (QUADPAN) to the
prediction of propeller blade loads
[SAE PAPER 861743] p 440 A87-32618
Porous aerofoil analysis using viscous-inviscid coupling
at transonic speeds p 410 A87-33164
Direct-inverse method for airfoils at high angles of
attack p 410 A87-33242
Advanced method for computing flow around wings with
rear separation and ground effect p 410 A87-33246
Applications of a fast, time accurate full potential scheme
to a statically flexible wing in the transonic regime
[AIAA PAPER 87-0707] p 411 A87-33655
Flutter calculations using Doublet Lattice aerodynamics
modified by the full potential equations
[AIAA PAPER 87-0882] p 412 A87-33703
Euler calculations for flowfield of a helicopter rotor in
hover p 430 A87-34506
Computational method for screened two-dimensional
wind tunnel inlets p 413 A87-34513
Analysis of viscous transonic flow over airfoil sections
[AIAA PAPER 87-0420] p 413 A87-34723
Full potential transonic multigrid code for arbitrary
configurations p 413 A87-35013
A method for computing flow fields around moving
bodies p 484 A87-35552
Transonic gas flow past a plate p 484 A87-35816
A solution to the variational problem of the optimal shape
of supersonic nozzles p 484 A87-35817
Aspects of the calculation of potential flow past a slot
in a system of airfoil profiles p 484 A87-35916
Modeling of large-scale mixing processes in an
expanding supersonic jet p 485 A87-36093
Finite volume step method for inviscid and viscous
supersonic flows
[DGLR PAPER 86-162] p 486 A87-36790
Selective elimination - A fast solver for real-time
unsteady integration of the Euler equations in explicit
formulation
[DGLR PAPER 86-163] p 486 A87-36791
Simulation of viscous flows by zonal solutions of Euler,
boundary-layer and Navier-Stokes equations
[MBB-S-PUB-272] p 486 A87-36801
A computational method for three-dimensional flow
fields of transonic turbine stages and its application
p 486 A87-36916
Transonic flow along arbitrary stream filament of
revolution solved by separate computations with shock
fitting p 486 A87-36917
Analysis of computation methods in S2 stream surfaces
for quasi-three-dimensional design of turbine
p 486 A87-36920
Lifting surface calculations in the Laplace domain with
application to root loci p 487 A87-37108
Rapid computation of unsteady transonic cascade
flows p 487 A87-37118
Unsteady aerodynamics in rotary-wing aeroelasticity -
A review p 487 A87-37204
Computations with 3-D Euler code for wings
p 487 A87-37205
Numerical simulation of an inviscid supersonic flow past
a sphere by a self adjusting hybrid scheme for shock
capturing p 488 A87-37211
A mutually profitable alliance - Asymptotic expansions
and numerical computations --- in fluid mechanics
p 533 A87-37215
Modelling of separating flow and its stability
p 533 A87-37216
Study of the aerodynamic field of a helicopter rotor in
hover - Comparison between theory and experiment
[AAAF PAPER NT 86-19] p 489 A87-38042
Validation of aerodynamic models for predicting the
aeroelastic behavior of aircraft with exterior stores
[AAAF PAPER NT 86-21] p 489 A87-38044
High-lift - Theoretical and experimental problems
[AAAF PAPER NT 86-22] p 489 A87-38045
Unified model for the calculation of blade profile losses
of axial compressors p 489 A87-39079
Accurate transonic wave drag prediction using simple
physical models p 552 A87-39531
Computation of low-speed flow with heat addition
p 552 A87-39536
Computation of internal flows at high Reynolds number
by numerical solution of the Navier-Stokes equations
p 553 A87-39709
Euler analysis of transonic propeller flows
p 553 A87-39813
Doublet-panel method for half-model wind-tunnel
corrections p 598 A87-39893

Theoretical evaluation of the aerodynamic performance of a transonic wing [ONERA-20/3423-AY] p 810 N87-28507

Numerical calculation of unsteady inviscid rotational transonic flow past airfoils using Euler equations p 811 N87-28510

Implementation and validation of a wake model for low-speed forward flight [NASA-CR-181341] p 811 N87-28514

Future Research on Transonic Unsteady Aerodynamics and Its Aeroelastic Applications [AGARD-R-749] p 812 N87-28518

Development of supersonic computational aerodynamic program using panel method [NASA-TT-20113] p 813 N87-28526

Some numerical calculations by using linear classical sonic theories approached from sub- or supersonic speeds [NASA-TT-20112] p 813 N87-28527

Contribution to the description of rotating flow instabilities and inlet perturbations in axial flow compressors [ETN-87-90040] p 850 N87-28845

COMPUTATIONAL GRIDS

Euler solutions on O-O grids around wings using local refinement p 6 A87-11512

Experiences with an unfactored implicit predictor-corrector method p 47 A87-11522

A simulation of rotor-stator interaction using the Euler equations and patched grids p 7 A87-11536

Numerical solution of the Euler equations using rational Runge-Kutta method p 7 A87-11538

Calculation of strong viscous/inviscid interactions on airfoils by zonal solutions of the Navier-Stokes equations p 7 A87-11540

A survey of composite grid generation for general three-dimensional regions p 56 A87-11779

An analytical parametric investigation of numerical nonlinear vortex-lattice methods p 67 A87-13638

Numerical solution of transonic potential flows with finite elements method using multigrid technique p 68 A87-13900

Influence of trailing-edge meshes on skin friction in Navier-Stokes calculations p 71 A87-14125

Vectorizable multigrid algorithms for transonic-flow calculations p 72 A87-14652

The influence of the choice of computational parameters on the results of three-dimensional potential methods --- transonic flow [ONERA, TP NO. 1986-169] p 214 A87-21069

The validation of solution methods for the Navier-Stokes equations for a compressible fluid - Results of the 'GAMM-Workshop' in Nice [ONERA, TP NO. 1986-184] p 215 A87-21083

New numerical techniques in the method of singularities for application to complex three-dimensional configurations --- aerodynamic flow simulation [ONERA, TP NO. 1986-186] p 215 A87-21085

A combined integrating- and differentiating-matrix formulation for boundary-value problems on rectangular domains p 270 A87-21270

TRANAIR - A computer code for transonic analyses of arbitrary configurations [AIAA PAPER 87-0034] p 216 A87-22369

A three-dimensional grid generation method for gas-turbine combustor flow computations [AIAA PAPER 87-0204] p 249 A87-22482

A zonal grid generation method for complex configurations [AIAA PAPER 87-0276] p 270 A87-22528

A diagonal implicit multigrid algorithm for the Euler equations [AIAA PAPER 87-0354] p 223 A87-22578

Euler calculations for wings using Cartesian grids [AIAA PAPER 87-0356] p 223 A87-22579

Three-dimensional Euler solutions on blocked grids using an implicit two-pass algorithm [AIAA PAPER 87-0450] p 225 A87-22642

Improvements to the aircraft Euler method [AIAA PAPER 87-0452] p 225 A87-22644

Flow simulations for a complex airplane configuration using Euler equations [AIAA PAPER 87-0454] p 225 A87-22646

Solution of the two-dimensional Navier-Stokes equations using sparse matrix solvers [AIAA PAPER 87-0603] p 285 A87-24991

Multigrid solution of inviscid transonic flow through rotating blade passages [AIAA PAPER 87-0608] p 285 A87-24992

Multigrid acceleration of the isenthalpic form of the compressible flow equations p 382 A87-28750

Mesh generation by a sequence of transformations --- for three dimensional aircraft shape mapping p 361 A87-30443

Two- and three-dimensional viscous computations of a hypersonic inlet flow [AIAA PAPER 87-0283] p 346 A87-31106

Self-adaptive-grid method with application to airfoil flow p 347 A87-31177

Full potential transonic multigrid code for arbitrary configurations p 413 A87-35013

A vertex based multigrid algorithm for three dimensional compressible flow calculations p 489 A87-38493

Impact of numerical methods on gas turbine combustor design and development p 515 A87-38959

Multigrid approximate factorization scheme for two-element airfoil flows p 552 A87-39529

Computation of internal flows at high Reynolds number by numerical solution of the Navier-Stokes equations p 553 A87-39709

Improving the accuracy and cutting the time required in numerical investigation of transonic flow of gas in turbomachine cascades p 554 A87-40871

Multigrid methods for calculating the lifting potential incompressible flows around three-dimensional bodies p 555 A87-41411

FAS multigrid employing ILU/SIP smoothing - A robust fast solver for 3D transonic potential flow p 555 A87-41419

Calculation of transonic steady and oscillatory pressures on a low aspect ratio model p 556 A87-41632

Three dimensional mesh generation by triangulation of arbitrary point sets [AIAA PAPER 87-1124] p 617 A87-42073

Grid generation and inviscid flow computation about cranked-winged airplane geometries [AIAA PAPER 87-1125] p 558 A87-42074

Time-accurate Euler equations solutions on dynamic blocked grids [AIAA PAPER 87-1127] p 558 A87-42076

Viscous flow computations using a composite grid [AIAA PAPER 87-1128] p 617 A87-42077

Application of MACSYMA and sparse matrix technology to multielement airfoil calculations [AIAA PAPER 87-1142] p 618 A87-42088

Multigrid acceleration of a relaxation procedure for the RNS equations [AIAA PAPER 87-1145] p 558 A87-42091

Extension and applications of flux-vector splitting to unsteady calculations on dynamic meshes [AIAA PAPER 87-1152] p 559 A87-42098

A fast implicit MAF scheme for solving 3D transonic potential flow in turbomachines --- multigrid approximate factorization [AIAA PAPER 87-1153] p 559 A87-42099

Example on how to model and simulate turbulence for flight simulators p 543 N87-22353

Implementation of turbulence models into simulators p 527 N87-22354

The assessment and evaluation of combat performance improvements p 509 N87-22675

Frequency-response identification of XV-15 tilt-rotor aircraft dynamics [NASA-TM-89428] p 524 N87-22690

The 2GCHAS: A high productivity software development environment p 548 N87-23162

Evaluation of the angle of attack limiter of the F-16 C/D aircraft [AD-A177941] p 585 N87-23612

Piloted simulation in the development of the XV-15 tilt rotor research aircraft p 600 N87-23646

Utilization of simulation to support F-14A low altitude high angle of attack flight testing p 600 N87-23649

Numerical investigation of V/STOL jet induced interactions p 572 N87-24413

Unsteady three-dimensional simulation of VTOL upwash fountain turbulence p 572 N87-24414

Radar target identification techniques applied to a polarization diverse aircraft data base [AD-A180044] p 614 N87-24599

Optimal cooperative control synthesis of active displays [NASA-CR-4058] p 705 N87-25807

Computational chemistry p 706 N87-26023

An investigation of helicopter higher harmonic control using a dynamic system coupler simulation p 682 N87-26051

An investigation of some simple models for the F/A-18 flight dynamics [AD-A181638] p 752 N87-26903

COMPUTERS

Compressible, viscous, multi-foil analysis and design on a micro-computer [AIAA PAPER 87-2556] p 727 A87-49107

Design verification of SIFT [NASA-CR-4097] p 858 N87-30099

CONCAVITY

On the occurrence of regular reflection of shocks in concave corner flows p 10 A87-12586

CONCENTRATION (COMPOSITION)

Diagnostics in supersonic combustion [AIAA PAPER 87-1787] p 690 A87-45202

CARS approaches to simultaneous measurements of H₂ and H₂O concentration and temperature in H₂-air combustion systems p 605 N87-23792

CONCORDE AIRCRAFT

A review of the technical development of Concorde p 96 A87-16408

Commercial supersonic operations - Ten years of experience with Concorde [SAE PAPER 861683] p 427 A87-32599

CONCRETE STRUCTURES

Investigation of the components of the NAL high Reynolds number two-dimensional wind tunnel. Part 4: Design, construction and performance of the exhaust silencer [NASA-TM-88513] p 258 N87-15237

Consequence of layer separation on pavement performance [DOT/FAA/PM-86/48] p 602 N87-23661

CONCRETES

Criteria for asphalt-rubber concrete in civil airport pavements: Mixture design [DOT/FAA/PM-86/39] p 129 N87-11910

Asphalt-rubber SAMI (Stress-Absorbing Membrane Interlayers) field evaluation [AD-A169700] p 194 N87-14356

Development of mechanistic flexible pavement design concepts for the heavyweight F-15 aircraft [AD-A170902] p 194 N87-14357

Facilities technology application tests: Fuel-resistant pavement sealers [AD-A171473] p 258 N87-15238

Criteria for asphalt-rubber concrete in civil airport pavements. Vol. 2: Evaluation of asphalt-rubber concrete [DOE/FAA/PM-86/39-VOL-2] p 526 N87-21964

Performance of cracked and sealed rigid airport pavements [DOT/FAA/PM-87/4] p 526 N87-21965

CONCURRENT PROCESSING

The implementation and use of Ada on distributed systems with high reliability requirements [NASA-CR-179842] p 137 N87-12265

CONDENSATION

Transonic nozzle flow instability due to shock wave/condensation front interaction [AIAA PAPER 87-1355] p 567 A87-42409

CONDUCTIVE HEAT TRANSFER

- The finite contour method --- for transient heat conduction in plate p 270 A87-22442
 [AIAA PAPER 87-0148]
 Inverse design of coolant flow passages in ceramically coated scram jet combustor struts p 514 A87-38807
 Further studies of helicopter rotor ice accretion and protection p 738 A87-48945

CONES

- A study of the effect of the separation zone on the oscillations of a cone p 484 A87-35824
 Optimization of hypersonic waveriders derived from cone flows including viscous effects p 413 A87-20193

CONFERENCES

- Flammability and sensitivity of materials in oxygen-enriched atmospheres; Proceedings of the Symposium, Washington, DC, April 23, 24, 1985. Volume 2 p 38 A87-10859
 Airborne reconnaissance IX; Proceedings of the Meeting, San Diego, CA, August 20, 21, 1985 [SPIE-561] p 18 A87-10931
 Conference on Numerical Methods in Fluid Mechanics, 6th, Goettingen, West Germany, September 25-27, 1985, Proceedings p 47 A87-11501
 Recent advances in aeroacoustics p 58 A87-11766
 Numerical methods for engine-airframe integration p 23 A87-11776
 Numerical and physical aspects of aerodynamic flows III; Proceedings of the Third Symposium, California State University, Long Beach, CA, January 21-24, 1985 p 8 A87-11782
 Radio Technical Commission for Aeronautics, Annual Assembly Meeting and Technical Symposium, Washington, DC, November 19-21, 1985, Proceedings p 1 A87-11801
 Annual Aerospace Applications of Artificial Intelligence Conference, 1st, Dayton, OH, September 16-19, 1985, Proceedings p 56 A87-12211
 Progress in advanced materials and processes: Durability, reliability and quality control; Proceedings of the Sixth International European SAMPE Conference, Scheveningen, Netherlands, May 28-30, 1985 p 39 A87-12651
 Navigation and environment; Proceedings of the Fifth International Congress, Tokyo, Japan, October 1-5, 1985 p 20 A87-12676
 Joint National Symposium on the Influence of Aviation on Engineering and the Future of Aeronautics in Australia, Melbourne, Australia, August 8, 9, 1985, Preprints and Supplementary Papers p 1 A87-13001
 Fire safety science; Proceedings of the First International Symposium, Gaithersburg, MD, October 7-11, 1985 p 78 A87-13186
 1986 American Control Conference, 5th, Seattle, WA, June 18-20, 1986, Proceedings. Volumes 1, 2, & 3 p 133 A87-13301
 ION, National Technical Meeting, Long Beach, CA, January 21-23, 1986, Proceedings p 85 A87-13532
 Aero- and hydro-acoustics; Proceedings of the Symposium, Ecole Centrale de Lyon, Ecully, France, July 3-5, 1985 p 131 A87-13585
 Fibre reinforced composites 1986; Proceedings of the Second International Conference, University of Liverpool, England, April 8-10, 1986 p 121 A87-13613
 Israel Annual Conference on Aviation and Astronautics, 27th, Haifa, Israel, February 27, 28, 1985, Collection of Papers p 64 A87-13635
 National Specialist's Meeting on Crashworthy Design of Rotorcraft, Georgia Institute of Technology, Atlanta, April 7-9, 1986, Proceedings p 89 A87-13662
 Aerodynamic Decelerator and Balloon Technology Conference, 9th, Albuquerque, NM, October 7-9, 1986, Technical Papers p 79 A87-13776
 International Aerospace and Ground Conference on Lightning and Static Electricity, 11th, Dayton, OH, June 24-26, 1986, Technical Papers p 80 A87-15001
 Recent advances in aerodynamics p 73 A87-15451
 Advanced actuation, controls and integration for aerospace vehicles; Proceedings of the Symposium, San Diego, CA, October 9, 1985 [SAE P-170] p 112 A87-15476
 Identification and system parameter estimation 1985; Proceedings of the Seventh Symposium, University of York, England, July 3-7, 1985. Volumes 1 & 2 p 135 A87-16176
 NAECON 1986; Proceedings of the National Aerospace and Electronics Conference, Dayton, OH, May 19-23, 1986. Volumes 1, 2, 3, & 4 p 141 A87-16726
 International Conference on Structural Adhesives in Engineering, University of Bristol, England, July 2-4, 1986, Proceedings p 198 A87-18183
 American Helicopter Society, Annual Forum, 42nd, Washington, DC, June 2-4, 1986, Proceedings. Volumes 1 & 2 p 143 A87-19201

Institute of Navigation, Annual Meeting, 42nd, Seattle, WA, June 24-26, 1986, Proceedings

- Air worthy p 159 A87-19351
 Computational methods in potential aerodynamics p 273 A87-23264
 Industrial vibration modelling: Polymodel 9; Proceedings of the Ninth Annual Conference, Newcastle-upon-Tyne, England, May 21, 22, 1986 p 322 A87-25876
 Manufacturing applications of lasers; Proceedings of the Meeting, Los Angeles, CA, Jan. 23, 24, 1986 [SPIE-621] p 322 A87-26676
 Inter-Noise 86 - Progress in noise control; Proceedings of the International Conference on Noise Control Engineering, Cambridge, MA, July 21-23, 1986. Volumes 1 & 2 p 333 A87-27101
 Starting systems technology II; Proceedings of the Aerospace Technology Conference and Exposition, Long Beach, CA, Oct. 13-16, 1986 [SAE SP-678] p 367 A87-29576
 Wind shear; Proceedings of the Aerospace Technology Conference and Exposition, Long Beach, CA, Oct. 13-16, 1986 [SAE SP-681] p 351 A87-29584
 V/STOL/STOVL; Proceedings of the Aerospace Technology Conference and Exposition, Long Beach, CA, Oct. 13-16, 1986 [SAE SP-680] p 359 A87-29634
 New materials in civil aviation; Proceedings of the Aerospace Technology Conference and Exposition, Long Beach, CA, Oct. 13-16, 1986 [SAE SP-682] p 339 A87-29640
 Simulators III; Proceedings of the Conference, Norfolk, VA, Mar. 10-12, 1986 p 386 A87-30845
 Digital Avionics Systems Conference, 7th, Fort Worth, TX, Oct. 13-16, 1986, Proceedings p 401 A87-31451
 BASTART 85 - Bonded aircraft structures, technical application and repair techniques; Proceedings of the Workshop, Bremen, West Germany, Jan. 22-24, 1985 p 481 A87-35276
 Yearbook 1986 I; DGLR, Annual Meeting, Munich, West Germany, Oct. 8-10, 1986, Reports p 482 A87-36751
 AUTOTESTCON '86; Proceedings of the International Automatic Testing Conference, San Antonio, TX, Sept. 8-11, 1986 p 546 A87-38651
 Symposium on Vehicle Crashworthiness Including Impact Biomechanics; Proceedings of the Winter Annual Meeting, Anaheim, CA, Dec. 7-12, 1986 p 495 A87-38693
 PLANS '86 - Position Location and Navigation Symposium, Las Vegas, NV, Nov. 4-7, 1986, Record p 579 A87-41351
 Computational Fluid Dynamics Conference, 8th, Honolulu, HI, June 9-11, 1987, Technical Papers p 557 A87-42051
 Case histories involving fatigue and fracture mechanics; Proceedings of the Symposium, Charleston, SC, Mar. 21, 22, 1985 p 692 A87-42851
 Helicopter Rotor Icing Symposium, London, England, Jan. 14, 1986, Proceedings p 646 A87-44701
 Materials in aerospace; Proceedings of the First International Conference, London, England, Apr. 2-4, 1986. Volumes 1 & 2 p 603 A87-44163
 Radar Technology 1986; Symposium, 6th, Bremen, West Germany, Nov. 4-6, 1986, Reports p 697 A87-45876
 International Symposium on Air Breathing Engines, 8th, Cincinnati, OH, June 14-19, 1987, Proceedings p 673 A87-46176
 1986 report to the aerospace profession; Proceedings of the Thirtieth Symposium, Beverly Hills, CA, Sept. 24-27, 1986 p 742 A87-47835
 Yearbook 1986 II; DGLR, Annual Meeting, Munich, West Germany, Oct. 8-10, 1986, Reports p 711 A87-48154
 AIAA Lighter-Than-Air Technology Conference, 7th, Monterey, CA, Aug. 17-19, 1987, Technical Papers p 711 A87-48638
 Composites for general aviation aircraft; Proceedings of the General Aviation Aircraft Meeting and Exposition, Wichita, KS, Apr. 28-30, 1987 [SAE SP-717] p 712 A87-48686
 General aviation aircraft crash dynamics; Proceedings of the General Aviation Aircraft Meeting and Exposition, Wichita, KS, Apr. 28-30, 1987 [SAE SP-716] p 736 A87-48692
 AIAA Applied Aerodynamics Conference, 5th, Monterey, CA, Aug. 17-19, 1987, Technical Papers p 721 A87-49051

 Society of Flight Test Engineers, Annual Symposium, 17th, Washington, DC, Aug. 10-14, 1986, Proceedings p 713 A87-49198
 AIAA Atmospheric Flight Mechanics Conference, Monterey, CA, Aug. 17-19, 1987, Technical Papers p 767 A87-49577

- Designing for low cost fabrication; Proceedings of the Workshop, Loughborough University of Technology, England, Apr. 16, 17, 1986 p 714 A87-49627
 International Helicopter Forum, 16th, Bueckeburg, West Germany, June 11, 12, 1986 and International Aerospace Exhibition, Hanover, West Germany, June 6-15, 1986, Reports p 714 A87-49638
 Conference on High-Temperature Corrosion of Superalloys, London, England, Feb. 11, 12, 1986, Proceedings p 840 A87-51351
 1986 IEEE International Symposium on Electromagnetic Compatibility, San Diego, CA, Sept. 16-18, 1986, Symposium Record p 848 A87-52517
 Specialists' Meeting on Rotary Wing Propulsion Systems, Williamsburg, VA, Nov. 12-14, 1986, Technical Papers p 801 A87-53413
 Report of the International Symposium on Computational Fluid Dynamics, Tokyo p 49 A87-10029
 Doppler Radar Detection of Wind Shear [NASA-CP-2435] p 17 A87-10054
 Proceedings of the 13th Symposium on Aircraft Integrated Data Systems [DFVLR-MITT-86-04] p 30 A87-10075
 Turbine Engine Hot Section Technology, 1984 [NASA-CP-2339] p 52 A87-11180
 Recent Experiences in Multidisciplinary Analysis and Optimization, part 1 [NASA-CP-2327-PT-1] p 96 A87-11717
 First International Conference Materials in Aerospace [BAE-S85/AMR/0080] p 144 A87-14243
 Advanced Joining of Aerospace Metallic Materials --- conference proceedings [AGARD-CP-398] p 324 A87-17051
 Joint University Program for Air Transportation Research, 1983 [NASA-CP-2451] p 340 A87-18520
 Multifunction Radar for Airborne Applications --- conference [AGARD-CP-381] p 387 A87-18721
 AAAI (American Association on Artificial Intelligence) Workshop on AI (Artificial Intelligence) Simulation [AD-A174053] p 396 A87-19031
 The Repair of Aircraft Structures Involving Composite Materials [AGARD-CP-402] p 403 A87-20174
 Net shape technology in aerospace structures. Volume 1 [AD-A176508] p 406 A87-20957
 Net shape technology in aerospace structures. Volume 2. Appendix. Precision Forgings in Aerospace Structures. Presentations of a workshop held on December 3-5, 1984 in Oxnard, California [AD-A176509] p 406 A87-20958
 Net shape technology in aerospace structures. Volume 3. Appendix. Emerging Net Shape Technologies. Presentations of a workshop held on March 27-29, 1985 in Santa Barbara, California [AD-A176510] p 406 A87-20959
 Advanced Instrumentation for Aero Engine Components [AGARD-CP-399] p 467 A87-21170
 Efficient Conduct of Individual Flights and Air Traffic or optimum Utilization of Modern Technology for the Overall Benefit of Civil and Military Airspace Users [AGARD-CP-410] p 500 A87-21881
 Transonic and Supersonic Phenomena in Turbomachines [AGARD-CP-401] p 515 A87-21927
 Atmospheric Turbulence Relative to Aviation, Missile, and Space Programs [NASA-CP-2468] p 543 A87-22341
 Flight Simulation [AGARD-CP-408] p 599 A87-23633
 Aeroelasticity in axial-flow turbomachines. Volume 1: Unsteady turbomachinery aerodynamics [AGARD-AG-298-VOL-1] p 571 A87-24398
 Joint University Program for Air Transportation Research, 1985 [NAS 1.55:2453] p 715 A87-27596
 Modeling of Systems for Aircraft Guidance and Air Traffic Control for Research, Development, and Evaluation --- conference [DFVLR-MITT-86-24] p 821 A87-28530
 ACEE composite structures technology [NASA-CR-172359] p 844 A87-28613
 ACEE composite structures technology [NASA-CR-172358] p 844 A87-28614
 ACEE composite structures technology [NASA-CR-172360] p 845 A87-28615
 Advances in Guidance and Control Systems and Technology [AGARD-CP-411] p 822 A87-29474
CONFIDENCE LIMITS
 Efficient computation of parameter confidence intervals [AIAA PAPER 87-2624] p 795 A87-49623

CONFIGURATION INTERACTION

CONFIGURATION INTERACTION

A simulation of rotor-stator interaction using the Euler equations and patched grids p 7 A87-11536

CONFIGURATION MANAGEMENT

Design verification of SIFT [NASA-CR-4097] p 858 N87-30099

CONGRESSIONAL REPORTS

NASA authorizations, fiscal year 1987 [GPO-61-975] p 274 N87-15904

CONICAL BODIES

Conical wing of maximum lift-to-drag ratio in a supersonic gas flow p 4 A87-10615

A study of the shape of the cross-section profile of a minimum-drag three-dimensional conical body moving in a rarefied gas p 286 A87-25231

Numerical modeling of shock wave intersections p 286 A87-25233

Wing and conical body of arbitrary cross section in supersonic flow p 413 A87-34507

Calculation of three-dimensional supersonic flow past cone-like bodies with a separated shock wave p 805 A87-51671

Development of supersonic computational aerodynamic program using panel method [NASA-TT-20113] p 813 N87-28526

CONICAL CAMBER

Study of lee-side flows over conically cambered delta wings at supersonic speeds, part 1 [NASA-TP-2660-PT-1] p 571 N87-23597

Study of lee-side flows over conically cambered Delta wings at supersonic speeds, part 2 [NASA-TP-2660-PT-2] p 643 N87-25301

Constant-density approximation to Taylor-Maccoll solution p 71 A87-14127

Finite-volume Euler and Navier-Stokes solvers for three-dimensional and conical vortex flows over delta wings [AIAA PAPER 87-0041] p 217 A87-22374

Normal force characteristics at supersonic speeds of sharp edged delta wings [AIAA PAPER 87-0214] p 221 A87-22491

Conical, separated flows with shock and shed vorticity p 341 A87-27957

The observation of transition in shock wind tunnel p 343 A87-28341

Normal-force characteristics of sharp-edged delta wings at supersonic speeds p 553 A87-39894

Stability of axisymmetric boundary layers on sharp cones at hypersonic Mach numbers [AIAA PAPER 87-1413] p 567 A87-42442

Supersonic flow around tip sides of wings p 12 N87-10033

CONICAL NOZZLES

Density field of a viscous gas jet issuing from a conical nozzle into vacuum p 4 A87-10603

Prediction of velocity coefficient and spray cone angle for simplex swirl atomizers p 125 A87-13830

Free-jet investigation of mechanically suppressed, high radius ratio conical plug model nozzles [NASA-CR-3596] p 860 N87-29315

CONICAL SHELLS

Full-strength and minimum-weight conical and composite shells of revolution p 610 A87-42137

CONSERVATION LAWS

Energetics of oscillating lifting surfaces using integral conservation laws [AIAA PAPER 87-0193] p 220 A87-22474

Construction of explicit and implicit symmetric TVD schemes and their applications --- Total Variation Diminishing for fluid dynamics computation p 344 A87-29688

CONSOLES

Test and evaluation of a multifunction keyboard and a dedicated keyboard for control of a flight management computer [NASA-CR-178202] p 183 N87-14330

CONSTITUTIVE EQUATIONS

Biaxial constitutive equation development p 53 N87-11217

CONSTRAINTS

A direct method for enforcing equality constraints in optimal output feedback p 134 A87-13353

Guidebook for analysis of tether applications [NASA-CR-178904] p 38 N87-10169

CONSTRUCTION

Advanced construction procedures: Confined bases for airport pavements [FAA/PM-86/9] p 118 N87-11799

Asphalt-rubber SAMI (Stress-Absorbing Membrane Interlayers) field evaluation [AD-A169700] p 194 N87-14356

CONSTRUCTION INDUSTRY

General aviation aircraft utilization in the construction industry [AD-A183155] p 802 N87-29404

CONTACT LOADS

A microgravity experiment to measure surface forces and surface energies in solids p 454 A87-32559

Selection of admissible contact stresses for toothed gears of aircraft engines p 663 A87-43605

CONTAINERS

Standardizing air cargo containers p 155 A87-17418

CONTAMINATION

Response of a small-turboshaft-engine compression system to inlet temperature distortion [NASA-TM-83765] p 35 N87-10100

Techniques to determine particulates in liquid fuels [DE87-002028] p 458 N87-21135

CONTINGENCY

Contingency power for small turboshaft engines using water injection into turbine cooling air [AIAA PAPER 87-1906] p 668 A87-45289

Contingency power for small turboshaft engines using water injection into turbine cooling air [NASA-TM-89817] p 442 N87-20280

CONTINUITY EQUATION

On the non-uniqueness of solutions for boundary value problems in transonic flows p 553 A87-39924

Large-eddy numerical simulation of an array of three-dimensional impinging jets [AD-A182459] p 850 N87-28835

CONTINUUM FLOW

Computational fluid dynamics near the continuum limit [AIAA PAPER 87-1115] p 558 A87-42064

CONTINUUM MECHANICS

Design sensitivity analysis of nonlinear structural response p 390 N87-18863

Analysis of structures with rotating, flexible substructures [AD-A178903] p 542 N87-23004

CONTOURS

B-SURF (three-dimensional CAD) system for designing and manufacturing of products with complex contour p 206 A87-18538

CONTRACT MANAGEMENT

The system engineering and integration contract - An overview p 61 A87-11804

F/A-18 Hornet: Reliability development testing - An update p 299 A87-26035

CONTRACTORS

Air traffic system: Pilot program to contract out maintenance at selected facilities [PB87-186607] p 741 N87-26894

CONTRAROTATING PROPELLERS

Noise and performance of a counter-rotation propeller p 105 A87-14366

Basic analyses for optimum propulsion efficiency of a counter rotating ATP --- Advanced Turbo Prop p 590 A87-39266

UDF/727 flight test program [AIAA PAPER 87-1733] p 666 A87-45171

Flow behind single- and dual-rotation propellers at angle of attack [AIAA PAPER 87-1750] p 634 A87-45183

A panel method for counter rotating propfans [AIAA PAPER 87-1890] p 668 A87-45279

Extension of local circulation method to counter rotation propeller [AIAA PAPER 87-1891] p 635 A87-45280

A study of some factors affecting the performance of a contra-rotating axial compressor stage p 639 A87-46211

Study of the aerodynamics of high-speed propellers [ONERA, TP NO. 1987-61] p 640 A87-46761

Unducted fan aerodynamic design [ASME PAPER 87-GT-233] p 759 A87-48717

A study of the leading edge vortex and tip vortex on prop-fan blades [ASME PAPER 87-GT-234] p 719 A87-48718

The acoustic experimental investigation of counterrotating propeller configurations [SAE PAPER 871031] p 796 A87-48760

Cruise noise of counterrotation propeller at angle of attack in wind tunnel [NASA-TM-88869] p 139 N87-13252

CONTROL

1986 American Control Conference, 5th, Seattle, WA, June 18-20, 1986, Proceedings. Volumes 1, 2, & 3 p 133 A87-13301

NASA B737 flight test results of the total energy control system [NASA-CR-178285] p 775 N87-26918

CONTROL BOARDS

Reconfigurable display panel using embedded Ada p 472 A87-31509

Test and evaluation of a multifunction keyboard and a dedicated keyboard for control of a flight management computer [NASA-CR-178202] p 183 N87-14330

CONTROL CONFIGURED VEHICLES

Determination of optimal position of actuators for flexible flight vehicles p 190 A87-18528

Experiments on reduction of propeller induced interior noise by active control of cylinder vibration p 361 A87-30933

Control operations in advanced aerospace systems p 474 A87-32117

Design of CCV flight control system of STOL flying boat p 680 A87-45097

Fly-by-wire system and control laws of the T-2 control configured vehicle [AIAA PAPER 87-2586] p 774 A87-50549

Longitudinal handling qualities of the T-2 Control Configured Vehicle [AIAA PAPER 87-2587] p 774 A87-50550

Interactions between an aircraft structure and active control systems p 835 A87-52964

CONTROL EQUIPMENT

MTFCS (multiple target formation flight control system) Formation position sensor trade-off analysis p 110 A87-13536

Integrated active control systems: Methods of algorithmic integration --- Russian book p 135 A87-14682

A new technology in energy-efficient electrically driven aircraft environmental control systems p 166 A87-18116

Flight testing of flight control and navigation equipment --- Russian book p 497 A87-36588

Synthesis of time-invariant linear systems under determinate and random excitations --- for flight vehicle motion stability p 521 A87-39009

Effects of redundancy configuration and its management mode on the reliability of flight control system p 595 A87-39422

Simulator evaluations of inceptors for ACT helicopters p 678 A87-43405

Full-scale engine demonstration of an advanced sensor failure detection isolation, and accommodation algorithm - Preliminary results [AIAA PAPER 87-2259] p 763 A87-50422

Aircraft control tower service [ETN-87-99169] p 357 N87-19371

Full-scale engine demonstration of an advanced sensor failure detection, isolation and accommodation algorithm: Preliminary results [NASA-TM-89880] p 536 N87-22097

Auxiliary data input device [NASA-CASE-LAR-13626-1] p 700 N87-25584

CONTROL MOMENT GYROSCOPES

Controlling the elastic vibrations of aircraft structures by means of control moment gyroscopes p 188 A87-17564

CONTROL RODS

The use of discrete minimization in the design of a straight control section in the fuselage of transport aircraft p 358 A87-28151

CONTROL SIMULATION

ATTAS - The new test bed p 92 A87-14003

Non-iterative parameter identification techniques p 206 A87-19238

Pilot/vehicle analysis of the lateral/vertical control of a twin-lift helicopter configuration [AIAA PAPER 87-0345] p 253 A87-22571

Use of microprocessor elements in simulation of digital avionics systems p 450 A87-31473

A simulation platform for three-axis attitude control of a large balloon gondola p 436 A87-32485

Pre- and post-flight-test models versus measured skyship-500 control responses [AIAA PAPER 87-2508] p 765 A87-48650

Simulation studies of translation rate command systems for hover and low speed flight [AIAA PAPER 87-2286] p 767 A87-49579

Simulation evaluation of the control system command monitoring concept for the NASA V-STOL research aircraft (VSRA) [AIAA PAPER 87-2255] p 770 A87-50418

Helicopter flight control research: A demanding application of piloted simulation [RAE-TM-FS(B)-595] p 191 N87-13445

Simulation of an integrated fire and flight control system for air-to-air gunnery [ETN-87-99479] p 449 N87-20293

CONTROL STABILITY

Design analysis and methodology for evaluating flight control systems [AIAA PAPER 86-2655] p 189 A87-17904

Sensitivity analysis of automatic flight control systems using singular-value concepts p 310 A87-23978

The elimination of limit cycles of an aircraft flight control system-linear model following approach p 311 A87-24724

Stability robustness improvement using constrained optimization techniques p 474 A87-32231

 Development of in-flight simulation aircraft for research and training applications in UK p 602 A87-23658
 A combined stochastic feedforward and feedback control design methodology with application to autoland design [NASA-CR-4078] p 705 A87-25806
 Optimal cooperative control synthesis of active displays [NASA-CR-4058] p 705 A87-25807
 Singular trajectories in airplane cruise-dash optimization [NASA-CR-180636] p 659 A87-26035
 Multi-input multi-output system control for experimental aircraft [NASA-CR-181197] p 775 A87-26915
 An interactive synthesis approach for robust active flutter suppression control law design p 776 A87-27673
 Integrated Application of Active Controls (IAAC) technology to an advanced subsonic transport project: Test act system validation [NASA-CR-172525] p 836 A87-28563
 NYANS: A package for time varying control systems --- computer aided design [FOA-C-20642-2.1] p 858 A87-29174
 Small-scale rotor test rig capabilities for testing vibration alleviation algorithms [NASA-TM-100002] p 858 A87-30102

CONTROL VALVES
 Collision of multiple supersonic jets related to pip noise generation in cage valve p 286 A87-25280
 Research and development of aircraft control actuation systems [AD-A177491] p 522 A87-21958

CONTROLLABILITY
 The pilot workload factor in aircraft handling qualities assessment p 186 A87-16760
 T-46A flight test results p 357 A87-28150
 A look at handling qualities of canard configurations p 444 A87-32226
 Aero-marine design and flying qualities of floatplanes and flying-boats p 508 A87-39146
 Investigating aircraft handling qualities using a structural model of the human pilot [AIAA PAPER 87-2537] p 774 A87-50538
 Longitudinal handling qualities of the T-2 Control Configured Vehicle [AIAA PAPER 87-2587] p 774 A87-50550
 Flared landing approach flying qualities. Volume 1: Experiment design and analysis [NASA-CR-178188-VOL-1] p 254 A87-15234
 Analysis of NLR configurations using OCM for pilot modeling [NASA-CR-180656] p 449 A87-20289
 A simulation investigation of scout/attack helicopter directional control requirements for hover and low-speed tasks [NASA-TM-86755] p 522 A87-21961
 A look at handling qualities of Canard configurations [NASA-TM-88354] p 493 A87-22629

Evaluation of numerator lead effects on aircraft handling qualities [AD-A179388] p 523 N87-22687

Visual and motion cueing in helicopter simulation p 599 N87-23634

Utilization of simulation to support F-14A low altitude high angle of attack flight testing p 600 N87-23649

Study of helicopterroll control effectiveness criteria [NASA-CR-177404] p 681 N87-25330

Multi-input multi-output system control for experimental aircraft [NASA-CR-181197] p 775 N87-26915

Experimental investigation of the short-period requirements of MIL-F-8785C, volume 2 [AD-A181475] p 775 N87-26917

Dynamic stability and handling qualities tests on a highly augmented, statically unstable airplane [NASA-TM-88297] p 776 N87-26920

Piloted-simulation study of effects of vortex flaps on low-speed handling qualities of a Delta-wing airplane [NASA-TP-2747] p 776 N87-26922

Determination of handling qualities and display requirements for helicopter instrument flight during decelerating approaches to slow speeds [AD-A182797] p 836 N87-28559

CONTROLLERS

1986 American Control Conference, 5th, Seattle, WA, June 18-20, 1986, Proceedings. Volumes 1, 2, & 3 p 133 A87-13301

Evaluation of detectability and distinguishability of aircraft control element failures using flight test data p 110 A87-13435

Tradeoff methods in multiobjective insensitive design of airplane control systems p 115 N87-11730

Application of optimization techniques to the design of a flutter suppression control law for the DAST ARW-2 p 115 N87-11736

Flight model discharge system [AD-A169423] p 117 N87-12571

Aircraft battery state of charge and charge control system [AD-A169411] p 130 N87-12766

The evaluation of a number of prototypes for the free-tip rotor constant-moment controller [NASA-TM-86664] p 131 N87-12869

Formulation and minimality of nonlinear discrete time control systems p 254 N87-15233

Development of a sensitivity analysis technique for multiloop flight control systems p 311 N87-16847

User guide for the digital control system of the NASA/Langley Research Center's 13-inch Magnetic Suspension and Balance System [NASA-CR-178210] p 376 N87-18574

Design and experimental verification of a calculation method for frequency response analysis of digital control systems in a continuous environment --- aircraft control [NLR-TR-85090-U] p 374 N87-19402

A time-based concept for terminal-area traffic management p 501 N87-21895

Computer assisted arrival sequencing and scheduling with the COMPAS system p 502 N87-21897

The application of optimal control techniques to the UTIAS research simulator p 599 N87-23637

Control of aircraft under severe wind shear conditions p 682 N87-26050

A study of methods to predict and measure the transmission of sound through the walls of light aircraft. Numerical method for analyzing the optimal performance of active noise controllers [NASA-CR-181186] p 798 N87-27485

Fault-tolerant flight control system combining expert system and analytical redundancy concepts p 776 N87-27605

CONVECTION

The terminal area simulation system. Volume 1: Theoretical formulation [NASA-CR-4046] p 421 N87-20255

Oklahoma downbursts and their asymmetry [AD-A182097] p 792 N87-28229

Large-eddy numerical simulation of an array of three-dimensional impinging jets [AD-A182459] p 850 N87-28835

CONVECTION CLOUDS

Turbulence as observed by concurrent measurements made at NSSL using weather radar, Doppler radar, Doppler lidar and aircraft p 543 N87-22348

CONVECTIVE HEAT TRANSFER

Unsteady heat transfer coefficient estimation for long duration [AIAA PAPER 86-1240] p 264 A87-21534

Dynamics of compressible air flow in ducts with heat exchange p 383 A87-29279

Local heat transfer and fluid flow studies on a rectangular plate inclined at different angles of attack and yaw to an air stream p 386 A87-30707

Local heat-transfer coefficients of simulated smooth glaze ice formations on a cylinder p 420 A87-32163

Control of the intensity of convective heat transfer in a Laval nozzle under conditions of turbulent flow and in the presence of local separation zones p 803 A87-50972

Unsteady aerodynamic and heat transfer processes in a transonic turbine stage p 251 N87-15220

Determination of the local heat transfer characteristics on glaze ice accretions on a cylinder and a NACA 0012 airfoil [AD-A179931] p 647 N87-25309

Radiative and convective heat transfer over ablating composite flat surface in hypersonic flow regime [AD-A182119] p 810 N87-28503

CONVENTIONS

The Warsaw Convention system regarding air carrier responsibility - New developments in jurisprudence p 709 A87-42864

CONVERGENCE

Comparison of methods for expanding the convergence region of SITAN system --- positioning using terrain-aided navigation p 157 A87-16752

A robust general helicopter trim program p 766 A87-48961

CONVERGENT-DIVERGENT NOZZLES

On broadband shock associated noise of supersonic jets p 58 A87-11768

A comparison between the integral characteristics and the shape of the profiled contours of Laval nozzles with gradual and abrupt convergence p 145 A87-17590

Film cooling requirements in 2-D converging/diverging vectoring/reversing nozzles p 441 A87-35021

2-D, vectoring/reversing nozzles for new fighter engines - A review p 441 A87-35026

Multiaxis aircraft control power from thrust vectoring at high angles of attack [AIAA PAPER 86-1779] p 595 A87-40272

Static investigation of post-exit vanes for multiaxis thrust vectoring [AIAA PAPER 87-1834] p 667 A87-45236

Static internal performance of a two-dimensional convergent-divergent nozzle with thrust vectoring [NASA-TP-2721] p 574 N87-24432

CONVEXITY

Profiling of a lifting convex wing by a hodograph method p 805 A87-51672

CONVOLUTION INTEGRALS

Development and application of a convolution technique for flying qualities research p 444 A87-32234

COOLING

Forced convection heat transfer to air/water vapor mixtures p 385 A87-30706

Friction factors and heat transfer coefficients in turbulent cooling passages of different aspect ratios. I - Experimental results [AIAA PAPER 87-2009] p 696 A87-45350

Liner cooling research at NASA Lewis Research Center --- for gas turbine combustion chambers [AIAA PAPER 87-1828] p 762 A87-50189

Transpiration cooling - Contribution of film cooling to the overall cooling effectiveness p 847 A87-51475

COOLING SYSTEMS

A study of the effect of the temperature factor on pressure losses in the cooling system of the leading edge of a deflector vane --- for gas turbine engines p 127 A87-15218

A new technology in energy-efficient electrically driven aircraft environmental control systems p 166 A87-18116

Minimizing heat rejection in aircraft accessory drive gearboxes [SAE PAPER 861736] p 368 A87-29582

Experimental investigation on cooling effectiveness of high-temperature air-cooled turbine blade p 513 A87-37845

Heat transfer through multi-turns of cooling passages in a turbine blade p 533 A87-37848

Increased avionics cooling capacity for F-15 aircraft [SAE PAPER 860910] p 514 A87-38702

A ram air driven air cycle cooling system for avionics pods [SAE PAPER 860912] p 514 A87-38704

X-29 fuel/auxiliary oil systems thermal management [SAE PAPER 860913] p 514 A87-38705

Advanced liquid-cooled, turbocharged and intercooled stratified charge rotary engines for aircraft [SAE PAPER 871039] p 759 A87-48766

New technological considerations that improve avionics reliability p 750 A87-50336

Coolant passage heat transfer with rotation, a progress report p 53 N87-11225

COORDINATE TRANSFORMATIONS

An advanced parameter estimation coprocessor p 205 A87-16734

Navigational coordinate systems - How to get your surface and air positioning very precise and still be off by 20 nautical miles p 157 A87-16750

COORDINATES

Development of direct-inverse 3-D method for applied aerodynamic design and analysis [NASA-CR-180646] p 751 N87-26895

COPPER ALLOYS

Testing of Fe-Cu-base ablative composites. II p 41 A87-12971

The effect of composition and heat treatment upon microstructure/property relationships in Al-Li-Cu-Mg alloys p 842 A87-52673

CORE FLOW

Tip vortex core measurements on a hovering model rotor [AIAA PAPER 87-0209] p 320 A87-24938

CORNER FLOW

On the occurrence of regular reflection of shocks in concave corner flows p 10 A87-12586

Computation of two-dimensional supersonic turbulent flow over a compression corner p 66 A87-13502

Hybrid MacCormack and implicit beam-warming algorithms for a supersonic compression corner p 346 A87-31159

Aspects of the calculation of potential flow past a slat in a system of airfoil profiles p 484 A87-35916

Effect of port corner geometry on the internal performance of a rotating-vane-type thrust reverser [NASA-TP-2624] p 77 N87-12541

Experimental evaluation of two turning vane designs for fan drive corner of 0.1-scale model of NASA Lewis Research Center's proposed altitude wind tunnel [NASA-TP-2646] p 376 N87-18576

Computation of tip and corner region flows p 537 N87-22153

Experimental evaluation of corner turning vanes [NASA-TM-100143] p 839 N87-28571

CORRECTION

Correction for wall-interference by means of a measured boundary condition method --- wind tunnel walls [NLR-TR-84114-U] p 151 N87-13414

Lift-interference and blockage corrections for a two-dimensional aerofoil during a sudden change of incidence [BU-334] p 350 N87-19364

CORRELATION

Correlation of analytical calculations from GRASP (General Rotorcraft Aeromechanical Stability Program) with torsionally-soft rotor data [AD-A178881] p 524 N87-22689

CORRELATION COEFFICIENTS

Evaluation of icing drag coefficient correlations applied to iced propeller performance prediction [SAE PAPER 871033] p 737 A87-48761

CORROSION

Electromagnetic methods to detect corrosion in aircraft structures p 45 A87-10791

Corrosion and corrosion prevention in aircraft structures [NLR-MP-85029-U] p 43 N87-11004

Investigation of coating performance and corrosion of compressor components in the JT-30-P-3 engine of F-111C aircraft [AD-A168802] p 107 N87-11792

Corrosion and load transfer effects on fatigue of mechanically fastened joints [AD-A173802] p 268 N87-16365

Patch repair of corroded aircraft skin areas p 406 N87-20191

Corrosion maintenance and experimental design [AD-A181926] p 716 N87-27610

CORROSION PREVENTION

Improved durability airline paint schemes p 40 A87-12660

A study of the thermal-stress state of gas turbine engine blades with protective coatings p 664 A87-43640

Corrosion protection --- in aircraft structures p 624 A87-44750

Corrosion and corrosion prevention in aircraft structures [NLR-MP-85029-U] p 43 N87-11004

Corrosion/oxidation protection of high temperature material --- gas turbine engines [PNR90355] p 319 N87-16905

AGARD corrosion handbook. Volume 2: Aircraft corrosion control documents: A descriptive catalogue [AGARD-AG-278-VOL-2] p 607 N87-24553

[FOA-C-30432-3.3] p 393 N87-19798

DATA TRANSFER (COMPUTERS)

Integrated 1553 Data Bus Monitor System
p 499 A87-37417

DATA TRANSMISSION

Supplemental data transmission in AM radio broadcasting
p 425 A87-33332

Possible contributions from the SSR mode S data link to the conduct of efficient aircraft operations
p 500 N87-21887

Fault tolerant electrical power system. Phase 2: Analysis and preliminary design
[AD-A177278] p 508 N87-21907

Fiber optic data transmission
p 540 N87-22611

Auxiliary data input device
[NASA-CASE-LAR-13626-1] p 700 N87-25584

DAYTIME

Cumulative airport noise exposure metrics: An assessment of evidence for time-of-day weightings
[AD-A174848] p 393 N87-19815

DC 10 AIRCRAFT

Ten years of flight service with DC-10 composite rudders - A backward glance
[SAE PAPER 861674] p 360 A87-29643

Lessons learned from the DC-10 carbon-epoxy rudder program
[SAE PAPER 861675] p 360 A87-29644

A decade of composite rudder service reviewed
p 689 A87-44861

DC 9 AIRCRAFT

Conclusions of the Investigative Commission on Air Safety of the COIA concerning the accident occurring in Barajas on December 7, 1983
p 738 A87-48800

DE HAVILLAND AIRCRAFT

Performance data Aeroc 8.2.AC.20, issue 5, Dash 8, series 100
p 301 N87-16817

DECCELERATION

Aerodynamic Decelerator and Balloon Technology Conference, 9th, Albuquerque, NM, October 7-9, 1986. Technical Papers
p 79 A87-13776

Control and display requirements for decelerating approach and landing of fixed- and rotary-wing VSTOL aircraft
p 193 A87-19279

Estimation of the stagnation line of a system of jets impinging on a plane obstacle in incoming flow
p 439 A87-31737

Automatic braking system modification for the Advanced Transport Operating Systems (ATOPS) Transportation Systems Research Vehicle (TSRV)
[NASA-CR-178155] p 191 N87-13446

Determination of handling qualities and display requirements for helicopter instrument flight during decelerating approaches to slow speeds
[AD-A182797] p 836 N87-28559

DECISION MAKING

An efficient decision-making-free filter for processes with abrupt changes
p 136 A87-16189

Pilot's associate demonstration one - A look back and ahead --- developing an aircraft expert system
p 179 A87-16840

An examination of distributed planning in the world of air traffic control
p 355 A87-28353

Case study - Developing an operations concept for future air traffic control
p 424 A87-33030

Selected problems in the decision making process for future small transport/utility aircraft
[SAE PAPER 871045] p 712 A87-48771

Optimization in the systems engineering process
p 96 N87-11719

Influence of analysis and design models on minimum weight design
p 98 N87-11739

Multidisciplinary systems optimization by linear decomposition
p 136 N87-11740

An analysis of the cost-volume relationships within the aircraft program of the Naval Air Rework Facility, Alameda, California
[AD-A171729] p 212 N87-15933

A decision support system for the diagnosis of aircraft emergencies
[AD-A177394] p 495 N87-21876

Multiple paths in complex tasks
[NASA-CR-180392] p 619 N87-24911

Traditional versus rule-based programming techniques: Application to the control of optional flight information
[NASA-TM-89161] p 795 N87-28275

Closing the man-machine loop: On the use of physiological measures to affect computer-controlled devices
p 855 N87-29507

DECISION THEORY

The principles of composite optimum design of compound aggregate complexes
p 474 A87-32463

DECOMPOSITION

Application of decomposition techniques to the preliminary design of a transport aircraft
[NASA-CR-178239] p 362 N87-18563

DECOUPLING

Decoupling control synthesis for an oblique-wing aircraft
p 108 A87-13342

Spatial decoupling between antennas on large bodies
p 382 A87-29167

Design and fabrication of the NASA decoupler pylon for the F-16 aircraft, addendum 1
[NASA-CR-172355] p 27 N87-10860

DEFECTS

Fatigue crack growth predictions of welded aircraft structures containing flaws in the residual stress field
p 692 A87-42853

DEFENSE PROGRAM

Survivability/Vulnerability Information Analysis Center (SURVIAC) - A tool for the aircraft survivability community
[AIAA PAPER 86-2691] p 209 A87-17928

Military developments in aeronautics - The next thirty years
p 339 A87-29276

Ada - From promise to practice?
p 546 A87-37550

Air Force technical objective document fiscal year 1987
[AD-A167324] p 62 N87-10779

Possible military applications of stratospheric airship discussed
p 101 N87-12716

DOD (Department of Defense) acquisition: Case study of the Navy V-22 OSPREY Joint Vertical Lift Aircraft Program
[PB86-231388] p 175 N87-14315

Cost analysis for aircraft system test and evaluation: Empirical survey data structuring and parametric modeling, volume 2
[AD-A181466] p 739 N87-26885

Fiscal year 1988 technical objective document
[AD-A180311] p 861 N87-29364

Air force technical objective document fiscal year 1988
[AD-A183017] p 862 N87-30224

DEFLECTION

Correlation of acoustic emission and strain/deflection measurement during composite airframe static tests
p 168 A87-19227

Calculated effects of varying Reynolds Number and dynamic pressure on flexible wings at transonic speeds
p 75 N87-11738

Vertical deflection characteristics of aircraft tyres
[ESDU-86005] p 129 N87-11992

Influence of large deflection and transverse shear on random response of rectangular symmetric composite laminates to acoustic loads
[NASA-CR-178313] p 798 N87-27489

DEFLECTORS

A study of the effect of the temperature factor on pressure losses in the cooling system of the leading edge of a deflector vane --- for gas turbine engines
p 127 A87-15218

DEFORMATION

Measurement of model deformations in wind tunnels
p 525 A87-36943

The integral equation for the time dependent linearized potential flow over a wing
[AD-A176684] p 490 N87-21850

Analysis of structures with rotating, flexible substructures applied to rotorcraft aerostaticity in GRASP (General Rotorcraft Aeromechanical Stability Program)
[AD-A178941] p 510 N87-22677

Numerical study of high speed viscous flows
[AD-A178639] p 542 N87-22940

The effects of aeroelastic deformation on the unaugmented stopped-rotor dynamics of an X-Wing aircraft
[NASA-TM-100480] p 791 N87-28056

DEGRADATION

Carbon residue studies with a micro carbon residue tester
[AD-A171153] p 259 N87-15306

DEGREES OF FREEDOM

A higher order element for stepped rotating beam vibration
p 263 A87-20950

The influence of support oscillation in dynamic stability tests --- sting plunging effects
[AIAA PAPER 87-0243] p 257 A87-22506

The influence of an additional degree of freedom on subsonic wing rock of slender delta wings
[AIAA PAPER 87-0496] p 283 A87-24970

The fundamentals of body-freedom flutter
p 321 A87-25598

Accurate estimation of aircraft inertia characteristics from a single suspension experiment
p 596 A87-41628

Some fundamentals of simulator cockpit motion generation
p 683 A87-44714

Experimental aeroelastic behavior of forward-swept graphite/epoxy wings with rigid-body freedom
p 824 A87-53781

Aeroelastic effects in multirotor vehicles. Part 2: Methods of solution and results illustrating coupled rotor/body aeromechanical stability
[NASA-CR-4009] p 522 N87-21957

DEICERS

Helicopter de-icing system development and qualification flight in natural icing versus simulation and analysis
p 171 A87-19269

Ice protection thermal modelling techniques
p 171 A87-19270

A numerical and experimental investigation of electrothermal aircraft deicing
p 171 A87-19271

Application of rotor icing analyses to the design of a rotorcraft deicing system
p 172 A87-19272

Deicing the McDonnell Douglas AH-64A
p 172 A87-19273

Further studies of helicopter rotor ice accretion and protection
p 738 A87-48945

Performance data Aeroc 8.2.AC.20, issue 5, Dash 8, series 100
p 301 N87-16817

Electro-expulsive separation system
[NASA-CASE-ARC-11613-1] p 849 N87-28833

DEICING

A heater made from graphite composite material for potential deicing application
[AIAA PAPER 87-0025] p 297 A87-24905

State-of-the-art of ground aircraft deicing technology
[SAE PAPER 861656] p 452 A87-32590

Helicopter rotor icing protection methods
p 654 A87-44256

Development of the Chinook helicopter rotor blade de-icing system
p 655 A87-44704

Inflight anti/de-icing experience from the certification of the SF340
p 738 A87-49203

Icing and de-icing on a downscale model in ONERA S1 MA wind tunnel
p 818 A87-54191

Ground aircraft deicing technology review
[DOT/FAA/CT-85/21] p 83 N87-11707

A heater made from graphite composite material for potential deicing application
[NASA-TM-88888] p 101 N87-12559

Structural properties of impact ices accreted on aircraft structures
[NASA-CR-179580] p 328 N87-18121

Ground de-icing of aircraft
[CAP-512] p 422 N87-20975

Influence of a heated leading edge on boundary layer growth, stability and transition
[DE87-008516] p 700 N87-25538

DELAMINATING

Criticality of delaminations in composite materials structures
p 465 A87-35022

Toughened composites selection criteria
p 782 A87-48531

DELAY

Weather and system delays
[AIAA PAPER 87-0442] p 234 A87-22635

DELTA WINGS

Vortex-stretched flow around a cranked delta wing
p 3 A87-10520

Numerical experiment with inviscid vortex-stretched flow around a cranked delta wing, supersonic speed
p 7 A87-11537

Experimental investigations of three-dimensional laminar boundary layers on a slender delta wing
p 9 A87-12145

Experimental investigation of vortex flow over double-delta wing at high alpha
p 67 A87-13652

Impact of airfoil profile on the supersonic aerodynamics of delta wings
p 71 A87-14363

Lower-side normal force characteristics of delta wings at supersonic speeds
p 72 A87-14372

Mathematical modeling of the motion of a statically deformed delta-shaped glider
p 95 A87-15205

Experimental investigation of apex fence flaps on delta wings
p 146 A87-17817

Comment on 'Convergence characteristics of a vortex-lattice method for nonlinear configuration aerodynamics' p 146 A87-17818
Improvements on supersonic kernel function method and its application to flutter calculation p 148 A87-18584
Transonic vortex flows past Delta wings - Integral equation approach p 213 A87-20876
Leading-edge vortex solutions with large total pressure losses p 217 A87-22372
[AIAA PAPER 87-0039]
Finite-volume Euler and Navier-Stokes solvers for three-dimensional and conical vortex flows over delta wings p 217 A87-22374

Potential impacts of advanced technologies on the ATC capacity of high-density terminal areas
[NASA-CR-4024] p 22 N87-10854

Operating and support hazard analysis for self-contained navigation system LSI model 6216A, B and C, group B [AD-A169381] p 22 N87-10855

Simulator design and instructional features for carrier landing: A field transfer study
[AD-A169962] p 119 N87-12573

Development and evaluation of an airplane electronic display format aligned with the inertial velocity vector [NASA-TP-2648] p 182 N87-13438

Flight simulator: Field of view utilized in performing tactical maneuvers
[AD-A172048] p 193 N87-13453

Test and evaluation of a multifunction keyboard and a dedicated keyboard for control of a flight management computer
[NASA-CR-178202] p 183 N87-14330

Design and initial application of the extended aircraft interrogation and display system: Multiprocessing ground support equipment for digital flight systems
[NASA-TM-86740] p 301 N87-16820

Investigation of air transport technology at Massachusetts Institute of Technology, 1983
p 352 N87-18521

Development of an LED display system for cross-track distance and velocity for Loran-C flight
p 356 N87-18522

Acceleration display system for aircraft zero-gravity research
[NASA-TM-87358] p 389 N87-18801

Development of simulated directional audio for cockpit applications
[AD-A175350] p 391 N87-19570

Traffic scenario generation technique for piloted simulation studies
[NASA-TM-86397] p 421 N87-20254

The retinal image of the fresnel lens optical landing system
[AD-A176090] p 426 N87-20258

Integration of altitude and airspeed information into a primary flight display via moving-tape formats
[NASA-TM-89064] p 438 N87-20265

Electronic display equipment for use in the advanced flight deck simulator at British Aerospace, Weybridge [RID-1912] p 453 N87-21005

F-16 digital terrain system: Concept of operations and support
[AD-A177737] p 511 N87-21919

The effects of display and autopilot functions on pilot workload for Single Pilot Instrument Flight Rule (SPIFR) operations
[NASA-CR-4073] p 512 N87-21921

Aircraft control position indicator
[NASA-CASE-LAR-12984-1] p 512 N87-22678

A graphics environment supporting the rapid prototyping of pictorial cockpit displays
[AD-A178636] p 548 N87-23182

Principles of data display in aviation instruments
p 590 N87-23572

Visual display research tool
p 599 N87-23635

Advanced visuals in mission simulators
p 599 N87-23636

Collected flight and simulation comparisons and considerations
p 602 N87-23660

Optimal cooperative control synthesis of active displays
[NASA-CR-4058] p 705 N87-25807

Systems Testbed for Avionic Research (STAR) automation concept development
[AD-A180658] p 757 N87-26907

The flight development of a color electronic display format and monitoring system of helicopter engine and transmission data
[RAE-TM-FS(B)-638] p 829 N87-28548

Determination of handling qualities and display requirements for helicopter instrument flight during decelerating approaches to slow speeds
[AD-A182797] p 836 N87-28559

Jet transport flight operations using cockpit display of traffic information during instrument meteorological conditions: Simulation evaluation
[NASA-TP-2567] p 819 N87-29469

An assessment of variable format information presentation
p 861 N87-29512

Organization of displays in the visual space of the combat aircraft pilot
p 856 N87-29516

The flight evaluation of a speech recognition and a speech output system in an advanced cockpit display and flight management system for helicopters
p 829 N87-29527

DISTANCE MEASURING EQUIPMENT
Test and flight evaluation of precision distance measuring equipment p 296 A87-26003

An airspace-surveillance and collision-avoidance system based on the standard commercial-aviation DME
p 355 A87-29632

DFVLR develops inexpensive integrated navigation, communication and airspace surveillance system based on the distance measuring system DME
p 425 A87-35177

Integrated navigation, communication and surveillance systems based on standard distance measuring equipment
p 649 A87-44039

DISTILLATION
Production of high energy aviation fuels from advanced coal liquids, phase 1
[AD-A182333] p 785 N87-27819

DISTORTION
Parameter estimation and in-plane distortion invariant chord processing
p 135 A87-13689

Wing divergence and structural distortion
[RAE-TR-85057] p 433 N87-20989

DISTRIBUTED PARAMETER SYSTEMS
Control operations in advanced aerospace systems
p 474 A87-32117

Suboptimal control of distributed systems in the case of incomplete measurements --- for wing vibration damping
p 619 A87-42126

Optimal and insensitive control of hyperbolic distributed parameter systems with applications to wing flutter problems
[AD-A174954] p 362 N87-18564

DISTRIBUTED PROCESSING
Selection of media access protocol for distributed digital avionics
p 134 A87-13436

An examination of distributed planning in the world of air traffic control
p 355 A87-28353

Global system data bus using the Digital Autonomous Terminal Access Communication protocol
p 471 A87-31480

Fault-tolerance in distributed digital fly-by-wire flight control systems
p 435 A87-31515

Processor tradeoffs in distributed real-time systems
p 857 A87-52796

The implementation and use of Ada on distributed systems with high reliability requirements
[NASA-CR-179842] p 137 N87-12265

A distributed data acquisition system for aeronautics test facilities
[NASA-TM-88961] p 315 N87-16851

DIVERGENCE
Application of diverging motions to calculate loads for oscillating motions
p 148 A87-18955

Wing divergence and structural distortion
[RAE-TR-85057] p 433 N87-20989

Divergence and flutter of swept-forward wings with crossflexibilities
[RAE-TR-80047] p 449 N87-21000

Estimation of divergence and flutter boundaries from locally stationary random responses
[NAL-TR-898] p 537 N87-22169

DO-28 AIRCRAFT
The icing research aircraft Do28, D-IFMP of DFVLR and its measuring equipment
[ESA-TT-972] p 176 N87-14326

DOCUMENTS
FAA helicopter/heliport research, engineering, and development bibliography, 1964-1986
[FAA/PM-86/47] p 118 N87-11798

DOMAINS
Modeling XV-15 tilt-rotor aircraft dynamics by frequency and time-domain identification techniques
[NASA-TM-89404] p 735 N87-27631

Interpolation techniques for the time domain averaging of vibration data with application to helicopter gearbox monitoring
[AD-A182572] p 754 N87-27662

DOMES (STRUCTURAL FORMS)
Numerical simulation of diffuser/combustor dome interaction
p 676 A87-46255

Integrating a head-up display with dome visual simulation technology
[AD-A175222] p 366 N87-19394

DOORS
Emergency exits for underwater escape from rotorcraft
[AEG-REPT-528] p 156 N87-14304

DOPPLER EFFECT
Doppler frequency shift in a refractive atmosphere
p 859 A87-52876

Operating and support hazard analysis for self-contained navigation system LSI model 6216A, B and C, group B [AD-A169381] p 22 N87-10855

DOPPLER NAVIGATION
Low cost Doppler aided strapdown inertial navigation system
p 296 A87-24719

An integrated navigation system for advanced attack helicopters
p 422 A87-31468

The observability of a Doppler-aided inertial navigation system
p 578 A87-39269

Decentralized filtering and redundancy management for multisensor navigation
p 578 A87-39736

Evaluation of alternatives for Army precision landing system: Ground guidance
[AD-A174093] p 237 N87-15956

Modeling of the fault situation in navigation systems
p 821 N87-28534

DOPPLER RADAR
Nowcasting low-altitude wind shear with a Doppler radar
[AIAA PAPER 87-0642] p 269 A87-22753

Airborne pulse-Doppler radar - False-alarm control
p 499 A87-37577

Low altitude wind shear detection with Doppler radar
p 615 A87-40247

Approach to study of PRF sensitivity in airborne pulse-Doppler radar
p 829 A87-53802

Doppler Radar Detection of Wind Shear
[NASA-CP-2435] p 17 N87-10054

Experimental and theoretical Doppler-lidar signatures of aircraft wake vortices
p 14 N87-10330

Mobile intercept of storms
p 132 N87-13064

A review of microbursts and their analysis and detection with Doppler radar
[AD-A170458] p 133 N87-13110

Application of Doppler radar and lidar to diagnose atmospheric phenomena
p 331 N87-17271

Remote versus in situ turbulence measurements
p 543 N87-22346

Turbulence as observed by concurrent measurements made at NSSL using weather radar, Doppler radar, Doppler lidar and aircraft
p 543 N87-22348

JAWS multiple Doppler derived winds
p 703 N87-25271

United Airlines wind shear incident of May 31, 1984
p 647 N87-25288

Low-altitude wind shear detection with Doppler radar [AD-A181900] p 793 N87-28233

Preliminary Memphis FAA (Federal Aviation Administration)/Lincoln Laboratory operational weather studies results
[AD-A182730] p 854 N87-29057

DORNIER AIRCRAFT
Dornier 328 - Concept for a new-generation regional airliner
p 657 A87-46326

Technological aspects in preparing the development of regional airliners
p 657 A87-46327

Dornier aims the Do328 at the 30-passenger market
p 742 A87-47247

DOWNTIME
Translating aircraft reliability and maintainability into measures of operational effectiveness
[AIAA PAPER 86-2690] p 198 A87-17927

Translating aircraft reliability and maintainability into measures of operational effectiveness
p 789 A87-50334

DOWNWASH
Numerical solution of the downwash associated with a blown-flap system
p 347 A87-31290

Modelling aircraft wing downwash transit time effects in the direction of flight
[DGLR PAPER 86-165] p 521 A87-36792

Investigation of blade-vortices in the rotor-downwash
p 627 A87-43415

Helicopter modelling for performance calculation
p 652 A87-43434

Investigations of blade-vortices in the rotor-downstream
p 721 A87-48970

Implementation and validation of a wake model for low-speed forward flight
[NASA-CR-181341] p 811 N87-28514

DRAG
Simplified forms of performance equations. Addendum A: Effect on aeroplane level speed of small changes in thrust, drag, weight, power
[ESDU-86004-ADD-A] p 100 N87-12556

Effects of afterbody boattail design and empennage arrangement on aeropropulsive characteristics of a twin-engine fighter model at transonic speeds
[NASA-TP-2704] p 492 N87-21873

Estimation of spillage drag for a wide range of axisymmetric intakes at M 1
[ESDU-84004] p 701 N87-26301

Acoustic effects on profile drag of a laminar flow airfoil [NASA-TM-100505] p 860 N87-30155

DRAG CHUTES
Status report of a new recovery parachute system for the F111 aircraft crew escape module
[AIAA PAPER 86-2437] p 91 A87-13821

The Annular Parachute - An approach to a low altitude personnel parachute
[AIAA PAPER 86-2449] p 80 A87-13823

- A preliminary study into the constant drag parachute for aircrew escape systems
[BU-345] p 421 N87-20256
- Combustion by-products on F-4 drogue parachutes
[AD-A182929] p 819 N87-29472
- DRAG COEFFICIENTS**
- Wave drag analysis of realistic fighter aircraft using a full potential method
[AIAA PAPER 86-2627] p 147 A87-17886
- Recent progress in the measurement of the drag coefficient of models of transport aircraft in a wind tunnel
[ONERA, TP NO. 1986-170] p 256 A87-21070
- Transonic wave drag estimation and optimization using the nonlinear area rule
p 348 A87-31295

DWELL

DWELL

The effect of load dwells on the fatigue of carbon fiber composites
[BAE-MSM-R-GEN-0547] p 844 N87-28606

DYNAMIC CHARACTERISTICS

Application of design optimization techniques to rotor dynamics problems p 167 A87-19204
Numerical determination of the dynamic characteristics of a composite blade p 305 A87-25911
Validation of a method for air resonance testing of helicopters at model scale using active control of Pylon dynamic characteristics p 683 A87-43462
Theoretical and experimental investigations on a six-component rotor balance p 778 A87-48971
A dynamic model for airframe cost estimation
[AD-A168842] p 65 N87-11687
Crash dynamics program transport seat performance and cost benefit study
[DOT/FAA/CT-85/36] p 83 N87-11708
Characterization and dynamical studies of polymers in dipolar (aprotic) liquids
[AD-A169243] p 123 N87-12685
A flight dynamic simulation program in air-path axes using ACSL (Advanced Continuous Simulation Language)
[AD-A173849] p 332 N87-18337
Development of a mathematical model that simulates the longitudinal, and lateral-directional response of the F/A-18 for the study of flight control reconfiguration
[AD-A176333] p 450 N87-21004
Investigation of periodic pitching through the static stall angle of attack
[AD-A179512] p 493 N87-22623
Frequency-response identification of XV-15 tilt-rotor aircraft dynamics
[NASA-TM-89428] p 524 N87-22690
Demonstration of frequency-sweep testing technique using a Bell 214-ST helicopter
[NASA-TM-89422] p 598 N87-23632
Large-eddy numerical simulation of an array of three-dimensional impinging jets
[AD-A182459] p 850 N87-28835

DYNAMIC CONTROL

Reachable outputs in systems with bounded parameter uncertainties - Application to failure detection
p 134 A87-13326
Dynamic output feedback flight control laws using eigenstructure assignment
p 109 A87-13355
Eigenstructure assignment by dynamic output feedback
p 134 A87-13385
Synthesis of piecewise constant control with memory for continuous stochastic systems
p 269 A87-20379
The rotating nose method for controlling asymmetric forces at high angle of attack
p 311 A87-24722
Optimization of the controlled rotations of a rigid body with an elastic rod using first integrals of a free system
p 859 A87-50915
Advanced ATC: An aircraft perspective
p 501 N87-21893

DYNAMIC LOADS

Dynamic loads on twin jet exhaust nozzles due to shock noise
p 94 A87-14369
Dynamic loading of aircraft during ground operations
p 298 A87-25522
Optimization of airplane wing structures under taxiing loads
p 785 A87-47192
Analysis of shock and vibration environments for cargo on C9B transport aircraft
[DE86-016101] p 176 N87-14322
Experimental and analytical evaluation of dynamic load and vibration of a 2240-kW (300-hp) rotorcraft transmission
[NASA-TM-88975] p 467 N87-20556
Research and development of aircraft control actuation systems
[AD-A177491] p 522 N87-21958
Analysis of structures with rotating, flexible substructures
[AD-A178903] p 542 N87-23004
Helicopter blade dynamic loads measured during performance testing of two scaled rotors
[NASA-TM-89053] p 573 N87-24423
Langley Aircraft Landing Dynamics Facility
[NASA-RP-1189] p 839 N87-29544

DYNAMIC MODELS

A simulation of the dynamics of the mechanisms of the aircraft landing gear
p 96 A87-15220
Reducing the gap between the quantitative and qualitative design, development and testing of control systems --- linear models for highly maneuverable aircraft
[AIAA PAPER 86-2710] p 189 A87-17940
Basic research in structural dynamic system identification
p 206 A87-19242

The use of advanced aerodynamic models in the aeroelastic computations of helicopter rotors
[ONERA, TP NO. 1986-120] p 238 A87-21039

A model comparison of a supersonic aircraft minimum time-to-climb problem
[AIAA PAPER 87-0146] p 240 A87-22441

Sensitivity analysis of automatic flight control systems using singular-value concepts
p 310 A87-23978

A dynamic model of an aeroplane with wings of high aspect ratio for flutter analysis by the method of finite elements
p 595 A87-39773

Comparison of analytic and pragmatic model reduction methods using as an example the dynamics of aircraft lateral motion
p 595 A87-40521

An optimized method for computing the coefficients of the simplified model of the lateral motion of an airplane
p 596 A87-40522

An advanced mathematical model for helicopter flight simulation using nonlinear unsteady aerodynamics
p 679 A87-43435

A stage-by-stage post-stall compression system modeling technique
[AIAA PAPER 87-2088] p 636 A87-45397

Dynamic data acquisition, reduction, and analysis for the identification of high-speed compressor component post-stability characteristics
[AIAA PAPER 87-2089] p 697 A87-45398

Effects of blade-to-blade dissimilarities on rotor-body lead-lag dynamics
p 746 A87-48953

Finite state modelling of unsteady aerodynamics and its application to a rotor dynamic problem
p 721 A87-48955

The significance of error dynamics in model-following for flight control design
[AIAA PAPER 87-2311] p 771 A87-50432

Dynamics of a high-speed rotor touching a boundary
p 848 A87-51614

Dynamic positioning using GPS carrier phase measurements
p 820 A87-52765

Seat experiment results of full-scale transport aircraft controlled impact demonstration
[AD-A172245] p 235 N87-15193

Dynamics of a helicopter with a sling load
p 243 N87-15957

Modelling of rigid-body and elastic aircraft dynamics for flight control development
[AD-A172423] p 255 N87-15978

Identification of a dynamic model of a helicopter from flight tests
p 300 N87-16813

Flight simulator with transputers
[BU-333] p 378 N87-19415

Dynamic stall calculations using a Navier-Stokes solver
[AD-A178566] p 523 N87-22688

Identification of a dynamic model of a helicopter from flight tests
p 659 N87-26040

User's manual for ADAM (Advanced Dynamic Airfoil Model)
[DE87-012342] p 813 N87-28524

DYNAMIC PRESSURE

Development of a drag measurement system for the CERF 6-foot shock tube
[AD-A173087] p 316 N87-16854

Experimental measurement of the dynamic pressure distribution in a squeeze film bearing damper executing circular centered orbits
p 539 N87-22219

A study of fluid-dynamic pressure fields on compressor reed valves
[AD-A178584] p 541 N87-22938

DYNAMIC PROGRAMMING

Dual adaptive control: Design principles and applications
[NASA-CR-181050] p 705 N87-25804

DYNAMIC RESPONSE

Correlation of experimental static and dynamic response of simple structural components
p 124 A87-13683

Application of regression analysis to coupled responses at high angles of attack
p 113 A87-16185

Automated tuning of airframe vibration by structural optimization
p 168 A87-19208

The rotor dynamic coefficients of coned-face mechanical seals with inward or outward flow
[ASME PAPER 86-TRIB-6] p 199 A87-19526

Response of structures to random excitations in time domain
p 382 A87-28562

Investigation of transonic region of high dynamic response encountered on an elastic supercritical wing
[AIAA PAPER 87-0735] p 411 A87-33662

The effect of gyroscopic forces on dynamic stability and response of spinning tapered blades
[AIAA PAPER 87-0737] p 464 A87-33663

Validation of flutter test analysis method
[AIAA PAPER 87-0780] p 445 A87-33676

Study of the dynamic response of helicopters to a large airplane wake
p 678 A87-43429

Nonlinear dynamic response of composite rotor blades
[AD-A173069] p 176 N87-14321

Development of mechanistic flexible pavement design concepts for the heavyweight F-15 aircraft
[AD-A170902] p 194 N87-14357

An experimental investigation of the structural dynamics of a torsionally soft rotor in vacuum
[NASA-CR-177418] p 244 N87-15965

Estimation of bias errors in measured airplane responses using maximum likelihood method
[NASA-TM-89059] p 254 N87-15977

Unsteady aerodynamics of a rotating compressor blade row in incompressible flow. Volume 1: Experimental facilities, procedures and sample data
[AD-A173043] p 307 N87-16831

A comparative study of some dynamic stall models
[NASA-TM-88917] p 391 N87-18883

Automated aircraft static structural testing with computer aided interpretation
[AD-A175321] p 363 N87-19384

Investigation of transonic region of high dynamic response encountered on an elastic supercritical wing
[NASA-TM-89121] p 417 N87-20236

Development of a mathematical model that simulates the longitudinal, and lateral-directional response of the F/A-18 for the study of flight control reconfiguration
[AD-A176333] p 450 N87-21004

Dynamic response and stability of a composite prop-fan model
[NASA-CR-179528] p 519 N87-21956

Aircraft Dynamic Response to Damaged and Repaired Runways
[AGARD-R-739] p 584 N87-23609

Interpretation in terms of the response of a one degree-of-freedom oscillator to two successive disturbances
p 585 N87-23610

An experimental-analytical routine for the dynamic qualification of aircraft operating on rough runway surfaces
p 585 N87-23611

Dynamic response of two composite prop-fan models on a nacelle/wing/fuselage half model
[NASA-CR-179589] p 585 N87-23615

Influence of dynamic inflow on the helicopter vertical response
[NASA-TM-88327] p 598 N87-24482

Validation of the ARL (Aeronautical Research Laboratories) mathematical model of the Sea King Mk 50 helicopter
[AD-A181314] p 752 N87-26901

The computed gust response of an aircraft. The relative effect of various degrees of freedom
[AD-A180968] p 775 N87-26916

Use of blade sweep to reduce 4/rev hub loads
[AD-A182247] p 754 N87-27659

Application of GRASP (General Rotorcraft Aeromechanical Stability Program) to nonlinear analysis of a cantilever beam
[NASA-TM-89222] p 754 N87-27660

Analysis and test evaluation of the dynamic response and stability of three advanced turboprop models
[NASA-CR-174814] p 833 N87-28555

DYNAMIC STABILITY

Drag and stability improvements of a square parachute
[AIAA PAPER 86-2471] p 68 A87-13805

The effect of turbine elements on the gasdynamic stability margin
p 105 A87-15208

Dynamic stability threshold of contacting mechanical seals
[ASLE PREPRINT 86-TC-3B-2] p 199 A87-19507

The influence of support oscillation in dynamic stability tests --- sting plunging effects
[AIAA PAPER 87-0243] p 257 A87-22506

A decentralized approach to integrated flight control synthesis
p 372 A87-29249

Classification of criteria for the gasdynamic stability of a gas turbine engine based on a set of its parameters
p 439 A87-31746

A study of the effect of the separation zone on the oscillations of a cone
p 484 A87-35824

The longitudinal dynamic stability and control of a large receiver aircraft during air-to-air refueling
p 521 A87-36841

Synthesis of time-invariant linear systems under determinate and random excitations --- for flight vehicle motion stability
p 521 A87-39009

Aircraft servo-aeroelasticity stability
p 594 A87-39410

Aeroelastic stability of a bearingless circulation rotor in forward flight
p 652 A87-43443

A panel method for predicting the dynamic stability derivatives of an oscillating wing in high subsonic flow
p 641 A87-46951

Effects of temperature transients on the stability of a turbojet engine
p 761 A87-49241

EDGES

EDGES

Thermal and thermally stressed state of trigonal prisms modeling the operation of the edges of gas turbine blades p 382 A87-29204

EDUCATION

NAECON 1986; Proceedings of the National Aerospace and Electronics Conference, Dayton, OH, May 19-23, 1986. Volumes 1, 2, 3, & 4 p 141 A87-16726

Rotorcraft preliminary design education [AIAA PAPER 86-2748] p 210 A87-17961

The organization of flight testing in an university environment [AIAA PAPER 86-9820] p 273 A87-23262

Simulation of performance, behaviour and faults of aircraft engines [AIAA PAPER 87-1868] p 668 A87-45263

Airbreathing propulsion system design at the United States Air Force Academy - An integrated approach [AIAA PAPER 87-1870] p 709 A87-45265

Flight-vehicle structures education in the US: Assessment and recommendations [NASA-CR-4048] p 336 A87-17526

Computer program for conceptual helicopter design [AD-A175140] p 363 A87-19382

Microcomputer software support for classes in aircraft conceptual design [AD-A181450] p 752 A87-26902

EFFECTIVE PERCEIVED NOISE LEVELS

A citizen acoustician's observations of aircraft noise p 330 A87-27112

An international study of the influence of residual noise on community disturbance due to aircraft noise p 330 A87-27114

Ldn dictates local options - Why? --- sociological effect of artificially-modeled noise standards p 331 A87-27117

Effects of background noise on total noise annoyance [NASA-TP-2630] p 208 A87-14120

EFFICIENCY

Automation - A necessity for higher ATC efficiency p 577 A87-39261

An efficient algorithm for solution of the unsteady transonic small-disturbance equation [NASA-TM-89014] p 230 A87-15176

EIGENVALUES

Decoupling control synthesis for an oblique-wing aircraft p 108 A87-13342

Dynamic output feedback flight control laws using eigenstructure assignment p 109 A87-13355

Eigenstructure assignment by dynamic output feedback p 134 A87-13385

Application of eigenstructure assignment to flight control design: Some extensions p 371 A87-28911

Application of eigenstructure assignment to self reconfiguring aircraft MIMO controllers [AIAA PAPER 87-2235] p 770 A87-50402

Eigenvalue analysis of 2D aircraft fuselage beam model and fuselage air cavity using a symmetric fluid-structure interaction finite element formulation [FFA-TN-1986-70] p 303 A87-17698

Sensitivity Analysis in Engineering [NASA-CP-2457] p 390 A87-18855

EIGENVECTORS

Design of dynamic compensators via eigenstructure assignment with flight control applications p 186 A87-16768

Application of eigenstructure assignment to flight control design: Some extensions p 371 A87-28911

Flight control synthesis via eigenstructure assignment - The discrete version p 448 A87-35002

Investigation of ground and air resonance using a combination of multiblade coordinates and Floquet theory p 653 A87-43444

Application of eigenstructure assignment to self reconfiguring aircraft MIMO controllers [AIAA PAPER 87-2235] p 770 A87-50402

EJECTION SEATS

Status report of a new recovery parachute system for the F111 aircraft crew escape module [AIAA PAPER 86-2437] p 91 A87-13821

Life threat assessment logic for adaptive control of the crest ejection seat p 161 A87-16941

The USAF's CREST program - Phase I p 298 A87-25837

Multi-axis seat ejection (MASE) sled p 494 A87-37770

In-flight ejection seat test using the Aircrew Gliding Escape System (AGES) parachute [AD-A172987] p 235 A87-15948

The derivation of low profile and variable cockpit geometries to achieve 1st to 99th percentile accommodation [AD-A173454] p 295 A87-17687

Controllable ejection seat catapult [AD-D012592] p 355 A87-19370

A preliminary study into the constant drag parachute for aircrew escape systems [BU-345] p 421 N87-20256

Airspeed sensing pressure valve system [AD-D012569] p 438 N87-20266

Crew escape capsule to airframe latch/disconnect mechanisms [AD-A181565] p 739 N87-26886

EJECTORS

Mixing characteristics of a supersonic multiple jet ejector [AIAA PAPER 87-0248] p 249 A87-22510

Installation aerodynamics of ejectors in combat aircraft p 367 A87-29265

Two-dimensional nozzle plume characteristics [AIAA PAPER 87-2111] p 636 A87-45413

Two-dimensional nozzle plume characteristics [NASA-TM-89812] p 349 N87-18540

Augmentor wing powered lift technology: Affordable alternatives to enhance tactical airlift capability [AD-A177750] p 508 N87-21911

ELASTIC ANISOTROPY

A two-dimensional linear elastic crack tip element for NASTRAN [AD-A176133] p 469 N87-21378

Life prediction and constitutive models for engine hot section anisotropic materials [NASA-CR-179594] p 593 N87-23622

ELASTIC BARS

Optimization of the controlled rotations of a rigid body with an elastic rod using first integrals of a free system p 859 A87-50915

ELASTIC BENDING

Influence of third-degree geometric nonlinearities on the vibration and stability of pretwisted, precone, rotating blades p 674 A87-46228

Optimum aeroelastic characteristics for composite supermaneuverable aircraft [AD-A174785] p 362 N87-19377

ELASTIC BODIES

Investigation of transonic region of high dynamic response encountered on an elastic supercritical wing [AIAA PAPER 87-0735] p 411 A87-33662

A simplified state-space modeling of elastic vehicle p 582 A87-39272

Symbolic generation of elastic rotor blade equations using a FORTRAN processor and numerical study on dynamic inflow effects on the stability of helicopter rotors [NASA-TM-86750] p 587 N87-24455

ELASTIC DAMPING

Interference of rotor harmonics in two-shaft coaxial rotor systems with nonlinearly elastic shaft supports p 610 A87-42136

ELASTIC DEFORMATION

Analysis of elastic and plastic deformation in a layered structure subjected to rolling-sliding contact p 534 A87-38555

The effects of aeroelastic deformation on the unaugmented stopped-rotor dynamics of an X-Wing aircraft [AIAA PAPER 87-2563] p 769 A87-49613

ELASTIC PLATES

Resonant and non-resonant acoustic properties of elastic panels. I - The radiation problem p 49 A87-13026

Further generalization of an equivalent plate representation for aircraft structural analysis [AIAA PAPER 87-0721] p 463 A87-33562

Scattering of sound by a semi-infinite elastic plate with a soft backing - A matrix Wiener-Hopf problem p 859 A87-52846

ELASTIC PROPERTIES

Effect of geometric elastic non-linearities on the impact response of flexible multi-body systems p 462 A87-32917

Nonlinear fracture mechanics analysis with boundary integral method [AD-A173216] p 328 N87-18124

ELASTIC SYSTEMS

Longitudinal stability analysis of elastic vehicles [AIAA PAPER 87-0348] p 253 A87-22573

ELASTIC WAVES

3D and axisymmetric thermo-elastic stress analysis by BEASY p 609 A87-41269

ELASTODYNAMICS

Controlling the elastic vibrations of aircraft structures by means of control moment gyroscopes p 188 A87-17564

Use of hierarchical elastic blade equations and automatic trim for helicopter vibration analysis p 167 A87-19206

Experimental investigation of structural autoparametric interaction under random excitation [AIAA PAPER 87-0779] p 464 A87-33675

ELASTOMERS

The effect of nonlinear elastomeric lag damper characteristics on helicopter rotor dynamics [AIAA PAPER 87-0955] p 583 A87-39649

FEL - A new main rotor system p 651 A87-43402

Electro-expulsive separation system [NASA-CASE-ARC-11613-1] p 849 N87-28833

ELASTOPLASTICITY

The effect of material compressibility (Poisson ratio) on the elasto-plastic solution to the problem of a cylinder under internal pressure (coldworking situation) p 124 A87-13642

Nonisothermal elasto-visco-plastic response of shell-type structures p 541 N87-22796

ELECTRA AIRCRAFT

The development of an air motion measurement system for NASA's Electra aircraft p 589 A87-42183

ELECTRIC ARCS

Experimental study of the interaction between an arc and an electrically floating structure p 126 A87-15023

WSUH-ID: Review of damage following lightning strike 30 November 1981 [RAE-TRANS-2103] p 432 N87-20262

ELECTRIC BATTERIES

Transportation container for Li/SO₂ batteries on passenger aircraft [DE87-008653] p 577 N87-24440

ELECTRIC CONDUCTORS

International Aerospace and Ground Conference on Lightning and Static Electricity. Technical papers: The key to lightning technology, held in Orlando, Florida on 26-28 June 1984 [AD-A169867] p 235 N87-15192

ELECTRIC CONNECTORS

EMC characteristics of grounding networks and electrical interfaces --- in aircraft p 746 A87-48950

ELECTRIC CONTROL

Design considerations for fly-by-wire control of new Airbus aircraft [MBB-UT-222-86] p 110 A87-13991

ESSY - An electromechanical adjustment system for aircraft control surfaces p 92 A87-14014

The second electronics revolution - The impact potential of new power electronic technologies on aircraft actuation systems p 197 A87-16765

A new technology in energy-efficient electrically driven aircraft environmental control systems p 166 A87-18116

A contribution to digital compensation of periodic disturbances with frequencies in bounded intervals --- in helicopters [ESA-TT-979] p 191 N87-14352

The development of the T-46 next generation trainer manned engineering simulator at the US Air Force Flight Test Center p 601 N87-23652

ELECTRIC CORONA

Corona from simulated aircraft surfaces and their contribution to the triggered discharge p 82 A87-15024

ELECTRIC CURRENT

Prediction of skin currents flowing on a Lynx helicopter due to a simulated lightning strike p 95 A87-15012

Current levels and distributions on an aircraft during ground lightning simulation tests and in-flight lightning attachments p 82 A87-15017

Lightning return stroke current computation p 126 A87-15029

A heater made from graphite composite material for potential deicing application [AIAA PAPER 87-0025] p 297 A87-24905

A heater made from graphite composite material for potential deicing application [NASA-TM-88888] p 101 N87-12559

Electro-expulsive separation system [NASA-CASE-ARC-11613-1] p 849 N87-28833

Low altitude lightning attachment to an aircraft [AD-A183290] p 819 N87-29473

ELECTRIC DISCHARGES

State-of-the-art techniques for lightning susceptibility/vulnerability assessments p 126 A87-15006

Corona from simulated aircraft surfaces and their contribution to the triggered discharge p 82 A87-15024

Improved electrostatic discharge wicks for aircraft p 127 A87-15039

The mathematics of interaction between a lightning rod on earth and a step leader due to lightning p 329 A87-25994

Visualization of shock wave and streamline around hypersonic vehicle by using electrical discharge p 806 A87-52322

Ground testing of an operational fighter aircraft for p-static discharge effects p 824 A87-52522

Design for testability for future digital avionics systems p 177 A87-16727

IESS - Dynamic test and evaluation facility for integrated CNI --- Integrated Electromagnetic System Simulator for Communication, Navigation, and Identification p 192 A87-16827

The B-1B Central Integrated Test System Expert Parameter System p 179 A87-16839

On ground calibration of a pushbroom scanner p 255 A87-19651

An ultrasonic sensor for the detection and measurement of the thickness of ice on an airfoil [ONERA, TP NO. 1986-175] p 246 A87-21074

Testability management for digital avionics p 459 A87-31500

Measuring instability during avionic design p 459 A87-31501

Designing to MIL-STD-2165 - Testability --- of V-22 avionics p 437 A87-33872

Microprocessor based UUT testing in a depot environment p 547 A87-38666

Equivalent testing temperature --- for SAAB avionics p 786 A87-47642

Investigation of optimal complexity of BITE and its effects on reliability, maintainability, monitoring and fault prediction --- Built-In Test (BITE) electronic systems [ETN-86-97976] p 51 N87-11175

Aircraft electromagnetic compatibility [NASA-CR-181051] p 613 N87-23856

ELECTRONIC MODULES

An expert system for the configuration of aircraft modular VSCF generator systems p 205 A87-16755

Universal receiver for ICNIA p 434 A87-31460

Universal receiver for ICNIA p 589 A87-41405

ELECTRONIC PACKAGING

Modular ICNIA packaging technology p 436 A87-31546

Avionics weight control for the starship and beyond [SAWE PAPER 1736] p 505 A87-36300

ELECTRONIC WARFARE

ECCM/advanced radar test bed (E/ARTB) system definition --- Electronic Counter CounterMeasures p 157 A87-16749

ELECTRONICS

NAECON 1986; Proceedings of the National Aerospace and Electronics Conference, Dayton, OH, May 19-23, 1986. Volumes 1, 2, 3, & 4 p 141 A87-16726

ELECTROSTATIC CHARGE

Electrostatic field measurements in a foam filled C-130 fuel tank during fuel sloshing p 95 A87-15037

Improved electrostatic discharge wicks for aircraft p 127 A87-15039

ELECTROSTATIC PROBES

Flight model discharge system [AD-A169423] p 117 N87-12571

ELECTROSTATICS

Electrostatic spray modification in gas turbine combustion p 379 A87-31288

ELEVATORS (CONTROL SURFACES)

Flight testing TECS - The Total Energy Control System [SAE PAPER 861803] p 444 A87-32648

The aeroelastic instability of an elevator balance horn in a shear layer wake flow [SAE PAPER 861827] p 427 A87-32661

ELLIPSOIDS

A laminar boundary layer method for flows in planes of symmetry and application to inclined ellipsoids of revolution p 9 A87-12146

ELLIPTIC DIFFERENTIAL EQUATIONS

Solution of inverse problem of transonic flow on S2 surface using an elliptic algorithm p 347 A87-31166

Generation of surface grids through elliptic partial differential equations for aircraft and missile configurations [AD-A172867] p 271 N87-16557

Numerical grid generation around complete aircraft configurations p 475 N87-20202

ELLIPTIC FUNCTIONS

An analysis of elliptic grid generation techniques using an implicit euler solver [AD-A169240] p 207 N87-14061

ELLIPTICAL CYLINDERS

Numerical and experimental study of dynamics of two-dimensional body [ISAS-619] p 59 N87-10748

EMBEDDED COMPUTER SYSTEMS

Capacity management of air traffic control computer systems p 395 A87-30274

A quantitative analysis of the history of developing a large embedded software system p 472 A87-31495

Reconfigurable display panel using embedded Ada p 472 A87-31509

Embedded expert systems for avionics applications p 435 A87-31529

Embedded expert systems for fault detection and isolation --- in avionics systems p 436 A87-31530

Ada - From promise to practice? p 546 A87-37550

The implementation and use of Ada on distributed systems with high reliability requirements [NASA-CR-179842] p 137 N87-12265

EMERGENCIES

Emergency locator transmitters - A problem and a challenge p 578 A87-39428

Emergency descent simulation of an aerostat after breakaway [AIAA PAPER 87-2440] p 736 A87-48644

Emergency exits for underwater escape from rotorcraft [AEG-REPT-528] p 156 N87-14304

Task force on emergency evacuation of transport airplanes. Volume 2: Supporting documentation [AD-A172256] p 235 N87-15194

EMERGENCY LIFE SUSTAINING SYSTEMS

Boeing 747 crash accident - A theoretical consideration on the variation of the internal pressure p 238 A87-21276

ENDOSCOPES

NDT of jet engines - An industry survey. I p 321 A87-25823

ENERGY ABSORPTION

Crashworthy crewseat limit load optimization through dynamic testing p 91 A87-13675

Mechanism of energy absorption via buckling - An analytical study p 124 A87-13682

A method of predicting the energy-absorption capability of composite subfloor beams [NASA-TM-89088] p 380 N87-19450

Integrally-stiffened crash energy-absorbing subfloor beam structure [NASA-CASE-LAR-13697-1] p 659 N87-25321

ENERGY CONSERVATION

Polymer, metal, and ceramic matrix composites for advanced aircraft engine applications p 121 A87-15187

Advances in numerical weather prediction for aviation forecasting p 615 A87-42483

Ground-based time-guidance algorithm for control of airplanes in a time-metered air traffic control environment: A piloted simulation study [NASA-TP-2616] p 34 N87-10864

USAF test pilot school. Flying qualities textbook, volume 2, part 1 [AD-A170959] p 173 N87-13431

Development of selected advanced aerodynamics and active control concepts for commercial transport aircraft [NASA-CR-3781] p 275 N87-17659

Fuel conservation evaluation of US Army helicopters. Part 6: Performance calculator evaluation [AD-A181645] p 753 N87-27653

ENERGY CONSUMPTION

Energy efficient actuation using variable displacement hydraulic control [SAE PAPER 851757] p 112 A87-15481

ENERGY CONVERSION

Energy conversion for long endurance air vehicles p 184 A87-18117

ENERGY CONVERSION EFFICIENCY

Improving the energy efficiency of cooled high-temperature turbines p 104 A87-13990

ENERGY DISSIPATION

Development of the highly loaded axial flow turbine airfoils, making use of the improved inverse channel flow design method p 202 N87-14257

ENERGY METHODS

Theoretical foundations of a method for the strength analysis of fuselage frames. II - Solution of the energy problem p 507 A87-39085

ENERGY POLICY

Research and development. Technical-scientific publications 1986 [ETN-87-99713] p 710 N87-26826

Integration of the propfan concept in aircraft design [MBB-UT-0001/86] p 677 N87-26835

ENERGY REQUIREMENTS

Energy conversion for long endurance air vehicles p 184 A87-18117

ENERGY SOURCES

Alternatives for the propulsion of global range transport aircraft [ETN-87-98978] p 371 N87-19399

ENERGY STORAGE

Integrated power and attitude control system (IPACS) technology p 194 A87-18138

ENERGY TECHNOLOGY

Japan Report: Science and technology [JPRS-JST-86-014] p 391 N87-19541

ENGINE AIRFRAME INTEGRATION

Numerical methods for engine-airframe integration p 23 A87-11776

CFD applications to engine/airframe integration p 23 A87-11780

CFD - A user's technology assessment --- for propulsion integration and aircraft engine installation p 23 A87-11781

Propulsion challenges for hypersonic flight [AIAA PAPER 86-2620] p 183 A87-17880

Fighter aircraft/propulsion integration [AIAA PAPER 86-2658] p 142 A87-17905

Computational analysis of hypersonic airbreathing aircraft flow fields [AIAA PAPER 87-0279] p 222 A87-22531

ATF propulsion tests will drive operations at Arnold facility p 314 A87-23746

Integrated dynamic model of two-variable supersonic inlet-engine combination p 304 A87-25421

Ultra high bypass engine applications to commercial and military aircraft [SAE PAPER 861720] p 440 A87-32611

STOVL engine/airframe integration [AIAA PAPER 87-1711] p 655 A87-45158

Airbreathing propulsion system design at the United States Air Force Academy - An integrated approach [AIAA PAPER 87-1870] p 709 A87-45265

Integration effects of pylon geometry and rearward mounted nacelles for a high-wing transport [AIAA PAPER 87-1920] p 655 A87-45300

Force accounting for airframe integrated engines [AIAA PAPER 87-1965] p 636 A87-45334

Test flow calibration study of the Langley Arc-Heated Scramjet Test Facility [AIAA PAPER 87-2165] p 685 A87-45445

Ultra high bypass installation design for transport aircraft [AIAA PAPER 87-2280] p 748 A87-49061

Unsteady inlet distortion characteristics with the B-1B p 575 N87-24478

Computational analysis of hypersonic airbreathing aircraft flow fields p 645 N87-26019

An experimental investigation of an advanced turboprop installation on a swept wing at subsonic and transonic speeds [NASA-TP-2729] p 733 N87-26883

ENGINE CONTROL

Closed loop control of an afterburning F100 gas turbine engine p 103 A87-13323

Variable structure control of a turbojet engine p 103 A87-13343

Impact of mismodeled idle engine performance on calculation and tracking of optimal 4-D descent trajectories p 88 A87-13360

Mathematical model and digital simulation for speed control system of two-spool turbojet engine p 105 A87-14139

Airworthiness considerations of lightning strike protection for helicopter digital engine controls p 105 A87-15010

Moving closer to fully integrated control p 247 A87-20937

FADEC for fighter engines --- Full Authority Digital Engine Control p 303 A87-24612

Adjustment diagnostics and fault isolation for calibration test of jet engine controls p 459 A87-31526

Applications of VLSI in electronic turbine engine controls p 459 A87-31534

Integrated controls - Preparing for the Advanced Tactical Fighter p 443 A87-31540

Improved engine performance utilizing integrated inlet control p 438 A87-31541

Parameters for the evaluation of combined engine thrust vector control systems p 439 A87-31725

Analytical redundancy technology for engine reliability improvement [SAE PAPER 861725] p 462 A87-32614

Integrated flight/propulsion control for next generation military aircraft [SAE PAPER 861726] p 437 A87-32615

Design verification and engine test of an advanced fuel management system for aircraft gas turbine engines [SAE PAPER 861727] p 440 A87-32616

Development program of a full authority digital electronic control system for the T55-L-712E turboshaft engine p 663 A87-43465

Approximation of the characteristics of the turbine of a gas turbine engine in a wide range of operating modes p 663 A87-43606

Flight test of the F100-PW-220 engine in the F-16 [AIAA PAPER 87-1845] p 667 A87-45245

F-15/F100 digital electronic engine control main fuel gear pump field service evaluation [AIAA PAPER 87-1846] p 667 A87-45246

Preliminary flight results of an adaptive engine control system of an F-15 airplane [AIAA PAPER 87-1847] p 667 A87-45247

Micro-computer/parallel processing for real time testing of gas turbine control systems [AIAA PAPER 87-1926] p 669 A87-45304

Highly reliable, microprocessor-based engine control [AIAA PAPER 87-1927] p 669 A87-45305

Development of Digital Engine Control System for the Harrier II [AIAA PAPER 87-2184] p 673 A87-45458

Integration of engine/aircraft control - 'How far is it sensible to go' p 674 A87-46226

Investigation on the stall margin of a turbofan engine p 675 A87-46239

Reliability, 'better than the best' p 699 A87-46728

Integrating pitch and power control p 765 A87-48276

A full authority digital electronic control system for multi-engine rotorcraft p 761 A87-48965

Multi-variable control concepts for turboshaft engines p 832 A87-53431

Control of gas turbines. The future: Is a radical approach needed? --- aircraft engines [PNR-90295] p 107 N87-11793

Spectrum-modulating fiber-optic sensors for aircraft control systems [NASA-TM-88968] p 309 N87-17700

Some considerations relating to aero engine pyrometry p 468 N87-21187

Highly integrated digital electronic control: Digital flight control, aircraft model identification, and adaptive engine control [NASA-TM-86793] p 592 N87-23619

A rotorcraft flight/propulsion control integration study [NASA-CR-179574] p 587 N87-24457

Advanced detection, isolation and accommodation of sensor failures: Real-time evaluation [NASA-TP-2740] p 682 N87-25331

ENGINE COOLING

Simulation of oil circuits in VSCF electrical power systems [SAE PAPER 861623] p 462 A87-32580

Experimental investigation on cooling effectiveness of a turbine blade under various design conditions p 513 A87-37846

Cooling flow technique for designing afterburner heat shields p 513 A87-37847

Inverse design of coolant flow passages in ceramically coated scram jet combustor struts p 514 A87-38807

Contingency power for small turboshaft engines using water injection into turbine cooling air [AIAA PAPER 87-1906] p 668 A87-45289

Waste heat recovery system for high altitude application of liquid cooled, piston engines [AIAA PAPER 87-2174] p 673 A87-45454

Contingency power for small turboshaft engines using water injection into turbine cooling air [NASA-TM-89817] p 442 N87-20280

The effects of an embedded vortex on a film cooled turbulent boundary layer [AD-A177785] p 536 N87-22136

ENGINE DESIGN

The balance between theoretical, computational and experimental work in turbomachines p 49 A87-13015

Mechanized manufacture of composite main rotor blade spars p 124 A87-13625

On the improvement of an expendable turbojet engine flight envelope p 104 A87-13647

Further development of the axial-radial compressor p 104 A87-13998

New-technology gas generator (GNT 1) - The actual state of development p 126 A87-14006

Turbine bypass remote augmentor lift system for V/STOL aircraft p 105 A87-14364

For small airliners and executive jets p 105 A87-15179

Turbofan engine cycle design selection - Year 2000 [AIAA PAPER 86-2705] p 184 A87-17937

An overview of the small engine component technology (SECT) studies --- commuter, rotorcraft, cruise missile and auxiliary power applications in year 2000 [AIAA PAPER 86-1542] p 184 A87-17993

Anatomy of a new helicopter engine - Pratt and Whitney Canada PW200 series turboshafts p 184 A87-18510

Planning for T800-LHT-800 availability, supportability and affordability p 184 A87-18512

Fabrication and quality assurance processes for superhybrid composite fan blades p 195 A87-19123

Critical propulsion system parameters for future STOL combat aircraft p 185 A87-19280

Revised guidelines for propfan inlet design based on recent analytical and test experience [AIAA PAPER 87-0163] p 249 A87-22452

Theory and analysis of aircraft turbomachines (2nd revised and enlarged edition) --- Russian book p 304 A87-25265

Development of high by-pass ratio turbofan engines p 305 A87-25422

Design and development of a power takeoff shaft p 305 A87-25717

Constructional improvements in a turboprop engine p 306 A87-27492

Combination engines for spaceplanes p 378 A87-29357

Performance analysis of a mixed flow turbofan engine at the design point p 367 A87-29388

Some aspects of gas turbine combustion using air-blast atomizers p 367 A87-29389

Design verification system for advanced aerospace engines p 367 A87-29454

Past, present and future of hydraulic APU start systems [SAE PAPER 861711] p 368 A87-29577

Development of a hot gas vane motor for aircraft starting systems [SAE PAPER 861714] p 368 A87-29580

A systems approach to engine starting system design [SAE PAPER 861734] p 368 A87-29581

Avco-Pratt - Getting its LHX engine field-ready p 369 A87-30501

Methods for monitoring and maintaining military turbojets p 340 A87-30843

Low aspect ratio axial flow compressors - Why and what it means [SAE PAPER 861837] p 369 A87-31150

Rolls revs up for the new century p 369 A87-31209

Technology for the design of high temperature rise combustors p 370 A87-31287

Calculation of a plane nonadjustable supersonic air intake for CAD p 438 A87-31723

Classification of mathematical models of gas turbine engines. I p 439 A87-31745

Classification of criteria for the gasdynamic stability of a gas turbine engine based on a set of its parameters p 439 A87-31746

2000 is (nearly) now --- development of new fighter engines p 439 A87-32003

Aerospace information report 1939 trial application [SAE PAPER 861787] p 478 A87-32636

Optimization and analysis of gas turbine engine blades [AIAA PAPER 87-0827] p 475 A87-33614

The propfan leads the way to a new generation of propulsion engines p 441 A87-35180

Europe consolidates its turboshaft family p 512 A87-36698

[REPT-3707-LC-85-PT-1]
p 195 N87-13496

EPOXY RESINS

- Resin-hardener systems for resin transfer molding
p 120 A87-13093
Polymer systems for rapid sealing of aircraft structures at low temperature
[AD-A167667]
p 41 N87-10209
Composite repair of cracked aluminum structure
p 404 N87-20183
Composite repair material and design development efforts
p 405 N87-20188
Unconventional approaches to field repair
p 406 N87-20190

EQUATIONS OF MOTION

- Direct solution of flutter equations with interactive graphics procedure
p 110 A87-13648
Mathematical modeling of the motion of a statically deformed delta-shaped glider
p 95 A87-15205
Use of hierarchical elastic blade equations and automatic trim for helicopter vibration analysis
p 167 A87-19206
The influence of support oscillation in dynamic stability tests --- sting plunging effects
[AIAA PAPER 87-0243]
p 257 A87-22506
Application of Reissner method to free vibrations of a tapered, twisted, aerofoil cross-section turbine blade, mounted at a stagger angle on a rotating disc
p 366 A87-27811
Construction of a generating solution and a generating system of equations in a study of self-oscillatory parachute motion
p 408 A87-31729
Non-linear equation of motion of fibre reinforced composite rotor blades
p 531 A87-35657
An analytic method of quantifying helicopter agility
p 678 A87-43432
The integration of a six axis motion system and a wide angle visual system inside a dome
p 684 A87-44720
Stochastic model theory of broadband shock associated noise from supersonic jets
p 859 A87-52069
Introduction to aerodynamics derivatives, equations of motion and stability
[ESDU-86021]
p 76 N87-12536
Simplified forms of performance equations. Addendum A: Effect on aeroplane level speed of small changes in thrust, drag, weight, power
[ESDU-86004-ADD-A]
p 100 N87-12556
Modeling aerodynamic discontinuities and the onset of chaos in flight dynamical systems
[NASA-TM-89420]
p 292 N87-17663
A flight dynamic simulation program in air-path axes using ACSL (Advanced Continuous Simulation Language)
[AD-A173849]
p 332 N87-18337
QFT (Quantitative Feedback Theory) digital flight control design as applied to the AFTI/F16
[AD-A177744]
p 522 N87-21959
Analysis of structures with rotating, flexible substructures
[AD-A178903]
p 542 N87-23004
Symbolic generation of elastic rotor blade equations using a FORTRAN processor and numerical study on dynamic inflow effects on the stability of helicopter rotors
[NASA-TM-86750]
p 587 N87-24455
Modeling and implementation of wind shear data
p 709 N87-25273
Singular trajectories in airplane cruise-dash optimization
[NASA-CR-180636]
p 659 N87-26035
Gust response of helicopters
[AD-A176333]
p 682 N87-26049
- EQUATIONS OF STATE**
An equation of state for the material of the nozzle vanes of a gas-turbine engine under thermal cycling in a sulfur-containing medium
p 379 A87-29203
An angle-only tracking filter in modified spherical coordinates --- for fighter aircraft maneuvers
[AIAA PAPER 87-2380]
p 741 A87-50465
Development of a mathematical model that simulates the longitudinal, and lateral-directional response of the F/A-18 for the study of flight control reconfiguration
[AD-A176333]
p 450 N87-21004
- EQUIPMENT SPECIFICATIONS**
The development of dynamic performance standards for civil rotorcraft seats
p 155 A87-19251
A systems approach to engine starting system design [SAE PAPER 861734]
p 368 A87-29581
GE's big fan gets bigger
p 513 A87-38034
Engine-airframe integration for rotorcraft: Component specifications and qualification
p 26 N87-10071
Description of the US Army small-scale 2-meter rotor test system
[NASA-TM-87762]
p 292 N87-17664
Air transportation technology program at Ohio University, 1983
p 352 N87-18524

- Acceleration display system for aircraft zero-gravity research
[NASA-TM-87358]
p 389 N87-18801
Minimum operational performance standards for airborne area navigation equipment using Loran-C inputs [RTCA/DO-194]
p 357 N87-19372
An experimental study of the properties of surface pressure fluctuations for separating turbulent boundary layers
[NASA-CR-180295]
p 789 N87-27124

EROSION

- Characterization of optical and surface parameters during particle impact damage
p 195 A87-17973
Erosion problem of axial compressor blades of a turboshaft engine
p 675 A87-46246
A design system for erosion tolerant helicopter engines
p 831 A87-53430
Study of particulated flows and erosion in turbomachinery
[AD-A172965]
p 251 N87-15232
A study of compressor erosion in helicopter engine with inlet separator
[AD-A173288]
p 309 N87-17703
Nuclear hardness simulation and analysis of composite aircraft structures. Volume 2: Dust erosion assessment [AD-A174893]
p 363 N87-19378
High temperature protective coatings for aero engine gas turbine components
[AD-A176001]
p 442 N87-20286
Erosion study of AM355 and Al2O3 ceramics
[AD-A178882]
p 530 N87-22858

ERROR ANALYSIS

- Characterizing height keeping error distribution based on indirect observation
p 17 A87-12683
Characterizing height-keeping error distribution based on indirect observation --- applicable to evaluation of safety of air traffic control systems
p 158 A87-17243
Reliable high accuracy long range real time differential G.P.S. using a lightweight high frequencies data link
p 581 A87-41393
Errors in the measurement of the course angles of radar reference points due to the imprecise stabilization of the antenna mounting in bank and pitch
p 649 A87-44312
Efficient computation of parameter confidence intervals
[AIAA PAPER 87-2624]
p 795 A87-49623
The significance of error dynamics in model-following for flight control design
[AIAA PAPER 87-2311]
p 771 A87-50432
Failure detection in dynamic systems with modeling errors
[AIAA PAPER 87-2604]
p 795 A87-50565
Investigation of optimal complexity of BITE and its effects on reliability, maintainability, monitoring and fault prediction --- Built-In Test (BITE) electronic systems
[ETN-86-97976]
p 51 N87-11175
Study of the effects of vibration on inertial navigation system accuracy
[AD-A172420]
p 237 N87-15954
Readiness and retention. Pilot flight experience and aircraft mishaps
[AD-A173911]
p 353 N87-18548
Low-cost FM oscillator for capacitance type of blade tip clearance measurement system
[NASA-TP-2746]
p 594 N87-24481
Simulation of strapdown systems for error analysis, and modeling for navigation with other sensor systems
p 821 N87-28535
Measurement uncertainty for the Uniform Engine Testing Program conducted at NASA Lewis Research Center [NASA-TM-88943]
p 833 N87-28557
Velocity accuracy measurement of GPS user equipment
p 822 N87-29477

ERROR CORRECTING CODES

- Integrity of the Microwave Landing System (MLS) Data Functions
p 580 A87-41388

ERROR DETECTION CODES

- A redundancy management procedure for fault detection and isolation
p 46 A87-11127
A quantitative analysis of the history of developing a large embedded software system
p 472 A87-31495

ERROR SIGNALS

- Phase noise from aircraft motion: Compensation and effect on synthetic aperture radar images
p 615 N87-24802

ERRORS

- Pilot and static errors in steady level flight
[ESDU-86006]
p 74 N87-11691
Introduction to air data system parameters, errors and calibration laws
[ESDU-86031]
p 247 N87-15967
Estimation of bias errors in measured airplane responses using maximum likelihood method
[NASA-TM-89059]
p 254 N87-15977

- Digital program for calculating static pressure position error
[NASA-TM-86726] p 301 N87-16821
- Results of numerical and physical modelling of airborne adcock arrays for VHF DF (Direction Finding) applications
[AD-P005423] p 790 N87-27851
- ERS-1 (ESA SATELLITE)**
DFVLR flight operation acting as a useful service unit for ERS-1 p 331 N87-17378
- ESCAPE CAPSULES**
Crew escape capsule to airframe latch/disconnect mechanisms
[AD-A181565] p 739 N87-26886
- ESCAPE SYSTEMS**
Aircrew automated escape systems requirements formulation, evaluation, test and acceptance p 294 A87-25836
- The USAF's CREST program - Phase I p 298 A87-25837
- Escaping from burning cabins - Are smoke hoods the answer? p 352 A87-30003
- Multi-axis seat ejection (MASE) sled p 494 A87-37770
- Emergency exits for underwater escape from rotorcraft
[AEG-REPT-528] p 156 N87-14304
- In-flight ejection seat test using the Aircrew Gliding Escape System (AGES) parachute
[AD-A172987] p 235 N87-15948
- A new recovery parachute system for the F111 aircraft crew escape module
[DE87-000973] p 576 N87-24437
- ESTIMATES**
Identification of dynamic systems - applications to aircraft. Part 1: The output error approach
[AGARD-AG-300-VOL-3-PT-1] p 508 N87-21913
- Estimation of blade airloads from rotor blade bending moments
[NASA-TM-100020] p 815 N87-29421
- Modeling and computational algorithms for parameter estimation and optimal control of aeroelastic systems and large flexible structures
[AD-A183302] p 852 N87-29893
- ESTIMATING**
Unsteady heat transfer coefficient estimation for long duration
[AIAA PAPER 86-1240] p 264 A87-21534
- Weight estimation of unconventional structures by structural optimization
[SAWE PAPER 1718] p 532 A87-36290
- A decentralized fault-tolerant approach to estimation in multi-sensor navigation systems p 21 N87-10057
- An approximate method of estimating the aerodynamic interference between two parallel bodies in a supersonic flow (axial force)
[BR100271] p 76 N87-12540
- Estimation of bias errors in measured airplane responses using maximum likelihood method
[NASA-TM-89059] p 254 N87-15977
- ETHERS**
Properties and processing of fiber-reinforced polyetheretherketone (PEEK) p 38 A87-11372
- EULER EQUATIONS OF MOTION**
Euler equations analysis of the initial roll-up of aircraft wakes p 4 A87-10522
- Euler solutions on O-O grids around wings using local refinement p 6 A87-11512
- Application of a 2D time-marching Euler code to transonic turbomachinery flow p 6 A87-11516

Validation of a fault-tolerant multiprocessor: Baseline experiments and workload implementation [NASA-CR-181238] p 795 N87-28277

The SIFT hardware/software systems. Volume 1: A detailed description [NASA-TM-87574] p 858 N87-29186

Joint development of the Multi-function Integrated Inertial Sensor Assembly (MIISA) p 852 N87-29479

A vector-based failure detection and isolation algorithm for a dual fail-operational redundant strapdown inertial measurement unit [NASA-TM-100493] p 829 N87-29531

Design verification of SIFT [NASA-CR-4097] p 858 N87-30099

FAULT TREES

Technical diagnosis by automated reasoning p 57 A87-12217

Sensor-based fault diagnosis in a flight expert system p 177 A87-16681

An architecture for consideration of multiple faults --- in Space Shuttle simulator hardware p 204 A87-16682

Adjustment diagnostics and fault isolation for calibration test of jet engine controls p 459 A87-31526

AFTA - A platform to expert systems in ATE --- Avionics Fault Tree Analyzer p 483 A87-38656

FEASIBILITY

Europe's tilt-rotor - The gauntlet is taken up p 551 A87-41027

FEASIBILITY ANALYSIS

Aerospace plane - Fact or fantasy? p 65 A87-16396

Folding tilt rotor demonstrator feasibility study p 169 A87-19247

A new concept of surface-airplane (Power-Augmented Ram Wing) p 582 A87-39265

The feasibility of aircraft with rotating cylinder wings [BU-327] p 364 A87-19390

Development of a reduced area horizontal tail for a wide body jet aircraft [NASA-CR-172278] p 837 N87-28564

FEATHERING

Application of higher harmonic blade feathering on the OH-6A helicopter for vibration reduction [NASA-CR-4031] p 230 N87-15175

FEDERAL BUDGETS

National Aeronautics and Space Administration p 61 N87-10774

NASA authorizations, fiscal year 1987 [GPO-61-975] p 274 N87-15904

Readiness and retention. Pilot flight experience and aircraft mishaps [AD-A173911] p 353 N87-18548

FEEDBACK

Acta Aerodynamica Sinica [AD-A176552] p 483 N87-21847

FEEDBACK CIRCUITS

The model of the variable speed constant frequency closed-loop system operating in generating state p 320 A87-24718

FEEDBACK CONTROL

Guidance strategies for near-optimum take-off performance in a windshear p 24 A87-12138

Closed loop control of an afterburning F100 gas turbine engine p 103 A87-13323

A direct method for enforcing equality constraints in optimal output feedback p 134 A87-13353

Dynamic output feedback flight control laws using eigenstructure assignment p 109 A87-13355

Multivariable high-gain control with feedforward compensation - A design technique p 134 A87-13365

Eigenstructure assignment by dynamic output feedback p 134 A87-13385

Extensions of a simplified continuous-time multivariable adaptive control algorithm p 134 A87-13399

Multi-variable control of the GE T700 engine using the LQG/LTR design methodology --- Linear Quadratic Gaussian/Loop Transfer Recovery method p 103 A87-13418

Optimal guidance law with first order lag loop and normal constraint p 86 A87-14140

Robust controller design for a Short Take-Off and Landing (STOL) aircraft using quantitative feedback theory p 187 A87-16772

Active transition fixing and control of the boundary layer in air p 148 A87-18927

Application of modern synthesis to aircraft control - Three case studies p 252 A87-20973

A highly accurate feedback approximation for horizontal variable-speed interceptions p 310 A87-23988

Aircraft control design using improved time-domain stability robustness bounds p 332 A87-23991

Closed-loop Mach number control in a blowdown transonic wind tunnel p 314 A87-25279

A decentralized approach to integrated flight control synthesis p 372 A87-29249

Control of aircraft by decoupled high feedback gain servo p 372 A87-30226

Singular perturbations in systems and control p 473 A87-31550

Stability robustness improvement using constrained optimization techniques p 474 A87-32231

Closed-loop pilot vehicle analysis of the approach and landing task p 444 A87-32233

Wind tunnel test and analysis on gust load alleviation of a transport-type wing [AIAA PAPER 87-0781] p 446 A87-33677

A procedure for simultaneously stabilizing a collection of single input linear systems using non-linear state feedback control p 546 A87-36843

Design methodology for robust stabilizing controllers p 596 A87-40860

XMAN - A tool for automated jet engine diagnostics [AIAA PAPER 87-1931] p 696 A87-45309

Feedback control for penetrating a downburst [AIAA PAPER 87-2343] p 771 A87-50462

Model-following output feedback controller for oblique-wing aircraft [AIAA PAPER 87-2408] p 772 A87-50491

Processor tradeoffs in distributed real-time systems p 857 A87-52796

Time-scale synthesis of a closed-loop discrete optimal control system p 857 A87-52960

Multi-variable control concepts for turbohaft engines p 832 A87-53431

Fault tolerant control laws [NASA-CR-178094] p 50 N87-10400

Development of a sensitivity analysis technique for multiloop flight control systems p 311 N87-16847

QFT (Quantitative Feedback Theory) digital flight control design as applied to the AFTI/F16 [AD-A177744] p 522 N87-21959

Eigenspace techniques for active flutter suppression [NASA-CR-4071] p 522 N87-21960

Safe microburst penetration techniques: A deterministic, nonlinear, optimal control approach p 504 N87-22620

Stability boundaries for command augmentation systems p 523 N87-22622

Accurate prediction of longitudinal flying qualities for landing aircraft [AD-A179069] p 509 N87-22676

Multi-input/multi-output designated eigenstructure (MODES): A computer-aided control system design program [AD-A179341] p 548 N87-23204

Flight test evaluation of techniques to predict longitudinal pilot induced oscillations [AD-A179229] p 597 N87-23629

Channelized or nonchannelized fault-tolerant computers - A hardware complexity comparison of fault-tolerant computers for flight control systems
p 473 A87-31536
Software reliability - Measures and effects in flight critical digital avionics systems
p 473 A87-31537
Integrated controls - Preparing for the Advanced Tactical Fighter
p 443 A87-31540
Flight control actuators for tomorrow's fighters
p 426 A87-32070
Transonic and supersonic lateral control of aircraft by adaptive perfect servo
p 444 A87-32101
The Boeing 7J7 advanced technology airplane
p 444 A87-32118
Recursive attitude determination from vector observations Euler angle estimation
p 444 A87-32228
Development and application of a convolution technique for flying qualities research
p 444 A87-32234
Integrated flight/propulsion control for next generation military aircraft
p 437 A87-32615
[SAE PAPER 861726] p 437 A87-32615
Airbus A320 side stick and fly by wire - An update
[SAE PAPER 861801] p 444 A87-32646
The use of skewed inertial sensors in flight control systems
p 437 A87-32660
[SAE PAPER 861825] p 437 A87-32660
Flight control synthesis via eigenstructure assignment - The discrete version
p 448 A87-35002
Fifteen years of flight control evolution on European Airbus aircraft weight impact
p 506 A87-36305
[SAWE PAPER 1743] p 506 A87-36305
Integrated inertial reference device for flight control and navigation
p 497 A87-36769
[DGLR PAPER 86-150] p 497 A87-36769
Mission and flight path planning in a tactical air combat computer
p 521 A87-36782
[DGLR PAPER 86-156] p 521 A87-36782
Design of flight control system with maneuver enhancement and gust alleviation
p 594 A87-39419
Effects of redundancy configuration and its management mode on the reliability of flight control system
p 595 A87-39422
Experience with synchronous and asynchronous digital control systems --- for flight
[AIAA PAPER 86-2239] p 595 A87-40274
Sensor management for a fault tolerant integrated inertial flight control reference and navigation system
p 581 A87-41397
Analytical determination of the optimal parameters of automatic pilots
p 596 A87-42139
The model inverse as an element of a manoeuvre demand system for helicopters
p 679 A87-43441
EMI-fault prevention and self recovery of digital flight control systems
p 661 A87-43470
An approach to the synthesis of an adaptive flight control system with incomplete information
p 680 A87-45096
Design of CCV flight control system of STOL flying boat
p 680 A87-45097
Validation of an integrated flight and propulsion control design for fighter aircraft
p 680 A87-45306
[AIAA PAPER 87-1928] p 680 A87-45306
Analysis of typical fault-tolerant architectures using HARP
p 704 A87-45771
Thrust vectoring - Why and how?
p 673 A87-46180
Reliability, 'better than the best'
p 699 A87-46728
Mission Adaptive Wing test program
p 743 A87-47839
Pre- and post-flight-test models versus measured skyship-500 control responses
p 765 A87-48650
[AIAA PAPER 87-2508] p 765 A87-48650
Autorotating wings - A concept that remains vital
p 745 A87-48799
Report of the Working Group on Helicopter Health Monitoring
p 713 A87-48942
Flight control systems for search and rescue
p 766 A87-48946
V-22 tiltrotor fly-by-wire flight control system
p 766 A87-48947
Flight control system philosophy for active control of a helicopter
p 766 A87-48948
Effect of time delay on manual flight control and flying qualities during in-flight and ground-based simulation
[AIAA PAPER 87-2370] p 767 A87-49161
Recursive real-time identification of step-response matrices of high-performance aircraft with noisy sensors for adaptive digital flight control
[AIAA PAPER 87-2309] p 771 A87-50430

- The significance of error dynamics in model-following for flight control design
[AIAA PAPER 87-2311] p 771 A87-50432
- Restructurable control using proportional-integral-implicit model following --- for fighter aircraft
[AIAA PAPER 87-2312] p 771 A87-50433
- A general methodology for pole placement in linear quadratic regulator design of multivariable control systems
[AIAA PAPER 87-2314] p 795 A87-50435
- Total energy control concepts applied to flight in windshear
[AIAA PAPER 87-2344] p 772 A87-50463
- Guidance on maneuvering flight paths for rotary wing aircraft
[AIAA PAPER 87-2406] p 772 A87-50489
- Handling qualities design of a Northrop high-performance fighter
[AIAA PAPER 87-2450] p 772 A87-50496

[SAE PAPER 861702] p 351 A87-29589

Operational wind shear detection and warning - The 'CLAWS' experience at Denver and future objectives
[SAE PAPER 861847] p 352 A87-29590

The potential influence of rain on airfoil performance p 346 A87-31128

Windshear detection/alert and guidance cockpit displays - A pilot's perspective p 420 A87-31489

Turbulence structure in microburst phenomena p 470 A87-34514

Aeronautical meteorology in practice p 470 A87-35000

Oklahoma weather phenomena that may affect aviation p 614 A87-39891

Low altitude wind shear detection with Doppler radar p 615 A87-40247

An ordinary 3-axis horizon instrument which every pilot likes - Can it be misleading and dangerous? The answer is 'Yes' p 755 A87-47845

The microbursts of 22 June 1982 in JAWS p 792 A87-49368

Takeoff and landing in a downburst p 738 A87-50344

Severe winds in the DFW microburst measured from two aircraft p 792 A87-50459

Boeing windshear systems
[AIAA PAPER 87-2342] p 771 A87-50461

Statistical evaluation of performance indices of microburst-generated wind effect on airplane flight
[AIAA PAPER 87-2345] p 772 A87-50464

Wind shear p 853 A87-51232

Prospects for destructive self-induced interactions in a vortex pair --- due to sinusoidal disturbances from large transport aircraft wakes p 809 A87-53778

Icing and de-icing on a downscale model in ONERA S1 MA wind tunnel p 818 A87-54191

Runway incursions at controlled airports in the United States
[PB86-917003] p 84 N87-11711

Calculation of ice accretion on cylindrical rods according to Bain's model and comparison with experimental results --- stratus clouds
[ESA-TT-970] p 176 N87-14325

Lightning strikes on aircraft. Exploitation of Landes (France)-Front '84 campaign and complementary development of airborne electrical sensors
[ONERA-RF-91/7154-PY] p 470 N87-20706

Automatic systems and the low-level wind hazard p 681 N87-25279

Unresolved issues in wind shear encounters p 647 N87-25282

Determination of the local heat transfer characteristics on glaze ice accretions on a cylinder and a NACA 0012 airfoil
[AD-A179931] p 647 N87-25309

Experiences with hot-wire instruments for the measurement of the liquid water content in clouds
[DFVLR-MITT-86] p 704 N87-26476

Low-altitude wind shear detection with Doppler radar
[AD-A181900] p 793 N87-28233

A high resolution spatial and temporal multiple Doppler analysis of a microburst and its application to aircraft flight simulation
[DOT/FAA/PM-87/11] p 854 N87-29060

FLIGHT INSTRUMENTS

New horizons in flight displays p 366 A87-30550

Flight instrumentation telemetry for aerospace application p 498 A87-37406

Flight inspection procedures and position fixing techniques p 499 A87-38874

Human factors associated with glass cockpit design
[SAE PAPER 871036] p 756 A87-48764

Electronic display equipment for use in the advanced flight deck simulator at British Aerospace, Weybridge [RID-1912] p 453 N87-21005

Evaluation of the safe flight instrument corporation stall warning system for the OV/1D aircraft
[AD-A177364] p 511 N87-21918

F-16 digital terrain system: Concept of operations and support
[AD-A177737] p 511 N87-21919

Aircraft control position indicator
[NASA-CASE-LAR-12984-1] p 512 N87-22678

Principles of data display in aviation instruments p 590 N87-23572

FLIGHT LOAD RECORDERS

Quality of modal analysis and reconstruction of forcing functions based on measured output data --- flight load prediction for launch vehicle payload p 381 A87-28561

Operational engine usage and mission analysis
[AIAA PAPER 87-2097] p 671 A87-45404

FLIGHT MANAGEMENT SYSTEMS

Dynamic flight optimization p 24 A87-11899

Impact of mismodeled idle engine performance on calculation and tracking of optimal 4-D descent trajectories p 88 A87-13360

Progress in knowledge-based flight monitoring p 177 A87-16705

Rapid prototyping of pilot interfaces as an aid to defining software requirements p 179 A87-16807

Display of navigation information on aircraft screens p 158 A87-16989

Cockpit added for evaluating helicopter systems p 162 A87-17416

ATMOS: Real-time simulation of man/machine-interaction in air traffic management (ATMOS - Air Traffic Management and Operations Simulator) p 236 A87-23068

Database application to aircraft engineering functions related to flight testing
[AIAA PAPER 86-9823] p 241 A87-23263

A quantitative analysis of the history of developing a large embedded software system p 472 A87-31495

A software quality assurance tool for code auditing p 472 A87-31496

Development of a digital/analog electronic flight instrumentation system (EFIS) simulation p 451 A87-31545

A flight expert system (FLES) for on-board fault monitoring and diagnosis p 589 A87-42629

The AVSCOM flight safety part program p 647 A87-46724

Evaluation of a takeoff performance monitoring system
[AIAA PAPER 87-2256] p 757 A87-50419

Dynamic performance and stability of integrated communication and control systems
[AIAA PAPER 87-2603] p 775 A87-50564

Technology requirements of integrated, critical digital flight systems
[AIAA PAPER 87-2602] p 775 A87-50569

Ground-based time-guidance algorithm for control of airplanes in a time-metered air traffic control environment: A piloted simulation study
[NASA-TP-2616] p 34 N87-10864

Rapid prototyping facility for flight research in artificial-intelligence-based flight systems concepts
[NASA-TM-88268] p 137 N87-12273

Test and evaluation of a multifunction keyboard and a dedicated keyboard for control of a flight management computer
[NASA-CR-178202] p 183 N87-14330

Design and analysis of advanced flight planning concepts
[NASA-CR-4063] p 421 N87-20253

Design and verification by nonlinear simulation of a Mach/CAS control law for the NASA TCV B737 aircraft
[NASA-CR-178029] p 449 N87-20290

Efficient Conduct of Individual Flights and Air Traffic or Optimum Utilization of Modern Technology for the Overall Benefit of Civil and Military Airspace Users
[AGARD-CP-410] p 500 N87-21881

A time-based concept for terminal-area traffic management p 501 N87-21895

Next generation of control techniques in advanced TMA p 502 N87-21898

Exploiting the capabilities of flight management systems in solving the airport arrival problem p 502 N87-21899

Application of flight performance advisory systems to US Navy aircraft p 502 N87-21900

Design criteria for multi-loop flight control systems p 522 N87-21901

Some experiences in integrating avionic systems on the civil flight deck p 511 N87-21902

Semi-automatic cross-checking between different copies of the same flight plan p 502 N87-21903

Efficient conduct of individual flights and air traffic or optimum utilization of modern technology for the overall benefit of civil and military airspace users
[AGARD-AR-236] p 582 N87-23608

NASA B737 flight test results of the total energy control system
[NASA-CR-178285] p 775 N87-26918

Fuel conservation evaluation of US Army helicopters. Part 6: Performance calculator evaluation
[AD-A181645] p 753 N87-27653

A flight evaluation of voice interaction as a component of an integrated helicopter avionics system
[RAE-TM-FS(B)-637] p 829 N87-28547

The flight development of a color electronic display format and monitoring system of helicopter engine and transmission data
[RAE-TM-FS(B)-638] p 829 N87-28548

The flight evaluation of a speech recognition and a speech output system in an advanced cockpit display and flight management system for helicopters

p 829 N87-29527

FLIGHT MECHANICS

Scientific problems of aviation and space: History and present state --- Russian book

p 62 A87-11339

The classification of wind shears from the point of view of aerodynamics and flight mechanics

p 24 A87-11898

Guidance strategies for near-optimum take-off performance in a windshear

p 24 A87-12138

Maximum likelihood estimation of parameters in nonlinear flight mechanics systems

p 113 A87-16192

Frequency domain parameter estimation of aeronautical systems without and with time delay

p 114 A87-16193

State estimation of flying vehicle

p 114 A87-16209

Development and application of in-flight simulator aircraft for flying qualities research at DFVLR

p 192 A87-16777

Integrated system identification methodology for helicopter flight dynamics

p 190 A87-19239

Flight evaluation of height response characteristics for the hover bob-up task and comparison with proposed criteria

p 170 A87-19255

On aircraft flight performance in a perturbed atmosphere

p 237 A87-20799

On the application of axiomatic aerodynamic modelling to aircraft dynamics. IV - Two dimensional dynamic stall

p 521 A87-36842

UK research into system identification for helicopter flight mechanics

p 793 A87-48959

AIAA Atmospheric Flight Mechanics Conference, Monterey, CA, Aug. 17-19, 1987, Technical Papers

p 767 A87-49577

Direct variational method in flight dynamics boundary value problems --- Russian book

p 856 A87-52233

Application of bifurcation and catastrophe theories to near stall flight mechanics

[AD-A167697] p 13 N87-10046

Overview of the support of the aeronautics research and technology by the Bundesministerium fuer Forschung und Technologie (BMFT)

[ETN-86-98215] p 144 N87-13402

More recent research results of the DFVLR in the domain of aerodynamics and flight mechanics

[ETN-86-98216] p 151 N87-13412

Technical evaluation report on the Flight Mechanics Panel Symposium on Flight Simulation

[ISBN-92-835-0399-6] p 258 N87-15985

The use of Aerialia flight simulator for the development of the AM-X weapon system

p 601 N87-23650

The classification of wind shears from the point of view of aerodynamics and flight mechanics

[NASA-TT-20020] p 615 N87-24866

FLIGHT OPERATIONS

Development and testing of new technologies for flight operation and safety

p 86 A87-14004

Helicopter external load operations

[CAP-426] p 432 N87-20259

The problems of the calculation of the capacity of flight operation surfaces of airports

[ILR-MITT-170] p 838 N87-28566

Sophisticated integral control methods for use in flight

p 856 N87-29510

FLIGHT OPTIMIZATION

Optimal flight paths through microburst wind profiles

p 35 A87-10519

Dynamic flight optimization

p 24 A87-11899

Sensitivity studies of 4D descent strategies in an advanced metering environment

p 88 A87-13361

Manufacturers plan new long-range aircraft

p 95 A87-15181

Optimization of cruise at constant altitude

p 371 A87-28918

Extension of hot air balloon flight duration through adaption of balloon surface characteristics

p 344 A87-29262

Encircling the earth --- Voyager aircraft

p 402 A87-33136

The problem of the maximum flight range of aircraft

p 494 A87-35919

Optimization and acceleration guidance of flight trajectories in a windshear

p 765 A87-47807

Reducing fuel consumption of subsonic aircraft by optimal cyclic cruise

p 824 A87-52881

Wind tunnel test of the modified goldschmidt model with propulsion and empennage: Analysis of test results

[AD-A167360] p 13 N87-10045

Energy management of 3-dimensional minimum-time intercept

p 27 N87-10858

Optimal descending, hypersonic turn to heading

[DE86-010989] p 120 N87-12577

Application of flight performance advisory systems to US Navy aircraft

p 502 N87-21900

Singular trajectories in airplane cruise-dash optimization

p 825 N87-28544

FLIGHT PATHS

Optimal flight paths through microburst wind profiles

p 35 A87-10519

The method of calculating the desired flight path of terrain following technique with circular arc spline

p 111 A87-14136

State estimation of flying vehicle

p 114 A87-16209

A flight-path-overshoot flying qualities metric for the landing task

p 310 A87-23976

Investigation of extreme temperature values in the free atmosphere

p 329 A87-25259

Statistical analysis of extreme vertical temperature gradients in the 6-20 km layer over the Moscow-Irkutsk flight path

p 329 A87-25260

Search strategy for the potential collision between two aircraft

p 351 A87-28152

Epsilon entropy of trajectory information --- for aircraft control

p 355 A87-29163

Mission and flight path planning in a tactical air combat computer

[DGLR PAPER 86-156] p 521 A87-36782

A flight simulator evaluation of the approach path parameters for MLS curved approaches

[AIAA PAPER 87-2574] p 738 A87-49174

Pilot evaluation of population-minimal ground tracks in the airport community

p 838 A87-52879

Energy management of 3-dimensional minimum-time intercept

p 27 N87-10858

Aircraft accident report: Henson Airlines Beech B99, N339HA, Grottoes, Virginia, September 23, 1985

[PB86-910409] p 155 N87-13419

Considerations on Microwave Landing System (MLS) approach path interception procedures and applicable turn techniques

[NLR-MP-85063-U] p 160 N87-13426

Survey of track keeping and altitudes on Heathrow and Gatwick Standard Instrument Departure routes --- London airports

[CAA-PAPER-84018] p 160 N87-14308

A proposed single criterion for IFR (Instrument Flight Rules) approaches to converging runways

[AD-A171844] p 237 N87-15953

Noise levels from urban helicopter operations, New Orleans, Louisiana

[AD-A174129] p 273 N87-16590

A flight dynamic simulation program in air-path axes using ACSL (Advanced Continuous Simulation Language)

[AD-A173849] p 332 N87-18337

Path discrepancies between great circle and rhumb line

[TM-98] p 357 N87-18527

Investigations of flight paths for maneuvers with constant energy and constant changes of energy including different strategies of steering, calculations of energy requirements for given flight paths, determination of the criteria for successful completion of turning maneuvers in the vertical plane

[ETN-87-99017] p 362 N87-18565

A time-based concept for terminal-area traffic management

p 501 N87-21895

Computer assisted arrival sequencing and scheduling with the COMPAS system

p 502 N87-21897

Next generation of control techniques in advanced TMA

p 502 N87-21898

Exploiting the capabilities of flight management systems in solving the airport arrival problem

p 502 N87-21899

Design criteria for multi-loop flight control systems

p 522 N87-21901

Development and flight verification of airborne glideslope computation/gust detection system

[NAL-TR-908] p 503 N87-21906

Fuel penalties and time flexibility of 4D flight profiles under mismodeled wind conditions

[NASA-TM-89128] p 509 N87-21917

F-16 digital terrain system: Concept of operations and support

[AD-A177737] p 511 N87-21919

Loran-C approach considerations

p 503 N87-22612

Optimal flight trajectories in the presence of windshear, 1984-86

[NASA-CR-180316] p 682 N87-26047

FLIGHT PATHS

Operational usage of the KS-147A (LOROP) in the RF-5E

p 29 A87-10936

Mission and flight path planning in a tactical air combat computer

[DGLR PAPER 86-156] p 521 A87-36782

Design and analysis of advanced flight planning concepts

[NASA-CR-4063] p 421 N87-20253

Extended Range Twin Operations (ETOPS) --- twin engine aircraft

[CAP-513] p 422 N87-20976

Air navigation services and aircraft around the year 2000

p 500 N87-21883

Strategic control to improve efficiency of air traffic management

p 501 N87-21894

Exploiting the capabilities of flight management systems in solving the airport arrival problem

p 502 N87-21899

Semi-automatic cross-checking between different copies of the same flight plan

p 502 N87-21903

The use of a computer to obtain flight manual data

[AD-A176741] p 547 N87-22416

Test plan for helicopter GPS (Global Positioning System) applications

[AD-A183299] p 823 N87-29488

FLIGHT RECORDERS

Multipurpose aircraft monitoring with a smart recorder

p 179 A87-16836

'Lost' data recovery technique

p 246 A87-20797

Crashworthiness experiment summary full-scale transport controlled impact demonstration program

[DOT/FAA/CT-85/20] p 17 N87-10055

Proceedings of the 13th Symposium on Aircraft Integrated Data Systems

[DFVLR-MITT-86-04] p 30 N87-10075

Integrated monitoring systems for tactical aircraft

p 31 N87-10080

Application of operational flight recording to helicopters

p 31 N87-10081

The Airborne Integrated Data System (AIDS) for the Airbus A-310 engine condition monitoring

p 31 N87-10082

The impact of flight data on an airline: A case study

p 32 N87-10088

Data recovery techniques, an update --- flight data

p 32 N87-10089

Software for flight recorder data processing developed by Lufthansa

p 32 N87-10090

Airline data acquisition in an ACARS environment

p 32 N87-10092

Flight recorders: New US regulations and new International Civil Aviation Organization (ICAO) standards

p 32 N87-10093

Data compression techniques for multifunction flight data recorders

p 33 N87-10094

The Fairchild CVDR: A new combination voice and data recorder --- Cockpit Voice and Data Recorder (CVDR)

p 33 N87-10095

The Boeing B 720 aircraft Controlled Impact Demonstration (CID): Flight data recorder/cockpit voice recorder experiment

p 33 N87-10096

United States Navy - Canadian Forces solid state flight data recorder/crash position locator experiment on the B-720 controlled impact demonstration

p 33 N87-10097

Comparative evaluation of redundant flight data recorded by a digital aircraft integrated data system recorder (DAR) on board an Airbus A-310 aircraft

p 33 N87-10098

Investigations on a digital bit synchronizer for a detailed flight data recovery

p 33 N87-10099

Digital data recording on floppy disks applied for on-board use in helicopters

[DFVLR-MITT-86-10] p 51 N87-11149

Small, self-contained aircraft fatigue data recorder

[AD-A172400] p 243 N87-15207

Digital data recording on floppy disks applied for onboard use in helicopters

[ESA-TT-1011] p 614 N87-24675

United Airlines wind shear incident of May 31, 1984

p 647 N87-25287

Flight duration, airspeed practices and altitude management of airplanes involved in the NASA VGH General Aviation Program

[NASA-TM-89074] p 625 N87-25293

FLIGHT SAFETY

Optimal flight paths through microburst wind profiles

p 35 A87-10519

The classification of wind shears from the point of view of aerodynamics and flight mechanics

p 24 A87-11898

Theoretical aspects and practical questions regarding the assurance of flight safety

p 17 A87-11900

Characterizing height keeping error distribution based on indirect observation

p 17 A87-12683

The U.S. Federal Radionavigation Plan

p 21 A87-12684

Automated functions for air traffic control systems

p 21 A87-12687

Fire safety science; Proceedings of the First International Symposium, Gaithersburg, MD, October 7-11, 1985

p 78 A87-13186

Weather safety aspects in future civil air navigation

p 85 A87-13540

Large volume water sprays for dispersing warm fogs p 125 A87-13848

Safety of flight issues for an automatic trajectory control system p 186 A87-16761

Investigation of an automatic trim algorithm for restructurable aircraft control p 186 A87-16767

Characterizing height-keeping error distribution based on indirect observation --- applicable to evaluation of safety of air traffic control systems p 158 A87-17243

The future of the National Airspace System [AIAA PAPER 86-2743] p 210 A87-17959

Basic principles for protecting aircraft against lightning strikes [ONERA, TP NO. 1986-174] p 233 A87-21073

'Gold-plated' design --- redundancy and safety factors in aircraft structures p 233 A87-22222

Keeping them flying --- aircraft maintenance shortcomings p 211 A87-22223

A systems approach to safe airspace operations p 294 A87-24174

Quasi-steady flight to quasi-steady flight transition in a windshear - Trajectory guidance [AIAA PAPER 87-0271] p 311 A87-24946

Analysis of aircraft piston engine failures. I p 305 A87-25969

Analysis of aircraft piston engine failures. II p 305 A87-25973

Collision risk in the wide open spaces p 295 A87-27602

An airspace-surveillance and collision-avoidance system based on the standard commercial-aviation DME p 355 A87-29632

Reductions in oceanic separation standards through the use of a TCAS-derived CDTI --- Traffic Alert and Collision Avoidance System - Cockpit Display of Traffic Information p 419 A87-31488

FAA - An agency besieged. II - Technology for air safety p 401 A87-31618

Man-machine aircraft-navigation complexes --- Russian book p 424 A87-32670

Fight against bird strikes continues p 494 A87-35560

Multi-axis seat ejection (MASE) sled p 494 A87-37770

Experience with synchronous and asynchronous digital control systems --- for flight [AIAA PAPER 86-2239] p 595 A87-40274

Time modulation. I - Modulation scheme helps air-traffic safety p 582 A87-42609

The new Annex 17 - The latest contribution by international civil aviation to the battle against terrorism p 708 A87-42860

Aviation safety and the FAA's quality assurance program p 709 A87-44064

The quality of radar data and its determination at the radar installations of the Bundesanstalt fuer Flugsicherung p 650 A87-45878

The AVSCOM flight safety part program p 647 A87-46724

The use of flight test techniques in aircraft accident investigations p 738 A87-49202

Dynamic characteristics of flight near the ground [AIAA PAPER 87-2288] p 768 A87-49581

Ice accretion dependence on cloud physical parameters p 55 A87-11433

Ice accretion calculations on cylindrical rods following the Bain model, and comparison with experimental results (Fuchs, Schickel, Kaluza, Uwira, 1985) p 56 A87-11434

The influence of weather-active fronts on visual flight conditions p 56 A87-11437

Statistics of wind shear due to nocturnal boundary layer jet airstreams in North Germany p 56 A87-11461

Design of a takeoff performance monitoring system p 103 A87-11787

Wind shear and flight safety: A select bibliography [CAA-PAPER-86003] p 156 A87-14300

Activities report in air traffic control [ETN-87-98861] p 160 A87-14309

The simulator: The perfect illusion --- flight simulator [FACHTHEMEN-9] p 193 A87-14354

Aircraft control tower service [ETN-87-99169] p 357 A87-19371

Electromagnetic perturbations created onboard aircraft by direct or close lightning [ONERA-RF-15/7234-PY] p 577 A87-24441

The classification of wind shears from the point of view of aerodynamics and flight mechanics [NASA-TT-20020] p 615 A87-24866

Wind Shear/Turbulence Inputs to Flight Simulation and Systems Certification [NASA-CP-2474] p 625 A87-25267

Automatic systems and the low-level wind hazard p 681 A87-25279

Unresolved issues in wind shear encounters p 647 A87-25282

Aircraft accident/incident summary reports: Unalaska, Alaska, September 25, 1985; Jenkinsburg, Georgia, September 29, 1985; Boston, Massachusetts, December 15, 1985; DeKalb, Texas, December 31, 1985; Erie, Pennsylvania, February 21, 1986 [PB87-910408] p 648 A87-25310

Validation of a fault-tolerant multiprocessor: Baseline experiments and workload implementation [NASA-CR-181238] p 795 A87-28277

Models for the description of holding procedures in air traffic as an aid for optimization with respect to safety and efficiency p 822 A87-28536

Aviation safety: Procedures for registering and certifying air carriers [PB87-193249] p 819 A87-29468

FLIGHT SIMULATION

ATTAS - The new test bed p 92 A87-14003

Development and testing of new technologies for flight operation and safety p 86 A87-14004

Design analysis and methodology for evaluating flight control systems [AIAA PAPER 86-2655] p 189 A87-17904

Validation of a fighter aircraft simulation using high angle-of-attack flight test data [AIAA PAPER 86-2681] p 164 A87-17921

Design and development of a three-axis augmentation system for a Class III STOL assault transport [AIAA PAPER 86-2709] p 189 A87-17939

Early evaluation of the V-22 Osprey through piloted simulation p 171 A87-19268

Real-time comparison of X-29A flight data and simulation data [AIAA PAPER 87-0344] p 253 A87-22570

Modular simulation facility design p 257 A87-23066

Mission simulators p 314 A87-24611

A digital simulation technique for Dryden atmospheric turbulence model p 310 A87-24715

A high resolution spatial and temporal multiple Doppler analysis of a microburst and its application to aircraft flight simulation p 392 A87-28020

Simulators III; Proceedings of the Conference, Norfolk, VA, Mar. 10-12, 1986 p 386 A87-30845

The rise of the Phoenix - Development of a KC-135R operational flight trainer p 376 A87-30851

Correlation and analysis for SH-2F 101 rotor [AIAA PAPER 87-0922] p 429 A87-33726

Towards total simulation p 452 A87-34768

Mission Adaptive Wing test program p 743 A87-47839

Flight testing the X-29 p 743 A87-47841

High altitude flutter investigation and exploration of the flutter boundary of the TR-1 and specially configured U-2R p 743 A87-47842

Navy departure resistance and air combat maneuvering evaluation of the FA-18B airplane p 765 A87-47843

T-46A flight test results p 743 A87-47844

Development and Flight test of the F110-GE-400 for the F-14D aircraft [AIAA PAPER 87-1849] p 759 A87-48574

A comparison of a nonlinear flight dynamic simulation of an airship with flight test results [AIAA PAPER 87-25007] p 765 A87-48649

Pre- and post-flight-test models versus measured skyship-500 control responses [AIAA PAPER 87-2508] p 765 A87-48650

Spin resistance evaluation of a light airplane [SAE PAPER 871021] p 766 A87-48758

Flight test investigations of a wing designed for natural laminar flow [SAE PAPER 871044] p 720 A87-48770

Flight tests confirming the operability of night vision display cockpits for the new helicopters p 756 A87-48918

Dynamic interface flight test and simulation limitations p 747 A87-48969

Society of Flight Test Engineers, Annual Symposium, 17th, Washington, DC, Aug. 10-14, 1986, Proceedings p 713 A87-49198

Management of United States Air Force (USAF) operational test and evaluation (OT&E) flight test programs p 799 A87-49199

CAFTA - The latest in flight test data analysis systems p 794 A87-49200

Satisfying the flight test data requirements of flight training simulators p 779 A87-49201

The use of flight test techniques in aircraft accident investigations p 738 A87-49202

Flight test and evaluation of a prototype airborne video and pulse code modulation multiplexing system p 756 A87-49205

Testing and development of holographic HUD systems p 757 A87-49207

The E-3 Joint Test Force - A unique test organization p 713 A87-49208

Effects of inlet temperature and pressure upon the generalized performance parameters of the T56 engine p 761 A87-49210

The AV-8B flight test video system p 757 A87-49214

Flow visualization techniques applied to full-scale vehicles [AIAA PAPER 87-2421] p 750 A87-49594

Evaluation of airplane spin resistance using proposed criteria for light general aviation airplanes [AIAA PAPER 87-2562] p 769 A87-49612

- Transonic vibration induced by mismatching between engine and thrust nozzle p 762 A87-49985
Pilot report - A tale about flying the NOTAR p 750 A87-50224
Inflight evaluation of a modal suppression yaw damper [AIAA PAPER 87-2257] p 770 A87-50420
Dynamic stability and handling qualities tests on a highly augmented, statically unstable airplane [AIAA PAPER 87-2258] p 770 A87-50421
Fly-by-wire system and control laws of the T-2 control configured vehicle [AIAA PAPER 87-2586] p 774 A87-50549
Longitudinal handling qualities of the T-2 Control Configured Vehicle [AIAA PAPER 87-2587] p 774 A87-50550
Manipulated turbulence structure in flight p 806 A87-52056
UHB demonstrator flight test program [AIAA PAPER 87-1732] p 824 A87-52844
Flight test of a digital controller used in a helicopter autoland system p 835 A87-53079
Helicopter certification - New test techniques p 825 A87-54201
Aircraft positioning using Global Positioning System carrier phase data p 821 A87-54367
Design and fabrication of the NASA decoupler pylon for the F-16 aircraft [NASA-CR-172354] p 25 N87-10065
Application of operational flight recording to helicopters p 31 N87-10081
Wind shear measurement on board a MORANE 993 p 31 N87-10086
Comparative evaluation of redundant flight data recorded by a digital aircraft integrated data system recorder (DAR) on board an Airbus A-310 aircraft p 33 N87-10098
Response of a small-turboshaft-engine compression system to inlet temperature distortion [NASA-TM-83765] p 35 N87-10100
In-flight total forces, moments and static aeroelastic characteristics of an oblique-wing research airplane [NASA-TP-2224] p 36 N87-10103
Flight service evaluation of composite helicopter components [NASA-CR-178149] p 41 N87-10182
Performance and quality flight test textbook. Volume 2: Flying qualities [AD-A168124] p 3 N87-10830
Correlation between flight simulation and processing of flight tests based on inertial measurements [NLR-MP-85058-U] p 28 N87-10863
Flight test report of the NASA icing research airplane: Performance, stability, and control after flight through natural icing conditions [NASA-CR-179515] p 116 N87-11797
NASA rotor systems research aircraft: Fixed-wing configuration flight-test results [NASA-TM-86789] p 100 N87-12557
Evaluation of a nonlinear parameter extraction mathematical model including the term $C_{\text{subm}}(\text{sub delta } e \text{ squared})$ [NASA-TM-87731] p 116 N87-12566
Helicopter icing spray system (HIS) evaluation and improvement [AD-A170732] p 173 N87-13429
USAF test pilot school. Performance phase textbook, volume 1 [AD-A170957] p 173 N87-13430
USAF test pilot school. Flying qualities textbook, volume 2, part 1 [AD-A170959] p 173 N87-13431
USAF test pilot school. Flying qualities textbook, volume 2, part 2 [AD-A170960] p 173 N87-13432
Development and evaluation of an airplane electronic display format aligned with the inertial velocity vector [NASA-TP-2648] p 182 N87-13438
Summary of AH-1G flight vibration data for validation of coupled rotor-fuselage analyses [NASA-CR-178160] p 201 N87-13795
Comparison of theoretical and flight-measured local flow aerodynamics for a low-aspect-ratio fin [NASA-TM-86806] p 232 N87-15941
In-flight ejection seat test using the Aircrew Gliding Escape System (AGES) parachute [AD-A172987] p 235 N87-15948
Permanent magnet variable speed constant frequency power generation system [AD-A173959] p 252 N87-15974
Design and initial application of the extended aircraft interrogation and display system: Multiprocessing ground support equipment for digital flight systems [NASA-TM-86740] p 301 N87-16820
Flight service evaluation of advanced composite ailerons on the L-1011 transport aircraft [NASA-CR-178170] p 318 N87-16883
DFVLR flight operation acting as a useful service unit for ERS-1 p 331 N87-17378
Noise propagation from a four-engine, propeller-driven airplane [NASA-TM-89035] p 335 N87-17482
LFC leading edge glove flight: Aircraft modification design, test article development and systems integration [NASA-CR-172136] p 275 N87-17658
Structural and aerodynamic loads and performance measurements of an SA349/2 helicopter with an advanced geometry rotor [NASA-TM-88370] p 301 N87-17691
DC-10 winglet flight evaluation [NASA-CR-3748] p 302 N87-17694
Methods for designing treatments to reduce interior noise of predominant sources and paths in a single engine light aircraft [NASA-CR-172546] p 336 N87-18401
Aircraft parameter estimation [NASA-TM-88281] p 362 N87-19376
Development of flight performance algorithms and a tactical computer aided mission planning system for the A-7E aircraft [AD-A175724] p 364 N87-19387
Assessing the benefits and costs of motion for C-17 flight simulators [AD-A174822] p 377 N87-19411
The 1985 small propeller-driven aircraft noise test program [AD-A175596] p 477 N87-20799
Challenges in modeling the X-29 flight test performance [NASA-TM-88282] p 433 N87-20991
New methods and results for quantification of lightning-aircraft electrostatics [NASA-TP-2737] p 492 N87-21871
Development and flight verification of airborne glideslope computation/gust detection system [NAL-TR-908] p 503 N87-21906
Identification of dynamic systems - applications to aircraft. Part 1: The output error approach [AGARD-AG-300-VOL-3-PT-1] p 508 N87-21913
Microprocessor applications in airborne flight test instrumentation [AGARD-AG-160-VOL-18] p 511 N87-21920
Accurate prediction of longitudinal flying qualities for landing aircraft [AD-A179069] p 509 N87-22676
Flight and analytical investigations of a structural mode excitation system on the YF-12A airplane [NASA-CR-166623] p 520 N87-22685
Evaluation of numerator lead effects on aircraft handling qualities [AD-A179388] p 523 N87-22687
Frequency-response identification of XV-15 tilt-rotor aircraft dynamics [NASA-TM-89428] p 524 N87-22690
High altitude turbulence for supersonic cruise vehicles [NASA-TM-88285] p 544 N87-23100
Flight investigation of the effects of an outboard wing-leading-edge modification on stall/spin characteristics of a low-wing, single-engine, T-tail light airplane [NASA-TP-2691] p 585 N87-23614
High-angle-of-attack pneumatic lag and upwash corrections for a hemispherical flow direction sensor [NASA-TM-86790] p 590 N87-23616
Highly integrated digital electronic control: Digital flight control, aircraft model identification, and adaptive engine control [NASA-TM-86793] p 592 N87-23619
Flight test evaluation of techniques to predict longitudinal pilot induced oscillations [AD-A179229] p 597 N87-23629
Demonstration of frequency-sweep testing technique using a Bell 214-ST helicopter [NASA-TM-89422] p 598 N87-23632
Utilization of simulation to support F-14A low altitude high angle of attack flight testing p 600 N87-23649
The development of the T-46 next generation trainer manned engineering simulator at the US Air Force Flight Test Center p 601 N87-23652
Correlation between flight simulation and processing of flight tests based on inertial measurements p 601 N87-23655
Unusual airborne simulator applications p 602 N87-23656
Collected flight and simulation comparisons and considerations p 602 N87-23660
Investigation of dynamic ground effect p 573 N87-24420
Unsteady inlet distortion characteristics with the B-1B p 575 N87-24478
Digital data recording on floppy disks applied for onboard use in helicopters [ESA-TT-1011] p 614 N87-24675
Performance and loads data from a hover test of a 0.658-scale V-22 rotor and wing [NASA-TM-89419] p 642 N87-25296
Ground and flight test results of a total main rotor isolation system [NASA-CR-4082] p 643 N87-25302
Heliprot visual approach surface testing test plan [AD-A179897] p 650 N87-25312
TACAN/INS Performance Evaluation (TIPE) flight test report [AD-A180138] p 650 N87-25313
Correlation of B-1 flight test subjective assessments and some ride quality/vibration exposure criteria [AD-A179844] p 658 N87-25318
Flight service evaluation of advanced composite ailerons on the L-1011 transport aircraft [NASA-CR-178321] p 691 N87-25439
Identification of a dynamic model of a helicopter from flight tests p 659 N87-26040
The treatment of calibrations of total air temperature probes for use in flight-test analysis work [ESDU-84007] p 701 N87-26324
Operational performance of vapor-screen systems for in-flight visualization of leading-edge vortices on the F-106B aircraft [NASA-TM-4004] p 732 N87-26877
Traffic Alert and Collision Avoidance System (TCAS-3) [BCD-TR-157] p 741 N87-26892
Flight characteristics test of the UH-60A with tail boom mounted strake [AD-A180791] p 751 N87-26898
Evaluation of the OV-1D aircraft with the YT53-L-704 engine and rudder augmentation system, phase 2 [AD-A180966] p 752 N87-26900
Elementary data analysis of measurements in nonsteady longitudinal and lateral flight test maneuvers [VTH-LR-409] p 752 N87-26905
Preliminary flight assessment of the X-29A advanced technology demonstrator [NASA-TM-100407] p 752 N87-26906
The value of early flight evaluation of propulsion concepts using the NASA F-15 research airplane [NASA-TM-100408] p 763 N87-26913
Dynamic stability and handling qualities tests on a highly augmented, statically unstable airplane [NASA-TM-88297] p 776 N87-26920
Design and evaluation of dynamic flight test maneuvers [VTH-LR-497] p 753 N87-27657
Level flight performance evaluation of the UH-60A helicopter with the production external stores support system and ferry tanks installed [AD-A181947] p 753 N87-27658
Preliminary airworthiness evaluation of the UH-1H helicopter with the T53-L-703 engine installed [AD-A182369] p 825 N87-28541
A flight evaluation of voice interaction as a component of an integrated helicopter avionics system [RAE-TM-FS(B)-637] p 829 N87-28547
The flight development of a color electronic display format and monitoring system of helicopter engine and transmission data [RAE-TM-FS(B)-637] p 829 N87-28547

Description of an aeronautical geometry conversion package: Wave-drag to Langley Wireframe Geometry Standard (LaWGS) to Supersonic Implicit Marching Potential (SIMP) [NASA-CR-178299] p 548 N87-23194

Numerical solution of the Navier-Stokes equations about three-dimensional configurations: A survey p 701 N87-26022

The effect of rotor wake geometry variation on hover induced power estimation for a UH-1H Iroquois helicopter [AD-A180787] p 732 N87-26867

3-D inelastic analysis methods for hot section components. Volume 2: Advanced special functions models [NASA-CR-179517] p 790 N87-27267

GEOSTROPHIC WIND

On nocturnal wind shear with a view to engineering applications p 328 A87-24746

GLASS

Impact fracture of chemically tempered glass helicopter windshields p 195 A87-17824

GLASS FIBER REINFORCED PLASTICS

Development of a GFRP wing in accordance with FAR Part 23 p 92 A87-13993

Seastar - Glass, plastic, and tradition p 656 A87-45648

A method for the manufacture of model helicopter rotor blades from glass fiber reinforced plastic [RAE-TR-85040] p 175 N87-14316

Construction and test of a composite microflight wing structure [BU-341] p 365 N87-19392

Materials selection and design study of a composite microflight wing structure [BU-335] p 432 N87-20263

GLASS FIBERS

British Airways alternative method for the repair of metal/metal, metal honeycomb and fibreglass, carbon-fibre or Kevlar/honeycomb components using hot-setting film or paste adhesives p 481 A87-35278

GLIDE PATHS

Isochrones for minimum time horizontal gliding flight [AIAA PAPER 87-0449] p 240 A87-22641

New concepts concerning ILS siting p 497 A87-35558

Terrain modelling of glideslope for instrument landing system p 650 A87-46415

Minimum operational performance standards for airborne ILS glide slope receiving equipment operating within the radio frequency range of 328.6-335.4 MHz [RTCA/DO-192] p 21 N87-10853

Guidance law simulation studies for complex approaches using the Microwave Landing System (MLS) [NASA-CR-178182] p 87 N87-12552

Aircraft accident report: Henson Airlines Beech B99, N339HA, Grottoes, Virginia, September 23, 1985 [PB86-910409] p 155 N87-13419

An evaluation of descent strategies for TNAV-equipped aircraft in an advanced metering environment [NASA-CR-178093] p 236 N87-15197

Investigation on Microwave Landing System (MLS) approach path interception and transition techniques. Part 1: Fast-time computer simulations [NLR-TR-85097-U-PT-1] p 357 N87-19373

The retinal image of the fresnel lens optical landing system [AD-A176090] p 426 N87-20258

Advanced monitoring concepts p 503 N87-22614

GLIDERS

Mathematical modeling of the motion of a statically deformed delta-shaped glider p 95 A87-15205

Integrated aerodynamic/structural design of a sailplane wing [AIAA PAPER 86-2623] p 163 A87-17882

A computational method for free time optimal control problems, with application to maximizing the range of an aircraft-like projectile p 372 A87-29677

Certification of the PIK30 powered glider [REPT-5/CEV/IS/SE/AV/86] p 174 N87-13436

Glasflugel H 201 Libelle glider: Aging study, test report, part 1 [REPT-3707-LC-85-PT-1] p 195 N87-13496

Calculation of noise around airports for powered gliders [VTH-LR-475] p 860 N87-30150

GLIDING

In-flight ejection seat test using the Aircrew Gliding Escape System (AGES) parachute [AD-A172987] p 235 N87-15948

GLOBAL POSITIONING SYSTEM

Global positioning system applications p 18 A87-10047

Combined utilization of Loran and GPS - The best from each system p 20 A87-11664

Integration of GPS with other radionavigation systems p 21 A87-12680

A low cost commercial GPS set p 21 A87-12685

ION, National Technical Meeting, Long Beach, CA, January 21-23, 1986, Proceedings p 85 A87-13532

Navstar Global Positioning Systems Collins user equipment - An evolutionary assessment p 85 A87-13533

Combining Loran and GPS - The best of both worlds p 86 A87-13544

GPS failure detection by autonomous means within the cockpit p 159 A87-19353

Measurement errors in GPS observables p 159 A87-19357

Measurement capability of moving-receiver radio interferometry p 159 A87-19360

Australian trials of Phase II Navstar GPS user equipment p 159 A87-19362

Diffstar - A concept for differential GPS in northern Norway p 159 A87-19363

GPS enhancements for aircraft p 236 A87-19997

The minimum for geometric dilution of precision in Global Positioning System navigation p 355 A87-28917

An integrated navigation system for advanced attack helicopters p 422 A87-31468

Ring laser gyro inertial and GPS integrated navigation system for commercial aviation p 579 A87-41364

Flight test results of an integrated GPS and strapdown inertial system p 580 A87-41377

Evaluation of GPS ionospheric time delay algorithm for single-frequency users p 580 A87-41378

Independent ground monitor coverage of Global Positioning System (GPS) satellites for use by civil aviation p 580 A87-41389

Altitude aided GPS p 580 A87-41390

Partial inertial aiding for low cost aircraft GPS navigators p 581 A87-41391

Reliable high accuracy long range real time differential G.P.S. using a lightweight high frequencies data link p 581 A87-41393

High precision differential GPS navigation p 581 A87-41394

Use of phase data for accurate differential GPS kinematic positioning p 581 A87-41395

Requirements for sole means navigation in U.S. Navy aircraft p 581 A87-41402

Civil access to the precise positioning service of the Navstar Global Positioning System p 582 A87-41403

Space-age navigation p 820 A87-51325

Dynamic positioning using GPS carrier phase measurements p 820 A87-52765

Inertial-GPS - A marriage of convenience under test p 820 A87-53578

The Navstar/GPS program - An evolution or a revolution in the world of navigation p 840 A87-53581

The role of Navstar/GPS in civil aviation p 820 A87-53582

Aircraft positioning using Global Positioning System carrier phase data p 821 A87-54367

Aided-airborne Gravity Gradiometer Survey System (GGSS) study [AD-A170749] p 203 N87-14766

Evaluation of alternatives for Army precision landing system: Ground guidance [AD-A174093] p 237 N87-15956

Inertial-GPS: A marriage of reason, an analysis p 500 N87-21885

MCS: Its technical features and operational capabilities p 501 N87-21892

Investigation of air transportation technology at Ohio University, 1984 p 496 N87-22609

Joint University Program for Air Transportation Research, 1985 [NAS 1.55:2453] p 715 N87-27596

Velocity accuracy measurement of GPS user equipment p 822 N87-29477

Test plan for helicopter GPS (Global Positioning System) applications [AD-A183299] p 823 N87-29488

GOALS

Multiple paths in complex tasks [NASA-CR-180392] p 619 N87-24911

GOERTLER INSTABILITY

Stationary disturbances in three-dimensional boundary layers over concave surfaces [AIAA PAPER 87-1412] p 632 A87-44945

GONDOLAS

A simulation platform for three-axis attitude control of a large balloon gondola p 436 A87-32485

GOVERNMENT PROCUREMENT

AHIP - The OH-58D from conception to production --- Army Helicopter Improvement Program p 144 A87-19248

LHTEC - Putting its T800 candidate to the test p 369 A87-30502

LHTEC - Meeting the LHX cost challenge p 801 A87-53425

Air traffic control: FAA's (Federal Aviation Administration's) advanced automation system acquisition strategy is risky [PB86-231743] p 237 N87-15200

Air traffic system: Pilot program to contract out maintenance at selected facilities [PB87-186607] p 741 N87-26894

GOVERNMENT/INDUSTRY RELATIONS

The FAA 'Buy-Sell' slot rule - Airline deregulation at the crossroads p 210 A87-19297

Overview of the integrated Federal Aviation Administration (FAA) wind shear program plan [SAE PAPER 861702] p 351 A87-29589

GRAIN SIZE

The effect of thermal treatment on properties of rapidly solidified AA2024 p 528 A87-36855

GRAMMARS

A test on the reliability and performance of the verbex series 4000 voice recognizer [AD-A169066] p 130 N87-12729

GRANTS

Graduate engineering research participation in aeronautics [NASA-CR-179798] p 3 N87-10828

GRANULAR MATERIALS

Resilient modulus of freeze-thaw affected granular soils for pavement design and evaluation, Part 3: Laboratory tests on soils from Albany County Airport [DOT/FAA-PM-84-16.3] p 466 N87-20433

GRAPH THEORY

An architecture for consideration of multiple faults --- in Space Shuttle simulator hardware p 204 A87-16682

GRAPHIC ARTS

A graphics environment supporting the rapid prototyping of pictorial cockpit displays [AD-A178636] p 548 N87-23182

GRAPHITE

Nickel coated graphite fiber conductive composites p 39 A87-11844

Composites proving durable --- for aircraft structures p 359 A87-29593

Unconventional approaches to field repair p 406 N87-20190

GRAPHITE-EPOXY COMPOSITES

Decay of end effects in graphite/epoxy bolted joints p 44 A87-10115

Advances in toughness of structural composites based on interleaf technology p 40 A87-12661

Experimental investigation on advanced composite-stiffened structures under uniaxial compression and bending p 263 A87-20889

A heater made from graphite composite material for potential deicing application [AIAA PAPER 87-0025] p 297 A87-24905

Design and development of a power takeoff shaft p 305 A87-25717

Postbuckling and failure characteristics of stiffened graphite-epoxy shear webs [AIAA PAPER 87-0733] p 463 A87-33572

Development of failure resistant bismaleimide/carbon composites p 457 A87-34845

The effect of multiple elevated temperature bonding cycles on AS/3501-6 mechanical properties p 529 A87-38617

Thermal and flammability characterization of graphite composites p 688 A87-43398

Composite vital parts optimisation for EH 101 rotor hub p 653 A87-43451

Ultrasonic characteristics of graphite/epoxy composite material subjected to fatigue and impacts p 780 A87-47821

Damage tolerance of toughened resin graphite composites p 782 A87-48532

Impact response of composite fuselage frames [SAE PAPER 871009] p 744 A87-48696

Application studies of a new graphite/epoxy material for the vertical fin of a commercial transport aircraft p 841 A87-51792

Experimental aeroelastic behavior of forward-swept graphite/epoxy wings with rigid-body freedom p 824 A87-53781

Is fatigue testing of impact damaged laminates necessary? p 844 A87-54316

A heater made from graphite composite material for potential deicing application [NASA-TM-88888] p 101 N87-12559

Flight service evaluation of advanced composite ailerons on the L-1011 transport aircraft [NASA-CR-178170] p 318 N87-16883

Fibre composite repair of cracked metallic aircraft components: Practical and basic aspects p 405 N87-20187

Dynamic response and stability of a composite prop-fan model [NASA-CR-179528] p 519 N87-21956

Dynamic response of two composite prop-fan models on a nacelle/wing/fuselage half model [NASA-CR-179589] p 585 N87-23615

Flight service evaluation of advanced composite ailerons on the L-1011 transport aircraft p 691 N87-25439
[NASA-CR-178321]
The 737 graphite composite flight spoiler flight service evaluation p 846 N87-29609
[NASA-CR-178322]
GRAPHITE-POLYIMIDE COMPOSITES
Moisture diffusion in graphite/bismalimide-modified-epoxy composite IM6/5245C p 604 A87-40384
GRASSLANDS
Results from the pushbroom microwave radiometer flights over the Konza Prairie in 1985 p 853 A87-53206
GRAVIMETERS
Development of new aviation technology for gravimetric surveying p 331 N87-17106
GRAVIMETRY
Development of new aviation technology for gravimetric surveying p 331 N87-17106
Hardware design for a fixed-wing airborne gravity measurement system p 433 N87-20993
[AD-A176620]
GRAVITATION
Hardware design for a fixed-wing airborne gravity measurement system p 433 N87-20993
[AD-A176620]
GRAVITATIONAL FIELDS
Fundamentals of navigation according to geophysical fields --- Russian book p 19 A87-11337
GRAVITY GRADIOMETERS
Aided-airborne Gravity Gradiometer Survey System (GGSS) study p 203 N87-14766
[AD-A170749]
GREAT CIRCLES
Path discrepancies between great circle and rhumb line p 357 N87-18527
[TM-98]
GREEN'S FUNCTIONS
Introduction to the Green's function method in aerodynamics p 276 A87-23633
An integral equation method for potential aerodynamics p 277 A87-23641
Improvements on a Green's function method for the solution of linearized unsteady potential flows p 556 A87-41627
GRINDING MACHINES
Grinding of steel: A case study p 324 N87-17048
[AD-A174649]
GROUND BASED CONTROL
Evaluation of alternatives for Army precision landing system: Ground guidance p 237 N87-15956
[AD-A174093]
Models for the ground based approach planning system Computer Oriented Metering Planning and Advisory System (COMPAS) p 822 N87-28539
GROUND EFFECT (AERODYNAMICS)
Interaction of decaying trailing vortices in ground shear p 66 A87-13499
The induced aerodynamics of jet and fan powered V/STOL aircraft p 73 A87-15459
Multiple jet impingement flowfields p 73 A87-15461
A study of the rotor wake in nap-of-the-earth p 166 A87-18526
Analysis of the influence of the height above the ground of a jet-engine air-intake on the structure of free inlet air flow p 288 A87-25972
Full-scale ground effects of twin impinging jets beneath a subsonic tactical V/STOL aircraft p 343 A87-28625
[AIAA PAPER 86-2704]
Effect of sink rate on ground effect of low-aspect-ratio wings p 348 A87-31291
Advanced method for computing flow around wings with rear separation and ground effect p 410 A87-33246
A quasi-stationary calculation model for simulating helicopter starting and landing procedures with emphasis on the ground effects p 506 A87-36771
[DGLR PAPER 86-152]
Exploratory evaluation of a moving-model technique for measurement of dynamic ground effects p 685 A87-45303

Gust and maneuver spectra for general aviation aircraft
[AIAA PAPER 86-25991] p 93 A87-14622
Gust response of a flat-plate aerofoil in the time domain p 345 A87-30446
Calculation of noise caused by interaction of supersonic cascade and varied oncoming gust p 859 A87-51812
Development and flight verification of airborne glideslope computation/gust detection system
[NAL-TR-908] p 503 N87-21906
Example on how to model and simulate turbulence for flight simulators p 543 N87-22353
The status of military specifications with regard to atmospheric turbulence p 544 N87-22355
Low altitude wind shear detection with Doppler radar
[DOT/FAA/PM-87/6] p 544 N87-22379
B-57B gust gradient program p 657 N87-25276
Turbulence models p 703 N87-25277
An introduction to time-dependent aerodynamics of aircraft response, gusts and active controls
[ESDU-84020] p 682 N87-26048
The computed gust response of an aircraft. The relative effect of various degrees of freedom
[AD-A180968] p 775 N87-26916
Search for a principle to generate high frequency gusts --- wind tunnel tests
[ONERA-RSF-92/1865-AY] p 779 N87-27677
Effect of airfoil mean loading on high-frequency gust interaction noise p 811 N87-28513
Preliminary Memphis FAA (Federal Aviation Administration)/Lincoln Laboratory operational weather studies results
[AD-A182730] p 854 N87-29057
- GYRODAMPERS**
Controlling the elastic vibrations of aircraft structures by means of control moment gyroscopes p 188 A87-17564
- GYROSCOPIC PENDULUMS**
Dynamics of a high-speed rotor touching a boundary p 848 A87-51614
- GYROSCOPIC STABILITY**
The effect of gyroscopic forces on dynamic stability and response of spinning tapered blades
[AIAA PAPER 87-0737] p 464 A87-33663
- GYROSTABILIZERS**
Tracking a laser-projected horizon indicator
[AD-A183384] p 856 N87-30051
- H**
- H-53 HELICOPTER**
The design and qualification testing of an energy-absorbing seat for the Navy's H-53 A/D helicopters p 91 A87-13679
- H-60 HELICOPTER**
Pilot report - Air Force's Sikorsky HH-60 Night Hawk p 750 A87-50225
- HAILSTORMS**
The terminal area simulation system. Volume 2: Verification cases
[NASA-CR-4047] p 421 N87-20252
- HANDBOOKS**
A designers' guide to the achievement of electrical continuity in carbon fibre composite structures --- aircraft
[CD6500551] p 844 N87-28607
- HANDICAPS**
Airlines are exempt from law on rights of the disabled p 709 A87-42863
- HANG GLIDERS**
An experimental investigation into methods for quantifying hang glider airworthiness parameters
[CAR-8705] p 585 N87-23613
- HARDENERS**
Resin-hardener systems for resin transfer molding p 120 A87-13093
- HARDENING (MATERIALS)**
Optimization of a process for the surface hardening of structural parts using the fatigue limit criterion p 263 A87-20394
Production laser hardfacing of jet engine turbine blades p 323 A87-26678
Calculation of the parameters of a hardening burnishing treatment p 461 A87-31735
- HARDNESS**
Carburizing steel for high temperature service
[AD-A168327] p 122 N87-11877
Nuclear hardness simulation and analysis of composite aircraft structures. Volume 2: Dust erosion assessment
[AD-A174893] p 363 N87-19378
- HARDWARE**
Development and experiment of airborne microwave rain-scatterometer/radiometer system. I - Hardware system. II - Experimental data processing software system p 365 A87-28435
A Hardware and Software Integration Facility (HSIF) for SH-60F CV-Helo p 451 A87-31478
Telemetry Integrated Processing System operational overview p 527 A87-37400
Standardization and logistic support cost effectiveness of advanced avionics systems p 661 A87-43468
Real cost savings through standard interface hardware p 755 A87-48062
H/W and S/W redundancy techniques for 90's rotorcraft computers p 756 A87-48949
The SIFT hardware/software systems. Volume 1: A detailed description
[NASA-TM-87574] p 858 N87-29186
- HARMONIC ANALYSIS**
Acta aeronautica et astronautica sinica (selected articles)
[AD-A173364] p 276 N87-17661
- HARMONIC CONTROL**
System identification techniques for helicopter higher harmonic control p 190 A87-19241
Flight demonstration of higher harmonic control (HHC) on S-76 p 170 A87-19260
Higher harmonic control - Flight tests of an experimental system on SA 349 research Gazelle p 170 A87-19263
A coupled rotor/airframe vibration model with higher harmonic control effects p 171 A87-19264
Flight tests of an open loop higher harmonic control system on an S-76A helicopter p 171 A87-19265
Elastic fuselage modes and higher harmonic control in the coupled rotor/airframe vibration analysis p 747 A87-48957
Adaptive inverse control for rotorcraft vibration reduction
[NASA-TM-86829] p 207 N87-14910
Application of higher harmonic blade feathering on the OH-6A helicopter for vibration reduction
[NASA-CR-4031] p 230 N87-15175
- An investigation of helicopter higher harmonic control using a dynamic system coupler simulation p 682 N87-26051
Small-scale rotor test rig capabilities for testing vibration alleviation algorithms
[NASA-TM-100002] p 858 N87-30102
- HARMONIC OSCILLATION**
Application of diverging motions to calculate loads for oscillating motions p 148 A87-18955
Interference of rotor harmonics in two-shaft coaxial rotor systems with nonlinearly elastic shaft supports p 610 A87-42136
Equivalent linearization of a nonlinear element with respect to subharmonic motions p 789 A87-49981
- HARMONICS**
Cruise noise of counterrotation propeller at angle of attack in wind tunnel
[NASA-TM-88869] p 139 N87-13252
Supersonic flow over elastic bodies in oscillation p 817 N87-29464
- HARNESSES**
Static test procedures for restraint anchorages in small aircraft
[SAE PAPER 871007] p 737 A87-48694
- HARRIER AIRCRAFT**
AV-8B/GR Mk 5 airframe composite applications p 88 A87-13628
The AV-8B goes aboard - TACAIR operations from the LHD 1
[SAE PAPER 861632] p 339 A87-29639
Development of Digital Engine Control System for the Harrier II
[AIAA PAPER 87-2184] p 673 A87-45458
Harrier II - Digital engine control flight tests p 758 A87-47837
The AV-8B flight test video system p 757 A87-49214
Analysis and application of aircraft departure prediction criteria to the AV-8B Harrier II
[AIAA PAPER 87-2561] p 769 A87-49611
Propulsion system technologies for thrust vectoring p 519 N87-22670
Development of in-flight simulation aircraft for research and training applications in UK p 602 N87-23658
- HASTELLOY (TRADEMARK)**
Non-isothermal fatigue crack growth in Hastelloy-X p 840 A87-51400
- HEAD (FLUID MECHANICS)**
Computational method for screened two-dimensional wind tunnel inlets p 413 A87-34513
- HEAD-UP DISPLAYS**
A procedure for the mechanical design of military aircraft head-up-displays to withstand bird-strike loads p 303 A87-25882
HUD guidance improves landing performance p 755 A87-48278
Testing and development of holographic HUD systems p 757 A87-49207
Head-up flying p 835 A87-53583
Integrating a head-up display with dome visual simulation technology
[AD-A175222] p 366 N87-19394
Application of flight performance advisory systems to US Navy aircraft p 502 N87-21900
Evaluation of the angle of attack limiter of the F-16 C/D aircraft
[AD-A177941] p 585 N87-23612
Operational training: Application and experience p 601 N87-23653
Evaluation of the F/A-18 head-up-display for recovery from unusual attitudes
[AD-A183303] p 829 N87-29532
- HEARING**
Development of simulated directional audio for cockpit applications
[AD-A175350] p 391 N87-19570
- HEAT EXCHANGERS**
A whole-system analysis of recuperated gas turbines p 305 A87-25884
Dynamics of compressible air flow in ducts with heat exchange p 383 A87-29279
Minimizing heat rejection in aircraft accessory drive gearboxes
[SAE PAPER 861736] p 368 A87-29582
Optimizing aircraft fuel thermal management p 440 A87-32068
Heat exchangers for turboshaft engines p 664 A87-44253
- HEAT FLUX**
High temperature heat transfer for gas turbines using shock tubes p 37 A87-12646
Influence of vane/blade spacing and cold-gas injection on vane and blade heat-flux distributions for the Teledyne 702 HP turbine stage
[AIAA PAPER 87-1915] p 669 A87-45295

Highlights of unsteady pressure tests on a 14 percent supercritical airfoil at high Reynolds number, transonic condition [AIAA PAPER 87-0035] p 216 A87-22370
An experimental investigation of the perpendicular vortex-airfoil interaction at transonic speeds [AIAA PAPER 87-0208] p 221 A87-22486
Computation of internal flows at high Reynolds number by numerical solution of the Navier-Stokes equations p 553 A87-39709
Direct simulation of high Reynolds number flows using a new integro-differential solver [AIAA PAPER 87-1175] p 561 A87-42119
- Analysis of crossover between local and massive separation on airfoils [AIAA PAPER 87-1268] p 564 A87-42355
Airfoil dynamic stall at constant pitch rate and high Reynolds number [AIAA PAPER 87-1329] p 565 A87-42391
Dynamic stall around an airfoil at high Reynolds numbers - A comparison between numerical results and experimental visualization p 804 A87-51454
Vortex shedding of a square cylinder in front of a slender airfoil at high Reynolds numbers. Part 1: Spacing effect [MPIS-23/1985] p 13 N87-10048
Vortex shedding of a square cylinder in front of a slender airfoil at high Reynolds numbers. Part 2: Compressibility effect [MPIS-24/1985] p 75 N87-11704
Comparison of transonic airfoil characteristics by Navier-Stokes computation and by wind tunnel test at high Reynolds number [NAL-TR-911T] p 492 N87-21869
High Reynolds Number tests of the NASA SC(2)-0012 airfoil in the Langley 0.3-meter transonic cryogenic tunnel [NASA-TM-89102] p 571 N87-23594
Aerodynamics of unmanned aircraft at full-scale in the RAE 24ft wind-tunnel [RAE-TM-AERO-2081] p 645 N87-26027
Fatigue-life monitoring of the 5 metre wind tunnel [RAE-TM-AERO-2084] p 688 N87-26055
High Reynolds number flows around smooth and rough cylinders. Volume 1. Mean surface pressure distribution [AD-A183531] p 816 N87-29428
- HIGH SPEED**
High speed flight effects on noise propagation [AIAA PAPER 87-0013] p 271 A87-22359
High-speed propeller noise predictions - Effects of boundary conditions used in blade loading calculations [AIAA PAPER 87-0525] p 333 A87-24978
Measured noise of a scale model high speed propeller at simulated takeoff/approach conditions [AIAA PAPER 87-0526] p 397 A87-31109
Higher cruise speed commercial aircraft evolution [SAE PAPER 861686] p 402 A87-32602
High speed wind tunnel tests of the PTA aircraft --- Propan Test Assessment Program [SAE PAPER 861744] p 409 A87-32619
Variable cycle concepts for high Mach applications [AIAA PAPER 87-2103] p 672 A87-45408
Euler analysis of the three-dimensional flow field of a high-speed propeller - Boundary condition effects [ASME PAPER 87-GT-253] p 719 A87-48719
High-speed propeller noise predictions: Effects of boundary conditions used in blade loading calculations [NASA-TM-88913] p 208 N87-14957
Transition fixing in the high speed range for the development of civil aircraft wings p 242 N87-15164
Measured noise of a scale model high speed propeller at simulated takeoff/approach conditions [NASA-TM-88920] p 272 N87-16588
Euler analysis of the three dimensional flow field of a high-speed propeller: Boundary condition effects [NASA-TM-88955] p 291 N87-16798
Summary of studies to reduce wing-mounted propan installation drag on an M = 0.8 transport [NASA-TP-2678] p 433 N87-20990
A quick look at the first NRL short pulse 95 GHz radar flight data [AD-A176182] p 468 N87-21214
Prediction of high-speed rotor noise with a Kirchhoff formula [AD-A178982] p 549 N87-23250
Extension of Kirchhoff's formula to radiation from moving surfaces [NASA-TM-89149] p 620 N87-24160
To enhance the capability and increase the productivity of a group working on critical problems of high speed fluid mechanics - both experimentally and through numerical calculations [AD-A182559] p 791 N87-27970
- HIGH STRENGTH ALLOYS**
Titanium alloy springs p 463 A87-33181
Quantitative fractographic examination of aircraft components tested under a fatigue spectrum loading p 534 A87-38545
Developments in titanium alloys p 689 A87-44744
Dispersion strengthened alloys for aerospace p 844 A87-53894
Repair techniques for gas turbine components p 325 N87-17071
Processing and properties of airframe materials [AD-A182159] p 792 N87-28065
- HIGH STRENGTH STEELS**
Fatigue fracture in steel landing gear components [NLR-MP-85050-U] p 54 N87-11233
- HIGH TEMPERATURE**
Elevated temperature mechanical behavior of P/M dispersion strengthened Al-Fe-Ni alloys p 528 A87-36866
Burner rig tests on coated anisotropic high temperature alloys p 783 A87-49553
High temperature static strain gage program p 52 N87-11188
Unitized high temperature probes [AD-D012508] p 324 N87-17020
The physics of fuel sprays. Volume 1: Experimental measurements [AD-A175660] p 442 N87-20285
Development of powder metallurgy 2XXX series Al alloy plate and sheet materials for high temperature aircraft structural applications, FY 1983/1984 [NASA-CR-172521] p 458 N87-20406
Elevated temperature crack growth [NASA-CR-179601] p 539 N87-22267
- HIGH TEMPERATURE AIR**
Extension of hot air balloon flight duration through adaption of balloon surface characteristics p 344 A87-29262
Blackening of petroleum-based aviation oils - Causes and consequences p 604 A87-40925
High temperature transport properties of air [AIAA PAPER 87-1632] p 707 A87-43129
Evaporation of monodisperse fuel sprays in flowing air [AD-A177119] p 529 N87-22054
Effects of aircraft engine bleed air duct failures on surrounding aircraft structure [AD-A181071] p 739 N87-26884
- HIGH TEMPERATURE ENVIRONMENTS**
Equivalent testing temperature --- for SAAB avionics p 786 A87-47642
Support of the eight-foot high temperature tunnel modification project [NASA-CR-181280] p 780 N87-27678
- HIGH TEMPERATURE GASES**
A reinforcing band near the flange of a heated cylindrical casing p 48 A87-12445
Improving the energy efficiency of cooled high-temperature turbines p 104 A87-13990
A numerical technique for the solution of a vaporizing fuel droplet [AD-A180774] p 465 A87-33984
BAE Wharton Hot Gas Laboratory [ARG-207] p 376 N87-18577
High temperature protective coatings for aero engine gas turbine components [AD-A176001] p 442 N87-20286
- HIGH TEMPERATURE LUBRICANTS**
Carbon residue studies with a micro carbon residue tester [AD-A171153] p 259 N87-15306
- HIGH TEMPERATURE RESEARCH**
Technology for the design of high temperature rise combustors p 370 A87-31287
- HIGH TEMPERATURE TESTS**
High-temperature behavior of different coatings in high-performance gas turbines and in laboratory tests p 317 A87-26105
Composites for aerospace design applications p 454 A87-31373
Characterization and modeling of the high temperature flow behavior of aluminum alloy 2024 p 455 A87-32032

- Integrated design of structures p 509 N87-22669
- Improved control surface actuator
- [NASA-CASE-LAR-12852-1] p 588 N87-24461
- Flight worthiness of fire resistant hydraulic systems. Volume 2: Component and endurance testing
- [AD-A180865] p 751 N87-26899

HYDRAULIC FLUIDS

- Selection parameters for hydraulic system filters with a comparison of aircraft and marine applications
- [AD-A174045] p 389 N87-18825

HYDRAULIC JETS

HYDRAULIC JETS

Cutting aerospace structures with water p 531 A87-35395

HYDRAULIC TEST TUNNELS

Vortex breakdown and control experiments in the Ames-Dryden water tunnel [NASA-TM-89410] p 151 N87-13409

HYDRAZINE ENGINES

Development of a hot gas vane motor for aircraft starting systems [SAE PAPER 861714] p 368 A87-29580

HYDROCARBON COMBUSTION

Long-term deposit formation in aviation turbine fuel at elevated temperature p 121 A87-14986
Exhaust carbon - The effects of fuel composition p 676 A87-46253

HYDROCARBON FUEL PRODUCTION

Evaluation of naphthene rich turbine fuels as heat sinks for hypersonic aircraft [AD-A182118] p 845 N87-28658

HYDROCARBON FUELS

A method for calculating the susceptibility of jet fuels to smoking p 40 A87-12901
Dynamic simulation research on digital speed control system of aeroengine p 306 A87-27485
Computational models for gas-turbine combustors p 515 A87-38954

HYDRODYNAMICS

The effect of lubricant cavitation on the characteristics of a short hydrodynamic damper p 127 A87-15203
Numerical modeling in aerohydrodynamics p 804 A87-51651

Wind tunnel test of the modified goldschmidt model with propulsion and empenage: Analysis of test results [AD-A167360] p 13 N87-10045

Characterization and dynamical studies of polymers in dipolar (aprotic) liquids [AD-A169243] p 123 N87-12685

Water facilities in retrospect and prospect: An illuminating tool for vehicle design [NASA-TM-89409] p 150 N87-13403

HYDROGEN FUELS

An analysis of the combustion of a turbulent supersonic nonisobaric hydrogen jet in supersonic wake flow of air p 317 A87-25127

The future of hydrogen - An analysis at world level with a special look at air transport p 340 A87-30165

Three-dimensional numerical predictions of the flow behind a rearward-facing-step in a supersonic combustor [AIAA PAPER 87-1962] p 636 A87-45332

Advancements in hydrogen expander airbreathing engines [AIAA PAPER 87-2003] p 670 A87-45348

Hydrogen scramjet with sidewall injection - Shock tunnel simulations p 674 A87-46217

Combined use of hydrogen as fuel atomizer and additional fuel in gas-turbine engine p 261 N87-16182

Japan Report: Science and technology [JPRS-JST-86-014] p 391 N87-19541

Effect of Reynolds number variation on aerodynamics of a hydrogen-fueled transport concept at Mach 6 [NASA-TP-2728] p 645 N87-26031

HYDROGENATION

Advanced aircraft fuel evaluation, phase 1 [AD-A182029] p 784 N87-27816

Production of high energy aviation fuels from advanced coal liquids, phase 1 [AD-A182333] p 785 N87-27819

HYDROPLANING

Aero-marine design and flying qualities of floatplanes and flying-boats p 508 A87-39146

HYPERBOLIC DIFFERENTIAL EQUATIONS

Unsteady 3-dimensional Euler equations solutions on dynamic blocked grids [AD-A173977] p 232 N87-15942

HYPERBOLIC FUNCTIONS

Construction of explicit and implicit symmetric TVD schemes and their applications --- Total Variation Diminishing for fluid dynamics computation p 344 A87-29688

HYPERSONIC AIRCRAFT

Ames accelerates research on hypersonic technology p 64 A87-13911

National Aero-Space Plane - Technology for America's future p 141 A87-17142

Computational analysis of hypersonic airbreathing aircraft flow fields [AIAA PAPER 87-0279] p 222 A87-22531

Navier-Stokes solution for a complete re-entry configuration p 287 A87-25718

Pitching oscillating derivatives of wedges in supersonic and hypersonic p 371 A87-28343

Will the aerospace plane work? p 339 A87-28613

Has the Orient Express been murdered? --- technological development of hypersonic transport aircraft p 340 A87-30002

Rolls revs up for the new century p 369 A87-31209

Higher cruise speed commercial aircraft evolution [SAE PAPER 861686] p 402 A87-32602

Transition to space - A history of 'space plane' concepts at Langley Aeronautical Laboratory 1952-1957 p 478 A87-33152

Displacement surface calculations for a hypersonic aircraft [AIAA PAPER 87-1190] p 561 A87-42310

Ground testing facilities requirements for hypersonic propulsion development [AIAA PAPER 87-1884] p 684 A87-45276

Compendium of NASA Langley reports on hypersonic aerodynamics [NASA-TM-87760] p 291 N87-16802

Optimal turning at high angle of attack of supersonic and hypersonic vehicles p 300 N87-16814

Optimization of hypersonic waveriders derived from cone flows including viscous effects p 413 N87-20193

A model test vehicle for hypersonic aerospace systems development [MBB-UR-87/5/86] p 658 N87-25314

Computational analysis of hypersonic airbreathing aircraft flow fields p 645 N87-26019

Effect of Reynolds number variation on aerodynamics of a hydrogen-fueled transport concept at Mach 6 [NASA-TP-2728] p 645 N87-26031

Thermal fatigue tests of a radiative heat shield panel for a hypersonic transport [NASA-TM-87583] p 845 N87-28643

Evaluation of naphthene rich turbine fuels as heat sinks for hypersonic aircraft [AD-A182118] p 845 N87-28658

Numerical simulation of X24C-10D [AD-A183287] p 816 N87-29427

HYPERSONIC BOUNDARY LAYER

Numerical method for non-equilibrium hypersonic boundary layers [AIAA PAPER 87-0516] p 284 A87-24976

The effect of a finely dispersed admixture on the boundary layer structure in hypersonic flow past a blunt body p 286 A87-25228

Stability of axisymmetric boundary layers on sharp cones at hypersonic Mach numbers [AIAA PAPER 87-1413] p 567 A87-42442

Prediction and control of transition in hypersonic boundary layers [AIAA PAPER 87-1414] p 632 A87-44946

Radiative and convective heat transfer over ablating composite flat surface in hypersonic flow regime [AD-A182119] p 810 N87-28503

HYPERSONIC COMBUSTION

An improved computational model for a scramjet propulsion system [AIAA PAPER 87-2078] p 671 A87-45393

The influence of flow non-uniformities in air-breathing hypersonic propulsion systems [AIAA PAPER 87-2079] p 636 A87-45394

HYPERSONIC FLIGHT

Propulsion challenges for hypersonic flight [AIAA PAPER 86-2620] p 183 A87-17880

Morphology of a standing oblique detonation wave --- for hypersonic airbreathing propulsion [AIAA PAPER 87-1785] p 695 A87-45201

A subsonic to Mach 5.5 subscale engine test facility [AIAA PAPER 87-2052] p 685 A87-45381

An outlook on hypersonic flight [AIAA PAPER 87-2074] p 671 A87-45392

Studies of scramjet flowfields [AIAA PAPER 87-2161] p 688 A87-45443

Aerothermodynamic computations for super-/hypersonic flight p 640 A87-46328

Rekindled vision of hypersonic travel [AD-A182118] p 845 N87-28658

HYPERSONIC FLOW

Implicit finite-difference simulation of separated hypersonic flow over an indented nosetip p 7 A87-11533

Constant-density approximation to Taylor-Maccoll solution [AIAA PAPER 87-0055] p 217 A87-22385

Interaction of jet in hypersonic cross stream using Sychev similarity parameters [AIAA PAPER 87-0267] p 222 A87-22522

Computational analysis of hypersonic airbreathing aircraft flow fields [AIAA PAPER 87-0279] p 222 A87-22531

Analytical and experimental evaluation of a 3-D hypersonic fixed-geometry, swept, mixed compression inlet [AIAA PAPER 87-0159] p 281 A87-24931

A survey of simulation and diagnostic techniques for hypersonic nonequilibrium flows [AIAA PAPER 87-0406] p 320 A87-24958

Two- and three-dimensional viscous computations of a hypersonic inlet flow [AIAA PAPER 87-0283] p 346 A87-31106

Hypersonic nonuniform flow of a viscous gas past a blunt body p 407 A87-31713

Direct simulation of hypersonic flows over blunt wedges p 408 A87-32160

A study of the effect of the separation zone on the oscillations of a cone p 484 A87-35824

Three-dimensional hypersonic flow of a dusty gas past a wing p 485 A87-36088

Application of an upwind algorithm to the three-dimensional parabolized Navier-Stokes equations [AIAA PAPER 87-1112] p 557 A87-42061

Three dimensional hypersonic flow simulations with the CSCM implicit upwind Navier-Stokes method --- Conservative Supra-Characteristic Method [AIAA PAPER 87-1114] p 557 A87-42063

Computational fluid dynamics near the continuum limit [AIAA PAPER 87-1115] p 558 A87-42064

An analysis of flux-split algorithms for Euler's equations with real gases [AIAA PAPER 87-1117] p 617 A87-42066

Accurate, efficient prediction method for supersonic/hypersonic inviscid flow [AIAA PAPER 87-1165] p 560 A87-42110

Grid adaptation for hypersonic flow [AIAA PAPER 87-1169] p 561 A87-42114

Hypersonic laminar strong interaction theory and experiment revisited using a Navier-Stokes code [AIAA PAPER 87-1191] p 561 A87-42311

Preliminary applications of holographic interferometry to study hypersonic regions of shock wave/boundary layer interaction [AIAA PAPER 87-1194] p 562 A87-42312

Direct simulation of aerothermal loads for an aeroassist flight experiment vehicle [AIAA PAPER 87-1546] p 626 A87-43063

A computational study of the flowfield surrounding the Aeroassist Flight Experiment vehicle [AIAA PAPER 87-1575] p 626 A87-43084

Navier-Stokes simulation of a hypersonic generic wing/fuselage [AIAA PAPER 87-1192] p 629 A87-44902

Numerical analysis of peak heat transfer rates for hypersonic flow over a cowl leading edge [AIAA PAPER 87-1895] p 635 A87-45283

Viscous shock-layer analysis of hypersonic flows over long slender bodies [AIAA PAPER 87-2487] p 806 A87-52291

Flow behind a rearward facing step in hypersonic high enthalpy flow - Some interferometric studies p 807 A87-52371

Numerical simulation of the hypersonic flow around lifting vehicles [NASA-TM-89444] p 536 N87-22116

Computational analysis of hypersonic airbreathing aircraft flow fields p 645 N87-26019

Experimental study of shock wave interference heating on a cylindrical leading edge [NASA-TM-100484] p 789 N87-27154

Radiative and convective heat transfer over ablating composite flat surface in hypersonic flow regime [AD-A182119] p 810 N87-28503

IGNITION

IGNITION

Flammability and sensitivity of materials in oxygen-enriched atmospheres; Proceedings of the Symposium, Washington, DC, April 23, 1985. Volume 2 p 38 A87-10859

Design and evaluation of a new injector configuration for supersonic combustion p 674 A87-46218

Characteristic times for lean blowoff in turbine combustors p 758 A87-47090

Fuel spray ignition by hot surfaces and aircraft fire stabilization [AD-A172827] p 260 N87-16094

Aircraft accident report: NASA 712, Convair 990, N712NA, March Air Force Base, California, July 17, 1985, executive summary p 495 N87-21878

[NASA-TM-87356-VOL-1] p 495 N87-21878

Aviation fuel property effects on altitude reflight [NASA-CR-179582] p 607 N87-24578

IGNITION LIMITS

Minimum ignition levels of aircraft fuel constituents to lightning related ignition sources p 83 A87-15038

Effects of alternative fuels on ignition limits of the J85 annular combustor p 591 A87-39814

IGNITION SYSTEMS

Fast start APU technology [SAE PAPER 861712] p 368 A87-29578

IGNITION TEMPERATURE

Prospective, characteristics and problems of the use of boron in different air augmented propulsion modes [IAF PAPER 86-191] p 122 A87-15924

Development and evaluation of a 1 kW plasma torch ignitor for scramjets p 250 A87-23258

Pressure scaling effects in a scramjet combustion chamber p 676 A87-46258

ILYUSHIN AIRCRAFT

From the history of Soviet aviation: Ilyushin aircraft --- Russian book p 141 A87-17705

Soviets learn widebody lessons p 420 A87-34766

IMAGE ANALYSIS

Droplet field visualization and characterization via digital image analysis p 320 A87-25291

IMAGE MOTION COMPENSATION

Motion compensation requirements for a high resolution spotlight SAR p 388 N87-18727

Implementation of an airborne SAR motion compensation system p 388 N87-18728

Phase noise from aircraft motion: Compensation and effect on synthetic aperture radar images p 615 N87-24802

IMAGE PROCESSING

Photogrammetric tools for panoramic sector scan imagery in the VIDARS analysis station p 19 A87-10948

Management of airborne reconnaissance images through real-time processing p 19 A87-10949

Knowledge-based tactical terrain analysis --- autonomous helicopter systems p 19 A87-11061

Wholefield displacement measurements using speckle image processing techniques for crash tests p 124 A87-13680

An efficient data hierarchy for integrating background image information in an aircraft map system p 177 A87-16730

Determining the kinematic parameters of a moving imaging sensor by processing spatial and temporal intensity changes p 187 A87-17433

Automatic fringe analysis in double exposure and live fringe holographic interferometry p 261 A87-19810

The digital map as a tactical situation display p 423 A87-31487

On-line vehicle motion estimation from visual terrain information. I - Recursive image registration. II - Ground velocity and position estimation p 497 A87-35342

Digital video image processing applications to drop size and concentration measurements p 848 A87-52334

JPL multipolarization workstation - Hardware, software and examples of data analysis p 858 A87-53231

Aerodynamic breakup of polymer solutions via digital image processing techniques [AD-A170982] p 196 N87-13545

Advanced monitoring concepts p 503 N87-22614

Advanced visuals in mission simulators p 599 N87-23636

Application of digital interferogram evaluation techniques to the measurement of 3-D flow fields p 851 N87-29451

IMAGE RECONSTRUCTION

Identification of 3D objects from multiple silhouettes using quadrees/octrees p 394 A87-27699

A configurable pixel cache for fast image generation p 544 A87-35714

Tomographic reconstruction of three-dimensional flow over airfoils [AD-A179976] p 643 N87-25300

IMAGE RESOLUTION

Wind tunnel experimental study of optical beam degradation through heterogeneous aerodynamic flows [ONERA, TP NO. 1987-50] p 707 A87-46753

IMAGING TRANSDUCERS

Determining the kinematic parameters of a moving imaging sensor by processing spatial and temporal intensity changes p 187 A87-17433

IMAGERY

Visual display research tool p 599 N87-23635

IMAGES

Aero-optical analysis of compressible flow over an open cavity [AIAA PAPER 87-1399] p 632 A87-44943

IMAGING RADAR

Multifunction Radar for Airborne Applications --- conference [AGARD-CP-381] p 387 N87-18721

Motion compensation requirements for a high resolution spotlight SAR p 388 N87-18727

Implementation of an airborne SAR motion compensation system p 388 N87-18728

MM wave SAR sensor design: Concept for an airborne low level reconnaissance system p 388 N87-18729

IMAGING TECHNIQUES

Rapid target locator p 18 A87-10944

Simulation of future thermal imagers p 255 A87-19700

Color graphics techniques for shaded surface displays of aerodynamic flowfield parameters [AIAA PAPER 87-1182] p 619 A87-42125

Visual systems developments p 694 A87-44725

Images of three dimensional flows in computer graphics p 57 N87-10017

Effects on fuel spray characteristics and vaporization on energy release rates and flow field structure in a dump combustor p 612 N87-23804

IMPACT

Vibration control of flexible multibody aircraft during touchdown impacts p 745 A87-48713

Dynamics of a high-speed rotor touching a boundary p 848 A87-51614

IMPACT DAMAGE

Certification problems for composite airplane structures p 39 A87-12652

Characterization of optical and surface parameters during particle impact damage p 195 A87-17973

Effects of impact loads on CFRP structures [DGLR PAPER 86-147] p 528 A87-36793

A310-300 CFRP fin - Damage tolerance demonstration p 655 A87-44594

Damage tolerance of toughened resin graphite composites p 782 A87-48532

Is fatigue testing of impact damaged laminates necessary? p 844 A87-54316

Crashworthiness experiment summary full-scale transport controlled impact demonstration program [DOT/FAA/CT-85/20] p 17 N87-10055

Crash dynamics program transport seat performance and cost benefit study p 83 N87-11708

An assessment of aircraft repair schemes for battle damage and permanent usage [R946/8] p 145 N87-14246

Analysis of bird strikes reported by European airlines 1976-1980. Civil aircraft over 5700 kg (12500 lb) maximum weight [CAA-PAPER-84019] p 155 N87-14296

Analysis of bird strikes to United Kingdom registered aircraft 1983 (civil aircraft over 5700 kg maximum weight) [CAA-PAPER-85018] p 156 N87-14299

A study of compressor erosion in helicopter engine with inlet separator p 309 N87-17703

Aircraft Dynamic Response to Damaged and Repaired Runways [AGARD-R-739] p 584 N87-23609

Crash impact behaviour of simulated composite and aluminium helicopter fuselage elements p 161 A87-16964

Pulse control of flexible multibody systems p 382 A87-29268

Effect of geometric elastic non-linearities on the impact response of flexible multi-body systems p 462 A87-32917

Scaling of impact loaded carbon fiber composites [AIAA PAPER 87-0867] p 456 A87-33647

Effects of impact loads on CFRP structures [DGLR PAPER 86-147] p 528 A87-36793

Seat experiment results of full-scale transport aircraft controlled impact demonstration [AD-A172245] p 235 N87-15193

Crash impact behaviour of simulated composite and aluminium helicopter fuselage elements p 161 A87-16964

Pulse control of flexible multibody systems p 382 A87-29268

Effect of geometric elastic non-linearities on the impact response of flexible multi-body systems p 462 A87-32917

Scaling of impact loaded carbon fiber composites [AIAA PAPER 87-0867] p 456 A87-33647

Effects of impact loads on CFRP structures [DGLR PAPER 86-147] p 528 A87-36793

Seat experiment results of full-scale transport aircraft controlled impact demonstration [AD-A172245] p 235 N87-15193

Crash impact behaviour of simulated composite and aluminium helicopter fuselage elements p 161 A87-16964

Pulse control of flexible multibody systems p 382 A87-29268

Effect of geometric elastic non-linearities on the impact response of flexible multi-body systems p 462 A87-32917

Scaling of impact loaded carbon fiber composites [AIAA PAPER 87-0867] p 456 A87-33647

Effects of impact loads on CFRP structures [DGLR PAPER 86-147] p 528 A87-36793

Seat experiment results of full-scale transport aircraft controlled impact demonstration [AD-A172245] p 235 N87-15193

An investigation of spray impact forces --- aircraft wheels [BU-340] p 392 N87-19697

IMPACT RESISTANCE

Impact resistant hybrid composite for aircraft leading edges p 24 A87-11848

Effects of impact loads on CFRP structures [DGLR PAPER 86-147] p 528 A87-36793

Ultrasonic characteristics of graphite/epoxy composite material subjected to fatigue and impacts p 780 A87-47821

KRASH analysis correlation. Transport airplane controlled impact demonstration test [AD-A179906] p 647 N87-25308

Integrally-stiffened crash energy-absorbing subfloor beam structure [NASA-CASE-LAR-13697-1] p 659 N87-25321

IMPACT STRENGTH Effects of impact loading on carbon fiber reinforced structures [MBB-Z-83/86] p 691 N87-25436

IMPACT TESTS Nondestructive inspection of composite structures by low-velocity impact p 45 A87-10765

Full scale crash test of a BK117 helicopter p 91 A87-13678

Impact fracture of chemically tempered glass helicopter windshields p 195 A87-17824

Rotating arms applied to studies of single angular drop impacts [AIAA PAPER 87-0257] p 257 A87-22516

The controlled impact demonstration (CID) structural experiments, philosophy, and results) --- of transport aircraft crashworthiness p 495 A87-38694

Crash response data system for the controlled impact demonstration (CID) of a full scale transport aircraft p 694 A87-45123

Impact response of composite fuselage frames [SAE PAPER 871009] p 744 A87-48696

Structural dynamics research in a full-scale transport aircraft crash test p 818 A87-53780

Crash dynamics program transport seat performance and cost benefit study [DOT/FAA/CT-85/36] p 83 N87-11708

KRASH analysis correlation: Transport airplane controlled impact demonstration test [DOT/FAA/CT-86/13] p 354 N87-19368

Bird impact qualification test for A-10 windshield [AD-A179263] p 575 N87-23599

KRASH analysis correlation. Transport airplane controlled impact demonstration test [AD-A179906] p 647 N87-25308

IMPELLERS

A quasi-three-dimensional method for diagonal flow fans p 11 A87-12958

The design of low-stress/high performance centrifugal impellers [AIAA PAPER 87-2099] p 697 A87-45405

Performance prediction in a centrifugal compressor impeller p 674 A87-46190

3-D viscous flow calculations at design and off-design conditions for the NACA 48-inch radial-inlet centrifugal impeller p 638 A87-46191

Investigation of the three dimensional flow near the exit of two backsweppt transonic centrifugal impellers [ONERA, TP NO. 1987-70] p 638 A87-46192

Development of a laser interferometric system for velocity measurements inside a transonic axial flow compressor stage p 698 A87-46244

Lateral fluid forces on whirling centrifugal impeller. I - Theory. II - Experiment in vaneless diffuser p 786 A87-47717

A two-dimensional finite element stress analysis of radial impellers p 847 A87-51472

IMPINGEMENT

Characterization of optical and surface parameters during particle impact damage p 195 A87-17973

Experimental, water droplet impingement data on two-dimensional airfoils, axisymmetric inlet and Boeing 737-300 engine inlet [AIAA PAPER 87-0097] p 297 A87-24918

Experimental investigation on the composite cooling of a semicylinder leading edge p 386 A87-30718

IMPROVEMENT

The assessment and evaluation of combat performance improvements p 509 N87-22675

Policy options for the aircraft turbine engine component improvement program [AD-A182727] p 764 N87-27672

IMPULSES

Helicopter impulsive noise - Theoretical and experimental status p 271 A87-21195

An analytical study of impulsive destruction of the tail-rotor-drive-shaft p 747 A87-48956

IN-FLIGHT MONITORING

Application of computational physics within Northrop p 706 N87-26008

Application of CFD codes to the design and development of propulsion systems p 677 N87-26009

Experience with 3-D composite grids p 706 N87-26021

Numerical solution of the Navier-Stokes equations about three-dimensional configurations: A survey p 701 N87-26022

Non-linear unsteady wing theory, part 1. Quasi two-dimensional behavior: Airfoils and slender wings [NASA-CR-181008] p 731 N87-26862

Viscous/inviscid interaction analysis of the aerodynamic performance of the NACA 65-213 airfoil [AD-A182091] p 735 N87-27634

Two-degree-of-freedom subsonic wing rock and nonlinear aerodynamic interference p 811 N87-28511

INTERACTIVE CONTROL

Aircraft interactive system management - From pencils to computers [AIAA PAPER 86-2631] p 209 A87-17890

Interactive design tool for cockpit controls and displays development [AIAA PAPER 86-2735] p 181 A87-17953

INTERCEPTION

A highly accurate feedback approximation for horizontal variable-speed interceptions p 310 A87-23988

Nonlinear guidance algorithm for aircraft pursuit-evasion and target interception [AIAA PAPER 87-2316] p 715 A87-50437

An angle-only tracking filter in modified spherical coordinates --- for fighter aircraft maneuvers [AIAA PAPER 87-2380] p 741 A87-50465

Considerations on Microwave Landing System (MLS) approach path interception procedures and applicable turn techniques [NLR-MP-85063-U] p 160 N87-13426

Investigation on Microwave Landing System (MLS) approach path interception and transition techniques. Part 1: Fast-time computer simulations [NLR-TR-85097-U-PT-1] p 357 N87-19373

INTERFACE STABILITY

The evaluation of surface treatment for bond durability p 534 A87-38630

INTERFACES

EMC characteristics of grounding networks and electrical interfaces --- in aircraft p 746 A87-48950

On optimal design for the blade-root/hub interface in jet engines p 106 N87-11769

Geometries for roughness shapes in laminar flow [NASA-CASE-LAR-13255-1] p 291 N87-16793

Development of a ROT22 - DATAMAP interface [NASA-CR-177403] p 395 N87-18993

Integration of communications with the Intelligent Gateway Processor [DE87-002386] p 396 N87-19981

Crew escape capsule to airframe latch/disconnect mechanisms [AD-A181565] p 739 N87-26886

INTERFACIAL TENSION

Improvement of flight hardware and isothermal Marangoni convection under micro-gravity conditions p 608 A87-39840

INTERFERENCE

A study of finned, multi-body aerodynamic interference at transonic Mach numbers [AIAA PAPER 87-2480] p 726 A87-49096

Investigation of wall interference at high angle of attack in a low speed wind tunnel with slotted wall [AIAA PAPER 87-2611] p 778 A87-49110

INTERFERENCE DRAG

Integration effects of pylon geometry and rearward mounted nacelles for a high-wing transport [AIAA PAPER 87-1920] p 655 A87-45300

Wind tunnel wall interference in V/STOL and high lift testing: A selected, annotated bibliography [NASA-TM-89066] p 193 N87-13450

Thrust and drag accounting for propeller/airframe interaction [ESDU-85017] p 751 N87-26897

INTERFERENCE FIT

Fatigue life enhancement and high interference bushing installation using the ForceMate bushing installation technique p 384 A87-30103

INTERLAYERS

Diffusion bonding of certain refractory metals p 121 A87-13171

Asphalt-rubber SAMI (Stress-Absorbing Membrane Interlayers) field evaluation [AD-A169700] p 194 N87-14356

INTERMETALLICS

Titanium aluminides - Future turbine materials p 456 A87-33272

Aluminium-lithium alloys --- for aerospace structures p 781 A87-47938

Design of high-temperature, ordered intermetallic alloys p 840 A87-51177

High-strength, high-temperature intermetallic compounds p 840 A87-51301

Air force technical objective document fiscal year 1988 p 862 N87-30224

[AD-A183017] p 862 N87-30224

INTERNAL COMBUSTION ENGINES

Applications of laser velocimetry and Rayleigh scattering to engine flows p 385 A87-30677

Performance estimation of an aircraft internal combustion engine [AIAA PAPER 87-2173] p 672 A87-45453

Advanced Gas Turbine (AGT) Technology Project [NASA-CR-179484] p 130 N87-11995

INTERNATIONAL COOPERATION

Transition to new systems and international perspectives p 20 A87-11806

The future of international air transport p 2 A87-13016

Eurocontrol - Liability and jurisdiction p 273 A87-23270

Custom in international air relations p 398 A87-29485

Nationality and registration of aircraft operated by joint air transport operating organizations or international operating agencies p 398 A87-29486

The current status of the Warsaw Convention and subsequent Protocols in leading Asian countries p 478 A87-32002

The role of the International Civil Aviation Organization on deregulation, discrimination, and dispute resolution p 550 A87-37566

The new Annex 17 - The latest contribution by international civil aviation to the battle against terrorism p 708 A87-42860

Interception of civil aircraft vs. misuse of civil aviation p 708 A87-42861

The effect of European law on air transport p 709 A87-42862

EH.101 - The helicopter matures p 657 A87-46371

Cooperation know-how in high-tech products [MBB-Z-101-86-PUB] p 799 A87-49966

Frequency spectrum allocation for a potential land mobile-satellite service p 267 N87-15380

Fatigue in aircraft corrosion testing: The first 10 years [NLR-MP-86009-U] p 380 N87-18662

INTERNATIONAL LAW

The role of choice of law in determining damages for international aviation accidents p 61 A87-10508

The international regulation of liability in the field of air traffic control services p 274 A87-23273

The 'right to fly' and the 'right to carry traffic by air', in international air transportation, after 40 years p 274 A87-23274

Negligence of the aircraft commander and bad airmanship - New frontiers p 549 A87-37015

Aviation antitrust - International considerations after Sunset p 549 A87-37016

With twin-jets across the North Atlantic - A legal reflection p 549 A87-37017

INTERNATIONAL RELATIONS

Legitimate responses to aerial intruders - The view from a neutral state p 399 A87-29489

Civil liability concerning unlawful interference with civil aviation p 861 A87-52900

INTERPOLATION

A semiempirical interpolation technique for predicting full-scale flight characteristics [AIAA PAPER 87-0427] p 283 A87-24964

The use of a computer to obtain flight manual data [AD-A176741] p 547 N87-22416

Interpolation techniques for the time domain averaging of vibration data with application to helicopter gearbox monitoring [AD-A182572] p 754 N87-27662

INTERPROCESSOR COMMUNICATION

Simulation model of a high-speed token-passing bus for avionics applications p 471 A87-31482

ATC air/ground digital communications architecture p 424 A87-31523

INTERROGATION

Design and initial application of the extended aircraft interrogation and display system: Multiprocessing ground support equipment for digital flight systems [NASA-TM-86740] p 301 N87-16820

INVENTORIES

Prototype aircraft sustainability model [AD-A183183] p 802 N87-29405

INVESTIGATION

Flight investigation of the effects of an outboard wing-leading-edge modification on stall/spin characteristics of a low-wing, single-engine, T-tail light airplane [NASA-TP-2691] p 585 N87-23614

Flight test evaluation of techniques to predict longitudinal pilot induced oscillations [AD-A179229] p 597 N87-23629

INVESTMENT CASTING

Powder metallurgy (P/M) near-net shape titanium components from prealloyed powder p 782 A87-48007

INVISID FLOW

Vortex-stretched flow around a cranked delta wing p 3 A87-10520
 Vortex simulation of propagating stall in a linear cascade of airfoils p 5 A87-11117
 Numerical experiments with a total variation diminishing (TVD) MacCormack scheme p 6 A87-11526
 Numerical experiment with inviscid vortex-stretched flow around a cranked delta wing, supersonic speed p 7 A87-11537
 Calculation of strong viscous/inviscid interactions on airfoils by zonal solutions of the Navier-Stokes equations p 7 A87-11540
 Finite element computations for high speed 3D inviscid flows p 7 A87-11542
 Shock boundary layer interactions in laminar transonic flow over airfoils using a hybrid method p 66 A87-13503
 Numerical calculation of three-dimensional inviscid supersonic flows p 66 A87-13504
 Numerical solution of the Euler equation for compressible inviscid fluids p 69 A87-14095
 An implicit time-marching scheme for transonic flow p 71 A87-14261
 Numerical viscous-inviscid interaction method for internal separated flow and shock wave-boundary layer interaction [ONERA, TP NO. 1986-123] p 214 A87-21041
 A quadrature-collocation technique for boundary element method - Application to helicopter fuselage [ONERA, TP NO. 1986-124] p 214 A87-21042
 Energetics of oscillating lifting surfaces using integral conservation laws p 220 A87-22474
 Engineering analysis of slender-body aerodynamics using Sychev similarity parameters [AIAA PAPER 87-0267] p 222 A87-22522
 Viscous transonic airfoil flow simulation by an efficient viscous-inviscid interaction method [AIAA PAPER 87-0412] p 223 A87-22617
 An efficient time-marching scheme for solving compressible Euler equations p 228 A87-22953
 Wavy wall solutions of the Euler equations p 278 A87-23672
 A comparison of inviscid and viscous transonic separated flows [AIAA PAPER 87-0036] p 280 A87-24907
 A truncation error injection approach to viscous-inviscid interaction [AIAA PAPER 87-540] p 284 A87-24981
 A numerical simulation of the inviscid flow through a counterrotating propeller [ASME PAPER 86-GT-138] p 287 A87-25395
 Analysis of velocity potential around intersecting bodies p 287 A87-25907
 A method for computation of viscous/inviscid interaction on transonic compressor cascades p 289 A87-27483
 Boundary-layer effects on the flowfield about isolated flow-through nacelles p 342 A87-27984
 Trailing-edge separation/stall alleviation p 347 A87-31196
 Supersonic inviscid-flow - A three-dimensional characteristics approach p 408 A87-32115
 Advanced method for computing flow around wings with rear separation and ground effect p 410 A87-33246
 Fast time marching approach to cascade transonic flow p 412 A87-34042
 Finite volume step method for inviscid and viscous supersonic flows [DGLR PAPER 86-162] p 486 A87-36790
 Numerical simulation of an inviscid supersonic flow past a sphere by a self adjusting hybrid scheme for shock capturing p 488 A87-37211
 A mutually profitable alliance - Asymptotic expansions and numerical computations --- in fluid mechanics p 533 A87-37215
 A vertex based multigrid algorithm for three dimensional compressible flow calculations p 489 A87-38493
 Euler analysis of transonic propeller flows p 553 A87-39813
 Aspects of unsteady transonic flow p 554 A87-40083
 Improving the accuracy and cutting the time required in numerical investigation of transonic flow of gas in turbomachine cascades p 554 A87-40871
 Grid generation and inviscid flow computation about cranked-winged airplane geometries [AIAA PAPER 87-1125] p 558 A87-42074
 A simultaneous viscous-inviscid interaction calculation procedure for transonic turbulent flows [AIAA PAPER 87-1155] p 559 A87-42101

Accurate, efficient prediction method for supersonic/hypersonic inviscid flow [AIAA PAPER 87-1165] p 560 A87-42110
 Viscous-inviscid interactions in external aerodynamics p 626 A87-43299
 Unsteady viscous-inviscid interaction method and computation of buffeting over airfoils [ONERA, TP NO. 1987-58] p 640 A87-46759
 Application of a Fourier panel method to 3-D spoiler calculations [AIAA PAPER 87-2417] p 725 A87-49087
 Inviscid transonic wing design using inverse methods in curvilinear coordinates [AIAA PAPER 87-2551] p 727 A87-49103
 Computation of optimum turbofan mixing with a subaccurate varying specific heat solution p 830 A87-51808
 Viscous wing theory development. Volume 1: Analysis, method and results [NASA-CR-178156] p 12 N87-10043
 Application of a potential code to general steady flows in three dimensions p 50 N87-10262
 Large perturbation flow field analysis and simulation for supersonic inlets [NASA-CR-174676] p 14 N87-10835
 Viscous-inviscid interaction in transonic separated flow over solid and porous airfoils and cascades p 76 N87-12535
 Matching of viscous fluid and inviscid fluid by a finite element method [ESA-TT-866] p 392 N87-19668
 Numerical simulation of internal and external inviscid and viscous 3-D flow fields p 466 N87-20213
 Computation of three-dimensional flows by viscous-inviscid interaction using the MZM method p 466 N87-20223
 Fluid dynamics of high performance turbomachines [AD-A177003] p 469 N87-21341
 Numerical analysis of inviscid compressible flows about wing-fuselage combinations based on the Euler equations [NAL-TR-896T] p 491 N87-21868
 Computation of unsteady flows using the point vortex method p 536 N87-22138
 Progress in Viscous-Inviscid Solvers (VIS) p 537 N87-22152
 Experimental research on compressible turbulent shear layers, viscous-inviscid interactions, and flow separation [AD-A179579] p 541 N87-22928
 Viscid/inviscid separated flows [AD-A179858] p 699 N87-25536
 Calculation of viscous effects on transonic flow for oscillating airfoils and comparisons with experiment [NASA-TP-2731] p 734 N87-27622
 Viscous/inviscid interaction analysis of the aerodynamic performance of the NACA 65-213 airfoil [AD-A182091] p 735 N87-27634
 A contribution to the computation of unsteady, transonic, inviscid flow about a wing profile [ETN-87-90038] p 810 N87-28505
 Numerical calculation of unsteady inviscid rotational transonic flow past airfoils using Euler equations p 811 N87-28510
 An analysis of the crossover between local and massive separation on airfoils [NASA-CR-4096] p 814 N87-29411

IODINE
 Functionalization of cubane using hypervalent iodine p 606 N87-23807

IONOSPHERIC PROPAGATION
 Evaluation of GPS ionospheric time delay algorithm for single-frequency users p 580 A87-41378

IRON ALLOYS
 Testing of Fe-Cu-base ablative composites. II p 41 A87-12971
 The preparation and properties of vapor deposited Al-Cr-Fe alloys p 841 A87-51634

ISOLATION
 A vector-based failure detection and isolation algorithm for a dual fail-operational redundant strapdown inertial measurement unit [NASA-TM-100493] p 829 N87-29531

ISOLATORS
 Static calibration of the RSRA active-isolator rotor balance system [NASA-TM-88211] p 588 N87-24459

ISOPARAMETRIC FINITE ELEMENTS
 Natural frequency analysis of pretwisted plates p 46 A87-10900

ISOSTATIC PRESSURE
 Net shape technology in aerospace structures. Volume 3. Appendix. Emerging Net Shape Technologies. Presentations of a workshop held on March 27-29, 1985 in Santa Barbara, California [AD-A176510] p 406 N87-20959

ISOTHERMAL FLOW

Characterization and modeling of the high temperature flow behavior of aluminum alloy 2024 p 455 A87-32032

ISOTHERMAL PROCESSES

An experimental study of the nearly isothermal operating conditions of low-temperature heat pipes --- for avionics p 262 A87-20393
 The finite contour method --- for transient heat conduction in plate [AIAA PAPER 87-0148] p 270 A87-22442

ISOTROPIC MEDIA

Creep fatigue life prediction for engine hot section materials (isotropic) [NASA-CR-174844] p 327 N87-18117

ITERATION

Application of an implicit iteration difference scheme to the solution of nonstationary Navier-Stokes equations p 146 A87-17747
 Component mode iteration for frequency calculations --- in analysis of structural vibration [AIAA PAPER 86-1023] p 704 A87-43388
 Application of viscous-inviscid interaction methods to transonic turbulent flows [NASA-CR-179900] p 75 N87-11700
 Multidisciplinary systems optimization by linear decomposition p 136 N87-11740
 Transonic airfoil design based on the Navier-Stokes equations to attain arbitrarily specified pressure distribution: An iterative procedure [NAL-TR-901T] p 509 N87-21916

ITERATIVE SOLUTION

Iterative computation of transonic potential flow past aerofoils with boundary layer p 148 A87-18579
 Multigrid acceleration of the isentropic form of the compressible flow equations p 382 A87-28750
 Transonic airfoil design procedure utilizing a Navier-Stokes analysis code p 346 A87-31151
 Full potential integral solution for transonic flows with and without embedded Euler domains [AIAA PAPER 87-1461] p 569 A87-42472
 A prescribed radial distribution circulation of a hovering rotor blade p 627 A87-43414
 A numerical study of flow in gas-turbine combustor [AIAA PAPER 87-2132] p 832 A87-53986
 PIAS: A program for an iterative aeroelastic solution p 97 N87-11725
 Transonic wing and airfoil design using inverse code WINDES p 174 N87-14275
 Full Approximative Scheme (FAS) multigrid employing Incomplete Lower Upper decomposition/Strongly Implicit Procedure (ILU/SIP) smoothing: A robust fast solver for 3D transonic potential flow [NLR-MP-85072-U] p 389 N87-18798
 A quasi three dimensional method for the calculation of transonic flows in turbomachines p 517 N87-21941
 Coupling iteration method linking aerodynamic fields with periodic dynamic fields [ONERA-RT-19/3239-RY-054-R] p 574 N87-24428
 The Aeronautical Research Institute (FFA) wing body 85 computer program. A panel method for determination of aerodynamic characteristics using direct block iteration solution techniques [FFA-TN-1986-28] p 642 N87-25298

J**J INTEGRAL**

Numerical analysis with generalized J-integral p 47 A87-11492

J-85 ENGINE

Integrated dynamic model of two-variable supersonic inlet-engine combination p 304 A87-25421
 J85 surge transient simulation p 675 A87-46240

JACKS (LIFTS)

Multivariable control of a twin lift helicopter system using the LQG/LTR design methodology --- Linear Quadratic Gaussian/Loop Transfer Recovery method p 110 A87-13419

JACOBI MATRIX METHOD

The Jacobi matrix technique in computational fluid dynamics p 796 N87-28348

JAGUAR AIRCRAFT

Improved combat performance using relaxed static stability and a spin prevention system (FBW Jaguar) p 523 N87-22674

JAMMING

Phased arrays for airborne ECM - The rest of the story p 355 A87-30118

JAPAN

Possible military applications of stratospheric airship discussed p 101 N87-12716

JAPANESE SPACECRAFT

Experimental mobile satellite system (EMSS) using ETS-V p 462 A87-32419

JET AIRCRAFT

- All-digital jets are taking off p 102 A87-14352
 Structural analysis of the controlled impact demonstration of a jet transport airplane p 430 A87-34512
 Soviets learn widebody lessons p 420 A87-34766
 Gulfstream Aerospace GIV - The maximum business jet p 742 A87-47249
 T-46A flight test results p 743 A87-47844
 Predictive compensation of visual system time delays [AIAA PAPER 87-2434] p 794 A87-49165
 A study of the flow field about an upper surface blown wing and its effects on longitudinal static stability of a small jet airplane p 11 N87-10009
 TSAR (Theater Simulation of Airbase Resources) database dictionary F-4E p 139 N87-13352
 Performance prediction of low volume airfield pavements [AD-A172270] p 193 N87-13454
 The handling qualities of a large jet transport aircraft in severe wind shear and turbulence p 192 N87-14353
 Variable cycle engine for high altitude aircraft [AD-D012522] p 251 N87-15972
 An analytical study of icing similitude for aircraft engine testing [AD-A173713] p 252 N87-15973
 Development of an advanced pitch active control system for a wide body jet aircraft [NASA-CR-172277] p 313 N87-17713
 Research and development of aircraft control actuation systems [AD-A177491] p 522 N87-21958
 DFVLR in-flight simulators ATTAS and ATTHES for flying qualities and flight control research p 602 N87-23657
 The computed gust response of an aircraft. The relative effect of various degrees of freedom [AD-A180968] p 775 N87-26916
 Jet transport flight operations using cockpit display of traffic information during instrument meteorological conditions: Simulation evaluation [NASA-TP-2567] p 819 N87-29469

Investigation of the vortex flap concept on a 75-deg sweep delta wing at supersonic speeds p 725 A87-49091
An experimental investigation of the insect shielding effectiveness of a Krueger flap/wing airfoil configuration [AIAA PAPER 87-2615] p 749 A87-49113
Leading- and trailing-edge flaps on a low Reynolds number airfoil p 808 A87-52886
Analysis of the vortical flow around a 60 deg Delta wing with vortex flap p 11 N87-10006
Stress analysis of Pathfinder-2 models [NASA-CR-172458] p 51 N87-11179
Investigation of leading-edge flap performance on delta and double-delta wings at supersonic speeds [NASA-TP-2656] p 417 N87-20233
Research on post-stall aerodynamics [AD-A177107] p 490 N87-21851
Subsonic wind-tunnel measurements of a slender wing-body configuration employing a vortex flap [NASA-TM-89101] p 642 N87-25295

LEADING EDGE THRUST

Wind tunnel test of the modified goldschmied model with propulsion and empennage: Analysis of test results [AD-A167360] p 13 N87-10045
Numerical methods and a computer program for subsonic and supersonic aerodynamic design and analysis of wings with attainable thrust considerations [NASA-CR-3808] p 3 N87-10829

LEADING EDGES

Impact resistant hybrid composite for aircraft leading edges p 24 A87-11848
Exploratory wind-tunnel investigation of the stability and control characteristics of advanced general aviation configurations [AIAA PAPER 86-2596] p 111 A87-14031
Wind-tunnel investigation of the OMAC canard configuration [AIAA PAPER 86-2608] p 69 A87-14038
Comment on 'Convergence characteristics of a vortex-lattice method for nonlinear configuration aerodynamics' p 146 A87-17818
Modelling of surface blowing from discrete slots as a mechanism for preventing ice accretion on aircraft surfaces p 239 A87-22365
Leading-edge vortex solutions with large total pressure losses [AIAA PAPER 87-0039] p 217 A87-22372
Numerical analysis of a NACA0012 airfoil with leading edge ice accretions [AIAA PAPER 87-0101] p 218 A87-22415
The control of vortical lift on delta wings by tangential leading edge blowing [AIAA PAPER 87-0158] p 220 A87-22450

An investigation of leading-edge vortices on delta wings with jet blowing [AIAA PAPER 87-0330] p 222 A87-22564

Leading edge vortex dynamics on a delta wing undergoing a wing rock motion [AIAA PAPER 87-0332] p 223 A87-22566
Analysis of flowfield on leading edge of transonic blade profile p 279 A87-23757
Experimental investigation on the composite cooling of a semicylinder leading edge p 386 A87-30718
A study of a circulation control airfoil with leading/trailing edge blowing [AIAA PAPER 87-0157] p 345 A87-31104

Methods for numerical simulation of leading edge vortex flow p 556 A87-41511
Comparison of measured and computed pitot pressures in a leading edge vortex from a delta wing p 556 A87-41512

Navier-Stokes computation of transonic vortices over a round leading edge delta wing p 562 A87-42326
Experimental study of the velocity field on a delta wing [AIAA PAPER 87-1231] p 563 A87-42328
Entrainment vortex of a leading-edge vortex p 641 A87-46777

An experimental investigation of delta wings with leading-edge vortex separation p 641 A87-46956
Experimental determination of position of vortex core at higher angle of attack in transonic-supersonic flow p 717 A87-47673

Quasi-transonic flow past delta wings p 718 A87-47747

A study of the leading edge vortex and tip vortex on prop-fan blades [ASME PAPER 87-GT-234] p 719 A87-48718

Three-dimensional incompressible Navier-Stokes simulations of slender-wing vortices [AIAA PAPER 87-2476] p 726 A87-49092
Effect of a round airfoil nose on leading-edge suction p 809 A87-53784

On the computation of transonic leading-edge vortices using the Euler equations p 809 A87-54361

An experimental study of the aerodynamics of a NACA 0012 airfoil with a simulated glaze ice accretion [NASA-CR-179897] p 75 N87-11701

PIAS: A program for an iterative aeroelastic solution p 97 N87-11725

Noise development in transonic flows at the impact of vortices on a profile leading edge [MPIS-5/1986] p 209 N87-14960

Geometries for roughness shapes in laminar flow [NASA-CASE-LAR-13255-1] p 291 N87-16793

Unitized high temperature probes [AD-D012508] p 324 N87-17020

LFC leading edge glove flight: Aircraft modification design, test article development and systems integration [NASA-CR-172136] p 275 N87-17658

Methods for numerical simulation of leading-edge vortex flow [NLR-MP-85052-U] p 349 N87-18545

Development of a device for controlling the leading edge vortices on a delta wing [AD-A175207] p 350 N87-19356

An investigation into the static pressure distribution and lift reduction over an aerofoil due to a forward spoiler [BU-346] p 350 N87-19366

The aerodynamic effects of a serrated strip near the leading edge of an airfoil [ETN-79480] p 418 N87-20248

Transonic compressor blade tip flow visualization on a water table [AD-A176592] p 468 N87-21265

An experimental and theoretical investigation of an air injection type anti-icing system for aircraft p 495 N87-21877

Shock waves losses analysis p 517 N87-21936

Evaluation of Navier-Stokes and Euler solutions for leading-edge separation vortices [NASA-TM-89458] p 570 N87-23584

Flight investigation of the effects of an outboard wing-leading-edge modification on stall/spin characteristics of a low-wing, single-engine, T-tail light airplane [NASA-TP-2691] p 585 N87-23614

Vortex interaction on a canard-wing configuration [AD-A179718] p 574 N87-24430

Influence of a heated leading edge on boundary layer growth, stability and transition [DE87-008516] p 700 N87-25538

Operational performance of vapor-screen systems for in-flight visualization of leading-edge vortices on the F-106B aircraft [NASA-TM-4004] p 732 N87-26877

Experimental study of shock wave interference heating on a cylindrical leading edge [NASA-TM-100484] p 789 N87-27154

Modeling of transient heat pipe operation [NASA-CR-180280] p 791 N87-27936

Effect of airfoil mean loading on high-frequency gust interaction noise p 811 N87-28513

Low-speed investigations of Apex fence and cavity flap concepts on a 60 degrees delta configuration [AD-A183138] p 816 N87-29425

The structure of leading edge vortex flows including vortex breakdown p 818 N87-29467

LEAKAGE

Test results for sawtooth-pattern damper seals - Leakage and rotordynamic coefficients [ASME PAPER 86-TRIB-21] p 200 A87-19530

Why accumulators? --- in aircraft hydraulic systems p 300 A87-27333

Evaluation of improved engine compartment overheat detection techniques [AD-A173960] p 235 N87-15950

Influence of disk leakage path on labyrinth seal inlet swirl ratio p 538 N87-22210

Development of gas-to-gas lift pad dynamic seals, volumes 1 and 2 [NASA-CR-179486] p 539 N87-22245

Portable fuel leak detector [AD-A180095] p 700 N87-25550

LEARNING THEORY
A dynamic model for airframe cost estimation [AD-A168842] p 65 N87-11687

LEAST SQUARES METHOD
Adaptive inverse control for rotorcraft vibration reduction [NASA-TM-86829] p 207 N87-14910

LEE WAVES
Study of lee-side flows over conically cambered delta wings at supersonic speeds, part 1 [NASA-TP-2660-PT-1] p 571 N87-23597

A review of aerospace and ground lightning threat characteristics and applications p 132 A87-15002

Summary of NASA storm hazards lightning research, 1980-1985 p 80 A87-15003

Interpretation of a class of in-flight lightning signatures p 81 A87-15005

State-of-the-art techniques for lightning susceptibility/vulnerability assessments p 126 A87-15006

Lightning strikes to aircraft of the German Federal Armed Forces p 81 A87-15008

Simulated lightning current tests on a Lynx helicopter p 95 A87-15011

Prediction of skin currents flowing on a Lynx helicopter due to a simulated lightning strike p 95 A87-15012

Spatial and temporal description of strikes to the FAA CV-580 aircraft p 81 A87-15013

Simultaneous airborne and ground measurement of low altitude cloud-to-ground lightning strike on CV-580 aircraft p 81 A87-15014

Comparison of electromagnetic measurements on an aircraft from direct lightning attachment and simulated nuclear electromagnetic pulse p 81 A87-15015

Analysis of the first milliseconds of aircraft lightning attachment p 81 A87-15016

Current levels and distributions on an aircraft during ground lightning simulation tests and in-flight lightning attachments p 82 A87-15017

Joint thunderstorm operations using the NASA F-106B and FAATC/AFWAL Convair 580 airplanes p 95 A87-15018

Experimental study of the interaction between an arc and an electrically floating structure p 126 A87-15023

Corona from simulated aircraft surfaces and their contribution to the triggered discharge p 82 A87-15024

Experimental calibration of an aircraft vector electric field meter system p 102 A87-15028

Lightning return stroke current computation p 126 A87-15029

Implementation of GEMACS for lightning interactions analysis --- general electromagnetic model for analysis of complex systems p 82 A87-15033

Comparison of absorption and radiation boundary conditions in a time-domain three-dimensional finite-difference code p 82 A87-15034

Minimum ignition levels of aircraft fuel constituents to lightning related ignition sources p 83 A87-15038

Storm structure during aircraft lightning strike events p 329 A87-25548

The mathematics of interaction between a lightning rod on earth and a step leader due to lightning p 329 A87-25994

Lightning protection activity in the development of a new helicopter p 654 A87-43471

Numerical simulation of cruiser on aircraft lightning p 646 A87-46317

Atmospheric electrical modeling in support of the NASA F106 Storm Hazards Project [NASA-CR-179801] p 132 N87-12082

Exterior electromagnetic response of NASA F-106 aircraft [AD-A171875] p 174 N87-13435

An experimental and theoretical study of nuclear-EMP (electromagnetic pulse)-type lightning simulators with combined peaking capacitor and crowbar [AD-A172648] p 267 N87-15407

Linear and nonlinear interpretation of the direct strike lightning response of the NASA F106B thunderstorm research aircraft [NASA-CR-3746] p 331 N87-18278

International Aerospace and Ground Conference on Lightning and Static Electricity held in Dayton, Ohio on 24-26 June 1986 [AD-A174859] p 394 N87-19856

WSUH-1D: Review of damage following lightning strike 30 November 1981 [RAE-TRANS-2103] p 432 N87-20262

Lightning strikes on aircraft. Exploitation of Landes (France)-Front '84 campaign and complementary development of airborne electrical sensors [ONERA-RF-91/7154-PY] p 470 N87-20706

New methods and results for quantification of lightning-aircraft electrostatics [NASA-TP-2737] p 492 N87-21871

Electromagnetic perturbations created onboard aircraft by direct or close lightning [ONERA-RF-15/7234-PY] p 577 N87-24441

Vector electric fields measured in a lightning environment [AD-A180012] p 577 N87-24442

Low altitude lightning attachment to an aircraft [AD-A183290] p 819 N87-29473

LIGHTNING SUPPRESSION

F-106 data summary and model results relative to threat criteria and protection design analysis p 81 A87-15004

Comparison of low level frequency domain lightning simulation test to pulse measurements --- on modified F-14A aircraft p 126 A87-15007

Zoning of aircraft for lightning attachment and current transfer p 94 A87-15009

Airworthiness considerations of lightning strike protection for helicopter digital engine controls p 105 A87-15010

Atmospheric Electricity Hazards Protection (AEHP) demonstration p 82 A87-15021

Aircraft lightning-induced transient test and protection comparison p 82 A87-15022

Basic principles for protecting aircraft against lightning strikes [ONERA, TP NO. 1986-174] p 233 A87-21073

The characterization of lightning - A step toward better protection of aircraft against lightning [ONERA, TP NO. 1986-177] p 233 A87-21076

Description of an aircraft lightning and simulated nuclear electromagnetic pulse (NEMP) threat based on experimental data p 420 A87-34569

International Aerospace and Ground Conference on Lightning and Static Electricity. Technical papers: The key to lightning technology, held in Orlando, Florida on 26-28 June 1984 [AD-A169867] p 235 N87-15192

LINE OF SIGHT

Evaluation of a pilot's line-of-sight using ultrasonic measurements p 756 A87-48922

LINE SPECTRA

Acta mechanica sinica (selected articles) [AD-A176240] p 418 N87-20246

LINEAR EQUATIONS

Aeroelastic control of oblique-wing aircraft p 108 A87-13341

Quasi-transonic flow past delta wings p 718 A87-47747

LINEAR QUADRATIC GAUSSIAN CONTROL

Linear-quadratic-Gaussian with loop-transfer recovery methodology for an unmanned aircraft [AIAA PAPER 85-1927] p 371 A87-28912

Application of multivariable control to the STOL and Maneuver Technology Demonstrator [AIAA PAPER 86-2403] p 751 A87-50487

Integral LQG controller design for a fighter aircraft [AIAA PAPER 87-2452] p 773 A87-50498

Multi-variable control concepts for turboshaft engines p 832 A87-53431

Sensitivity method for integrated structure/active control law design p 390 N87-18860

NYANS: A package for time varying control systems --- computer aided design [FOA-C-20642.2.1] p 858 N87-29174

LINEAR QUADRATIC REGULATOR

A general methodology for pole placement in linear quadratic regulator design of multivariable control systems [AIAA PAPER 87-2314] p 795 A87-50435

The application of quadratic optimal cooperative control synthesis to a CH-47 helicopter [NASA-TM-88353] p 313 N87-17715

LINEAR SYSTEMS

Aircraft flutter suppression via adaptive LQG control p 109 A87-13344

Order estimation of linear time invariant system p 394 A87-28351

Synthesis of time-invariant linear systems under determinate and random excitations --- for flight vehicle motion stability p 521 A87-39009

Nonlinear aeroelasticity - An overview p 608 A87-40060

Design methodology for robust stabilizing controllers p 596 A87-40860

Aeroelastic derivatives as a sensitivity analysis of nonlinear equations p 699 A87-46797

Notes regarding fundamental understandings of rotorcraft aeroelastic instability p 746 A87-48951

The design and analysis of simple low speed flap systems with the aid of linearized theory computer programs [NASA-CR-3913] p 812 N87-28522

LINEAR VIBRATION

Forced vibration of a stiff body in a viscous medium p 385 A87-30478

LINEARITY

Applicability of linearized-theory attached-flow methods to design and analysis of flap systems at low speeds for thin swept wings with sharp leading edges [NASA-TP-2653] p 230 N87-15174

The integral equation for the time dependent linearized potential flow over a wing [AD-A176684] p 490 N87-21850

LINEARIZATION

Equivalent linearization of a squeeze film damper p 198 A87-17965

Equivalent linearization of a nonlinear element with respect to subharmonic motions p 789 A87-49981

A linearized Euler analysis of unsteady flows in turbomachinery [NASA-CR-180987] p 542 N87-22948

LININGS

Liner cooling research at NASA Lewis Research Center --- for gas turbine combustion chambers [AIAA PAPER 87-1828] p 762 A87-50189

Turbine Engine Hot Section Technology, 1984 [NASA-CP-2339] p 52 N87-11180

Combustion overview p 43 N87-11181

Advanced composite combustor structural concepts program [NASA-CR-174733] p 458 N87-20387

LINKAGES

DVI in the military cockpit - A third hand for the combat pilot --- Direct Voice Input p 681 A87-46315

Helmet mounted displays for tactical aircraft p 755 A87-47112

Investigating aircraft handling qualities using a structural model of the human pilot [AIAA PAPER 87-2537] p 774 A87-50538

Problems associated with the integration of artificial intelligence into crew systems p 857 A87-53062

In real time with a pilot in the loop p 857 A87-53066

Application of artificial intelligence (AI) to aerospace manufacturing - A user perspective p 857 A87-53075

Extension and application of a procedure for damage assessment of aerospace structures [AD-A174035] p 396 N87-19004

A simulation evaluation of a pilot interface with an automatic terminal approach system [NASA-TP-2669] p 366 N87-19393

Integrating a head-up display with dome visual simulation technology [AD-A175222] p 366 N87-19394

Computer assisted arrival sequencing and scheduling with the COMPAS system p 502 N87-21897

Next generation of control techniques in advanced TMA p 502 N87-21898

Some experiences in integrating avionic systems on the civil flight deck p 511 N87-21902

The application of intelligent knowledge based systems to air traffic control p 503 N87-21904

Trends in ground-based and in-flight simulators for development applications p 600 N87-23645

Optimal cooperative control synthesis of active displays [NASA-CR-4058] p 705 N87-25807

Systems Testbed for Avionic Research (STAR) automation concept development [AD-A180658] p 757 N87-26907

Experimental investigation of the short-period requirements of MIL-F-8785C, volume 2 [AD-A181475] p 775 N87-26917

Investigation of air transportation technology at Princeton University, 1985 p 740 N87-27603

A multichannel model for the description of the pilot in the closed control system, for the evaluation of future aircraft guidance systems p 822 N87-28537

A flight evaluation of voice interaction as a component of an integrated helicopter avionics system [RAE-TM-FS(B)-637] p 829 N87-28547

Automation at the man-machine interface p 855 N87-29504

Closing the man-machine loop: On the use of physiological measures to affect computer-controlled devices p 855 N87-29507

Sophisticated integral control methods for use in flight p 856 N87-29510

MAN-COMPUTER INTERFACE Case study - Developing an operations concept for future air traffic control p 424 A87-33030

A hybrid nonlinear programming method for design optimization p 545 A87-35718

A test on the reliability and performance of the verbex series 4000 voice recognizer [AD-A169066] p 130 N87-12729

Digital Autonomous Terminal Access Communication (DATAC) system p 540 N87-22610

MANAGEMENT METHODS USAF test pilot school. Flying qualities textbook, volume 2, part 1 [AD-A170959] p 173 N87-13431

MANAGEMENT PLANNING

The F-16 - A model for maximum designed-in supportability [AIAA PAPER 86-2663] p 142 A87-17908

An examination of distributed planning in the world of air traffic control p 355 A87-28353

Capacity management of air traffic control computer systems p 395 A87-30274

Airline management prerogative in the deregulation era p 861 A87-52172

Engine-airframe integration for rotorcraft: System specifications and qualification p 27 N87-10074

MANAGEMENT SYSTEMS

Radar-supported traffic monitoring systems for maritime and air safety p 158 A87-16988

An assessment of artificial intelligence and expert systems technology for application to management of cockpit systems [AD-A175456] p 394 N87-19911

MANEUVERABILITY

Calculated performance, stability, and maneuverability of high speed tilting prop-rotor aircraft p 431 A87-34863

A computational method for stability and maneuverability of helicopter p 595 A87-39420

Calculated performance, stability, and maneuverability of high-speed tilting-prop-rotor aircraft p 651 A87-43408

Improved agility for modern fighter aircraft. II - Thrust vectoring engine nozzles p 673 A87-46181

Navy departure resistance and air combat maneuvering evaluation of the FA-18B airplane p 765 A87-47843

Thrust vectoring - Why and how? [DGLR PAPER 86-111] p 744 A87-48159

X-31 - Breaking the stall barrier p 744 A87-48366

Calculated performance, stability and maneuverability of high-speed tilting-prop-rotor aircraft [NASA-TM-88349] p 302 N87-17695

Development of a device for controlling the leading edge vortices on a delta wing [AD-A175207] p 350 N87-19356

Optimum aeroelastic characteristics for composite supermaneuverable aircraft [AD-A174785] p 362 N87-19377

Airworthiness and Flight Characteristics Test (A and FC) of the BHTI (Bell Helicopter Textron, Inc.) 214ST helicopter [AD-A175349] p 364 N87-19385

Research on post-stall aerodynamics [AD-A177107] p 490 N87-21851

Buffet onset measurements on an aircraft model at transonic Mach numbers [NAL-TM-AE-8602] p 490 N87-21861

Evaluation of the angle of attack limiter of the F-16 C/D aircraft [AD-A177941] p 585 N87-23612

A study of supermaneuver aerodynamics [AD-A181490] p 732 N87-26872

Flight evaluation of the UH-60A helicopter with the pitch bias actuator centered and electrically disconnected [AD-A183954] p 827 N87-29495

MANEUVERS

Subsonic maneuver capability of a supersonic cruise fighter wing concept [NASA-TP-2642] p 231 N87-15184

Flight characteristics test of the UH-60A with tail boom mounted strake [AD-A180791] p 751 N87-26898

Validation of the ARL (Aeronautical Research Laboratories) mathematical model of the Sea King Mk 50 helicopter [AD-A181314] p 752 N87-26901

Incompatibility of the M-1 maneuver with US Navy tactical aircraft oxygen systems [AD-A183731] p 856 N87-30072

MANIFOLDS (MATHEMATICS)

Robust nonlinear control for high angle of attack flight [AIAA PAPER 87-0346] p 597 A87-42649

MANUAL CONTROL

Reconnaissance interface - The near real time is now p 29 A87-10950

Pilot/vehicle analysis of the lateral/vertical control of a twin-lift helicopter configuration [AIAA PAPER 87-0345] p 253 A87-22571

Closed-loop pilot vehicle analysis of the approach and landing task p 444 A87-32233

J77 manual flight control functions [AIAA PAPER 87-2454] p 773 A87-50500

MANUFACTURING

The influence of aerospace developments upon developments in manufacturing p 1 A87-13002

Future developments and manufacturing at GAF p 2 A87-13013

Future developments and manufacturing at C.A.C. p 2 A87-13014

- Advanced manufacturing technology for structural aircraft/aerospace components p 123 A87-13074
Resin-hardener systems for resin transfer molding p 120 A87-13093
Use of filament winding in manufacturing high quality aerospace composite components p 123 A87-13164
Manufacturing applications of lasers; Proceedings of the Meeting, Los Angeles, CA, Jan. 23, 24, 1986 [SPIE-621] p 322 A87-26676
The global nature of the aircraft manufacturing industry p 402 A87-32936
Toward the factory of the future p 531 A87-35397
Economic manufacturing and inspection of the electron-beam-welded Tornado wing box p 324 A87-17055
Diffusion bonding in the manufacture of aircraft structure p 324 A87-17057
Net shape technology in aerospace structures. Volume 1 [AD-A176508] p 406 A87-20957
Net shape technology in aerospace structures. Volume 2. Appendix. Precision Forgings in Aerospace Structures. Presentations of a workshop held on December 3-5, 1984 in Oxnard, California [AD-A176509] p 406 A87-20958
Trial manufacture of NAL 0.1m x 0.1m transonic cryogenic wind tunnel [NAL-TR-910] p 526 A87-21969
A method for the manufacture of model helicopter rotor blades with torsional stiffness representative of full scale [RAE-TR-85094] p 752 A87-26904
The 1-(diorganooxy phosphonyl) methyl-2,4- and -2,6-diamino benzenes and their derivatives [NASA-CASE-ARC-11425-2] p 844 A87-28605
- MANY BODY PROBLEM**
Pulse control of flexible multibody systems p 382 A87-29268
- MAP MATCHING GUIDANCE**
Steering bit by bit --- with digital terrain map tested in AFTI-16 aircraft p 436 A87-31613
- MAPPING**
A review of microbursts and their analysis and detection with Doppler radar [AD-A170458] p 133 A87-13110
A coordinate conversion algorithm for multisensor data processing [AD-A176368] p 476 A87-21603
- MAPS**
A digital map set for the night attack aircraft p 177 A87-16729
An efficient data hierarchy for integrating background image information in an aircraft map system p 177 A87-16730
- MARAGING STEELS**
Inertia welding of nitralloy N and 18 nickel maraging 250 grade steels for utilization in the main rotor drive shaft for the AR-64 military helicopter program p 325 A87-17067
- MARANGONI CONVECTION**
Some results from parabolic flights --- on liquid-gas mixtures p 608 A87-39839
Improvement of flight hardware and isothermal Marangoni convection under micro-gravity conditions p 608 A87-39840
- MARECS MARITIME SATELLITES**
PRODAT system architecture --- communication network p 266 A87-15371
A conformal aircraft phased array antenna for airplane-satellite communication in the L band [DFVLR-FB-86-47] p 701 A87-26259
- MARINE ENVIRONMENTS**
Hot corrosion site environment in gas turbines p 830 A87-51353
- MARINE TECHNOLOGY**
Marinized Apache/An engineering challenge [AIAA PAPER 86-2676] p 164 A87-17917
Update on the U.S. Oceanic Display and Planning System p 425 A87-34900
Aerodynamics research and development at the Royal Aircraft Establishment (RAE), Farnborough in the United Kingdom [AD-A171837] p 258 A87-15982
Selection parameters for hydraulic system filters with a comparison of aircraft and marine applications [AD-A174045] p 389 A87-18825
- MARINE TRANSPORTATION**
ATS and VTS - Some observations towards a synthesis p 582 A87-41696
- MARITIME SATELLITES**
Aeronautical satellite communications over the Atlantic - A technical demonstration p 422 A87-31457
Experimental mobile satellite system (EMSS) using ETS-V p 462 A87-32419
- MARKETING**
Commuter, corporate and light aircraft - Analysis of international operations and markets [AIAA PAPER 86-2724] p 143 A87-17946
What's your heading? --- FAA analysis of general aviation aircraft sales decline p 143 A87-18643
Market supremacy through engineering automation p 395 A87-29596
Japan advances its aerospace timetable p 478 A87-31615
The market potential of future supersonic aircraft [SAE PAPER 861684] p 402 A87-32600
Time to reinvent the general aviation aircraft p 715 A87-50372
Unique research challenges for high-speed civil transports [NASA-TM-100490] p 740 A87-27651
- MARKOV PROCESSES**
Application of Markov models for RMA assessment --- Reliability, Maintainability and Availability p 128 A87-15435
An efficient decision-making-free filter for processes with abrupt changes p 136 A87-16189
- MARS LANDING**
The Mars airplane p 303 A87-17753
- MASS BALANCE**
Effectiveness of balancing flexible rotary compressor vanes on low-speed balancing machine p 592 A87-23580
- MASS DISTRIBUTION**
A higher order beam element for vibration of beams with discontinuities p 46 A87-10898
Design sensitivity analysis for an aeroelastic optimization of a helicopter blade [AIAA PAPER 87-0923] p 429 A87-33761
Accurate estimation of aircraft inertia characteristics from a single suspension experiment p 596 A87-41628
Concentrated mass effects on the flutter of a composite advanced turboprop model [NASA-TM-88854] p 130 A87-12017
Characterization and dynamical studies of polymers in dipolar (aprotic) liquids [AD-A169243] p 123 A87-12685
- MASS FLOW**
A supersonic jet in a chamber with a diaphragm p 808 A87-53520
Computational fluid dynamic studies of certain ducted bluff-body flowfields relevant to turbojet combustors. Volume 1: Time-dependent calculations with the k-epsilon turbulence model for an existing centerbody combustor [AD-A171434] p 131 A87-12816
- MASS FLOW RATE**
Results of wind tunnel tests on external combustion [ESA-TT-959] p 42 A87-10990
The effects of metallized fuel composition on the combustion characteristics of Solid Fuel Ramjets (SFRJ) [AD-A176744] p 515 A87-21922
- MATERIALS**
New materials in gas turbine technology p 41 A87-13009
Structural design with new materials p 49 A87-13011
- MATERIALS HANDLING**
Multivariable control of a twin lift helicopter system using the LQG/LTR design methodology --- Linear Quadratic Gaussian/Loop Transfer Recovery method p 110 A87-13419
- MATERIALS SCIENCE**
Progress in advanced materials and processes: Durability, reliability and quality control: Proceedings of the Sixth International European SAMPE Conference, Scheveningen, Netherlands, May 28-30, 1985 p 39 A87-12651
Analytical-experimental determination of the long-term strength of gas-turbine-engine materials following technological treatments p 455 A87-31736
Advances in superplastic materials p 456 A87-33269
State-of-art and prospect for materials and hot working technology for gas turbine disk p 780 A87-47681
- MATERIALS TESTS**
7050 aluminum rivets for military aircraft p 124 A87-13173
Testing of fiber-reinforced construction elements - Simulation of mechanical loads and environmental influences p 92 A87-14012
Results of research on materials and construction methods by the DFVLR p 64 A87-14015
Fire safety aspects for construction of civil aircraft p 575 A87-42682
- MATHEMATICAL MODELS**
Modeling and analysis of the dynamics of a drill penetrating a thin plate [ASME PAPER 86-WA/APM-33] p 46 A87-11112
Numerical simulation of viscous supersonic flow over a generic fighter configuration p 6 A87-11509
Improvement of mathematical models of helicopters by analytical presentation of nonlinear aerodynamics p 69 A87-13995
Analytical model for investigation of interior noise characteristics in aircraft with multiple propellers including synchrophasing p 94 A87-14925
The use of mathematical models in aerodynamics (The W. Rupert Turnbull Lecture) p 72 A87-15189
Rotor-fuselage coupling by impedance p 167 A87-19202
Mathematical modeling of the opening dynamics of an axisymmetric parachute p 212 A87-20412
Application of multiple objective optimization techniques to finite element model tuning p 266 A87-22819
Artificial dissipation models for the Euler equations p 278 A87-23656
A numerical simulation of the inviscid flow through a counterrotating propeller [ASME PAPER 86-GT-138] p 287 A87-25395
Evaluation of a stochastic initial fatigue quality model for fastener holes p 384 A87-30106
Automating the software development process p 470 A87-31453
Classification of mathematical models of gas turbine engines. I p 439 A87-31745
Supersonic flutter of aeroelastically tailored oblique wings [AIAA PAPER 87-0734] p 445 A87-33661
Structural dynamic modeling of advanced composite propellers by the finite element method [AIAA PAPER 87-0740] p 441 A87-33664
New concepts concerning ILS siting p 497 A87-35558
Analytical and experimental investigation of mistuning in propfan flutter [AIAA PAPER 87-0739] p 609 A87-40496
Analytical flutter investigation of a composite propfan model [AIAA PAPER 87-0738] p 609 A87-40497
Computational Fluid Dynamics in West Germany [AIAA PAPER 87-1130] p 617 A87-42079
A mathematical model of processes in a multiple discrete aircraft stabilization system p 596 A87-42127
Classification of mathematical models of gas turbine engines. II p 591 A87-42153
Rotor icing research at RAE Farnborough p 646 A87-44706
The integration of a six axis motion system and a wide angle visual system inside a dome p 684 A87-44720
Simulations of ramjet combustor flow fields. I - Numerical model, large-scale and mean motions [AIAA PAPER 87-1421] p 633 A87-44949
Tip clearance flows. I - Experimental investigation of an isolated rotor. II - Study of various models and comparison with test results p 638 A87-46208
A study on the effect of non-dimensional system parameters on squeeze film damper performance using experimental data p 698 A87-46229
Detailed random vibrations model and numerical resolution for an airfoil [ONERA, TP NO. 1987-73] p 681 A87-46767
Numerical simulation of flows in axial and radial turbomachines using Euler solvers [ONERA, TP NO. 1987-87] p 641 A87-46776
Pre- and post-flight-test models versus measured skyship-500 control responses [AIAA PAPER 87-2508] p 765 A87-48650
Further studies of helicopter rotor ice accretion and protection p 738 A87-48945
A review of mathematical modelling of aircraft cabin fires p 739 A87-50714
An approach to the numerical modeling of the dynamics of reacting gases in nozzles --- gasdynamic and chemical lasers p 847 A87-50872
Computational aerodynamics of supersonic lifting vehicles p 12 A87-10030
Numerical and experimental study of dynamics of two-dimensional body [ISAS-619] p 59 A87-10748
Correlation between flight simulation and processing of flight tests based on inertial measurements [NLR-MP-85058-U] p 28 A87-10863

[NASA-TM-89128] p 509 N87-21917
- Evaluation of numerator lead effects on aircraft handling qualities
[AD-A179388] p 523 N87-22687
- A structural model for composite rotor blades and lifting surfaces
p 784 N87-26989
- The effect of front-to-rear propeller spacing on the interaction noise of a model counterrotation propeller at cruise conditions
[NASA-TM-100121] p 798 N87-28396
- Real time simultaneous in-line wear and lubricant condition monitoring
[AD-A183286] p 852 N87-29842
- Modeling and computational algorithms for parameter estimation and optimal control of aeroelastic systems and large flexible structures
[AD-A183302] p 852 N87-29893

MODEMS

- EHF test modem/processor (ETM/P)
p 205 A87-16832

MODULARITY

- Modular simulation facility design p 257 A87-23066
- F-16 modular common inlet design concept
[AIAA PAPER 87-1748] p 666 A87-45181

MODULATION TRANSFER FUNCTION

- A technique for the objective measurement of MRTD --- Minimum Resolvable Temperature Difference
p 261 A87-19686

MODULUS OF ELASTICITY

- Aluminium-lithium alloys for helicopter structures
p 843 A87-53892
- Design study of advanced model support systems for the National Transonic Facility (NTF)
[NASA-CR-178214] p 453 N87-20297
- Pressuremeter moduli for airport pavement design and evaluation
[DOT/FAA/PM-87/10] p 839 N87-28572

MOIRE INTERFEROMETRY

- Residual stresses in 2024-T81 aluminum using caustics and moire interferometry p 843 A87-53785

MOISTURE CONTENT

- In-service environmental effects on carbon fibre composite material p 39 A87-12659
- Some effects of moisture on adhesive-bonded CFRP-CFRP joints p 129 A87-16160
- A thermal device for aircraft measurement of the solid water content of clouds p 246 A87-20951
- Results of icing flights in winter 1983/1984: Ice accretion thickness in correlation with cloud physical parameters, object and cloud parameters
[ESA-TT-969] p 176 N87-14324

MOISTURE RESISTANCE

- Moisture diffusion in graphite/bismalimide-modified-epoxy composite
IM6/5245C p 604 A87-40384

MOLDS

- Rotational molding of high temperature thermoplastics
p 199 A87-19219
- New methods and materials for molding and casting ice formations
[NASA-TM-100126] p 819 N87-29470

MOLECULAR ABSORPTION

- Vulnerability methodology and protective measures for aircraft fire and explosion hazards. Volume 3: On-Board Inert Gas Generator System (OBIGGS) studies. Part 1: OBIGGS ground performance tests
[AD-A167357] p 26 N87-10066

MOLECULAR BEAMS

- Molecular-beam study of the formation and properties of H₂O clusters p 528 A87-36644

MOLECULAR FLOW

- Molecular flow velocity using Doppler shifted Raman spectroscopy
[AIAA PAPER 87-1531] p 693 A87-43053

MOLECULAR INTERACTIONS

- Characterization and dynamical studies of polymers in dipolar (aprotic) liquids
[AD-A169243] p 123 N87-12685

MOMENTS

- Correlation of analytical calculations from GRASP (General Rotorcraft Aeromechanical Stability Program) with torsionally-soft rotor data
[AD-A178881] p 524 N87-22689

MOMENTS OF INERTIA

- A fully automatic mass properties machine
[SAWE PAPER 1723] p 525 A87-36294
- Accurate estimation of aircraft inertia characteristics from a single suspension experiment
p 596 A87-41628

MOMENTUM THEORY

- Investigating dynamic stall using a modified momentum-integral method
[AIAA PAPER 87-0431] p 225 A87-22626

- Investigation of helicopter twin-rotor characteristics
p 628 A87-43438

- Performance and noise analyses of advanced turbo-prop
p 760 A87-48914

- SIMPROP: A system for simple aerodynamic analysis of propellers in axial flow. Description of method and user's guide
[NLR-TR-84128-U] p 154 N87-14288

MOMENTUM TRANSFER

- Guidebook for analysis of tether applications
[NASA-CR-178904] p 38 N87-10169
- An experimental low Reynolds number comparison of a Wortmann FX67-K170 airfoil, a NACA 0012 airfoil and a NACA 64-210 airfoil in simulated heavy rain
[NASA-CR-181119] p 644 N87-25997

MONATOMIC GASES

- Flow of a monoatomic rarefied gas around a rotating circular cylinder p 803 A87-50880

MONITORS

- Helicopter rotor head condition monitoring
p 713 A87-48941
- Development of a takeoff performance monitoring system
[AIAA PAPER 86-2145] p 828 A87-52962
- A study to monitor microseismic activity to detect sinkholes
[DOT/FAA/PM-86/34] p 204 N87-14792
- Small, self-contained aircraft fatigue data recorder
[AD-A172400] p 243 N87-15207
- Data evaluation and technique development for analysis of JP-5 fuels
[DE87-002025] p 380 N87-19534
- Development of a takeoff performance monitoring system
[NASA-CR-178255] p 437 N87-20264

MONOCOQUE STRUCTURES

- Monocoque, sandwich, and composite aerospace structures --- Book p 199 A87-18562

MONOPLANES

- Calculating the aerodynamic loads and moments on airplane wings: Cantilever monoplanes --- Book
p 279 A87-24647

MONOPOLE ANTENNAS

- Monopole element at the center of a circular groundplane of arbitrary radius. Volume 2: Appendices
[AD-A171228] p 200 N87-13616

MONOPULSE RADAR

- RSM-870 - An autonomous Mode-S compatible SSR beacon
p 295 A87-24172
- Availability and maintainability of the RAMP monopulse SSR systems
p 497 A87-35557
- Monopulse secondary radar: Practical realization and achievement. Mode S: The radar of tomorrow
p 535 N87-21889

MONTE CARLO METHOD

- Acoustic fatigue - A Monte Carlo approach
[AIAA PAPER 87-0916] p 465 A87-33722
- Radar target identification techniques applied to a polarization diverse aircraft data base
[AD-A180044] p 614 N87-24599
- Dual adaptive control: Design principles and applications
[NASA-CR-181050] p 705 N87-25804

MOORING

- Nonlinear dynamic simulation of a moored aerostat
[AIAA PAPER 87-2505] p 736 A87-48648

MORPHOLOGY

- The effect of fibre characteristics on the morphology and performance of semi-crystalline thermoplastic composites p 378 A87-28140

MOTION

- Sources and observers in motion. II - Acoustic radiation from a small rigid body in arbitrary motion. III - Acoustic radiation from non-compact rigid bodies moving at high speed
p 59 A87-12995

MOTION PERCEPTION

- Some fundamentals of simulator cockpit motion generation
p 683 A87-44714
- Development of simulated directional audio for cockpit applications
[AD-A175350] p 391 N87-19570
- An experimental study on the threshold of roll perception
[NAL-TR-905] p 526 N87-21968
- Simulator motion characteristics and perceptual fidelity
p 600 N87-23639

MOTION SICKNESS

- Assessing the benefits and costs of motion for C-17 flight simulators: Technical appendixes
[AD-A174745] p 377 N87-19410

MOTION SIMULATION

- Determining the kinematic parameters of a moving imaging sensor by processing spatial and temporal intensity changes p 187 A87-17433

- Exploratory evaluation of a moving-model technique for measurement of dynamic ground effects

- [AIAA PAPER 87-1924] p 685 A87-45303
- Operating experience of a small six axis motion system inside a dome with a wide angle visual system
[AIAA PAPER 87-2437] p 778 A87-49168
- Simulating the helicopter-ship interface as an alternative to current methods of determining the safe operating envelopes
[AD-A175911] p 364 N87-19388
- Simulation of aircraft behaviour on and close to the ground: Summary of AGARD-Ic6)ograph AG-285
p 600 N87-23640

Unusual airborne simulator applications

- p 602 N87-23656
- Collected flight and simulation comparisons and considerations p 602 N87-23660

MOTION SIMULATORS

- Design study for a high-accuracy three-axis test table
p 375 A87-28915
- Design of motion simulation software with digital filtering techniques p 704 A87-44712
- Motion software for a research flight simulator
p 704 A87-44713
- Some fundamentals of simulator cockpit motion generation p 683 A87-44714
- The integration of a six axis motion system and a wide angle visual system inside a dome p 684 A87-44720
- Implementation of turbulence models into simulators
p 527 N87-22354

Flight Simulation

- [AGARD-CP-408] p 599 N87-23633
- Visual and motion cueing in helicopter simulation
p 599 N87-23634
- The application of optimal control techniques to the UTIAS research simulator p 599 N87-23637
- Piloted simulation in the development of the XV-15 tilt rotor research aircraft p 600 N87-23646

MOTION STABILITY

- Application of time-domain unsteady aerodynamics to rotary-wing aeroelasticity p 94 A87-14103
- Dynamics of full annular rotor rub
[AD-A173311] p 327 N87-18098

MOUNTING

- Airfoil flutter model suspension system
[NASA-CASE-LAR-13522-1-SB] p 687 N87-25334
- Drag measurements of blunt stores tangentially mounted on a flat plate at supersonic speeds
[NASA-TP-2742] p 734 N87-27626

MOVING TARGET INDICATORS

- Novel accuracy and resolution algorithms for the third generation MTD p 160 A87-19408
- A practical example of Moving Target Detection (MTD) processing for an air traffic control radar with weather channel p 535 N87-21890

MRCIA AIRCRAFT

- Ground and flight tests of Tornado reconnaissance pod p 22 A87-10940
- The V-22 tilt-rotor large-scale rotor performance/wing download test and comparison with theory
p 297 A87-25026
- Economical manufacturing and inspection of the electron-beam-welded Tornado wing box
p 324 N87-17055

MTBF

- Fault-tolerant C31 system A(0), A(1), MTBF allocations
p 86 A87-15427
- A customer's perspective of integrated CNI avionics
p 434 A87-31459
- Reliability, 'better than the best' p 699 A87-46728
- Equipment reliability real and perceived --- environmental factors affecting avionics MTBF
[SAE PAPER 871038] p 788 A87-48765

MULTIPISE FLOW

- A study on the axially curved mixed-flow vaneless diffusers p 47 A87-11481
- Three-dimensional flow effects in a two-dimensional supersonic air intake p 279 A87-24009
- Modeling of large-scale mixing processes in an expanding supersonic jet p 485 A87-36093

MULTIPLEXING

- Passive fiber-optic coherence multiplexing for aircraft sensors p 459 A87-31506
- Flight instrumentation telemetry for aerospace application p 498 A87-37406
- Flight test and evaluation of a prototype airborne video and pulse code modulation multiplexing system
p 756 A87-49205
- A digital simulation of the failure performance of a multiplex actuator --- aircraft control
[BU-337] p 375 N87-19407

NOISE MEASUREMENT

Calculation of the statistical characteristics of high-intensity diffracted acoustic noise

p 548 A87-35770

The role of helicopter noise-induced vibration and rattle in human response

p 549 A87-38106

Sound intensity measurements inside aircraft

p 745 A87-48913

Effects of background noise on total noise annoyance [NASA-TP-2630]

p 208 N87-14120

Noise levels from urban helicopter operations, New Orleans, Louisiana

p 273 N87-16590

Cumulative airport noise exposure metrics: An assessment of evidence for time-of-day weightings

p 393 N87-19815

NOISE MEASUREMENT

Realization of an airport noise monitoring system for determining the traffic flow in the surroundings of a military airbase

p 329 A87-27108

Prediction of aircraft noise around airports by a simulation procedure

p 334 A87-27109

Jackson Hole Airport - A case study of dual noise metrics in the airport noise control plan

p 330 A87-27116

A mobile aircraft flyover noise data acquisition and analysis system for the calculation of reference noise metrics

p 334 A87-27119

An alternative intensity technique for transmission loss measurements of light-weight structures

p 334 A87-27121

A directional array approach for the measurement of rotor noise source distributions with controlled spatial resolution

p 344 A87-29859

Application of low-power, high-rate PCM telemetry in a helicopter instrumentation system

p 356 A87-31100

Measured noise of a scale model high speed propeller at simulated takeoff/approach conditions

p 397 A87-31109

Measured sound levels of the Raisbeck quiet turbofan propellers on medium-twin aircraft

p 796 A87-48762

Sound intensity measurements inside aircraft

p 745 A87-48913

Community reactions to helicopter noise - Results from an experimental study

p 853 A87-52064

Acoustic mode measurements in the inlet of a turbofan engine

p 859 A87-52877

Detection of in-flight propeller-induced structure-borne noise

p 838 A87-53779

Aircraft noise measurement: The 1.2 metre microphone height saga

p 60 N87-11578

Introduction to helicopter noise

p 139 N87-12327

United Kingdom aircraft noise index study: Main report

p 203 N87-14780

Noise certification and noise sensitivity studies on the BO-105 helicopter

p 209 N87-14958

Measured noise of a scale model high speed propeller at simulated takeoff/approach conditions

p 272 N87-16588

Identification and proposed control of helicopter transmission noise at the source

p 300 N87-16816

The influence of wind-tunnel walls on discrete frequency noise

p 315 N87-16850

Methods for designing treatments to reduce interior noise of predominant sources and paths in a single engine light aircraft

p 336 N87-18401

Propeller aircraft interior noise model: User's manual for computer program

p 336 N87-18402

Realization of an airport noise monitoring system for determining the traffic flow in the surroundings of a military airbase

p 377 N87-18580

Measurement of noise from airplanes traveling at 3500 to 11000 m altitude

p 708 N87-25824

A study of methods to predict and measure the transmission of sound through the walls of light aircraft

p 797 N87-27479

First article noise survey of the A/F32T-9 large turbo fan engine enclosed noise suppressor system, far-field noise, McConnell AFB, Kansas

p 860 N87-29308

Turbofan aft duct suppressor study. Contractor's data report of mode probe signal data

p 834 N87-29538

NOISE POLLUTION

Comparison of the effectiveness of measures of aircraft noise exposure by using social survey data

p 54 A87-10117

Inter-Noise 86 - Progress in noise control; Proceedings of the International Conference on Noise Control Engineering, Cambridge, MA, July 21-23, 1986. Volumes 1 & 2

p 333 A87-27101

Airport noise pollution and adverse health effects

p 330 A87-27111

How to limit the residential area affected by aircraft noise around an airport

p 330 A87-27113

An international study of the influence of residual noise on community disturbance due to aircraft noise

p 330 A87-27114

The need for a representative international noise standard --- for airports

p 330 A87-27115

Aircraft noise descriptor and its application

p 334 A87-27118

Low altitude aircraft tracking and registration system [DGLR PAPER 86-137]

p 498 A87-36780

Effects of background noise on total noise annoyance [NASA-TP-2630]

p 208 N87-14120

United Kingdom aircraft noise index study: Main report [DR-8402]

p 203 N87-14780

Noise disturbance at night near Heathrow and Gatwick airports: 1984 check study --- London airports

p 203 N87-14781

CEC joint study of community response to aircraft noise 1984: Main report. The influence of residual noise on disturbance from aircraft noise --- Commission of the European Communities (CEC)

p 203 N87-14782

First article noise survey of the A/F32T-9 large turbo fan engine enclosed noise suppressor system, far-field noise, McConnell AFB, Kansas

p 860 N87-29308

[AD-A182475]

NOISE PREDICTION

Inter-Noise 86 - Progress in noise control; Proceedings of the International Conference on Noise Control Engineering, Cambridge, MA, July 21-23, 1986. Volumes 1 & 2

p 333 A87-27101

Application of the Fast Field Program to outdoor sound propagation

p 334 A87-27103

A citizen acoustician's observations of aircraft noise

p 330 A87-27112

High-speed propeller noise predictions: Effects of boundary conditions used in blade loading calculations [NASA-TM-88913]

p 208 N87-14957

NASTRAN application for the prediction of aircraft interior noise

p 797 N87-27248

NOISE PREDICTION (AIRCRAFT)

Analyses of broadband noise mechanisms of rotors

p 58 A87-11769

The evolution of methods for noise prediction of high speed rotors and propellers in the time domain

p 58 A87-11770

Noise and performance of a counter-rotation propeller

p 105 A87-14366

Progress in tail rotor noise analysis

p 208 A87-19245

Helicopter impulsive noise - Theoretical and experimental status

p 271 A87-21195

High speed flight effects on noise propagation [AIAA PAPER 87-0013]

p 271 A87-22359

A prediction of helicopter rotor discrete frequency noise for three scale models using a new acoustics program [AIAA PAPER 87-0252]

p 272 A87-22512

A computational and experimental study of high-speed impulsive noise from a rotating cylinder

p 272 A87-22513

Prediction of added noise due to the effect of unsteady flow on pusher propellers

p 250 A87-22514

Comparisons of predicted propeller noise with windtunnel and flyover data

p 272 A87-22687

Validation of an interior noise prediction model for a composite cylinder

p 240 A87-22689

High-speed propeller noise predictions - Effects of boundary conditions used in blade loading calculations [AIAA PAPER 87-0525]

p 333 A87-24978

An Euler code calculation of blade-vortex interaction noise

p 333 A87-25316

Propeller aircraft noise legislation - A comprehensive review

p 336 A87-25926

A prediction model for airport ground noise propagation

p 334 A87-27104

Prediction of aircraft noise around airports by a simulation procedure

p 334 A87-27109

Effects of weather conditions on airport noise prediction

p 334 A87-27110

Aircraft noise descriptor and its application

p 334 A87-27118

Prediction of light aircraft interior sound pressure level from the measured sound power flowing in to the cabin

p 299 A87-27120

Comments on the aeroacoustics of helicopter rotors

p 397 A87-31141

Significance of unsteady thickness noise sources

p 619 A87-39537

Non-linear propagation of broadband noise signals

p 619 A87-41560

Importance of broadband noise for advanced turboprops

p 620 A87-41631

Investigation of the aerodynamic performance and noise characteristics of a 1/5th scale model of the Dowty Rotol R212 propeller

p 640 A87-46265

Supersonic rotor noise calculation with sonic boom prediction methods

p 860 A87-53903

Prediction of helicopter rotor discrete frequency noise: A computer program incorporating realistic blade motions and advanced acoustic formulation

p 59 N87-10750

[NASA-TM-87721]

Propeller aircraft interior noise model utilization study and validation

p 60 N87-11576

Separation of airborne and structureborne noise radiated by plates constructed of conventional and composite materials with applications for prediction of interior noise paths in propeller driven aircraft

p 60 N87-11579

Methods for designing treatments to reduce interior noise of predominant sources and paths in a single engine light aircraft

p 336 N87-18401

Prediction of high-speed rotor noise with a Kirchhoff formula

p 549 N87-23250

Coupled aerodynamic and acoustical predictions for turboprops

p 571 N87-23598

Measurement of noise from airplanes traveling at 3500 to 11000 m altitude

p 708 N87-25824

Turbofan aft duct suppressor study. Contractor's data report of mode probe signal data

p 834 N87-29538

Turbofan aft duct suppressor study

p 834 N87-29539

Calculation of noise around airports for powered gliders

p 860 N87-30150

[VTH-LR-475]

NOISE PROPAGATION

Nonlinear acoustic propagation of broadband noise

p 58 A87-11773

Analytical model for investigation of interior noise characteristics in aircraft with multiple propellers including synchrophasing

p 94 A87-14925

High speed flight effects on noise propagation [AIAA PAPER 87-0013]

p 271 A87-22359

Collision of multiple supersonic jets related to pip noise generation in cage valve

p 286 A87-25280

A prediction model for airport ground noise propagation

p 334 A87-27104

Stochastic model theory of broadband shock associated noise from supersonic jets

p 859 A87-52069

Detection of in-flight propeller-induced structure-borne noise

p 838 A87-53779

The influence of wind-tunnel walls on discrete frequency noise

p 315 N87-16850

Noise propagation from a four-engine, propeller-driven airplane

Turbofan aft duct suppressor study

[NASA-CR-175067] p 834 N87-29539

NOISE SPECTRA

Application of the cepstrum to remove echoes from rotor acoustic spectra

p 208 A87-19243

Prediction of aircraft noise around airports by a simulation procedure

p 334 A87-27109

Spectra of noise and amplified turbulence emanating from shock-turbulence interaction

p 398 A87-31164

Calculation of the statistical characteristics of high-intensity diffracted acoustic noise

p 548 A87-35770

Combustion noise from gas turbine aircraft engines measurement of far-field levels

[NASA-TM-88971] p 335 N87-17480

The effect of front-to-rear propeller spacing on the interaction noise of a model counterrotation propeller at cruise conditions

[NASA-TM-100121] p 798 N87-28396

NOISE TOLERANCE

Reaction to aircraft noise in residential areas around Australian airports

p 54 A87-10116

A citizen acoustician's observations of aircraft noise

p 330 A87-27112

An international study of the influence of residual noise on community disturbance due to aircraft noise

p 330 A87-27114

Effects of background noise on total noise annoyance

[NASA-TP-2630] p 208 N87-14120

NOISEMAP 5.1 computer program update. Operator's manual, addendum 2

[AD-A177345] p 543 N87-22314

NONDESTRUCTIVE TESTS

A computer-aided nondestructive inspection system

p 44 A87-10720

Manufacturing technology for nondestructive evaluation (NDE) system to implement retirement for cause (RFC) procedures for gas turbine engine components

p 44 A87-10727

Evaluation of captured water column technology for advanced ultrasonic sizing techniques

p 45 A87-10728

RFC automated inspection overview --- eddy current and ultrasonic testing of gas turbine engine parts

p 45 A87-10730

Predictive models and reliability improvement in electromagnetic nondestructive evaluation

p 45 A87-10732

Quantitative thermal diffusivity measurements of composites

p 45 A87-10750

Nondestructive inspection of composite structures by low-velocity impact

p 45 A87-10765

Variations in ultrasonic backscatter attributed to porosity

p 45 A87-10768

Electromagnetic methods to detect corrosion in aircraft structures

p 45 A87-10791

Automated infrared inspection of jet engine turbine blades

p 125 A87-13719

Transient thermal technique for infrared non destructive testing of composite materials

p 261 A87-19689

Use of ultrasonic models in the design and validation of new NDE techniques

p 262 A87-20165

Monitoring the state of the blades of gas turbine engines by the acoustic emission method

p 262 A87-20346

Microfocus radiography of jet engines

p 321 A87-25822

NDT of jet engines - An industry survey, I

p 321 A87-25823

NDT of jet engines - An industry survey, II

p 383 A87-29617

NDT methods for bonded assemblies

p 461 A87-32202

Current capabilities of NDT - A service operator's view

p 462 A87-33173

Proceedings of a Structural Mechanics Colloquium of Nondestructive Testing of Fiber Reinforced Structures --- aircraft structures

[DFVLR-MITT-86-09] p 196 N87-14437

Nondestructive tests of Carbon Fiber Reinforced Plastics (CFRP) in the framework of damage mechanics investigations

p 196 N87-14438

NDT of electron beam welded joints (micro-focus and real time X-ray)

p 325 N87-17063

Performance of cracked and seated rigid airport pavements

[DOT/FAA/PM-87/4] p 526 N87-21965

Robots applied to nondestructive inspection (Project SIRO)

[ETN-87-99845] p 539 N87-22251

Preliminary investigation of the use of holographic interferometry to detect ill-fitting compressor blades

[AD-A178519] p 520 N87-22682

Low-cost FM oscillator for capacitance type of blade tip clearance measurement system

[NASA-TP-2746] p 594 N87-24481

Nondestructive tests of Carbon Fiber Reinforced Plastics (CFRP) in the framework of damage mechanics investigations

[DFVLR-MITT-86-09] p 851 N87-28923

NONEQUILIBRIUM FLOW

A survey of simulation and diagnostic techniques for hypersonic nonequilibrium flows

[AIAA PAPER 87-0406] p 320 A87-24958

Numerical method for non-equilibrium hypersonic boundary layers

[AIAA PAPER 87-0516] p 284 A87-24976

Nonstationary and nonequilibrium air flow in the vicinity of the critical flow line

p 407 A87-31717

An approach to the numerical modeling of the dynamics of reacting gases in nozzles --- gasdynamic and chemical lasers

p 847 A87-50872

NONISOTHERMAL PROCESSES

The effect of the surface nonisothermality of a thin profile on the stability of a laminar boundary layer

p 285 A87-25227

NONLINEAR EQUATIONS

An analytical parametric investigation of numerical nonlinear vortex-lattice methods

p 67 A87-13638

Nonlinear flying qualities - One approach

[AIAA PAPER 87-0347] p 253 A87-22572

Non-linear equation of motion of fibre reinforced composite rotor blades

p 531 A87-35657

Bifurcations in unsteady aerodynamics

p 554 A87-40085

An advanced mathematical model for helicopter flight simulation using nonlinear unsteady aerodynamics

p 679 A87-43435

Aeroelastic derivatives as a sensitivity analysis of nonlinear equations

p 699 A87-46797

NONLINEAR FILTERS

An efficient decision-making-free filter for processes with abrupt changes

p 136 A87-16189

Analytical redundancy through nonlinear observers --- of aircraft motion

p 114 A87-16197

A nonlinear tracker using attitude measurements

p 496 A87-35337

Non-linear identification of a squeeze-film damper

p 538 N87-22213

NONLINEAR PROGRAMMING

Nonlinear programming extensions to rational function approximations of unsteady aerodynamics

[AIAA PAPER 87-0854] p 412 A87-33694

A hybrid nonlinear programming method for design optimization

p 545 A87-35718

NONLINEAR SYSTEMS

Non-linear stability analysis of aircraft at high angles of attack

p 36 A87-12082

Bank-to-turn utilizing sampled data non-linear control

p 109 A87-13346

Flight control design using nonlinear inverse dynamics

p 109 A87-13352

Improvement of mathematical models of helicopters by analytical presentation of nonlinear aerodynamics

p 69 A87-13995

Special opportunities in helicopter aerodynamics

p 74 A87-15469

Nonlinear acoustics - Achievements, prospects, problems

p 138 A87-15582

Parametric identification of discontinuous nonlinearities

p 135 A87-16179

Maximum likelihood estimation of parameters in nonlinear flight mechanics systems

p 113 A87-16192

Comparison of two techniques of I.F.D. based on a non-linear stochastic model of an aircraft --- Instrument Fault Detection

p 114 A87-16196

Determination of nonlinear aerodynamic coefficients using the estimation-before-modeling methods

p 114 A87-16202

A decentralized approach to integrated flight control synthesis

p 372 A87-29249

Stochastic response of nonlinear structures with parameter random fluctuations

p 385 A87-30297

Effect of geometric elastic non-linearities on the impact response of flexible multi-body systems

p 462 A87-32917

Experimental investigation of structural autoparametric interaction under random excitation

[AIAA PAPER 87-0779] p 464 A87-33675

The application of transient aerodynamics to the structural nonlinear flutter problem

[AIAA PAPER 87-0908] p 447 A87-33717

A procedure for simultaneously stabilizing a collection of single input linear systems using non-linear state feedback control

p 546 A87-36843

Nonlinear aeroelasticity - An overview

p 608 A87-40060

An approximate analysis of the accuracy of the optimal discrete control of nonlinear stochastic systems using the method of semiinvariants

p 619 A87-42138

Robust nonlinear control for high angle of attack flight

[AIAA PAPER 87-0346] p 597 A87-42649

Influence of third-degree geometric nonlinearities on the vibration and stability of pretwisted, precone, rotating blades

p 674 A87-46228

- Nonlinear simulation of a flexible aircraft in maneuvering flight
[AIAA PAPER 87-2501] p 767 A87-49172
- Equivalent linearization of a nonlinear element with respect to subharmonic motions p 789 A87-49981
- Application of bifurcation and catastrophe theories to near stall flight mechanics
[AD-A17697] p 13 N87-10046
- Design sensitivity analysis of nonlinear structural response p 390 N87-18863
- Design and verification by nonlinear simulation of a Mach-CAS control law for the NASA TCV B737 aircraft [NASA-CR-178029] p 449 N87-20290
- Non-linear performance of a three-bearing rotor incorporating a squeeze-film damper p 539 N87-22217
- Analysis of structures with rotating, flexible substructures
[AD-A178903] p 542 N87-23004
- On the nonlinear aerodynamic and stability characteristics of a generic chine-forebody slender-wing fighter configuration
[NASA-TM-89447] p 643 N87-25305
- Application of GRASP (General Rotorcraft Aeromechanical Stability Program) to nonlinear analysis of a cantilever beam
[NASA-TM-89222] p 754 N87-27660
- Two-degree-of-freedom subsonic wing rock and nonlinear aerodynamic interference p 811 N87-28511

NONLINEARITY

- Influence of third-degree geometric nonlinearities on the vibration and stability of pretwisted, precone, rotating blades p 674 A87-46228
- Evaluation of a nonlinear parameter extraction mathematical model including the term $C(\text{subm}(\text{sub} \Delta e \text{ squared}))$
[NASA-TM-87731] p 116 N87-12566
- Nonlinear dynamic response of composite rotor blades
[AD-A173069] p 176 N87-14321
- Nonlinear potential analysis techniques for supersonic aerodynamic design
[NASA-CR-172507] p 293 N87-17670
- Development of control strategies for safe microburst penetration: A progress report p 353 N87-18531

NONUNIFORM FLOW

- Numerical and experimental investigation of a propeller flowfield with a 3-D non-uniform inflow
[AIAA PAPER 87-0607] p 228 A87-22735
- Hypersonic nonuniform flow of a viscous gas past a blunt body p 407 A87-31713
- Interaction of bodies with a nonuniform supersonic flow p 804 A87-51663
- TRANDESINF: A computer program for transonic airfoil design and analysis in nonuniform flow
[NASA-CR-4044] p 231 N87-15186
- Analysis and design of airfoils and axisymmetric bodies in transonic nonuniform flow p 811 N87-28509

NORTHROP AIRCRAFT

- The KS-147A LOROP camera system p 28 A87-10934
- Integration of the KS-147A LOROP into the RF-5E p 28 A87-10935
- Operational usage of the KS-147A (LOROP) in the RF-5E p 29 A87-10936

NOSE CONES

- Interaction of jet in hypersonic cross stream
[AIAA PAPER 87-0055] p 217 A87-22385
- Direct simulation of aerothermal loads for an aeroassist flight experiment vehicle
[AIAA PAPER 87-1546] p 626 A87-43063
- Boundary layer separation and the vortex structures around an inclined body of revolution
[AIAA PAPER 87-2276] p 722 A87-49058

NOSE TIPS

- Implicit finite-difference simulation of separated hypersonic flow over an indented nosetip p 7 A87-11533

NOSE WHEELS

- The equivalent masses at nose landing-gears during landing-impacts and when taxiing over runway perturbations p 88 A87-13637

- Flow rate and trajectory of water spray produced by an aircraft tire
[SAE PAPER 861626] p 451 A87-32582

NOSES (FOREBODIES)

- The rotating nose method for controlling asymmetric forces at high angle of attack p 311 A87-24722
- A study of supersonic three-dimensional flow past pointed axisymmetric bodies p 286 A87-25232

NOTCH TESTS

- An assessment of the small-crack effect for 2024-T3 aluminum alloy p 457 A87-34668
- Non-isothermal fatigue crack growth in Hastelloy-X p 840 A87-51400

NOWCASTING

- Nowcasting low-altitude wind shear with a Doppler radar
[AIAA PAPER 87-0642] p 269 A87-22753
- Structure of the time variability of the meteorological visibility range at Tolmachevo Airport p 329 A87-25258

NOZZLE DESIGN

- Performance and optimisation of an airblast nozzle - Drop size distribution and volumetric air flow p 125 A87-13828
- Prediction of velocity coefficient and spray cone angle for simplex swirl atomizers p 125 A87-13830
- Film cooling requirements in 2-D converging/diverging vectoring/reversing nozzles p 441 A87-35021
- Aerodynamic design modification of a hypersonic wind tunnel nozzle by CSCM with high order accuracy --- Conservative Supra-Characteristics Method
[AIAA PAPER 87-1896] p 635 A87-45284
- Application of ceramics to ramjet engine nozzles p 690 A87-46221
- A Navier-Stokes nozzle analysis technique p 758 A87-47084
- Propulsion system technologies for thrust vectoring p 519 N87-22670
- Passive shear-flow control to minimize ramjet combustion instabilities p 605 N87-23798
- Vortex-nozzle interactions in ramjet combustors p 612 N87-23800
- Free-jet investigation of mechanically suppressed, high radius ratio coannular plug model nozzles
[NASA-CR-3596] p 860 N87-29315

NOZZLE FLOW

- Density field of a viscous gas jet issuing from a conical nozzle into vacuum p 4 A87-10603
- Vortex simulation of propagating stall in a linear cascade of airfoils p 5 A87-11117
- Finite element computations for high speed 3D inviscid flows p 7 A87-11542
- Effect of two endwall contours on the performance of an annular nozzle cascade p 71 A87-14119
- Study of a bounded jet flow considering the initial turbulence. II - In the case of relatively large nozzle aspect ratio p 71 A87-14263
- A study of local heat transfer on the face surface of a nozzle ring model p 127 A87-15215
- A comparison between the integral characteristics and the shape of the profiled contours of Laval nozzles with gradual and abrupt convergence p 145 A87-17590
- A modular approach to the solution of a class of problems in internal gas dynamics p 146 A87-17749
- The validation of solution methods for the Navier-Stokes equations for a compressible fluid - Results of the 'GAMM-Workshop' in Nice
[ONERA, TP NO. 1986-184] p 215 A87-21083
- Fuel nozzle air flow modeling p 264 A87-21520

NOZZLE INSERTS

- Application of ceramics to ramjet engine nozzles p 690 A87-46221

NOZZLE THRUST COEFFICIENTS

- Secondary stream and excitation effects on two-dimensional nozzle plume characteristics
[AIAA PAPER 87-2112] p 637 A87-45414
- Transonic vibration induced by mismatching between engine and thrust nozzle p 762 A87-49985
- Secondary stream and excitation effects on two-dimensional nozzle plume characteristics
[NASA-TM-89813] p 349 N87-18539

NOZZLES

- An equation of state for the material of the nozzle vanes of a gas-turbine engine under thermal cycling in a sulfur-containing medium p 379 A87-29203
- Simulated flight acoustic investigation of treated ejector effectiveness on advanced mechanical suppressors for high velocity jet noise reduction
[NASA-CR-4019] p 335 N87-17481
- Effects of afterbody boattail design and empennage arrangement on aeropropulsive characteristics of a twin-engine fighter model at transonic speeds
[NASA-TP-2704] p 492 N87-21873

NUCLEAR EXPLOSIONS

- Nuclear hardness simulation and analysis of composite aircraft structures. Volume 2: Dust erosion assessment
[AD-A174893] p 363 N87-19378

NUCLEAR PROPULSION

- Alternatives for the propulsion of global range transport aircraft
[ETN-87-98978] p 371 N87-19399

NUCLEAR WARFARE

Description of an aircraft lightning and simulated nuclear electromagnetic pulse (NEMP) threat based on experimental data p 420 A87-34569

NUMERICAL ANALYSIS

Natural frequency analysis of compressor rotor blades p 34 A87-10899

Numerical analysis with generalized J-integral p 47 A87-11492

1986 American Control Conference, 5th, Seattle, WA, June 18-20, 1986, Proceedings. Volumes 1, 2, & 3 p 133 A87-13301

Comparison of numerical solutions of lower order and higher order integral equation methods for two-dimensional aerofoils [AIAA PAPER 86-2591] p 69 A87-14028

Numerical study of finite-rate supersonic combustion using parabolized equations [AIAA PAPER 87-0088] p 259 A87-22407

Numerical simulation of three-dimensional supersonic inlet flow fields [AIAA PAPER 87-0160] p 282 A87-24932

Numerical analysis of flow through scramjet engine inlets p 346 A87-31127

Spectra of noise and amplified turbulence emanating from shock-turbulence interaction p 398 A87-31164

Analysis of viscous transonic flow over airfoil sections [AIAA PAPER 87-0420] p 413 A87-34723

Numerical analysis of three-dimensional elastic membrane wings p 487 A87-37105

Evaluation of three numerical methods for propulsion integration studies on transonic transport configurations [AIAA PAPER 86-1814] p 554 A87-40273

Numerical simulation of transonic propeller flow using a three-dimensional small disturbance code employing novel helical coordinates [AIAA PAPER 87-1162] p 560 A87-42107

Bounded random oscillations - Model and numerical resolution for an airfoil [ONERA, TP NO. 1987-73] p 681 A87-46767

Notes regarding fundamental understandings of rotorcraft aeroelastic instability p 746 A87-48951

Numerical methods and a computer program for subsonic and supersonic aerodynamic design and analysis of wings with attainable thrust considerations [NASA-CR-3808] p 3 N87-10829

Numerical simulation of tip vortices of wings in subsonic and transonic flows [AD-A169116] p 77 N87-12544

A summary of the development of integral aerodynamic methods for the computation of rotor wake interactions [AD-A169254] p 77 N87-12545

Application of the AIPA (Approximate Iterative Preprocessing Algorithm) to F-106 data [AD-A169084] p 116 N87-12569

Monopole element at the center of a circular groundplane of arbitrary radius. Volume 2: Appendices [AD-A171228] p 200 N87-13616

Proceedings of the 3rd NAL Symposium on Aircraft Computational Aerodynamics [NAL-SP-5] p 152 N87-14247

Turbulence modeling for steady three-dimensional supersonic flows [AD-A170042] p 154 N87-14285

Analysis of viscous transonic flow over airfoil sections [NASA-TM-88912] p 323 N87-17001

Bounded random oscillations: Model and numerical solution for an airfoil p 294 N87-18513

Development of a ROT22 - DATAMAP interface [NASA-CR-177403] p 395 N87-18993

Numerical simulation of transonic propeller flow using a 3-dimensional small disturbance code employing novel helical coordinates [NASA-TM-89826] p 350 N87-19350

A numerical study of the Weis-Fogh mechanism p 414 N87-20197

Numerical study of combustion processes in afterburners p 458 N87-20269

Development of Digital Engine Control System for the Harrier II [AIAA PAPER 87-2184] p 673 A87-45458

Direct numerical control in grid generation p 207 N87-14270

Fault tolerant electrical power system. Phase 2: Analysis and preliminary design [AD-A177278] p 508 N87-21907

Acta aeronautica et astronautica sinica [AD-A179673] p 592 N87-23618

A rotorcraft flight/p propulsion control integration study [NASA-CR-179574] p 587 N87-24457

Dual adaptive control: Design principles and applications [NASA-CR-181050] p 705 N87-25804

NUMERICAL FLOW VISUALIZATION

Numerical investigation of supersonic flow past spike-tipped blunt bodies p 4 A87-10614

Mathematical modeling of separated flow past a wing profile and aerodynamic hysteresis p 5 A87-10619

Conference on Numerical Methods in Fluid Mechanics, 6th, Goettingen, West Germany, September 25-27, 1985, Proceedings p 47 A87-11501

Numerical experiments with a total variation diminishing (TVD) MacCormack scheme p 6 A87-11526

Efficient numerical method for transonic flow simulations p 6 A87-11528

An analytical parametric investigation of numerical nonlinear vortex-lattice methods p 67 A87-13638

Experimental and numerical investigation of supersonic turbulent flow through a square duct p 70 A87-14117

Numerical simulation of compressible flow around complex two-dimensional cavities [AIAA PAPER 87-0116] p 219 A87-22425

Flow simulations for a complex airplane configuration using Euler equations [AIAA PAPER 87-0454] p 225 A87-22646

On the numerical simulation of the unsteady wake behind an airfoil [AIAA PAPER 87-0190] p 282 A87-24934

Numerical simulation of viscous transonic airfoil flows [AIAA PAPER 87-0416] p 283 A87-24961

Numerical method for non-equilibrium hypersonic boundary layers [AIAA PAPER 87-0516] p 284 A87-24976

Numerical modeling of shock wave intersections p 286 A87-25233

Random vertex method and simulation of vortex structure behind a triangular prism p 289 A87-27486

Flow simulations for an aft-mounted propfan using Euler equations [SAE PAPER 861718] p 408 A87-32609

Numerical simulations of unsteady airfoil-vortex interactions p 413 A87-34851

Numerical simulation of an inviscid supersonic flow past a sphere by a self adjusting hybrid scheme for shock capturing p 488 A87-37211

Accurate numerical solutions for transonic viscous flow over finite wings p 556 A87-41630

Direct simulation of high Reynolds number flows using a new integro-differential solver [AIAA PAPER 87-1175] p 561 A87-42119

Flow visualization of CFD using graphics workstations [AIAA PAPER 87-1180] p 618 A87-42123

Color graphics techniques for shaded surface displays of aerodynamic flowfield parameters [AIAA PAPER 87-1182] p 619 A87-42125

Three-dimensional unsteady Euler solutions for propfans and counter-rotating propfans in transonic flow [AIAA PAPER 87-1197] p 562 A87-42314

Computations of three-dimensional cavity flow at subsonic and supersonic Mach numbers [AIAA PAPER 87-1208] p 562 A87-42317

Numerical simulation of supersonic flow over a three-dimensional cavity [AIAA PAPER 87-1288] p 565 A87-42363

Vortex simulation of three-dimensional mixing layers [AIAA PAPER 87-1311] p 565 A87-42378

Numerical and experimental studies on choked underexpanded jets [AIAA PAPER 87-1378] p 567 A87-42423

Numerical calculation of flow about wing-fuselage combination on the basis of Euler equations p 569 A87-42622

Direct simulation of aerothermal loads for an aeroassist flight experiment vehicle [AIAA PAPER 87-1546] p 626 A87-43063

Numerical simulation and comparison with experiment for self-excited oscillations in a diffuser flow p 693 A87-43381

Simulations of ramjet combustor flow fields. II - Origin of pressure oscillations [AIAA PAPER 87-1422] p 633 A87-44950

The numerical simulation of subsonic flutter [AIAA PAPER 87-1428] p 633 A87-44952

Two-dimensional numerical analysis for inlets at subsonic through hypersonic speeds [AIAA PAPER 87-1751] p 634 A87-45184

Numerical simulation of transonic three-dimensional flows in turbine blade passages p 638 A87-46206

Flow phenomena in transonic turbine cascades detailed experimental and numerical investigation p 639 A87-46223

Numerical simulation of compressible viscous flows around practical aircraft configurations [AIAA PAPER 87-2410] p 724 A87-49081

Numerical aerodynamics using large computers p 809 A87-53562

A numerical study of flow in gas-turbine combustor [AIAA PAPER 87-2132] p 832 A87-53986

Numerical simulation by finite element methods of transonic unsteady flow of compressible viscous fluids modeled by the Navier-Stokes equations [ETN-87-99048] p 389 N87-18797

NUMERICAL INTEGRATION

The application of computational fluid dynamics to aircraft design [AIAA PAPER 86-2651] p 147 A87-17902

A comparison and validation of methods for solving the Euler equations [ONERA, TP NO. 1986-183] p 215 A87-21082

Improved integration procedures for flight simulation [DGLR PAPER 86-154] p 545 A87-36773

Selective elimination - A fast solver for real-time unsteady integration of the Euler equations in explicit formulation [DGLR PAPER 86-163] p 486 A87-36791

A piloted simulator evaluation of a ground-based 4D descent advisor algorithm [AIAA PAPER 87-2522] p 715 A87-50525

NUMERICAL STABILITY

The influence of the choice of computational parameters on the results of three-dimensional potential methods --- transonic flow [ONERA, TP NO. 1986-169] p 214 A87-21069

NUMERICAL WEATHER FORECASTING

Advances in numerical weather prediction for aviation forecasting p 615 A87-42483

Determination of wind velocity and direction in the lower part of the atmospheric boundary layer on the basis of ground data p 854 A87-53969

OBLIQUE SHOCK WAVES

On the occurrence of regular reflection of shocks in concave corner flows p 10 A87-12586

Investigation of two-dimensional shock-wave/boundary-layer interactions p 552 A87-39528

- Morphology of a standing oblique detonation wave --- for hypersonic airbreathing propulsion [AIAA PAPER 87-1785] p 695 A87-45201
- Progress toward shock enhancement of supersonic combustion processes [AIAA PAPER 87-1880] p 690 A87-45274
- Standing oblique detonation wave engine performance [AIAA PAPER 87-2002] p 670 A87-45347
- A method for producing oblique shock-bow shock interaction in double-driver shock tunnel p 837 A87-51968
- Supersonic vortex rings - Visualization techniques p 807 A87-52360

OBLIQUE WINGS

- Aeroelastic control of oblique-wing aircraft p 108 A87-13341
- Decoupling control synthesis for an oblique-wing aircraft p 108 A87-13342
- The aerodynamic design of oblique wing aircraft [AIAA PAPER 86-2624] p 147 A87-17883
- Supersonic flutter of aeroelastically tailored oblique wings [AIAA PAPER 87-0734] p 445 A87-33661
- Model-following output feedback controller for oblique-wing aircraft p 772 A87-50491
- In-flight total forces, moments and static aeroelastic characteristics of an oblique-wing research airplane [NASA-TP-2224] p 36 A87-10103
- Flight-determined aerodynamic derivatives of the AD-1 oblique-wing research airplane [NASA-TP-2222] p 36 A87-10871
- Flight characteristics of the AD-1 oblique-wing research aircraft [NASA-TP-2223] p 373 A87-18570

OBSERVABILITY (SYSTEMS)

- Sensor failure detection in flight control systems using deterministic observers p 114 A87-16195
- Comparison of two techniques of I.F.D. based on a non-linear stochastic model of an aircraft --- Instrument Fault Detection p 114 A87-16196
- Analytical redundancy through nonlinear observers --- of aircraft motion p 114 A87-16197
- Non-linear observer for estimating aircraft state from flight test data p 372 A87-29558
- Parameter-insensitive technique for aircraft sensor fault analysis p 793 A87-47806
- Performance monitoring of sensors in high reliable flight control systems using deterministic observers p 32 A87-10087

OBSERVATION

- Sources and observers in motion. II - Acoustic radiation from a small rigid body in arbitrary motion. III - Acoustic radiation from non-compact rigid bodies moving at high speed p 59 A87-12995

OBSERVATION AIRCRAFT

- The Mars airplane p 303 A87-17753
- Evaluation of the OV-10 aircraft with the YT53-L-704 engine and rudder augmentation system, phase 2 [AD-A180966] p 752 A87-26900

OBSTACLE AVOIDANCE

- Near-field radar for helicopter obstacle avoidance p 365 A87-29631
- Dual frequency MM-wave radar for antitank helicopter p 389 A87-18756

OCEAN DYNAMICS

- Airborne multibeam radar altimetry --- of oceans p 853 A87-53115

OCEAN SURFACE

- Two-color short-pulse laser altimeter measurements of ocean surface backscatter p 588 A87-39462
- Airborne multibeam radar altimetry --- of oceans p 853 A87-53115
